a. As to claims for personal injury or death, the claimant should submit a written report by the attending physician, showing the nature and extent of injury, the nature and extent of treatment, the degree of permanent disability, if any, the prognosis and the period of hospitalization, or incapacitation, attaching itemized bills for medical, hospital or burial expenses incurred. Claims for loss of time or loss of earnings should be supported by a written report from the claimant's employer showing the claimant's age, occupation, wage or salary time lost from work, whether or not a full time employee and actual period of employment by dates. If the claimant is self employed, his claim for loss of earnings must be supported by competent evidence as to the amount of earnings actually lost.

b. As to claims for damage to property which has been or can be economically repaired, the claimant should submit an itemized signed statement or estimate by a reliable, disinterested concern or, if payment has been made, an itemized signed receipt evidencing payment.

c. As to claims for damage to property which was not economically reparable, or if the property was lost or destroyed, the claimant should submit a statement substantiating his averments as to the value of the property, both before and after the incident. Such statement should be by a disinterested competent person, preferably a reputable dealer or official familiar with the type of property damaged.

Any further instructions or information necessary in the preparation of your claim will be furnished, upon request, by the office indicated on the front of this form.

[SEAL]

JOHN A. KLEIN,
Major General, USA, The Adjutant General.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix C—Public Land Orders

[Public Land Order 1233]

ALASKA

WITHDRAWING PUBLIC LANDS FOR USE OF BUREAU OF INDIAN AFFAIRS FOR SCHOOL PURPOSES AND REINDEER RESERVE; PARTIALLY REVOKING EXECUTIVE ORDER OF JANUARY 7, 1903, AND EXECUTIVE ORDER NO. 2141 OF FEBRUARY 27, 1915

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, and the act of May 31, 1938 (52 Stat. 593; 48 U. S. C. 353a) it is ordered as follows:

1. Subject to valid existing rights, the following-described public lands in Alaska are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining and the mineral-leasing laws, and reserved under the jurisdiction of the Department of the Interior for use by the Bureau of Indian Affairs:

PORT GRAHAM

[59648]

FOR SCHOOL PURPOSES

Beginning at a point located S. 66° 30' W., 480 feet from witness corner located 25 links south of Corner No. 1 of U. S. Survey 510, thence South 156 feet to a point; West 35 feet to a point; South 844 feet to a point; West 310 feet to a point; North 700 feet to a point; East 75 feet to a point; North 300 feet to a point; East 270 feet to the point of beginning.

The tract described contains 6.7 acres.

KOTSEBUE

[63537]

AS A REINDEER RESERVE

That part of U. S. Survey No. 2407 described as follows:

Beginning at a point on line 1–6 U. S. S. 2407 from which Corner No. 1 bears S. 45° 55' E., 158.80 feet, thence N. 45° 55' W., 117.40 feet along line 1–6, U. S. S. 2407; S. 44° 05' W., 135 feet; S. 45° 55' E., 117.40 feet; N. 44° 05' E., 135 feet to point of beginning.

The tract described contains 0.36 acre.

GAMBELL

[59035]

FOR SCHOOL PURPOSES

Beginning at a point from which the northwest corner of the Alaska Native Service school building bears Easterly, 40 feet and Southerly 11 feet 8 inches, in approximate latitude 63° 47′ N., longitude 171° 45′ W., thence Southerly, 106 feet; Northerly, 100 feet; Southeasterly, 50 feet; Southwesterly, 100 feet; Southeasterly, 58 feet; Northeasterly, 100 feet; Southeasterly, 62.5 feet; Southwesterly, 100 feet; Northwesterly, 62.5 feet; Southwesterly, 144 feet; Southeasterly, 40 feet; Southwesterly, 94 feet; Northwesterly, 40 feet; Northeasterly, 86 feet; Northwesterly, 224 feet; Northeasterly, 152 feet to point of beginning.

The tract described contains 1.10 acres.

TYONEK

[62914]

FOR SCHOOL PURPOSES

Beginning at a point in the Native Village of Tyonek from which M. C. 12, U. S. Survey 1865 bears southwesterly 551 feet, in approximate latitude 61°04′ N., longitude 151°10′ W., thence N. 65° W., 250 feet; N. 25° E., 250 feet; S. 65° E., 250 feet; S. 25° W., 250 feet to point of beginning.

The tract described contains 1.4 acres.

2. The Executive order of January 7, 1903, reserving St. Lawrence Island for use as a reindeer station is hereby revoked so far as it affects the above described lands at Gambell.

3. Executive Order No. 2141 of February 27, 1915, reserving certain public lands in Alaska for use of the United States Bureau of Education is hereby revoked so far as it affects the above described lands at Tyonek.

OCTOBER 4, 1955.

FRED G. AANDAHL,
Assistant Secretary of the Interior.

[F. R. Doc. 55-8147; Filed, Oct. 7, 1955; 8:45 a. m.]

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Rules Amdt. 2-8]

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

TABLE OF FREQUENCY ALLOCATIONS

In the matter of revision of Part 2 of the Commission's rules to effect certain editorial changes therein; Rules Amdt. 2-8.

1. The Commission having under consideration the desirability of making certain editorial changes in Part 2 of its rules; and

2. It appearing that, on November 20, 1953, the Commission adopted an order which, in part, amended Part 2 of its rules to reflect a change in station designation from "Interim FM relay station" to "FM inter-city relay station" in footnote NG14 to § 2.104 (a) (5); and

3. It further appearing that this change is not reflected in the latest reprinting of Part 2 of the Commission's rules, as revised effective July 1, 1955; and

4. It further appearing that the amendments adopted herein are editorial in nature, and therefore, prior publication of Notice of Proposed Rule Making under the provisions of section 4 of the Administrative Procedure Act is unnecessary, and the amendments may become effective immediately; and

5. It further appearing that the amendments adopted herein are issued pursuant to authority contained in sections 4 (i) and 5 (d) (1) and 303 (r) of the Communications Act of 1934, as amended, and section 0.341 of the Commission's Statement of Organization, Delegations of Authority and Other Information;

6. *It is ordered,* This 4th day of October 1955, that, effective immediately, Part 2 of the Commission's rules is amended as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 5, 48 Stat. 1068, as amended, sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 155, 303)

Released: October 4, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

Amend Part 2, § 2.104 (a) (5) in the following particulars:

Delete the present wording of footnote NG14 and substitute the following in lieu thereof:

NG14 FM inter-city relay stations may be authorized to use the band 940–952 Mc on the condition that harmful interference will not be caused to stations operating in accordance with the table of frequency allocations.

[F. R. Doc. 55-8181; Filed, Oct. 7, 1955; 8:50 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

[9 CFR Part 78]

BRUCELLOSIS IN DOMESTIC ANIMALS

INTERSTATE MOVEMENT OF ANIMALS

On April 8, 1954, there was published in the FEDERAL REGISTER (19 F. R. 2020), a notice with respect to proposed amendments of Subchapter C, Chapter I, Title 9, Code of Federal Regulations. After consideration of all data, views, and arguments submitted in connection with the proposed amendments, it has been determined that certain modifications should be made therein. Notice is hereby given in accordance with section 4 of the Administrative Procedure Act (5 U. S. C. 1003) that, pursuant to the provisions of sections 6, 7, and 13 of the Act of May 29, 1884, as amended (21 U. S. C. 114a–1, 115, 117), sections 1 and 2 of the Act of February 2, 1903, as amended (21 U. S. C. 111–113, 120), and section 3 of the Act of March 3, 1905, as amended (21 U. S. C. 125), it is now proposed that the following regulations be issued in lieu of the provisions of paragraph (h) of § 78.1 and Subpart C as set forth in the notice published on April 8, 1954:

§ 78.1 *Definitions.* As used in this part, the following terms shall have the meanings set forth in this section except as otherwise clearly indicated.

• • • • • •

(h) *Official vaccinate.* A bovine animal vaccinated against brucellosis from 4 through 8 months of age, or a bovine animal of a beef breed in a range or semirange area, vaccinated against brucellosis from 4 to 12 months of age, under the supervision of a Federal or State veterinary official, with a vaccine approved by the Animal Disease Eradication Branch, Agricultural Research Service, United States Department of Agriculture; permanently identified as such a vaccinate; and reported at the time of vaccination to the appropriate State and Federal Agency cooperating in the eradication of brucellosis.

• • • • • •

SUBPART C—RESTRICTIONS ON MOVEMENT OF CATTLE BECAUSE OF BRUCELLOSIS

§ 78.10 *General restriction.* Cattle may not be moved interstate except as provided in the regulations in this subpart.

§ 78.11 *Designation of modified certified brucellosis-free areas.* The following States, counties, and municipalities, are hereby designated as modified certified brucellosis-free areas:

(a) The State of Maine;
(b) The State of New Hampshire;
(c) The State of North Carolina;
(d) Cherokee, Douglas, Gilmer, Gwinnett, Murray, Paulding, and Pickens Counties, in Georgia;
(e) Benewah, Bonner, Boundary, Clearwater, Kootenai, Latah, Lewis, and Shoshone Counties, in Idaho;
(f) Crawford County, in Indiana;
(g) Garrett, Somerset, Wicomico, and Worcester Counties, in Maryland;
(h) Alger, Antrim, Arenac, Baraga, Benzie, Charlevoix, Cheboygan, Chippewa, Delta, Dickinson, Emmet, Gogebic, Grand Traverse, Houghton, Iron, Kalkaska, Keweenaw, Leelanau, Luce, Mackinac, Marquette, Menominee, Ogemaw, Ontonagon, Otsego, Presque Isle, Schoolcraft, and Wexford Counties, in Michigan;
(i) Aitkin, Becker, Beltrami, Big Stone, Blue Earth, Brown, Carlton, Cass, Chippewa, Clay, Clearwater, Cook, Cottonwood, Hubbard, Itasca, Kittson, Koochiching, Lake, Lake of the Woods, Mahnomen, Marshall, Norman, Pennington, Polk, Pope, Red Lake, Redwood, Renville, Rosseau, St. Louis, Stevens, Traverse, Wasena, Wilkin, Wright, and Yellow Medicine Counties, in Minnesota;
(j) Beaverhead, Carbon, Cascade, Daniels, Lake, Mineral, Missoula, and Sheridan Counties, in Montana;
(k) Hillmore and York Counties, in Nebraska;

(l) Cape May County, in New Jersey;
(m) Benson, Burke, Cavalier, Divide, Eddy, Grand Forks, Griggs, Mercer, Morton, Montrail, Nelson, Oliver, Pembina, Pierce, Ramsey, Renville, Rolette, Trail, Walsh, Ward, Wells, and Williams Counties, in North Dakota;
(n) Clatsop, Coos, Curry, and Josephine Counties, in Oregon;
(o) Allegheny, Armstrong, Blair, Butler, Cameron, Carbon, Clarion, Clearfield, Clinton, Columbia, Dauphin, Elk, Forest, Greene, Huntingdon, Indiana, Juniata, Jefferson, Lawrence, Luzerne, Lycoming, McKean, Schuylkill, Somerset, Sullivan, Venango, Washington, and Wyoming Counties, in Pennsylvania;
(p) Allendale, Bamberg, Barnwell, Cherokee, Chester, Marlboro, Union, and York Counties, in South Carolina;
(q) Benton, Chelan, Clark, Columbia, Cowletz, Douglas, Franklin, Island, Kitsap, Garfield, Grant, Grays Harbor, Lewis, Lincoln, Pacific, Pend Orellle, San Juan, Skamania, Spokane, Stevens, and Wahkiakum Counties, in Washington;
(r) Barbour, Cabell, Doddridge, Fayette, Grant, Greenbrier, Harrison, Marshall, Mineral, Ohio, Raleigh, Roane, Upshur, and Wetzel Counties, in West Virginia;
(s) Vilas County, in Wisconsin; and
(t) Adjuntas, Aguadilla, Aguada, Aguas, Buenas, Anasco, Arroyo, Barceloneta, Camuy, Ciales, Cidra, Corozal, Guanico, Guayanilla, Hatillo, Isabela, Jayuya, Lares, Las Marias, Manati, Maricao, Maunabo, Moca, Morovia, Orocovis, Patillas, Penuelas, Quebradillas, Rincon, Rio Grande, San German, Sabana Grande, San Juan, Santa Isabel, Trujillo Alto, Utuado, Vega Alta, Vega Baja, Villalba, and Vauco Municipalities, in Puerto Rico.

§ 78.12 *Movement of brucellosis reactor cattle.* Cattle which have reacted to a test recognized by the Secretary of Agriculture for brucellosis may be moved interstate in accordance with the regulations in Subpart B of this part.

§ 78.13 *Movement of other cattle.*[1] (a) Steers and spayed heifers and calves under 8 months of age, not known to be affected with brucellosis, may be moved interstate without restriction under this subpart.

(b) Cattle of the following classes, not known to be affected with brucellosis, may be moved interstate without other restriction under this subpart, if accompanied by a certificate issued by a Federal or State inspector or an accredited veterinarian showing the identification tag, tattoo, or registration number of each animal and showing the specific class in which the cattle fall:

(1) Cattle originating in certified brucellosis-free herds;

(2) Cattle originating in the modified certified brucellosis-free areas specified in § 78.11;

(3) Cattle which are official vaccinates under 30 months of age at the time of interstate movement;

(4) Cattle from herds, under Federal-State supervision for the control of brucellosis, in which all animals over eight months of age, except official vaccinates under thirty months of age, have been subjected to a blood agglutination test, recognized by the Secretary of Agriculture for brucellosis, under the supervision of a Federal or State veterinary official, within 90 days prior to the date of movement interstate and found negative; the individual animals to be moved interstate having been subjected to another such test at least 30 days from the date of the previous herd test and within 30 days prior to the date of movement interstate and found negative;

(5) Cattle which are official vaccinates over 30 months of age at the time of movement interstate; which have been subjected to a test, recognized by the Secretary of Agriculture for brucellosis, under the supervision of a Federal or State veterinary official, after 30 months of age and found not to disclose a reaction exceeding incomplete agglutination in a dilution of 1:100; and which are moved interstate under a permit from the State of destination to be maintained in quarantine in such State until they are negative to another such test or until their death by slaughter or from natural causes;

(6) Bulls and female cattle of the beef type moved interstate, for feeding or grazing purposes only, to a State which has laws, rules, or regulations, which provide for the segregation or quarantine of such cattle brought into the State, and under a permit from such State of destination; and

(7) Cattle which have been subjected to a blood agglutination test, recognized by the Secretary of Agriculture for brucellosis, under the supervision of a Federal or State veterinary official, within 30 days prior to the date of movement interstate and found negative, and which are moved interstate under a permit from the State of destination to be maintained in quarantine in such State separate from other cattle until they are negative to another such test administered not less than 30 days after the date of the interstate movement or until their death by slaughter or from natural causes.

(c) Cattle of the following classes, not known to be affected with brucellosis, may be moved interstate under this subpart, except into the modified certified brucellosis-free areas specified in § 78.11, if accompanied by a certificate issued by a Federal or State inspector or an accredited veterinarian showing the identification tag number, tattoo, or registration number of each animal and showing the specific class in which the cattle fall:

(1) Cattle which have been subjected to a test, recognized by the Secretary of Agriculture for brucellosis, under the supervision of a Federal or State veterinary official, within 30 days prior to the date of movement interstate and found negative;

(2) Cattle which are official vaccinates over 30 months of age at the time of movement interstate; which have been subjected to a test, recognized by the Secretary of Agriculture for brucellosis, under the supervision of a Federal or State veterinary official, within 30 days prior to the interstate movement and found not to disclose a reaction exceeding incomplete agglutination in a dilution of 1:100; and

(3) Bulls and female cattle of the beef type moved interstate, for feeding or grazing purposes only, to a State which has laws, rules, or regulations, which provide for the segregation or quarantine of such cattle brought into the State.

(d) Cattle, not known to be affected with brucellosis, may be moved interstate under this subpart for immediate slaughter direct to a slaughtering establishment operating under the provisions of the Meat Inspection Act of March 4, 1907 (34 Stat. 1260; 21 U. S. C. 71 et seq.), or to a slaughtering establishment operating under State meat inspection, or to a slaughtering establishment designated by the proper State livestock sanitary official of the State of destination with approval of the Branch, if accompanied by a waybill or similar document, or a certificate signed by the owner or shipper of the cattle, stating: (1) The destination of the animals; (2) the purpose for which they are to be moved; (3) the number of animals covered by the waybill or similar document or certificate; (4) the point from which the animals are moved interstate; and (5) the address of such owner or shipper.

(e) Cattle, not known to be affected with brucellosis, may be moved interstate direct to a public stockyard without compliance with the foregoing provisions of this section, if accompanied by a waybill or similar document, or a certificate signed by the owner or shipper of the cattle, stating: (1) The destination of the animals; (2) the purposes for which they are to be moved; (3) the number of animals covered by the waybill or similar document or certificate; (4) the point from which the animals are moved interstate; and (5) the address of such owner or shipper: *Provided, however,* That the movement of said cattle from such public stockyard to another destination must comply with the provisions of this part the same as if the cattle had been originally consigned direct from the point of origin to such destination.

(f) The Chief of the Animal Disease Eradication Branch, Agricultural Research Service, may authorize the movement, not otherwise authorized by this section, of cattle, not known to have reacted to a test for brucellosis, under such conditions as he may prescribe to prevent the spread of brucellosis.

Any person who wishes to submit written data, views, or arguments concerning the foregoing proposed amendments may do so by filing them with the Chief, Animal Disease Eradication Branch, Agricultural Research Service, United States Department of Agriculture, Washington, D. C., within 30 days after publication hereof in the FEDERAL REGISTER.

Done at Washington, D. C., this 4th day of October 1955.

[SEAL] M. R. CLARKSON,
Acting Administrator,
Agricultural Research Service.

[F. R. Doc. 55-8153; Filed, Oct. 7, 1955; 8:46 a. m.]

[1] In each instance, the regulations of the State of destination should be consulted before interstate shipments are made.

DEPARTMENT OF COMMERCE

Federal Maritime Board

[46 CFR Ch. II]

[Docket No. 783]

PACIFIC COAST EUROPEAN TRADE; SECTION 19 INVESTIGATION

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that pursuant to section 19, Merchant Marine Act, 1920 (46 U. S. C. 876), section 22, Shipping Act, 1916 (46 U. S. C. 821), and sections 204 and 214, Merchant Marine Act, 1936 (46 U. S. C. 1114 and 1124), the Federal Maritime Board has instituted an investigation and proposes the following rule:

(a) That every common carrier by water in the trade from ports of the Pacific Coast of the United States to ports of Great Britain, Northern Ireland, Irish Free State, Continental Europe, Baltic, and Scandinavian ports, and ports in the Mediterranean Sea, shall file with the Federal Maritime Board and keep open to public inspection schedules showing all the rates and charges for or in connection with the transportation of property in such trade, or any part thereof, except cargo loaded and carried in bulk without mark or count. The schedules filed as aforesaid by any such common carrier by water shall show the point from and to which each such rate or charge applies; and shall contain all the rules and regulations which in anywise change, affect, or determine any part of the aggregate of such aforesaid rates or charges.

(b) No change shall be made in any such rate or charge which has been filed and made public as required by this section except by the filing and publishing as aforesaid of a new schedule or schedules which shall become effective not earlier than the date of filing thereof with the Board, and such schedule or schedules shall plainly show the changes proposed to be made in the schedule or schedules then in force, and the time when the rates, fares, charges as changed are to become effective.

(c) Provided further, the Board upon good cause shown may exempt from the requirements of this section the rates and charges applicable to specific commodities.

(d) That every such common carrier file with the Federal Maritime Board a statement of the rate of brokerage paid by it wherever brokerage is paid by the said carrier in connection with the movement of cargo in the said trade. Thereafter, a memorandum of any change in or departure from such rate of brokerage shall be filed within thirty days from the date such change becomes effective or such departure takes place.

Any person having an interest in the proceeding and grounds for intervention within the meaning of the Board's Rules of Practice and Procedure, Rule 5 (n) (46 CFR 201.74), may intervene in the said proceeding of investigation by compliance with the said Rule, and notifying the Secretary, Federal Maritime Board, Washington 25, D. C., within fifteen (15) days from the date of publication hereof in the FEDERAL REGISTER, of an intention to do so.

By order of the Board.

Dated: October 6, 1955.

[SEAL] A. J. WILLIAMS, *Secretary.*

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 11308, 11438; FCC 55M-841]

UMATILLA BROADCASTING ENTERPRISES ET AL.

ORDER SETTING PRE-HEARING CONFERENCE

In re applications of John M. Carroll tr/as Umatilla Broadcasting Enterprises, Pendleton, Oregon, Docket No. 11308, File No. BP-9510; Robert R. Moore tr/as Othello Broadcasting Company, Othello, Washington, Docket No. 11438, File No. BP-9723; for construction permits.

The Hearing Examiner having under consideration a petition filed September 30, 1955, by Umatilla Broadcasting Enterprises, requesting that a pre-hearing conference in the above-entitled proceeding be held on October 14, 1955;

It appearing that the hearing in such proceeding is now scheduled to commence on November 14, 1955; that section 1.841 of the Commission's Rules requires the exchange of exhibits by the parties at least 20 days prior to the hearing date; and that a conference in accordance with section 1.813 of the Commission's rules is necessary in order to expedite the hearing by consideration, among other things, of the following matters:

(1) The necessity or desirability of simplification, clarification, amplification or limitation of the issues;

(2) Admissions of fact and of documents which will avoid unnecessary proof;

(3) The possibility of stipulating with respect to facts;

(4) Assumptions regarding the availability of equipment;

(5) Need, if any, for depositions;

(6) The numbering of exhibits;

(7) The order of offer of proof with relationship to docket number;

(8) The date for the exchange of exhibits between the applicants, as required by Section 1.841, *supra;* and

(9) Such other matters as will be conducive to an expeditious conduct of the hearing;

It further appearing that public interest requires an early consideration of such petition and good cause has been shown for the grant thereof;

It is ordered, This 4th day of October 1955, that the petition be and it is hereby granted; and that a pre-hearing conference for the purposes hereinabove described be held in the above-entitled proceeding at the offices of this Commission, at 10:00 a. m., on Friday, October 14, 1955, and the parties are ordered and directed to appear, either in person or by counsel, at such conference prepared to discuss the matters enumerated above.

NORTHERN INDIANA BROADCASTERS, INC., ET AL

ORDER CONTINUING HEARING

In re applications of Northern Indiana Broadcasters, Incorporated, South Bend, Indiana, Docket No. 11474, File No. BP-9602; St. Joseph Valley Broadcasting Corporation (WJVA), Mishawaka, Indiana, Docket No. 11475, File No. BP-9778; for construction permits.

The Hearing Examiner having under consideration a motion filed September 29, 1955, by St. Joseph Valley Broadcasting Corporation (WJVA) requesting a continuance of the pre-hearing conference scheduled for September 30, 1955, as well as the hearing scheduled to begin on October 12, 1955; and

It appearing that St. Joseph Valley Broadcasting Corporation (WJVA) has been engaged in negotiations which, if consummated, may result in their withdrawal from this proceeding, a fact which would render a comparative hearing unnecessary; and

It appearing that counsel for all the parties have consented to the requested continuance, and for immediate consideration of the motion and good cause for continuance having been shown;

It is ordered, This the 29th day of September 1955, that the motion for the continuance of the pre-hearing conference and of the hearing be and the same is hereby granted; the pre-hearing conference and the start of the hearing are continued to a date which will be designated later by the Hearing Examiner.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS, *Secretary.*

STATEMENT OF ORGANIZATION, DELEGATIONS OF AUTHORITY AND OTHER INFORMATION

MISCELLANEOUS AMENDMENTS

The Commission having under consideration the desirability of making certain editorial changes in section 0.49 of its Statement of Organization, Delegations of Authority and Other Information; and

It appearing that the amendments adopted herein are editorial in nature, and, therefore, prior publication of Notice of Proposed Rule Making under the provisions of section 4 of the Administrative Procedure Act is unnecessary, and the amendments may become effective immediately; and

It further appearing that the amendments adopted herein are issued pursuant to authority contained in sections 4 (i), 5 (d) (1) and 303 (r) of the Communications Act of 1934, as amended, and paragraph 0.341 of the Commission's Statement of Organization, Delegations of Authority and Other Information.

It is ordered, This 5th day of October 1955, that, effective immediately, section 0.49 of the Commission's Statement of Organization, Delegations of Authority and Other Information is amended as set forth below.

Released: October 5, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS, *Secretary.*

1. In section 0.49 (a), change the heading of the last column in the table to read "Counties" and change the addresses of the following Radio District Offices:

Radio District	*and New Address*
5	(Delete "Ship Office: Room 200, U. S. Post Office Bldg., Newport News, Va." listed under Radio District No. 5.)
6	718 Atlanta National Bldg., 50 Whitehall St. SW., Atlanta 3, Ga. Sub-Office: P. O. Box 77, 214 Post Office Bldg., Savannah, Ga.
8	608 Federal Bldg., 600 South St., New Orleans 12, La. Sub-Office: 419 U. S. Courthouse and Customhouse, Mobile 10, Ala.
9	(NOTE: Main office address unchanged—change Sub-Office address to read as follows:) Sub-Office: P. O. Box 1527 (329 Post Office Bldg., 300 Willow St.), Beaumont, Tex.
10	P. O. Box 5238, 500 U. S. Terminal Annex Bldg., (Houston and Jackson Sts.), Dallas 22, Tex.
12	323-A Customhouse (555 Battery St.), San Francisco 26, Calif.
14	802 Federal Office Bldg., (First Ave. and Marion), Seattle 4, Wash.
15	521 New Customhouse (19th between California and Stout Sts.), Denver 2, Colo.
17	3100 Federal Office Bldg., 911 Walnut St., Kansas City 6E, Mo.
18	626 U. S. Courthouse, 219 South Clark St., Chicago 4, Ill.
23	(NOTE: Main office address unchanged—change Sub-Office address to read as follows:) Sub-Office: P. O. Box 1421, 5 Shattuck Bldg., Juneau, Alaska.
24	Briggs Bldg., 22d and E Sts. NW., Washington 25, D. C.

2. In section 0.49 (b) change the address of Regional Office No. 2 to read as follows:

Region No. 2, 718 Atlanta National Bldg., 50 Whitehall St. SW., Atlanta 3, Ga.—To include: District Nos. 6, 7, 8, 9, 10, and 22.

3. In section 0.49 (c) change the address of the Powder Springs, Ga., Pri-

mary Monitoring Station to read as follows:

Federal Communications Commission, P. O. Box 4, Powder Springs, Ga.

FEDERAL POWER COMMISSION

[Docket No. G-3175]

PHILLIPS PETROLEUM CO.

ORDER PERMITTING SUBSTITUTION OF REVISED RATE SCHEDULE AND SUSPENDING PROPOSED RATES AND CHARGES IN SUBSTITUTED RATE SCHEDULE

Phillips Petroleum Company (Applicant), on August 31, 1955, tendered for filing a contract, designated as Applicant's FPC Gas Rate Schedule No. 262, in substitution and in lieu of Applicant's FPC Gas Rate Schedule No. 26, including Supplements 1 through 11 thereto, and in lieu of Applicant's FPC Gas Rate Schedule No. 28 and Supplements 1 through 4 thereto, all pertaining to sales and deliveries of gas by Applicant to Northern Natural Gas Company.

Applicant's FPC Gas Rate Schedule No. 262 consists of a new contract to supersede Applicant's FPC Gas Rate Schedules Nos. 26 and 28 and effective October 1, 1955, which is the expiration date proposed in the present contracts. Applicant's FPC Gas Rate Schedule No. 262 makes no change in service but changes the rate only to the extent of making the proposed tax escalation clause applicable to all gas sold. Applicant's FPC Gas Rate Schedule No. 28 contains a tax escalation clause, whereas Applicant's FPC Gas Rate Schedule No. 26 does not contain a tax escalation clause. Applicant's FPC Gas Rate Schedule No. 262 effects an increase on that portion of gas presently sold under Applicant's FPC Gas Rate Schedule No. 26.

Applicant has requested permission of the Commission to substitute its FPC Gas Rate Schedule No. 262 in the foregoing designated docket for the previously filed Rate Schedules Nos. 26 and 28 pertaining to this same service and be made effective on October 1, 1955. The increased rates and charges proposed in the aforesaid filing of Applicant's FPC Gas Rate Schedule No. 262 have not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

This proceeding, which was instituted pursuant to Sections 4 and 15 of the Natural Gas Act for the purpose of determining the lawfulness of the increased rates and charges proposed by Applicant, has not been concluded, nor decision rendered therein.

The Commission finds:

(1) Good cause exists to permit the substitution of Applicant's FPC Gas Rate Schedule No. 262 filed on August 31, 1955, in lieu of Applicant's FPC Gas Rate Schedule No. 26, including Supplements 1 through 11 thereto, and in lieu of Applicant's FPC Gas Rate Schedule No. 28 and Supplements 1 through 4 thereto.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the proposed changes as provided in Applicant's FPC Gas Rate Schedule No. 262 in this proceeding, and that Applicant's FPC Gas Rate Schedule No. 262 be suspended and the use thereof deferred as hereinafter ordered.

(3) It is appropriate and necessary in carrying out the provisions of the Natural Gas Act to require Applicant, as a condition to its making effective rates under suspension, to file an undertaking.

The Commission orders:

(A) Applicant's FPC Gas Rate Schedule No. 262 filed on August 31, 1955, be and it is hereby substituted in lieu of Applicant's FPC Gas Rate Schedule No. 26, including Supplements 1 through 11 thereto, and in lieu of Applicant's FPC Gas Rate Schedule No. 28 and Supplements 1 through 4 thereto.

(B) Pursuant to the authority contained in Sections 4 and 15 of the Natural Gas Act and the Commission's General Rules and Regulations (18 CFR, Chapter I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of said proposed changes in rates and charges in Applicant's FPC Gas Rate Schedule No. 262; and, pending such hearing and decision thereon, the above-designated rate schedules and supplements be and the same hereby are suspended and the use thereof deferred until October 2, 1955, and until such further time as they are made effective in the manner prescribed by the Natural Gas Act.

(C) Interested State commissions may participate as provided by sections 1.8 and 1.37 (f) of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.37 (f)).

Adopted: September 28, 1955.

Issued: October 3, 1955.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 55-8148; Filed, Oct. 7, 1955; 8:45 a. m.]

[Docket No. E-6645]

SOUTHEASTERN POWER ADMINISTRATION

NOTICE OF REQUEST FOR APPROVAL OF RATES AND CHARGES FOR SALE OF POWER BY SOUTHEASTERN POWER ADMINISTRATION

OCTOBER 3, 1955.

In the matter of United States Department of the Interior, Southeastern Power Administration, Center Hill, Dale Hollow, and Wolf Creek Projects.

Notice is hereby given that the United States Department of the Interior on behalf of the Southeastern Power Administration (SEPA), has filed with the Federal Power Commission a contract dated December 18, 1948, as amended by a supplemental agreement dated July 26, 1955, together with supporting data, covering the sale by SEPA to the Tennessee Valley Authority (TVA) of power and energy generated at the Center Hill, Dale Hollow, and Wolf Creek projects in the Cumberland River Basin in Kentucky and Tennessee. Confirmation and approval of the rates and charges contained therein is requested for a period of five years pursuant to the Flood Control Act of 1944 (58 Stat. 887). The subject contract as amended provides, in summary, as follows:

The total power and energy generated at the above Cumberland River Basin projects, less power and energy required by the United States Army Corps of Engineers in connection with operation of the projects, shall be delivered at the project sites to TVA. The projects will be operated in accordance with a separate operating agreement between TVA and the Army.

As compensation for the power and energy delivered to it, TVA shall make a basic annual payment of $3,950,000, subject to adjustment for variations in the average unregulated flow of water into Wolf Creek reservoir for each year ending June 30. The annual payment shall be increased $560,000 for each 750 cubic feet per second or fraction thereof by which such flow exceeds 9,250 cubic feet per second, or decreased $560,000 for each 500 cubic feet per second or fraction thereof by which such flow is less than 8,500 cubic feet per second; provided, that the adjusted annual payment shall not be less than $1,710,000, nor more than $6,190,000.

Payments shall be made in monthly installments of $150,000 during the months from July through December of each year, and in accordance with computed amounts, based upon estimated average stream flow as provided in the agreement, during the months from January through June. In the event that the sum of the monthly installments at the end of the fiscal year exceeds the applicable annual charge, the excess shall be credited against installments due the following fiscal year.

Anyone desiring to make representation with respect to the foregoing should submit the same on or before October 25, 1955, to the Federal Power Commission, Washington 25, D. C. The proposed rates and charges are on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY, *Secretary.*

[Docket No. G-3908, etc.]

LIVEZEY GAS CORP. ET AL.

NOTICE OF APPLICATIONS AND DATE OF HEARING

OCTOBER 3, 1955.

In the matters of Livezey Gas Corporation, Docket No. G-3908; Oil Participations, Inc., Docket Nos. G-4363 and G-4364; Doham Gas Company, Docket No. G-4883; Brady Gas Company, Docket No. G-6011; Fez Gas Company, Docket No. G-6012; Sweetland Land and Mineral Company; Docket Nos. G-6013, G-6015, G-6017; Delhi Oil Company, Docket No. G-6306; Delta Gulf Drilling Company, Docket Nos. G-6331, G-6332, G-6333, and G-6334.

Take notice that there have been filed with the Federal Power Commission applications for certificates of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the respective Applicants to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the respective applications, which are on file with the Commission and open for public inspection.

The above-named Applicants produce and sell natural gas for transportation in interstate commerce for resale, as indicated below:

Docket No.	Location of field	Purchaser
G-3908	West Sinton and South Sinton Fields, San Patricio County, Tex.	Tennessee Gas Transmission Co.
G-4363	Corpus Channel Field, Nueces County, Tex.	Do.
G-4364	Spartan Field, San Patricio County, Tex.	Do.
G-4883	McClelland District, Doddridge County, W. Va.	Manufacturers Light & Heat Co.
G-6011	Laurel Hill District, Lincoln County, W. Va.	United Fuel Gas Co.
G-6012	Fez Creek Field, Lincoln County, W. Va.	Do.
G-6013	Mud River Field, Lincoln County, W. Va.	Do.
G-6015	Harts Creek District, Lincoln County, W. Va.	Do.
G-6017	Laurel Hill District, Lincoln County, W. Va.	Do.
G-6306	North Magnolia City Field, Jim Wells County, Tex.	Tennessee Gas Transmission Co.
G-6331	Carthage Field, Panola County, Tex.	Texas Gas Transmission Corp.
G-6332	Driftwood Field, Elk and Cameron Counties, Pa.	Sylvania Corp.
G-6333	Driftwood Field, Cameron County, Pa.	Manufacturers Light & Heat Co.
G-6334	Wharton Field, Porter County, Pa.	United Natural Gas Co.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 9, 1955, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before October 20, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

[Docket No. G-8839 etc.]

NATURAL GAS PIPELINE CO. OF AMERICA ET AL.

NOTICE OF APPLICATIONS AND DATE OF HEARING

OCTOBER 4, 1955.

In the matters of Natural Gas Pipeline Company of America, Docket No. G-8839; Texas Company, Docket No. G-8820; Phillips Petroleum Company, Docket No. G-8876.

Natural Gas Pipeline Company of America, and hereinafter referred to as Natural, a Delaware corporation with its principal place of business at 20 North Wacker Drive, Chicago 6, Illinois, filed, on May 2, 1955, its application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing to construct and operate gas facilities as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

(1) To construct and operate a side-tap connection to Natural's main transmission line system in the Southwest corner of Beaver County, Oklahoma.

(a) In addition to (1) above, Natural is to construct a gathering system in Texas and Beaver Counties, Oklahoma, consisting of 2.07 miles of 4-inch, 4.60 miles of 6-inch, and 5.05 miles of 8-inch pipelines.

(b) To construct wellhead meters and alcohol injection equipment.

(2) To construct and operate a side-tap connection in Hansford County, Texas, on Natural's Sinclair-Lips gas field lateral line approximately one mile southeast of the point of connection of the Sinclair-Lips line with Natural's main transmission system.

(a) In addition to (2) above, Natural is to construct gathering facilities consisting of approximately 0.9 mile of 4-inch pipeline.

(b) One wellhead meter and alcohol injection equipment.

The purpose of the above project is to enable Natural to take deliveries, into its main transmission system, of additional supplies of gas under new purchase contracts with Texas Company, United Producing Company, Inc., Rip C. Underwood, Cities Service Gas Development Company (formerly American Gas Production Company), and Phillips Petroleum Company.

The Texas Company and Phillips Petroleum Company (hereinafter referred to as Texas and Phillips respectively), are Delaware corporations with their principal places of business located at Houston, Texas, and Bartlesville, Oklahoma, respectively. Texas

filed its application on April 28, 1955, and Phillips filed on May 9, 1955, both filings were for certificates of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, authorizing Texas and Phillips to render service as hereinafter described, subject to the jurisdiction of the Commission all as more fully represented in their respective application which are on file with the Commission and open for public inspection.

Texas and Phillips propose to produce natural gas from the Cambrick field, Texas County, Oklahoma, and the Blakemore area, Hansford County, Texas, which will be sold to Natural for transportation in interstate commerce for resale.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 3, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before October 22, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[Rev. S. O. 562, Taylor's I. C. C. Order 59]

INDIANA HARBOR BELT RAILROAD CO.

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Charles W. Taylor, Agent, the Indiana Harbor Belt Railroad Company, because of work stoppage, is unable to transport traffic routed over and to points on its lines.

It is ordered, That:

(a) Rerouting traffic: The Indiana Harbor Belt Railroad Company, and its connections, is hereby authorized to divert or reroute such traffic over any available route to expedite the movement, regardless of routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroads desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: The carriers rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipments on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 12:01 p. m., September 30, 1955.

(g) Expiration date: This order shall expire at 11:59 p. m., October 31, 1955, unless otherwise modified, changed, suspended or annulled.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., September 30, 1955.

NOTICE OF INVESTIGATION

Investigation instituted. Upon application of the Stevens Linen Associates, Inc., Dudley, Massachusetts, received August 29, 1955, the United States Tariff Commission, on the 4th day of October, 1955, under the authority of section 7 of the Trade Agreements Extension Act of 1951, as amended, and section 332 of the Tariff Act of 1930, instituted an investigation to determine whether toweling, of flax, hemp, or ramie, or of which these substances or any of them is the component material of chief value, classifiable under paragraph 1010 of the Tariff Act of 1930, is, as a result in whole or in part of the duty or other customs treatment reflecting the concessions granted thereon under the General Agreement on Tariffs and Trade, being imported into the United States in such increased quantities, either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products.

Inspection of application. The application filed in this case is available for public inspection at the office of the Secretary, United States Tariff Commission, 8th and E Streets, NW., Washington, D. C., and in the New York office of the Tariff Commission, located in Room 437 of the Custom House, where it may be read and copied by persons interested.

I certify that the above investigation was instituted by the Tariff Commission on the 4th day of October 1955.

Issued: October 5, 1955.

SECURITIES AND EXCHANGE COMMISSION

[File No. 812-958]

STATE BOND AND MORTGAGE CO.

NOTICE OF FILING OF APPLICATION REGARDING THRIFT PLAN FOR EMPLOYEES

OCTOBER 3, 1955.

Notice is hereby given that State Bond and Mortgage Company (the "Company"), a registered investment company, has filed an application pursuant to Rule N-17D-1 of the rules and regulations promulgated under the Investment Company Act of 1940 ("Act") for an order under the rule granting such application in respect of a Thrift Plan for Employees.

The application describes the operation of the Plan in summary as follows:

The Plan is to be voluntary as to those persons in the employ of the company at the time of its adoption and compulsory as to persons becoming employees thereafter.

The allocation of the Company contribution among the various members will vary in direct proportion to the amount of their voluntary contribution, which contribution may be either 1 percent, 2 percent, 3 percent, 4 percent, or 5 percent of the employees' annual compensation. The Company contribution for each fiscal year of the Plan is to be the smallest of the following sums: (1) 50 percent of member contributions during the year; (2) 5 percent of annual net profit of the company; or (3) the excess of net profit over 15 percent of capital funds as of the beginning of the year. No stock of the Company may be held in the Plan. The Plan will be administered by a Trustee.

Company contributions will vest in the employee upon termination of employment (other than by retirement or death) only to the following extent depending upon years of employment:

	Percent
Less than five	0
Five to eight	25
Eight to ten	50
Ten or more	100

The Plan also provides that there shall be no vesting in case of discharge for proven fraud or dishonesty. Any forfeitures will vest in the other members of the Plan and will not inure to the benefit of the Company.

The Plan has been formally approved by the Board of Directors, but will not be submitted to security holders of the Company. It will be put into operation retroactively for the current fiscal year of the Company upon its clearance and approval by the Internal Revenue Service and by the Securities and Exchange Commission.

Rule N-17D-1 provides, among other things, that it shall be unlawful, with certain exceptions not applicable here, for an affiliated person of a registered investment or of any company controlled by any such registered investment company to participate in, or effect any transaction in connection with any bonus, profit-sharing or pension plan in which any such registered investment company or controlled company is a participant unless an application regarding such plan has been granted by the Commission, prior to the adoption thereof if not submitted to stockholders for approval.

Since affiliated persons of the Company would be eligible to participate, the Thrift Plan is subject to the provisions of Rule N-17D-1.

Notice is further given that any interested person may, not later than October 14, 1955, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the Rules and Regulations promulgated under the Act.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

AMERICAN NATURAL GAS CO. AND MICHIGAN CONSOLIDATED GAS CO.

ORDER REGARDING ISSUANCE OF COMMON STOCK BY PUBLIC UTILITY COMPANY AND ACQUISITION THEREOF BY PARENT COMPANY

OCTOBER 4, 1955.

American Natural Gas Company ("American Natural"), a registered holding company, and Michigan Consolidated Gas Company ("Michigan Consolidated"), a gas utility subsidiary company of American Natural, having filed with this Commission an application-declaration, and an amendment thereto, pursuant to sections 6 (a) (2), 6 (b), 7 (e), 9, 10, and 12 (f) of the Public Utility Holding Company Act of 1935 ("Act") and Rule U-43 promulgated thereunder regarding certain proposed transactions which are summarized as follows:

UNIVERSITY OF MICHIGAN

Michigan Consolidated proposes to issue and sell to American Natural, and American Natural proposes to buy from Michigan Consolidated, 930,000 shares of Michigan Consolidated common stock, par value $14 per share, for a cash consideration of $13,020,000, which is equal to the aggregate par value thereof. American Natural proposes to pay such purchase price out of the proceeds obtained from its recent offering of common stock. Michigan Consolidated will use the net proceeds from the sale of Michigan Consolidated common stock for the payment of construction costs and to reimburse its treasury for funds so used.

Michigan Consolidated further proposes to amend its Articles of Incorporation so as to increase its authorized shares of common stock from 4,500,000 shares (of which 4,475,000 shares are presently outstanding) to 5,500,000 shares.

The transactions proposed to be consummated by Michigan Consolidated have been expressly authorized by the Michigan Public Service Commission, the State commission of the State in which Michigan Consolidated is organized and doing business. The application-declaration states that no other commission, other than the Securities and Exchange Commission, has jurisdiction over any of the proposed transactions.

Fees and expenses in connection with the foregoing transactions are estimated as follows:

Federal original issue tax	$14,322
Michigan Public Service Commission fee	13,020
Michigan Corporation and Securities Commission fee	7,000
Counsel fees:	
Sidley, Austin, Burgess & Smith	750
Dyer, Meek, Ruegsegger & Bullard	750
American Natural Gas Service Company, services at cost	500
Miscellaneous telephone, telegraph, duplicating, traveling and other expenses and contingency fund	658
Total	37,000

Notice of the filing of the application-declaration having been duly given in the manner prescribed by Rule U-23, and no hearing having been ordered by or requested of the Commission; and the Commission finding that the applicable provisions of the Act and the Rules thereunder are satisfied; that the fees and expenses set forth above are not unreasonable; and that the application-declaration, as amended, should be granted and permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the Act, that said application-declaration, as amended, be and the same hereby is granted and permitted to become effective forthwith, subject to the terms and conditions contained in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

TITLE 6—AGRICULTURAL CREDIT

Chapter III—Farmers Home Administration, Department of Agriculture

Subchapter F—Security Servicing and Liquidations

[FHA Instruction 465.8]

PART 372—FARM OWNERSHIP LOANS

SUBPART C—ASSIGNMENT OF INSURED MORTGAGES

ASSIGNMENT OF AN INSURED MORTGAGE BY PRIVATE HOLDER TO PRIVATE BUYER

Section 372.125, Title 6, Code of Federal Regulations (20 F. R. 1047) is revised to prescribe the use of a new form and reads as follows:

§ 372.125 *Assignment of an insured mortgage by a private holder to a private buyer.* (a) Upon receipt of notice from a holder of intention to assign an insured mortgage, the Director, Finance Office, will send any accumulated payments on the loan to the holder and furnish the holder with appropriate information on how to complete the assignment. The Director, Finance Office, also will send the holder a copy of Form FHA–756, "Notice and Acknowledgment of Sale," a statement of account, and assignment forms, if needed.

(b) If the Director, Finance Office, receives information that an insured mortgage has already been assigned, he will inform the holder of any additional steps that are needed to complete the assignment and request the holder to furnish a completed Form FHA–756.

(c) Upon receipt of a properly completed Form FHA–756 and a conformed copy of the instrument of assignment, if a separate instrument of assignment was used, the Director, Finance Office, will execute, and date the acknowledgment section of Form FHA–756. He will send a facsimile of the completed Form FHA–756 to the assignee, to the assignor, and to the County Supervisor, and retain the original. Upon execution of the acknowledgment of notice of sale on Form FHA–756, the assignment shall be binding upon the Government from the date of the assignment, provided a valid assignment of the note and mortgage has been effected, and provided further that, except when the mortgaged property is located in Colorado, Missouri, Puerto Rico, Tennessee, or Virginia, the assignment has been properly recorded in the land records. The Government assumes no liability for any payment transmitted to the assignor prior to the date of the acknowledgment of notice of sale on Form FHA–756.

(d) The Finance Office will transmit payments to the assignee after the date of the acknowledgment on Form FHA–756 and will notify the assignor and assignee of any payments processed to the assignor subsequent to the date of the assignment or the statement of account, whichever is earlier, and prior to the date of the acknowledgment. The Farmers Home Administration will assume no liability for failure to give such notice and for adjustment of these payments between the assignor and assignee.

PART 475—1955 EMERGENCY FEED PROGRAM

This bulletin contains regulations pertaining to the 1955 Emergency Feed Program and is issued by the Commodity Credit Corporation.

Sec.
475.15 General statement.
475.16 Administration.
475.17 Definitions.
475.18 Farmer's Purchase Orders.
475.19 Dealer's Certificates.
475.20 Presentation of Dealer's Certificates to CCC.
475.21 Limitations on rights of transferees.
475.22 Suspension of Feed Dealer's Agreements.
475.23 Extension of time.
475.24 Termination.

AUTHORITY: §§ 475.15 to 475.24 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 407, 63 Stat. 1055, sec. 301, Pub. Law 480, 83d Cong.; 7 U. S. C. 1427.

§ 475.15 *General statement.* The program provided for in this part will be carried out by the United States Department of Agriculture through the Commodity Credit Corporation and the Commodity Stabilization Service (hereinafter called CCC and CSS, respectively) and is a part of the 1955 Emergency Feed Program formulated by the Department of Agriculture. The eligibility of applicants for assistance under the 1955 Emergency Feed Program will be determined by the Farmers Home Administration pursuant to the regulations contained in §§ 388.1 to 388.6 of this title (19 F. R. 5199). The regulations contained in this part state the terms and conditions (a) under which approved applicants in designated areas will be issued Farmer's Purchase Orders which may be tendered to dealers as part payment for designated surplus feed grains for use as livestock feed, (b) under which dealers who accept Farmer's Purchase Orders will be issued Dealer's Certificates, and (c) under which Dealer's Certificates may be presented to CCC for the purchase of available designated CCC-owned surplus feed grains.

§ 475.16 *Administration.* The program provided for in this part will be administered by CSS, under the general direction and supervision of the Executive Vice President, CCC, and in the field will be carried out by the Agricultural Stabilization and Conservation State Committees and Agricultural Stabilization and Conservation County Committees (hereinafter called State and county ASC Committees) and CSS commodity offices. Each county ASC committee will authorize in writing one or more representatives to approve and issue documents on behalf of the county ASC committee. State and county ASC committees and CSS commodity offices, and representatives and employees of any of the above, do not have authority to modify or waive any of the provisions of this part or any amendments or supplements hereto.

§ 475.17 *Definitions.* Unless the context or subject matter otherwise requires, as used in all forms and documents in connection herewith, except as otherwise specifically defined in the "Feed Dealer's Agreement—1955 Emergency Feed Program," and as used in this Part the following terms shall have the following meanings:

(a) "Designated surplus feed grains" means barley, corn, grain sorghums and oats. The term "corn" includes ear corn. At the time of issuance of a Farmer's Purchase Order, the county ASC committee will enter on such Purchase Order the conversion factor to be used to convert the quantity of ear corn, which may be delivered, to shelled corn. Such conversion factor shall be the one used in the locality, as determined by the county ASC committee, except that if the county ASC committee determines that no recognized conversion factor is used in the locality or that the conversion factor used is out of line with prevailing conditions, the conversion factor entered on the Purchase Order shall be that established by the State ASC Committee.

(b) "Approved mixed feed" means Mixed Feed A which must contain at least 75 percent by weight of designated surplus feed grain(s) or Mixed Feed B which must contain at least 60 percent by weight of designated surplus feed grain(s), or both. Prior to delivery to farmers, bags containing approved mixed feeds must be appropriately labeled to show substantially as follows, depending on the type of approved mixed feed involved:

(1) "Mixed Feed A—containing at least 75 percent by weight of designated surplus feed grain(s)," or

(2) "Mixed Feed B—containing at least 60 percent by weight of designated surplus feed grain(s)."

(c) "Designated CCC-owned surplus feed grains" means barley, corn, grain sorghums and oats.

(d) "Farmer" means a farmer, rancher or stockman whose application (Form FHA 937) for assistance under the 1955 Emergency Feed Program has been approved by a Farmers Home Administration county committee.

(e) "Dealer" means any person (including but not limited to an individual, partnership, corporation, cooperative, or other business entity) engaged in selling designated surplus feed grains or approved mixed feeds.

(f) "CCC storage sites" means CCC-owned structures, CCC-leased facilities, and those facilities operated by CCC under right of entry. (Such structures and facilities are commonly called CCC binsites.)

§ 475.18 *Farmer's Purchase Order—*(a) *Area.* Farmer's Purchase Orders (hereinafter refered to as "Purchase Orders") will be issued only in areas which have been designated by the President under Public Law 875, 81st Congress, as areas of major disaster, and also by the Secretary of Agriculture under Public Law 38, 81st Congress, as amended by Public Law 115, 83d Congress, and section 301 of Public Law 480, 83d Congress, as areas in which assistance of the nature provided for herein is needed.

(b) *Issuance.* (1) The original of an application (Form FHA 937) approved by a Farmers Home Administration county committee pursuant to the regulations contained in 19 F. R. 5199 (§§ 388.1 to 388.6 of this title) shall be presented by the farmer named therein at the office of the county ASC committee of the county in which such application was filed within fifteen calendar days after the date of approval shown on such application.

(2) After receipt of such an approved application within the time specified in subparagraph (1) of this paragraph, the county ASC committee will issue a Purchase Order to the farmer named in the application. At the farmer's request, the county ASC committee may issue two or more Purchase Orders based on one application. If only one Purchase Order is issued with respect to an application, the Purchase Order will show the number of hundredweight of designated surplus feed grains for which the application was approved. If more than one Purchase Order is issued with respect to an application, the total number of hundredweight of designated surplus feed grains shown on such Purchase Orders shall not exceed the number of hundredweight for which the application was approved. If a Purchase Order has been issued and the farmer requests two or more Purchase Orders in lieu thereof, the first Purchase Order must be returned to the county ASC committee for voiding prior to the issuance of the new Purchase Orders. In the event that more than one Purchase Order is issued with respect to one application, all such Purchase Orders shall show the same date of issuance as the first Purchase Order, and, as required by paragraph (c) (2) of this section, all such Purchase Orders will be invalid unless transferred by the farmer to the dealer within 60 calendar days after the date of issuance shown thereon. It shall be solely the responsibility of the farmer to request the issuance of additional Purchase Orders with respect to an application in sufficient time to permit transfer by him of such Purchase Orders within the required period of time.

(c) *Transfer by farmer.* (1) A Purchase Order may be transferred by the farmer to whom issued to a dealer as part payment for designated surplus feed grains or approved mixed feed. A dealer to whom a Purchase Order is transferred is required, in order to obtain a Dealer's Certificate based thereon, to accept such Purchase Order as part payment to the full extent of the value thereof, as specified in paragraph (d) of this section, for each hundredweight of designated surplus feed grains and approved mixed feed purchased and delivered, up to the maximum value of the Purchase Order.

(2) The date of transfer of a Purchase Order by a farmer to a dealer shall not be later than 60 calendar days after the date of issuance shown on the Purchase Order. The date of transfer shall be that date on which the farmer signs section IV of the Purchase Order which must be on or after the purchase by and actual delivery to the farmer of all of the designated surplus feed grains or approved mixed feed specified in section III of the Purchase Order.

(d) *Value.* The maximum total value of any Purchase Order shall be an amount equal to the number of hundredweight shown in section I of the Purchase Order multiplied by $1.00. Subject to such maximum, the actual total value of a Purchase Order shall be determined by the number of hundredweight of des-

ignated surplus feed grains or approved mixed feed purchased by and delivered to the farmer. The value for each hundredweight of designated surplus feed grains or approved mixed feed purchased by and delivered to the farmer shall be as follows:

(1) Designated surplus feed grains (excluding ear corn and approved mixed feed): $1.00.

(2) Ear corn; the conversion factor (e. g. if the conversion factor is 70 percent, the value shall be $0.70).

(3) Mixed Feed A; $0.75.

(4) Mixed Feed B; $0.60.

Mixed feeds containing less than sixty percent of designated surplus feed grain(s) shall have no value whatsoever. Dealers shall not be entitled to a Dealer's Certificate based in whole or part on any such mix and in the event that a Dealer's Certificate is issued based on any such mix the dealer shall not be entitled to any credit or allowance whatsoever for the quantity of designated surplus feed grain(s) contained in any such mix. Approved mixed feed may contain more than the minimum percentage of designated surplus feed grains, but approved mixed feed will in no event be valued at other than the amounts stated in subparagraphs (3) and (4) of this paragraph.

§ 475.19 *Dealer's Certificates*—(a) *Basis of issuance.* A dealer may present a Purchase Order transferred to him by a farmer to the county ASC committee which issued it and obtain a Dealer's Certificate based thereon, provided he has entered into a "Feed Dealer's Agreement—1955 Emergency Feed Program" signed on behalf of CCC by an authorized representative of the county ASC committee which issued the Purchase Order, and is entitled under the terms and conditions of such Agreement to present such Purchase Order. (A dealer must enter into a separate "Feed Dealer's Agreement—1955 Emergency Feed Program" for each county in which he presents Purchase Orders). A dealer who accepts the transfer of a Purchase Order prior to the time that he enters into an applicable "Feed Dealer's Agreement—1955 Emergency Feed Program" does so at his own risk and CCC shall not be liable to the dealer in any way for refusal to enter into such an Agreement with the Dealer. There must be compliance with the following conditions with respect to each Purchase Order presented:

(1) The date of transfer of a Purchase Order from a farmer to the dealer must have been within 60 calendar days after the date of issuance shown on the Purchase Order. (The date of transfer shall be determined as specified in § 475.18 (c) (2)).

(2) A Purchase Order must be received at the office of the county ASC committee which issued it within 30 calendar days after the date of transfer of the Purchase Order from the farmer to the dealer.

(3) The dealer must have sold and actually delivered to the farmer the quantity of designated surplus feed grains or approved mixed feed listed in the table set forth in section III of the Purchase Order. In the event that any designated surplus feed grains were delivered trackside to the farmer named in the Purchase Order, the sales price to the farmer must have been no more than the cost of such feed grains to the dealer plus a handling margin no larger than that which has been determined by the State ASC Committee to be reasonable. (Information as to the handling margin determined by the State ASC Committee to be reasonable will be available at the county ASC committee office and should be obtained from such office).

(4) The dealer must have accepted the transfer of the Purchase Order in part payment for the quantity of designated surplus feed grains or approved mixed feed listed in the table set forth in section III of the Purchase Order to the full extent of the value, as specified in § 475.18 (d) for each hundredweight so listed up to the maximum value of the Purchase Order.

(5) The dealer must submit to the county ASC office with each Purchase Order copies of sales tickets, sales slips, or invoices, for the designated surplus feed grains or approved mixed feed delivered to the farmer, showing the kinds and quantities of grains or feeds actually delivered, the date of such deliveries, the price per hundredweight charged the farmer, and the credit allowed on the purchase price for the Purchase Order.

(6) Sections III and IV of the Purchase Order must have been duly executed.

(b) *Face value.* The face value of a Dealer's Certificate shall be an amount equal to the actual total value of the Purchase Order or Purchase Orders which form the basis for issuance of the Dealer's Certificate.

(c) *Transfer.* Dealer's Certificates may be transferred by the dealer to any supplier, broker, agent or other person, and may subsequently be transferred from person to person. The transfer of Dealer's Certificates shall be made by endorsement on the reverse side thereof, giving the address of the endorser, and date of the endorsement.

§ 475.20 *Presentation of Dealer's Certificates to CCC.* Subject to all of the provisions of this part, valid Dealer's Certificates, if presented to CCC by the holder within 120 calendar days after the date of issuance, will be accepted at face value for the purchase of available designated CCC-owned surplus feed grains.

(a) *Where to purchase.* Holders of Dealer's Certificates (1) may purchase carload lots of designated CCC-owned surplus feed grains from any CSS Commodity Office which has such surplus feed grains available for sale, or (2) may purchase carload lots or less of designated CCC-owned surplus feed grains stored in CCC storage sites from any county ASC committee located in a designated disaster area, as defined in § 475.18 (a), which has such surplus feed grains available for sale. Information as to CSS Commodity Offices having such surplus feed grains available for sale may be obtained from the following CSS Commodity Offices: Chicago CSS Commodity Office, 623 South Wabash Avenue, Chicago 5, Illinois; Dallas CSS Commodity Office, 3306 Main Street, Dallas 26, Texas; Kansas City CSS Commodity Office, Federal Office Bldg., 911 Walnut Street, Kansas City 6, Missouri; Minneapolis CSS Commodity Office, 1006 West Lake Street, Minneapolis 8, Minnesota; and Portland CSS Commodity Office, 1218 Southwest Washington Street, Portland 5, Oregon. Information as to the location of CCC storage sites within the State in the designated disaster area may be obtained from the State ASC Committee. Information as to the availability of designated CCC-owned surplus feed grains in CCC storage sites may be obtained from the county ASC committee of the county in which the CCC storage site is located.

(b) *Purchase from CSS Commodity Office*—(1) *Offer to purchase.* In making an offer to purchase, the holder of a Dealer's Certificate must specify the class, grade, quality and quantity of the designated CCC-owned surplus feed grain which he desires to purchase, together with the destination and the consignee to whom such feed grain is to be shipped.

(2) *Confirmation of sale.* The CSS Commodity Office will accept or reject the offer within 72 hours from the time the offer is received (such acceptance or rejection will be by collect wire if requested): *Provided,* That any acceptance shall be conditioned on the signing and return by the purchaser to the CSS Commodity Office of a confirmation of sale issued by such office containing terms and conditions applicable to the sale. Such confirmation of sale, together with the provisions contained in this Section shall constitute the sales contract.

(3) *Price.* All sales will be made by the CSS Commodity Office in carload lots at the market price, as determined by CCC, "in store" or f. o. b. car at point determined by CCC.

(4) *Election to cancel.* CCC shall have the election to cancel the sales contract if Dealer's Certificates of a value at least equal to the value of the designated CCC-owned surplus feed grains contracted for are not received by the CSS Commodity Office within 10 calendar days after the date of its issuance of the confirmation of sale.

(5) *Delivery.* (i) Delivery of designated surplus CCC-owned feed grains will be made "in store" or f. o. b. cars at point determined by CCC. In advance of delivery of any such feed grains, the purchaser must submit valid Dealer's Certificates of face value sufficient to cover the sales value of the feed grain purchased. CCC does not guarantee delivery within any specified period of time following receipt of the Dealer's Certificate(s) but will exercise all available means to secure prompt delivery. The purchaser, if he so requests, will be advised by collect wire of cars being shipped.

(ii) The basis for determination of the quality and quantity of feed grains delivered shall be stated in the confirmation of sale issued by the CSS Commodity Office.

(6) *Basis of settlement*—(i) *At end of each sale.* (a) In the event that the Dealer's Certificates submitted to CCC have a total face value which is less than the value of the feed grains delivered, because of over-delivery or other cause, the purchaser shall pay to CCC, in cash, the difference between the total face value of the Certificates submitted and the value of the feed grain delivered, calculated on the basis of the specified sales price.

(b) In the event the purchaser submits Dealer's Certificates having a total face value in excess of the value of the feed grain delivered, the purchaser will be issued a new Dealer's Certificate for the excess value.

(c) To avoid administrative costs of issuing Dealer's Certificates in small denominations, Dealer's Certificates for excess value of $3 or less will be issued only upon request. Deficiencies of $3 or less owed to CCC may be disregarded unless demand for payment is made by CCC.

(ii) *At termination of program.* Upon termination of the 1955 Emergency Feed Program, any holder of valid Dealer's Certificates having a total face value insufficient to purchase a carload lot of any of the available designated CCC-owned surplus feed grains may (a) purchase from a CSS Commodity Office a carload lot of any such feed grain and submit to the CSS Commodity Office the Dealer's Certificates held by him, plus an amount of cash sufficient to cover the remainder of the price of the carload of feed grain purchased, or (b) purchase from a CSS Commodity Office for delivery "in store" a quantity of available designated CCC-owned surplus feed grains equal in price to the face value of such Dealer's Certificates and submit such Dealer's Certificates to the CSS Commodity Office in payment therefor. The foregoing provisions of this section shall be applicable to such purchases except to the extent that such provisions are inconsistent with this subdivision.

(c) *Purchase from County ASC Committees.* Sales of available designated CCC-owned surplus feed grain from CCC storage sites will be made under the direction of the county ASC committee responsible for the operation of the storage site.

(1) *Price.* All sales from CCC storage sites will be made in carload lots or less at the local market price as determined by the county ASC committee on the date of sale.

(2) *Time of payment.* Payment shall be made by presentation to the county ASC committee, prior to delivery of the feed grain, of valid Dealer's Certificates of an aggregate face value equal to the total price of the feed grain purchased. The provisions of paragraph (b) (6) (i) of this section shall be applicable to sales from CCC storage sites.

§ 475.21 *Limitation on rights of transferees.* The right of a transferee in due course of a Dealer's Certificate to present the Dealer's Certificate and obtain designated CCC-owned surplus feed grains shall not be limited except as follows:

(a) A Dealer's Certificate will not be accepted if presented later than 120 calendar days after the date of issuance.

(b) In the event that, after issuance of a Dealer's Certificate, there has been any alteration increasing the face value thereof, such Certificate will be accepted only for the face value thereof at the time of issuance.[1]

(c) Any transferee who acquires the Dealer's Certificate knowing or having good cause to know that the dealer who originally obtained such Certificate from the county ASC committee did so on the basis of false or fraudulent certifications or representations shall not be entitled to present the Dealer's Certificate. A transferee of a Dealer's Certificate who acquires such Certificate without knowing or having good cause to know of any such false or fraudulent certifications or representations shall be entitled to present the Certificate and obtain designated CCC-owned surplus feed grains.

§ 475.22 *Suspension of Feed Dealer's Agreements.* CCC may suspend the right of a dealer who has entered into Feed Dealer's Agreement or Agreements to participate in the 1955 Emergency Feed Program by notification in writing to the dealer if it has good reason to believe that the dealer has failed to comply with the provisions of such Agreement(s) with respect to any Purchase Order presented by him to the county ASC committees. Any such suspension shall be effective as to all Feed Dealer's Agreements entered into by the dealer under the 1955 Emergency Feed Program. In the event of suspension, the dealer shall not be entitled to present any Purchase Order to any county ASC committee unless and until such suspension is removed by CCC. In the event a suspension is removed only in part, the dealer shall be entitled to present only Purchase Orders covered by such removal of suspension.

§ 475.23 *Extension of time.* The executive Vice President, CCC, may when he deems it to be in the best interests of the program, extend the time within which a Purchase Order or Dealer's Certificate may be transferred or presented and he may, under such terms and conditions as he determines will serve the best interests of the program, delegate to others the authority to extend the time within which a purchase order or Dealer's Certificate may be transferred or presented.

§ 475.24 *Termination.* The program provided for in this part may be terminated at any time upon issuance of public notice in the FEDERAL REGISTER. Such termination shall not apply with respect to any Purchase Order or Dealer's Certificate issued prior to the effective date of such termination.

Issued this 5th day of October 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

TITLE 7—AGRICULTURE

Chapter III—Agricultural Research Service, Department of Agriculture

[P. P. C. 612, Revised, Supp. 5]

PART 301—DOMESTIC QUARANTINE NOTICES

SUBPART—KHAPRA BEETLE

ADMINISTRATIVE INSTRUCTIONS DESIGNATING PREMISES AS REGULATED AREAS UNDER REGULATIONS SUPPLEMENTAL TO KHAPRA BEETLE QUARANTINE

Pursuant to § 301.76-2 of the regulations supplemental to the Khapra Beetle

Quarantine (7 CFR Supp. 301.76–2, 20 F. R. 1012) under sections 8 and 9 of the Plant Quarantine Act of 1912, as amended (7 U. S. C. 161), revised administrative instructions issued as 7 CFR Supp. 301.76–2a (20 F. R. 4361), effective June 22, 1955, as amended effective July 13, 1955, July 30, 1955, August 17, 1955, and September 17, 1955 (20 F. R. 4979, 5447, 5961, 6992), are hereby further amended in the following respects:

(a) The designation as regulated areas of the following premises, included in the list contained in such instructions, is hereby revoked, and the reference to such premises in the list is hereby deleted, it having been determined by the Chief of the Plant Pest Control Branch that adequate sanitation measures have been practiced for a sufficient length of time to eradicate the khapra beetle in and upon such premises:

ARIZONA

Neal Collins Ranch, Thirteenth and one-half Street, Yuma.

CALIFORNIA

Giesby Bros. Grain & Milling Co., 148 East Olive Avenue, Monrovia.

Sumner Peck Ranch Co., Inc., Highway 33, 12 miles south of Mendota, Mendota.

Wattenbarger Feed & Hardware Store, 2521 East California Avenue, Bakersfield.

(b) The following premises are added to the list, contained in such instructions, of warehouses, mills, and other premises in which infestations of the khapra beetle have been determined to exist. Such premises are thereby designated as regulated areas within the meaning of said quarantine and regulations:

ARIZONA

Arizona Flour Mills, Tempe.
Box O Ranch, P. O. Box 424, Coolidge.
Grubbs Hatchery, P. O. Box 1806, Yuma.
Henry Leivas Farm, Route 1, Box 48–B, Parker.
Arthur McCoy Property, Route 1, Box 754, Yuma.
Pablo Ortiz Property, 220 Water Street, Yuma.
R. F. Richter Feed Store, Box 51, Parker.
Vita-Gro Feed Store, 155 West Main Street, Mesa.

CALIFORNIA

W. Denewiler Ranch, Route 1, Box 77, Blythe.
Gilbert Hayden Ranch, located at northwest corner of West 26 and F Road. Mail address P. O. Box 195, Imperial.
Holly Sugar Co. Feed Lot, located at intersection of East B and Road 34, Brawley.
D. H. Johnson Ranch, Route 2, Box 104, Imperial.
K. W. Taylor Feed Lot, located at intersection of West H and Road 9, Route 2, Box 45A, El Centro.
E. W. Thornton Ranch, Route 2, Box 2, Imperial.
Ray Willis Ranch, Route 1, Box 106, Brawley.

This amendment shall be effective October 11, 1955.

Subsequent to the fourth amendment of these instructions, effective September 17, 1955, an infestation of the khapra bettle was discovered on the Hubert Thacker property on Route 1, Box 777–A, Yuma, Arizona. Movement of regulated articles from this property was immediately stopped. Within a few days such infested premises had been fumigated and declared free of khapra beetle infestation. Accordingly, this property is not being included in this amendment.

This amendment revokes the designation as regulated areas of certain premises, it having been determined by the Chief of the Plant Pest Control Branch that adequate sanitation measures have been practiced for a sufficient length of time to eradicate the khapra beetle in and upon such premises. It also adds additional premises to the list of premises in which khapra beetle infestations have been determined to exist, and designates such premises as regulated areas under the khapra beetle quarantine and regulations.

This amendment in part imposes restrictions supplementing khapra beetle quarantine regulations already effective. It also relieves restrictions insofar as it revokes the designation of presently regulated areas. It must be made effective promptly in order to carry out the purposes of the regulations and to permit unrestricted movement of regulated products from the premises being removed from designation as regulated areas. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is found upon good cause that notice and other public procedure with respect to the foregoing amendment are impracticable and contrary to the public interest, and good cause is found for making the effective date thereof less than 30 days after publication in the FEDERAL REGISTER.

(Sec. 9, 37 Stat. 318; 7 U. S. C. 162. Interprets or applies sec. 8, 37 Stat. 318, as amended; 7 U. S. C. 161)

Done at Washington, D. C., this 6th day of October 1955.

[SEAL] E. D. BURGESS,
Acting Chief,
Plant Pest Control Branch.

[F. R. Doc. 55–8211; Filed, Oct. 10, 1955; 8:54 a. m.]

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 939—BEURRE D'ANJOU, BEURRE BOSC, WINTER NELIS, DOYENNE DU COMICE, BEURRE EASTER, AND BEURRE CLAIRGEAU PEARS GROWN IN OREGON, WASHINGTON, AND CALIFORNIA

EXPENSES AND RATE OF ASSESSMENT FOR 1955–56 FISCAL PERIOD

On September 21, 1955, notice of proposed rule making was published in the FEDERAL REGISTER (20 F. R. 7082) that consideration was being given to proposals regarding the expenses and the fixing of the rate of assessment for the 1955–56 fiscal period under Marketing Agreement No. 89, as amended, and Order No. 39, as amended (7 CFR Part 939), regulating the handling of Beurre d'Anjou, Beurre Bosc, Winter Nelis, Doyenne du Comice, Beurre Easter, and Beurre Clairgeau varieties of pears grown in Oregon, Washington, and California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice which were submitted by the Control Committee (established pursuant to said amended marketing agreement and order), it is hereby found and determined that:

§ 939.208 *Expenses and rate of assessment for the 1955–56 fiscal period*—(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Control Committee, established pursuant to the provisions of the aforesaid amended marketing agreement and order, to enable such committee to perform its functions, in accordance with the provisions thereof, during the fiscal period beginning July 1, 1955, and ending June 30, 1956, both dates inclusive, will amount to $27,915.00.

(b) *Rate of assessment.* The rate of assessment, which each handler who first handles pears shall pay as his pro rata share of the aforesaid expenses in accordance with the applicable provisions of said amended marketing agreement and order, is hereby fixed at six mills ($0.006) per standard western pear box of pears, or its equivalent of pears in other containers or in bulk.

It is hereby further found that it is impracticable and contrary to the public interest to postpone the effective time hereof until 30 days after publication in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that (1) in accordance with the provisions of said amended marketing agreement and order, the rate of assessment is applicable to all pears shipped during the 1955–56 fiscal period; (2) shipments of such pears are now being made; and (3) it is essential that the specification of the assessment rate be issued immediately so that the aforesaid assessments may be collected and thereby enable said Control Committee to perform its duties and functions in accordance with said amended marketing agreement and order.

As used herein, the terms "handler," "handles," "shipments," "shipped," "pears," "standard western pear box," and "fiscal period" shall have the same meaning as when used in said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued this 6th day of October 1955, to become effective on the date of publication hereof in the FEDERAL REGISTER.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

[F. R. Doc. 55–8191; Filed, Oct. 10, 1955; 8:47 a. m.]

PART 940—PEACHES GROWN IN THE COUNTY OF MESA IN COLORADO

EXPENSES AND FIXING RATE OF ASSESSMENT FOR 1955–56 FISCAL YEAR

Pursuant to the marketing agreement, as amended, and Order No. 40, as amended (7 CFR Part 940), regulating the handling of peaches grown in the County of Mesa in Colorado, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the proposals submitted by the Administrative Committee (established pursuant to said amended marketing agreement and order), it is hereby found and determined that:

§ 940.207 *Expenses and rate of assessment for the 1955–56 fiscal year*—(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Administrative Committee, established pursuant to the provisions of the aforesaid amended marketing agreement and order, for the maintenance and functioning of such committee, in accordance with the provisions thereof, during the fiscal year beginning March 1, 1955, and ending February 29, 1956, will amount to $10,710.00.

(b) *Rate of assessment.* The rate of assessment, which each handler who first handles peaches shall pay as his pro rata share of the aforesaid expenses in accordance with the applicable provisions of said amended marketing agreement and order is hereby fixed at $0.008554 per bushel basket of peaches, or its equivalent of peaches in other containers or in bulk, shipped by such handler during said fiscal year.

It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective time hereof until 30 days after publication in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that (1) said Administrative Committee at a meeting held on August 18, 1955, proposed an itemized budget of expenses and a rate of assessment based upon information then available as to production of peaches during the 1955 season and anticipated expenses; (2) necessary supplemental information supporting the proposed budget and rate of assessment was not made available to the Department until September 19, 1955; (3) shipments of peaches from Mesa County in Colorado have, since 12:01 a. m., M. s. t., August 26, 1955, been subject to the regulatory provisions of Peach Order 1 (§ 940.307; 20 F. R. 6211); (4) the rate of assessment is, in accordance with the amended marketing agreement and order, applicable to all fresh peaches shipped during the 1955–56 fiscal year; and (5) it is essential that the specification of the assessment be issued immediately so that the aforesaid assessments may be collected and thereby enable said Administrative Committee to perform its duties and functions in accordance with said amended marketing agreement and order.

As used herein, the terms "handler," "shipped," "peaches," and "fiscal year" shall have the same meaning as when used in said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued this 6th day of October 1955, to become effective on the date of publication hereof in the FEDERAL REGISTER.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

[F. R. Doc. 55–8192; Filed, Oct. 10, 1955; 8:47 a. m.]

PART 959—IRISH POTATOES GROWN IN MODOC AND SISKIYOU COUNTIES IN CALIFORNIA AND IN ALL COUNTIES IN OREGON, EXCEPT MALHEUR COUNTY

LIMITATION OF SHIPMENTS

§ 959.313 *Limitation of shipments*—(a) *Findings.* (1) Pursuant to Marketing Agreement No. 114, as amended, and Order No. 59, as amended (7 CFR Part 959; 20 F. R. 7068), regulating the handling of Irish potatoes grown in Modoc and Siskiyou Counties in California and in all counties in Oregon, except Malheur County, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Oregon-California Potato Committee, established pursuant to said amended marketing agreement and amended order, and upon other available information, it is hereby found that the limitation of shipments, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that (i) shipments of potatoes grown in the production area, as such term was defined in Order No. 59, as amended, prior to September 21, 1955—the effective date of the latest amendment (20 F. R. 7068) to said order—are currently subject to regulation (§ 959.312; 20 F. R. 7030) and, unless sooner modified or terminated, will so continue until November 1, 1955, (ii) more orderly marketing in the public interest, than would otherwise prevail, will be promoted by regulating the shipment of potatoes, in the manner set forth below, on and after the effective date of this section, (iii) compliance with this section will not require any special preparation on the part of handlers which cannot be completed by the effective date, (iv) the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, (v) reasonable time is permitted, under the circumstances, for such preparation, and (vi) information regarding the committee's recommendations has been made available to producers and handlers in the production area.

(b) *Order.* (1) During the period from October 12, 1955, to June 30, 1956, both dates inclusive, no handler shall ship potatoes of any variety grown in any district unless the potatoes meet the requirements (i) of the U. S. No. 1 or better grade, 2 inches minimum diameter or 4 ounces minimum weight or (ii) of the U. S. No. 2 or better grade, 6 ounces minimum weight: *Provided,* That potatoes grown in District No. 3 which meet the requirements of the U. S. No. 2 or better grade up to, but not including, the U. S. No. 1 grade, may be shipped if such potatoes are of a size not smaller than 1⅞ inches minimum diameter.

(2) During the period from October 12, 1955, to November 1, 1955, both dates inclusive, no handler shall ship any lot of potatoes of any variety if such potatoes are more than "slightly skinned" as such term is defined in the United States Standards for potatoes (§§ 51.1540 to 51.1559 of this title), which means that not more than ten percent of such potatoes have more than one-fourth of the skin missing or "feathered": *Provided,* That during such period, not to exceed 100 hundredweight of each variety of such potatoes may be handled every seven days without regard to the aforesaid skinning requirements if the handler thereof reports, prior to such handling, the name and address of the producer of such potatoes, and each shipment hereunder is handled as an identifiable entity.

(3) Pursuant to § 959.53, each handler may ship not in excess of five hundredweight of potatoes per week without regard to the limitations set forth in subparagraphs (1) and (2) of this paragraph and §§ 959.42 and 959.60.

(4) Except as otherwise provided in this section, the limitations set forth in subparagraphs (1) and (2) of this paragraph shall not be applicable to shipments of potatoes for the following purposes: (i) Grading or storing within the district where grown; (ii) certified seed potatoes; (iii) export; (iv) canning or freezing; (v) dehydration or manufacture or conversion into starch, flour, or alcohol; (vi) charity; (vii) potato chipping; (viii) livestock feed within the district where grown, except that potatoes grown in District No. 2 or District No. 4 may be shipped for livestock feed within, or to, such districts for such purpose.

(5) During the period October 12, 1955, to June 30, 1956, both dates inclusive: (i) No handler shall ship (*a*) potatoes for export which do not meet the requirements of the U. S. No. 1 or better grade, 1½ inches minimum diameter, or (*b*) potatoes for dehydration or manufacture or conversion into starch, flour, or alcohol which do not meet the requirements of 85 percent of the U. S. No. 1 or better grade, 1½ inches minimum diameter; (ii) potatoes grown in a particular district and which fail to meet applicable grade and size requirements of this section because of damage from shriveling or sprouting caused by the conditioning of the potatoes for potato chipping may be shipped for use for potato chipping; (iii) potatoes grown in a particular district and which by clipping second growth could be made to meet the aforesaid applicable grade and size requirements may be shipped for use for potato chipping without such clip-

ping; and (iv) potatoes grown in a particular district and which meet the aforesaid applicable grade and size requirements may be commingled in the handling thereof for use for potato chipping.

(6) Each handler making shipments of potatoes authorized pursuant to subparagraph (4) of this paragraph shall with respect to such shipments other than those for grading or storing and for livestock feed: (i) File an application for a Certificate of Privilege pursuant to §§ 959.130 and 959.131; (ii) pay the required assessments pursuant to § 959.42; (iii) have such shipments (except shipments of certified seed potatoes) inspected pursuant to § 959.60; and (iv) for each such shipment (except shipments of certified seed potatoes) furnish a record of shipment applicable thereto to the committee: *Provided,* That each application to ship potatoes for export, for canning or freezing, for dehydration or manufacture or conversion into starch, flour, or alcohol, for charity, or for potato chipping, shall be accompanied by a copy of the applicable bill of lading and the applicant handler's certification and the buyer's certification that the potatoes to be shipped are to be used for the purpose stated in the application: *Provided, further,* That each handler agrees, in his application to make shipments for canning or freezing, or for dehydration or manufacture or conversion into starch, flour, or alcohol, or for potato chipping, to bill each such shipment directly to the applicable processor and, if a particular shipment is not so billed, to furnish copies of the bill of lading and related diversion orders covering such shipment.

(7) Pursuant to § 959.60 (b), the inspection requirements of § 959.60 applicable to the handling of regraded, resorted, or repacked potatoes are suspended during the effective time of this § 959.313 with respect to any such potatoes which prior to the regrading, resorting, or repacking thereof, were inspected pursuant to § 959.60 (a) and the inspection certificate is valid at the time of handling such regraded, resorted or repacked potatoes.

(8) For the purpose of operations under this part, each required inspection certificate is hereby determined, pursuant to § 959.60 (c), to be valid for a period not to exceed 14 days following completion of inspection as shown on the certificate.

(9) Except as otherwise provided, the various grades and sizes referred to in this section shall have the same meaning as when used in the United States Standards for Potatoes (§§ 51.1540 to 51.1559 of this title), including the tolerances set forth therein, and the terms "District No. 1," "District No. 2," "District No. 3," "District No. 4," and all other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 114, as amended, and Order No. 59, as amended (§§ 959.1 to 959.88; 20 F. R. 7068).

(10) The provisions of § 959.312 (20 F. R. 7030) are hereby terminated October 12, 1955.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: October 7, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Docket No. AO-233-A3]

PART 963—MILK IN THE STARK COUNTY, OHIO, MARKETING AREA

ORDER AMENDING ORDER, AS AMENDED, REGULATING HANDLING

§ 963.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and each of the previously issued amendments thereto; and all of said previous finding and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Stark County, Ohio, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act.

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is hereby found and determined that good cause exists for making this amendatory order effective upon publication in the FEDERAL REGISTER. Such action is necessary in the public interest in order to reflect current marketing conditions and to facilitate the orderly marketing of milk produced for the Stark County, Ohio, marketing area. Milk needed in the market for Class I continues, during the current period of short supply, to be utilized for manufacturing purposes.

Accordingly, any further delay in the effective date of this order will seriously threaten the orderly marketing of milk in the marketing area. The provisions of this amendatory order are well known to handlers and producers, the public hearing having been convened on August 29, 1955; a recommended decision in this proceeding, to which interested parties were given an opportunity to file written exceptions, was filed on September 22, 1955; and a final decision was issued on October 6, 1955.

Reasonable time under the circumstances has been afforded persons affected to prepare for its effective date. Therefore, it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER. (See section 4 (c) Administrative Procedure Act, Public Law 404, 79th Congress, 60 Stat. 237.)

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order amending the order, as amended,) of more than 50 percent of the volume of the milk covered by this order amending the order, as amended, which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers, who during the determined representative period (July 1955), were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Stark County, Ohio, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

Amend § 963.52 by adding after paragraph (c) the following: "*Provided,* That from the effective date of this proviso through November 1955, in lieu of the "basic formula price" referred to in paragraphs (a) and (c) of this section, use the basic formula price computed pursuant to § 963.50 plus 30 cents."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 7th day of October 1955, to be effective on and after the date of publication in the FEDERAL REGISTER.

[SEAL] EARL L. BUTZ,
Assistant Secretary.

[F. R. Doc. 55-8279; Filed, Oct. 10, 1955; 9:00 a. m.]

PART 984—WALNUTS GROWN IN CALIFORNIA, OREGON, AND WASHINGTON

CONTROL PERCENTAGES

Pursuant to the provisions of Marketing Agreement No. 105, as amended, and Order No. 84, as amended (20 F. R. 5387), regulating the handling of walnuts grown in California, Oregon, and Washington, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of estimates and recommendations of the Walnut Control Board and other available information it is hereby determined that the percentages hereinafter established will tend to effectuate the declared policy of the act.

Available data indicate that the 1955–56 supply of walnuts will not be sufficient to satisfy the combined demands of the inshell and shelled markets, thus justifying a marketable percentage of 100 and a surplus percentage of zero. It appears that returns from the 1955 crop would not be improved by restricting the quantity of walnuts available for the inshell market. A relatively strong demand for shelled walnuts during the 1955–56 marketing year is indicated, and handlers should be permitted to dispose of walnuts in either the inshell or shelled outlets without restriction.

Therefore, the administrative rule is as follows:

§ 984.207 *Control percentages for walnuts during the marketing year beginning August 1, 1955.* During the marketing year beginning August 1, 1955, the following percentages shall be in effect: Merchantable free percentage, 100 percent; merchantable restricted percentage, zero percent; marketable percentage 100 percent; surplus percentage, zero percent.

It is hereby found and determined that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule making procedure, or to postpone the effective date of the aforesaid administrative rule later than the date of its publication in the FEDERAL REGISTER for the reason that (1) the percentages were recommended unanimously by the Walnut Control Board, the industry agency charged with responsibility for operating this program, and (2) the result of this action will be merely to notify handlers that no set-aside requirements will be imposed on them for the current marketing year.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 6th day of October 1955 to become effective upon publication of this document in the FEDERAL REGISTER.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division.

[F. R. Doc. 55-8214; Filed, Oct. 10, 1955; 8:56 a. m.]

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 6226]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

BRAINERD L. MELLINGER ET AL.

Subpart—*Advertising falsely or misleadingly:* § 13.55 *Demand, business, or other opportunities;* § 13.60 *Earnings;* § 13.170 *Qualities or properties of product or service;* § 13.205 *Scientific or other relevant facts.* In connection with the offering for sale, sale, and distribution of courses of instruction in reweaving in commerce, representing, directly or by implication: (1) That invisible French reweaving can be learned easily or quickly by taking respondents' course; (2) that it is easy to learn reweaving, or that one can become an expert reweaver by taking respondents' course of instruction, unless it is restricted to the patch or overlay method of reweaving and unless it is disclosed that anyone taking said course of instruction must have normal use of hands, good eyesight, with or without glasses, and is temperamentally disposed to learn reweaving; (3) that the potential earnings for persons completing respondents' course of instruction are greater than they are in fact; (4) that French reweaving is little known or is easy to perform; (5) that persons completing respondents' course can successfully operate a reweaving business by mail; (6) that reweaving is not available in small communities or that only a few reweaving establishments are operated in cities; (7) that any respondent received greater compensation for reweaving than is the fact; (8) that the issuance of certificates to persons who have completed respondents' course qualifies them as skilled reweavers; (9) that an organization known as Skil-Weavers Guild exists or that the Skil-Weavers insignia is of any validity; (10) that respondents, or any one in their behalf, provide national advertising for the benefit of persons who have completed their course; and (11) that through the efforts of respondents dry cleaners, department stores, laundries, or similar business organizations supply reweaving work to persons who have completed respondents' course, or that the amount of such reweaving work available at such sources is greater than it is in fact; prohibited.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Brainerd L. Mellinger et al. d. b. a. Skil-Weave Co. et al., Los Angeles, Calif., Docket 6226, September 22, 1955]

In the Matter of Brainerd L. Mellinger and Sibyle O. Mellinger, Copartners Trading and Doing Business as Skil-Weave Co., and Brainerd L. Mellinger, Jr., and Augustine Ott, Individuals

This proceeding was heard by Abner E. Lipscomb, hearing examiner, upon the complaint of the Commission which charged respondents with unfair and deceptive acts and practices in connection with the sale in commerce of a course of instruction designed to prepare students thereof for work as commercial reweavers, in violation of the Federal Trade Commission Act, and upon a Stipulation for Consent Order which disposed of all the issues involved in the proceeding and which was submitted to the hearing examiner pursuant to an agreement entered into by respondent with counsel supporting the complaint subsequent to the filing of respondents' answer.

By the terms of said stipulation, respondents admitted all the jurisdictional allegations set forth in the complaint; stipulated that the record in the matter might be taken as if the Commission had made findings of jurisdictional facts in accordance therewith and expressly waived a hearing before a hearing examiner or the Commission; the making of findings of fact or conclusions of law by the hearing examiner or the Commission; the filing of exceptions and oral argument before the Commission; and all further and other procedure before the hearing examiner or the Commission to which respondents might be entitled under the Federal Trade Commission Act or the rules of practice of the Commission.

Respondents agreed that the order contained in the stipulation should have the same force and effect as if made after a full hearing, presentation of evidence, and findings and conclusions thereon, respondents specifically waiving any and all right, power, or privilege to challenge or contest the validity of such order; and it was also agreed that said Stipulation for Consent Order, together with the complaint, should constitute the entire record in the proceeding, upon which the initial decision should be based; and it was further provided that the complaint in the matter might be used in construing the terms of the aforesaid order, which might be altered, modified, or set aside in the manner provided by statute for orders of the Commission; and that respondents specifically refrained from admitting or denying that they had engaged in any of the acts or practices stated in the complaint to be in violation of the law.

Thereafter said hearing examiner made his initial decision in which he set forth the aforesaid matters and that for all legal purposes respondents' answer would be regarded as withdrawn; set forth his conclusion, in view of the facts indicated and the further fact that the order embodied in the aforesaid stipulation differed from the order accompany-

ing the complaint in the matter in minor particulars only, that such order would safeguard the public interest to the same extent as could be accomplished by the issuance of an order after full hearing and all other adjudicative procedure waived in said stipulation; and accordingly, in consonance with the terms of the aforesaid stipulation, accepted the Stipulation for Consent Order submitted in the matter; found that the proceeding was in the public interest; and issued order to cease and desist.

Thereafter said initial decision, including said order, as announced and decreed by "Decision of the Commission and Order to File Report of Compliance," dated September 22, 1955, became, on said date, pursuant to § 3.21 of the Commission's rules of practice, the decision of the Commission.

Said order to cease and desist is as follows:

It is ordered, That the respondents, Brainerd L. Mellinger and Sibyl O. Mellinger (Spelled Sibyle O. Mellinger in the complaint), as individuals or as copartners trading as Skil-Weave Co., or under any other name, and respondents Brainerd L. Mellinger, Jr., and Augustine S. Ott, individually, and respondents' agents, representatives, and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution of courses of instruction in reweaving in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, directly or by implication:

1. That invisible French reweaving can be learned easily or quickly by taking respondents' course;

2. That it is easy to learn reweaving, or that one can become an expert reweaver by taking respondents' course of instruction, unless it is restricted to the patch or overlay method of reweaving and unless it is disclosed that anyone taking said course of instructions must have normal use of hands, good eyesight, with or without glasses, and is temperamentally disposed to learn reweaving;

3. That the potential earnings for persons completing respondents' course of instruction are greater than they are in fact;

4. That French reweaving is little known or is easy to perform;

5. That persons completing respondents' course can successfully operate a reweaving business by mail;

6. That reweaving is not available in small communities or that only a few reweaving establishments are operated in cities;

7. That any respondent received greater compensation for reweaving than is the fact;

8. That the issuance of certificates to persons who have completed respondents' course qualifies them as skilled reweavers;

9. That an organization known as Skil-Weavers Guild exists or that the Skil-Weavers insignia is of any validity;

10. That respondents, or any one in their behalf, provide national advertising for the benefit of persons who have completed their course;

11. That through the efforts of respondents dry cleaners, department stores, laundries or similar business organizations supply reweaving work to persons who have completed respondents' course, or that the amount of such reweaving work available at such sources is greater than it is in fact.

By said "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That respondents Brainerd L. Mellinger and Sibyl O. Mellinger (spelled Sibyle O. Mellinger in the complaint), copartners trading and doing business as Skil-Weave Co., and Brainerd L. Mellinger, Jr., and Augustine Ott, individuals, shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: September 22, 1955.

By the Commission.

[SEAL] JOHN R. HEIM,
Acting Secretary.

[F. R. Doc. 55-8199; Filed, Oct. 10, 1955; 8:49 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter I—Office of the Secretary of Defense

Subchapter B—Transportation

PART 35—LOADING RULES, TEST LOADINGS AND TEST SHIPMENTS

Sec.
35.1 Purpose.
35.2 Applicability.
35.3 General.

AUTHORITY: §§ 35.1 to 35.3 issued under sec. 202, 61 Stat. 500; 5 U. S. C. 171a.

§ 35.1 *Purpose.* This part provides uniform requirements and procedures with respect to loading rules, test loadings, and test shipments for the transportation of freight by railroads within the Continental United States.

§ 35.2 *Applicability.* The provisions of this part shall be applicable to all departments and agencies of the Department of Defense within the Continental United States.

§ 35.3 *General*—(a) *Loading rules*—(1) *Background.* The Association of American Railroads (AAR) publishes loading rules for the purpose of providing uniform, safe, and economical methods for loading shipments in or on rail cars. The rules contained in AAR Circular No. 42–B, "General Rules Covering Loading of Carload Shipments of Commodities in Closed Cars," and in all AAR pamphlets covering the loading of shipments on open top cars are mandatory; other rules contained in closed car pamphlets are recommendatory. Lists of pamphlets containing these rules may be obtained from the Secretary, Association of American Railroads, 59 East Van Buren Street, Chicago 5, Illinois.

(2) *Compliance.* (i) All activities of the military departments shall observe as minimum requirements the methods for loading, blocking, and bracing shipments in or on railroad cars as set forth in appropriate loading rules pamphlets of the Association of American Railroads, except that other methods in general use providing equivalent or superior protection may be substituted for recommendatory methods set forth in those pamphlets.

(ii) When it is considered necessary in the interest of safe transportation to prescribe particular carloading methods in a given Invitations for Bids and Request for Proposals covering the purchase of supplies, or in related transportation or packaging specifications, the required methods shall be specified in adequate detail. However, no provision shall be made in the above mentioned documents which will prevent contractors from employing, in lieu of recommendatory methods contained in AAR carloading pamphlets, commercial methods in general use which provide protection equivalent to or better than that afforded by the recommendatory methods.

(iii) If a contractor desires to use carloading methods other than those prescribed in accordance with subdivision (ii) of this subparagraph, the contractor shall be required to provide sufficient evidence to satisfy the military department concerned that such proposed substitute methods are adequate.

(3) *Proposed changes, exceptions, or additions.* (i) Any activity proposing a change, exception, or addition to loading rules of the AAR shall submit the proposal to the organizational element designated by the department concerned for coordination with the other departments.

(ii) The Department of the Army is hereby delegated the authority to act as the Department of Defense liaison agent with the Association of American Railroads for the purpose of developing new or revised loading rules.

(b) *Test loading and test shipments.* (1) Test loadings and test shipments are conducted for the purpose of determining the adequacy of shipping containers or loading, blocking, or bracing methods not specifically provided for in carriers' classifications, tariffs, loading rules, or other publications, and for developing new or revised packaging specifications or loading rules. Test loadings are conducted under simulated shipping conditions in the local area, with the car being subjected to impacts which may be encountered during actual shipping operations. Test shipments involve linehaul movements and are governed by AAR loading rules and pertinent sections of applicable tariffs and freight classifications.

(2) Any activity desiring to conduct a test loading or test shipment for the purpose of determining the adequacy of loading, blocking, or bracing methods or developing new or revised loading rules shall submit the proposal to the organizational element designated by the department concerned. If the department approves the conduct of the test, the other departments and the Director of Transportation and Communications, Office of the Assistant Secretary of Defense (Supply and Logistics) shall be informed of the time, place, and purpose of the test. If the Association of American Railroads is to participate in the test the Department of the Army shall be responsible for arranging such participation.

(3) At the conclusion of each test the sponsoring department shall make available to the other departments and to the Director of Transportation and Communications, Office of the Assistant Secretary of Defense (Supply and Logistics) the conclusions and recommendations on the test. Based on these conclusions and recommendations, the Department of the Army shall, if appropriate, act as liaison in arranging for negotiations on behalf of the sponsoring department with the Association of American Railroads for new or revised loading rules to reflect requirements developed by the test.

T. P. PIKE,
Assistant Secretary of Defense (Supply and Logistics).

OCTOBER 3, 1955.

[F. R. Doc. 55-8193; Filed, Oct. 10, 1955; 8:48 a. m.]

PART 36—REGULATION FOR TRANSPORTATION OF HOUSEHOLD GOODS BY MOTOR VAN CARRIERS

Sec.
36.1 Purpose.
36.2 Statutory authority and basic regulations.
36.3 Selection of carrier.
36.4 Distribution of traffic.
36.5 Rate adjustments.
36.6 Engagement of service.
36.7 Execution and distribution of service tender.
36.8 Execution of accessorial services certificate.
36.9 Processing of Government bills of lading and supporting papers.
36.10 Payment of transportation and accessorial charges to carrier(s) for shipments consigned to storage in transit at destination.
36.11 Household goods service tender.
36.12 Packing requirements, Appendix II.

AUTHORITY: §§ 36.1 to 36.12 issued under sec. 202, 61 Stat. 500; 5 U. S. C. 171a.

§ 36.1 *Purpose.* The purpose of this part is to establish uniform procedures to be followed by the Military Departments in the shipment at Government expense of household goods of their uniformed personnel by motor van carriers to, from, or between points in the Continental United States.

§ 36.2 *Statutory authority and basic regulations.* The statutory authority for the transportation of household goods of uniformed personnel at Government expense is contained in section 303 (c) of the Career Compensation Act of 1949 (63 Stat. 802) and the Missing Persons Act (56 Stat. 143, as amended). Basic regulations are set forth in Joint Travel Regulations promulgated jointly by the Secretaries of the following Departments: Army; Navy; Air Force; Treasury; Commerce; and Health, Education and Welfare. Chapter 8, Joint Travel Regulations, provides that shipments of household goods of uniformed personnel may be made at Government expense without regard to comparative costs; that is, by ordinary rail and/or water freight, ordinary motor freight, air or railway express, freight forwarder, or commercial van carrier, whichever, in the judgment of the shipping officer, will serve the best foreseeable interests of the Government and the owner of the property.

§ 36.3 *Selection of carrier.* The rule stated in § 36.2 with respect to comparative costs applies only to the mode or method of transportation, and does not apply to the selection of an individual carrier within a given mode. When, in the judgment of the _____ officer, commercial van service is to be used, selection of the carrier will be based primarily on the requirements of the individual shipment, the carrier's ability to perform the required services satisfactorily, and the cost of such services to the Government. In determining costs, consideration will be given to rates and charges in all applicable rate tenders and tariffs. It is not intended that relatively inconsequential differences in overall costs must be considered in the selection of carriers since the administrative costs involved could well offset any gains the Government might receive from such differentials. Shipments will be tendered only to carriers who are qualified, willing, and able to provide the service which will, in the judgment of the _____ officer, serve the best foreseeable interest of the Government and property owners. Carriers to which shipments are tendered must have proper operating rights from origin to destination or must have made satisfactory arrangements for joint carriage with other carriers properly qualified under Part II of the Interstate Commerce Act, as amended, or the laws of the State having jurisdiction of the carriage: *Provided, however*, That no carrier shall be eligible to accept shipments unless it has executed and filed with the _____ officer at origin a Household Goods Service Tender which conforms with §§ 36.11. If the destinations are beyond the territory authorized in its operating certificate, the carrier must also have filed with the _____ officer a Service Tender jointly executed by it and such other duly certificated carrier or carriers as will participate in the joint carriage of the shipments.

§ 36.4 *Distribution of traffic.* Subject to the conditions previously set forth, traffic will be equitably distributed among those qualified carriers affording the lowest over-all cost to the Government. Each _____ officer will maintain a list of qualified carriers as well as records indicating the distribution of traffic. Traffic will be distributed according to originating carrier rather than according to agent; e. g., the amount of traffic tendered to a carrier having a single agent will be equal to that received by a carrier with multiple agents in the same metropolitan area, other factors being equal. When a joint carriage arrangement is utilized, the full weight of the shipment will be charged to each participating carrier holding authority to serve the origin point.

§ 36.5 *Rate adjustments.* (a) Tenders by motor van carriers of rates or charges below those in tariffs will be in writing and will contain a provision that they may be cancelled or modified only by written notice of not less than thirty days by either party to the other, except that a shorter notice may be given by mutual agreement of the parties concerned. Such tenders will be filed in the local shipping office. No review by, or distribution to, higher authority is required for such tenders unless requested by that authority.

(b) When required, negotiations for rates or charges on volume transportation of household goods will be conducted by the headquarters of the Military Department concerned or as delegated and controlled by such headquarters.

§ 36.6 *Engagement of service.* (a) Subject to the exceptions noted in paragraph (b) of this section, Government bills of lading will be used to obtain linehaul transportation of household goods by motor van carriers and authorized accessorial services performed in connection therewith, such as packing, drayage (at origin and destination), storage in transit, unpacking at destination, etc. Such Government bills of lading will be prepared and executed in accordance with the regulations of the respective Military Departments. The name of the originating carrier will appear on the bill of lading in the space entitled "name of initial transportation company," and the names of all carriers participating in joint carriage will appear in the space entitled "via," in the order of the performance of service. In addition, the following information will be shown under "Description of Articles" on the Government bill of lading:

(1) Gross, tare, and net weights, if such information is available at the time the bill of lading is prepared;

(2) Number and date of the applicable Household Goods Service Tender;

(3) Rate(s) and charge(s) per cwt., or other definable measures applying on the shipment, if ascertainable at the time the bill of lading is prepared. If such rate(s) or charge(s) is not a normally applicable tariff rate(s) or charge(s), the word "Special" will be added in parentheses.

(4) Tariff identification or other reference for rate(s) and charge(s).

(b) Purchase orders may be issued in lieu of Government bills of lading for obtaining drayage or other types of local service.

(c) When storage in transit is desired, the bill of lading will be annotated accordingly. If the _____ officer desires such storage at origin or destination, the annotation will be "storage in transit not to exceed _____ days is authorized and will be at origin" or "storage in transit not to exceed _____ days is authorized and will be at destination," as appropriate. The name of the storage warehouse will not be specified by the _____ officer.

§ 36.7 *Execution and distribution of service tender.* The _____ officer will, upon request of a carrier, provide

the carrier two copies of the Household Goods Service Tender with Appendices I,[1] II, and III[1] thereto (reproduced locally) for execution. The original Household Goods Service Tender, after execution by the carrier, will be assigned an identifying serial number and retained in the files of the -------- officer. The duplicate copy of the Household Goods Service Tender will be retained by the carrier.

§ 36.8 *Execution of accessorial services certificate.*[1] A certificate (DD Form 619) verifying the accessorial services rendered by a motor van carrier in connection with the line-haul transportation must be executed in triplicate by the motor van carrier and the property owner, when applicable. Sufficient copies of this form will be provided the carrier by the -------- officer.

§ 36.9 *Processing of Government bills of lading and supporting papers.* (a) As soon as possible after pick-up of the household goods, the carrier will furnish the ordering activity:

(1) Two memorandum copies, numbers 6 and 8, of the applicable bill of lading showing gross, tare and net weights, signature of the carrier's agent, dates of pick-up and dispatch of shipment by the carrier, the transportation rate, and total charges accrued.

(2) One copy of the inventory list.

(3) One copy of the completed Accessorial Services Certificate, DD Form 619,[1] with the words "at origin" added after the name of the shipping activity or installation. (This is required only when accessorial services are performed and so noted on the Government bill of lading.)

(b) The carrier will furnish the property owner or his agent at the time of pick-up:

(1) Memorandum Copy No. 9 of the Government bill of lading.

(2) A copy of the inventory list.[1]

(c) The carrier will submit to the origin -------- officer for the purpose of receiving payment:

(1) Original and memorandum copy No. 5 of the accomplished bill of lading.

(2) Original and copy of Public Voucher (Standard Forms 1113 and 1113A).

(3) Original or certified copies of certificates showing gross and tare weights furnished by a certified weighmaster or obtained from a certified scale.

(4) Original of Accessorial Services Certificate (DD Form 619).[1] (This is required only when accessorial services are performed and so noted on the Government bill of lading.)

(5) Two copies of the carrier's bill of lading, freight bill, or combination form.

(d) Carriers will not be required to furnish a greater number of copies of a Government bill of lading and/or supporting papers than is established in this Part. In the event any copies of these documents (except the original Government bill of lading) are lost or destroyed, legible photostatic copies of the same size as the document reproduced, are acceptable. If the original Government bill of lading should become lost or destroyed it will be replaced by a Certificate in Lieu of lost U. S. Government Bill of Lading (Standard Form 1108).

(e) To facilitate timely payment to the carrier, the origin ------ officer will:

(1) Promptly assemble and review the voucher and supporting papers required by the disbursing procedures of the Military Department concerned; and

(2) Promptly dispatch such papers to the appropriate disbursing office.

§ 36.10 *Payment of transportation and accessorial charges to carrier(s) for shipments consigned to storage in transit at destination.*—(a) Payment of transportation charges. The payment of transportation charges from the point of shipment to the destination storage point on shipments of household goods forwarded for account of the Department of the Army, the Department of the Navy (Including the Marine Corps), or the Department of the Air Force, and stored in transit for account of the Motor Carrier and for ultimate delivery to the Consignee or owner may be made upon completion of the transportation to the carrier's destination storage point and prior to ultimate delivery to the consignee, *Provided:* The carrier hauling the shipment to the destination storage point certifies as follows over the signature of its duly authorized representative.

The household goods described on -------- (Government bill of lading No.) ---------- were placed in the carrier's storage warehouse at ---------- (Destination and will be warehouse) ---------- on ---------- (Date) permitted to remain there for a period of ---------- (Number of days) or such shorter period as may meet the consignee's or owner's demands. Carrier(s) assumes full carrier liability for the shipment during such storage and until delivery to the consignee or owner within the designated storage period.

(Signature and title of carrier's authorized representative)

(b) The certification required in paragraph (a) of this section will be made on the covering Government bill of lading except when there is not sufficient space on the bill of lading for this purpose. In the latter case the certification with reference to the appropriate Government bill of lading number may be made on plain paper and securely attached to said bill of lading.

(c) *Payment of accessorial charges.* When transportation charges have been paid as authorized in paragraph (a) of this section, the payment of accessorial charges, if any, accruing against the shipment after delivery into storage may be made upon presentation by the motor carrier of a claim therefor on Standard Form No. 1113, which should bear the same bill number as the carrier's original bill for transportation charges but carrying a letter suffix (Example—No. 12345–A). The claims for accessorial charges must identify the Government bill of lading covering the transportation service, show the basis for the accessorial charges claimed, and be supported by an additional original Accessorial Services Certificate (DD Form 619) for services rendered at destination, signed by the consignee, showing—

(1) The accessorial services ordered and furnished (space No. 11 may be left blank).

(2) Receipt of the shipment by the consignee or owner; and

(3) Loss or damage to the shipment, if any (use space captioned "Explanation or Remarks" for this information).

§ 36.11 *Household Goods Service Tender.*

To: ----------
(Name of installation or activity)

(Post office address)

Date ----------
Service Tender No. ----------
Name of Carrier ----------
Basic Federal or State Permit No. ----------
Name of Carrier ----------
Basic Federal or State Permit No. ----------

36.11–1 The undersigned motor carrier(s) (hereinafter called the carrier), representing that ---------- ---------- qualified
(It is) (They are)
under Part II of the Interstate Commerce Act and/or laws of the State of ---------- to perform van service, offer(s) the following in addition to tariff and legal requirements:

(a) All shipments will be moved from origin to destination in vehicles owned or operated by the carrier and under its direct responsibility, or in joint carriage with other duly certificated carriers. Joint carriage is defined for the purpose of this Tender as (1) the physical exchange of equipment between carriers or the receipt by one carrier of equipment from another carrier in furtherance of a through movement of traffic, at a point or points which such carriers are authorized to serve, and the simultaneous interlining of the shipment with the carrier receiving such exchanged equipment, or (2) the interline of shipments between authorized carriers.

(b) A notation will be made on the face of the pertinent Government bill of lading or purchase order indicating accessorial services performed and the charges therefor, when applicable.

(c) (1) The carrier will inform the ------- officer at origin of all shipments not dispatched at the end of the seventh calendar day after the day of pickup. It is understood that if a shipment has not been dispatched by this time the -------- officer has the option to remove the shipment from the carrier and engage another carrier to move the shipment to destination. It is further understood that if another carrier is engaged to transport the shipment, settlement of the accrued charges will be made with the initial carrier, except that no charge will be honored for drayage or storage that occurred because of the initial carrier's inability to transport the shipment.

(2) When the carrier accepts a shipment, both the origin and destination of which are within the scope of its certificated authority, but finds because of unavoidable circumstances that it is unable to physically transport the shipment, it may arrange with another duly authorized carrier at origin to perform the required service, provided the substitute carrier has a Service Tender on file with the installation or activity which tendered the shipment. In such cases the carrier which originally accepted the shipment will inform the -------- officer of the name of the carrier to whom the shipment has been transferred. The carrier which originally accepted the shipment will continue to be shown on the bill of lading as the initial carrier and will retain full common carrier liability for the shipment.

(d) All packing, materials, vans and equipment, and the loading and unloading of vans, are subject to inspection and approval by the -------- officer or his authorized representative at origin, to be performed in a manner and during such time so as not to restrict or unduly delay the carrier in the performance of its service.

(e) (1) Pickup will be made on the specific date(s) agreed upon between the hours of 7:00 a. m. and 7:00 p. m. unless the property owner gives advance approval to a change in date(s) or hour(s).

(2) Delivery to military installations will not be made on Saturdays, Sundays or holidays unless the carrier has advised the -------- officer or his representative sufficiently in advance of the arrival of the household goods and the -------- officer or his representative agrees to such delivery. Delivery to the owner's residence will not be made on Sundays or holidays unless the carrier has advised the owner or his representative sufficiently in advance of the arrival of the household goods and the owner or his representative agrees to such delivery.

(f) Vehicles used to transport household goods (including those used for intra-city hauls) will be closed furniture vans. The interiors thereof will be clean and sanitary and will be provided with a sufficient quantity of clean sanitized pads, covers, and other protective equipment to insure safe transit and delivery of the household goods. Unless specifically approved by the ordering -------- officer, the owner, or his agent, household goods will not be loaded on the tailgates of vans. When tailgate loading is approved, the load will not extend beyond the surfaces of the tailgate or above the top exterior surface of the vehicle.

(g) The tare weight of each vehicle used in the transportation of household goods will be determined by having it weighed prior to the transportation of each shipment, without the crew or any other person thereon, by a certified weighmaster or on a certified scale, and when so weighed the gasoline tank on each such vehicle will be full and the vehicle will contain only such blankets, pads, chains, dollies, hand trucks, and other equipment as is needed in the transportation of the shipment. The carrier will retain in the vehicle, subject to inspection, a weighmaster's certificate or weight ticket for each such vehicle showing the tare weight, the date weighed, and a list of equipment needed to transport the shipment. After the vehicle has been loaded it will be weighed, without the crew or any other person or thing thereon except the load of household goods being transported plus the material and equipment as indicated in the first sentence of this subparagraph, prior to delivery of the shipment, and the net weight will be determined by deducting the tare weight from the loaded weight. In the transportation of part loads the provisions of this paragraph will apply in all respects, except that the gross weight of the vehicle containing one or more part loads will be used as the tare weight of such vehicle as to part loads subsequently loaded thereon. Except when otherwise approved by the -------- officer concerned, the bill of lading when submitted for payment by the carrier will be accompanied by such duly certified weighmaster's weight certificate. All tare, gross, and net weights will be properly certified to by the person(s) who ascertains such weights. Constructive weights (seven pounds per cubic foot) will be used only upon authorization of the -------- officer at origin.

(h) In conjunction with the owner or his agent, the carrier will prepare in triplicate an inventory list of all articles received, bearing the signature of the owner or his agent together with the signature of the carrier, both certifying to the correctness of the inventory (Appendix III to this tender). (See also paragraph D, Appendix II.)

(i) A certificate (DD Form 619) itemizing the accessorial (additional) services performed will be prepared and signed by the carrier and the owner or his agent in connection with household goods shipped under this tender.

(j) Packing of household goods will be performed in accordance with the requirements attached hereto in Appendix II.

(k) (1) As soon as possible after pickup of the household goods the carrier will furnish the ordering activity:

a. Two memorandum copies, numbers 6 and 8, of the applicable bill of lading showing gross, tare and net weights, signature of carrier's agent, date of pick-up and dispatch of shipment by the carrier, the transportation rate, and total charges accrued.

b. One copy of the completed Accessorial Services Certificate, DD Form 619, with the words "at origin" added after the name of the shipping activity or installation. (This is required only when accessorial services are performed and so noted on the Government bill of lading.)

c. One copy of the inventory list.

(2) The carrier will furnish the property owner or his agent at time of pickup:

a. Memorandum copy No. 9 of Government bill of lading.

b. A copy of the inventory list.

(3) The carrier will submit to the origin -------- officer for the purpose of receiving payment:

a. Original and memorandum copy No. 5 of the accomplished bill of lading.

b. Original and copy of Public Voucher (Standard Forms 1113 and 1113A).

c. Original or certified copies of certificates showing gross and tare weights furnished by a certified weighmaster or obtained from a certified scale.

d. Original of Accessorial Services Certificate (DD Form 619). (This is required only when accessorial services are performed and so noted on the Government bill of lading.)

e. Two copies of the carrier's bill of lading, freight bill, or combination form.

(l) If the carrier loses or destroys any copies of the Government bill of lading (except the original) or supporting papers which are required to obtain payment for services rendered, it will provide the Government with legible photostatic copies thereof, the same size as the document reproduced. If the original Government bill of lading is lost or destroyed, it will be replaced by a Certificate in Lieu of Lost U. S. Government Bill of Lading (Standard Form 1108).

36.11–2 This is not a rate tender.

36.11–3 The carrier understands that submission of this service tender to the shipping activity is prerequisite to its consideration for transportation of household goods, that it does not obligate the Government in the distribution of traffic, and that such submission indicates that the carrier is qualified, willing, and able to accept shipments from that activity and seeks such business under the terms hereof.

36.11–4 This offer shall be effective upon the date first above written, shall continue in effect until withdrawn by the carrier upon thirty (30) days' notice in writing to the -------- officer (or his successor) to whom tendered, and shall, while effective, be applicable only to shipments of household goods which the undersigned carrier moves and services on Government bills of lading or purchase orders, and shall form a part of the conditions thereof.

(Name of carrier)

(Official's name and title)

(Name of carrier)

§ 36.12 *Packing Requirements, Appendix II.*

36.12–1 *General*—(a) *Boxes.* Wood or fiberboard boxes used as specified hereinafter shall be as follows: wood-cleated fiberboard, wood-cleated plywood, nailed wood, corrugated fiber, or solid fiber boxes. Boxes shall be new or in sound condition; if not new they shall be free of all marks pertaining to any previous shipment and free of any substance injurious to the articles being packed. Boxes may be made of lumber, plywood or solid fiber; they shall be well manufactured and free from imperfections which may affect their utility. Size and spacing of nails will be in accordance with the best commercial practice. All unclinched nails shall be either cement coated or chemically etched.

(b) *Cartons.* Cartons, new or used, of solid or corrugated fiberboard may be used for packing linens, books, bedding, mattresses, lamp shades, draperies or other articles. All cartons used shall be adequate for the use employed, and must be dry, clean, and free from vermin, acid, paint, grease, and other substances injurious to the owner or his agent or to the articles packed. After packing, cartons must be glued, stapled or sealed by taping lengthwise at the joint on top and bottom. The sidewalls and ends of the corrugated or solid fiber cartons shall be of a minimum average bursting strength per square inch of 200 pounds. With the exception of mattress cartons, the inside dimensions of the carton, length, width and depth totaled, shall not exceed 75 inches with a weight limitation of 65 pounds. Egg crates, orange crates and similar type boxes will not be used. When determined by the -------- officer as necessary to assure protection and safe transportation of the articles, boxes may be used in lieu of cartons.

(c) *Barrels and fiber drums.* Wooden barrels, fiber drums, or other drum type containers with a capacity of not less than 5 cubic feet are to be used for packing glassware, chinaware, bric-a-brac, table lamp bases, and other fragile articles. All such containers, whether new or used, must be clean, in sound condition and free of all substances which might be injurious to the owner or his agent or to the material packed therein. Fiber drums will not contain more than 120 pounds and shall have a sidewall bursting strength per square inch of a minimum average of 400 pounds. Corrugated containers of not less than 5 cubic feet may be used in lieu of a barrel or drum type container for packing. The sidewalls and ends of the container shall be of a minimum bursting strength per square inch of 350 pounds. Not more than 120 pounds of material shall be packed therein. The sum of the interior horizontal and vertical girths shall be not less than 157 inches for wooden barrels, fiber drums, or other drum type containers. The cubic capacity of corrugated containers may be determined by actual measurements.

(d) *Filler material.* Good quality wood excelsior, wood wool excelsior, shredded paper, "kimpak," newspaper, fiberboard or Kraft paper shall be used as a filler for general packing. Filler material shall be clean, dry and free from vermin or any substances injurious to the articles to be packed.

(e) *Padding.* New or good quality used wood excelsior or shredded paper pads, or other equally suitable material, shall be used when required.

(f) *Paper wrapping.* All wrapping paper used shall be new or clean, Kraft type of not less than 30 pounds weight except as otherwise provided herein.

(g) *Paper—waxed or treated.* All waxed paper used shall be manila wax or equivalent of not less than 30 pounds weight. Treated paper may be used if of "Butcher" paper type, free from creases and folds.

[1] Filed as part of original document.

36.12-2 *Manner of packing.* (a) All packing shall be performed in a manner requiring the least cube measurement, producing packages that will withstand normal movement by motor van without damage to container or contents and at a minimum of weight. Further, the number and weight of containers will not be greater than necessary to accomplish efficient movement.

(b) All finished surfaces shall be so protected as to prevent scratching or marring.

(c) The use of damp, wet, or unclean packing materials is prohibited.

(d) Care shall be exercised to prevent loss or damage of household goods in process of packing, and the carrier shall properly and amply protect household effects in its possession by proper protective measures and by not piling effects in a manner likely to cause damage.

(e) When necessary for safe transportation, or storage-in-transit, all barrels or fiber drums shall be securely headed, the barrels or fiber drums shall be marked "This End Up."

36.12-3 *Specific*—(a) *Books.* Books shall be placed in cartons. All books of similar size shall be packed together in rows. Pads of solid or corrugated fiberboard shall be inserted between rows and packed tightly, wedged with pads or paper if necessary to fill out the carton and prevent chafing. Books normally shall be packed not more than two rows high in a carton.

(b) *Chinaware, glassware, crockery, lamps, clocks, jardinieres, statuary, vases, and bric-a-brac.* Each barrel, fibre drum or other container shall be padded in the bottom with sufficient excelsior, shredded paper, newspaper or other adequate cushion material. Items shall be wrapped separately, except groups of flat items properly divided may be wrapped in bundles properly cushioned. The heaviest items shall be placed in the bottom, the lightest items on top. Barrels, fibre drums, and other containers shall be packed as compactly as possible. Padding shall be pressed gently but firmly around each item and as many pieces be put in the containers as possible with safety. Any surface or edge of an article that is fragile must be protected by cushioning. Stemware shall be packed in containers bottom side up, and bundles of flatware shall be placed in containers on edge.

(c) *Electrical equipment—fans, heaters, portable stoves, sunlamps, vibrators, and like items.* When necessary to protect the items for safe transportation or storage-in-transit they shall be completely wrapped in paper or newspaper and packed in a carton with enough padding to provide insulation necessary to prevent contact of one article with another and to eliminate movement of any article in the container. When packing is not necessary, the items shall be properly wrapped or padded for protection.

(d) *Kitchenware.* All kitchenware, flat irons, electric irons, etc. shall be packed and padded into cartons. The heavier items shall be kept to the bottom of the container and the lighter items to the top of the container.

(e) *Linen, draperies, clothing, and like items.* When not considered as safe for carriage in drawers, chests, dressers, trunks, etc., linen, towels, bedding, draperies, clothing (unless a wardrobe is to be used), small pictures, mirrors and other items of this type shall be packed carefully into cartons which shall be properly sealed at residence.

(f) *Mirrors, pictures, glass table tops and stone table tops.* Large mirrors shall be wrapped and packed in a crate. Not more than four furniture mirrors will be packed in any one crate. Specifications for packing mirrors are applicable to glass tops, large glass-faced pictures, and all other glass articles of this type. Stone table tops shall be packed separately.

(g) *Lampshades.* All lampshades, Christmast ornaments, small toys and other small items easily crushed, shall be wrapped and placed in cartons and shall be insulated from the carton walls and from other items. Silk and parchment lampshades shall be wrapped individually with clean paper, not newspaper, and placed in cartons and cushioned to prevent shifting or damage.

(h) *Mattresses.* Mattresses with innersprings and those containing foam rubber, or mattresses consigned to storage, must be placed in cartons at the residence. All cartons used shall have a minimum average bursting strength per square inch of 200 pounds. Mattresses without internal springs and those not containing foam rubber must be placed in cartons, bags or similar containers at the residence. Paper bags, if used, shall be of not less than 60 pound Kraft paper. All containers used must be clean and free from vermin.

36.12-4 *Inventory.* The carrier will use diligence to record in the inventory (not applicable to the contents of pieces of furniture or containers of any type) any unusual conditions of the goods so received. The inventory shall list the articles of furniture and words such as "Household goods" or other general descriptive terms will not be used. Special care shall be exercised to ensure that the inventory reflects the true condition of the property. General terms such as marred, scratched, soiled, worn, torn, gouged, and the like shall be avoided unless they are supplemented with a statement describing the degree and location of the exception. (Care in the preparation of the initial inventory will assist in protecting the owner of the property and the carrier in the event of loss and/or damage. Appendix III* is a suggested format for the body of the inventory form but its use is not mandatory. Inventory forms which specify name of owner of goods, the date of shipment and name of carrier, and contain on the form an explanation of the condition symbols and location symbols are acceptable.) However, the carrier will provide means or recording on the inventory prepared by the initial carrier exceptions and the nature of such exceptions to the initial listing in each unloading, warehousing, and reloading of the goods. Household goods will be properly identified at time of pickup by affixing a tag or tape (or marking in case of containers) containing identification information to each article (not applicable to individual items in containers of any type). Each lot will be separately identified and each article will be assigned a number which must correspond with the piece number as indicated in the inventory. The type of identification used and the method of affixing it to the article will be such as not to injure any article so identified.

36.12-5 *Preparation of articles.* Articles having surfaces liable to damage by scratching, marring, or chafing will be wrapped at time of loading in furniture pads, covers, burlaps or wrappers which are a part of the carrier's regular equipment. Any and all servicing necessary to protect the mechanical or other functions of washing machines, refrigerators, ironers, sewing machines, vacuum cleaners, heaters, ranges, radios, clocks, phonographs, television sets, deep freezers, dryers, and other similar items during their transportation shall not be at the responsibility or the expense of the carrier. The servicing of such items shall be provided prior to delivery of the shipment to the carrier for transportation and without expense to the carrier.

36.12-6 *Packing and loading at origin.* Packing and loading at origin shall include removing from the owner's premises all empty containers, packing materials, and other debris accumulated incident to packing and loading, unless relieved of this responsibility by the owner.

36.12-7 *Unloading and unpacking at destination.* Unloading at destination shall include, when goods are delivered to the owner's residence, the placement of the goods in appropriate rooms of the dwelling so they are readily available to the owner's use. Unpacking service shall be performed unless specifically waived by the owner, when goods are delivered to the owner's residence at destination either direct from the carrier's van or from a storage-in-transit warehouse. Unpacking service shall consist of the following: (a) Unpacking all barrels, boxes, cartons, and/or crates originally packed by the carrier, and placement of the contents so they are readily available to the owner; (b) recording all damages found while unpacking and furnishing the owner a copy of such record; and (c) removing from the owner's premises all empty containers, packing materials, and other debris, accumulated incident to unpacking, unless specifically requested otherwise by the owner.

T. P. PIKE,
Assistant Secretary of Defense (Supply and Logistics).

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix C—Public Land Orders

[Public Land Order 1234]

[Oregon 02708]

[Misc. 752231]

OREGON

MODIFYING EXECUTIVE ORDERS OF DECEMBER 12, 1917, CREATING POWER SITE RESERVES NOS. 659 AND 662 AND DEPARTMENTAL ORDER OF DECEMBER 12, 1917, CLASSIFYING LANDS AS WATER POWER DESIGNATION NO. 14

By virtue of the authority contained in section 1 of the act of June 25, 1910, c. 421 (36 Stat. 847; 43 U. S. C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952, and sections 2 and 3 of the act of June 9, 1916 (39 Stat. 218), it is ordered as follows:

The Executive Order of December 12, 1917, creating Power Site Reserves No. 659 and No. 692, and the Departmental order of December 12, 1917, classifying certain lands as Water Power Designation No. 14, all as construed by Departmental Interpretation No. 20 of May 10, 1922, are hereby modified to the extent necessary to permit the granting of a right-of-way under section 2477, United States Revised Statutes (43 U. S. C. 932), to the County of Tillamook, Oregon, for the construction of a highway over the lands hereinafter described, and as shown on maps on file in the Bureau of Land Management (Oregon 02708), on the condition that the use of the highway in whole or in part shall be discontinued without liability or expense to the United States or its licensees when found by the Secretary of the Interior to be in conflict with project works authorized by the United States, and on the further condition that the timber resources within the right-of-way limits shall be subject to disposal only by the Bureau of Land Management, and the cutting of such timber shall be accordance with and subject to such stipulations as shall be prescribed by that Bureau.

The following lands are affected by this order:

WILLAMETTE MERIDIAN

T. 3 S., R. 6 W.,
Sec. 7, SE¼SW¼, NE¼SE¼, S½SE¼;
Sec. 18, lots 1 and 2, NE¼NE¼;

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 963]

[Docket No. AO-233-A3]

MILK IN STARK COUNTY, OHIO, MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED AMENDMENTS TO ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Canton, Ohio, on August 29, 1955, pursuant to notice thereof which was issued on August 19, 1955 (20 F. R. 6193).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Acting Deputy Administrator, Agricultural Marketing Service, on September 22, 1955, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision in this proceeding. The notice of filing such recommended decision and opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on September 27, 1955 (20 F. R. 7196).

The material issues and the findings and conclusions of the recommended decision (20 F. R. 7196; F. R. Doc. 55-7757) are hereby approved and adopted as the material issues and the findings and conclusions of this decision as if set forth in full herein.

Rulings. Within the period reserved for filing exceptions to the recommended decision, exceptions were submitted on behalf of interested parties. These exceptions have been fully considered and to the extent to which the findings and conclusions of this decision are at variance with the exceptions, such exceptions are hereby overruled.

Determination of representative period. The month of July 1955 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of amendments to the order regulating the handling of milk in the Stark County, Ohio, marketing area in the manner set forth in the attached amending order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such marketing order, as hereby amended.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled respectively, "Marketing Agreement Regulating the Handling of Milk in the Stark County, Ohio, Marketing Area," and "Order Amending the Order Regulating the Handling of Milk in the Stark County, Ohio, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order, as amended, and as hereby proposed to be further amended by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 6th day of October 1955.

[SEAL] EARL L. BUTZ,
Assistant Secretary.

Order[1] Amending the Order Regulating the Handling of Milk in the Stark County, Ohio, Marketing Area

§ 963.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Canton, Ohio, on August 29, 1955, upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Stark County, Ohio, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Stark County, Ohio, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order as hereby amended as set forth below:

Amend § 963.52 by adding after paragraph (c) the following: "*Provided,* That in October and November, 1955 in lieu

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

of the 'basic formula price' referred to in paragraphs (a) and (c) of this section, use the basic formula price computed pursuant to § 963.50 plus 30 cents."

[F. R. Doc. 55-8220; Filed, Oct. 10, 1955; 8:59 a. m.]

[7 CFR Part 989]

RAISINS PRODUCED FROM RAISIN VARIETY GRAPES GROWN IN CALIFORNIA

PROPOSED FREE, RESERVE, AND SURPLUS PERCENTAGES FOR 1955–56 CROP YEAR AND LIST OF COUNTRIES FOR EXPORT SALE OF SURPLUS TONNAGE THROUGH HANDLERS

Notice is hereby given that there is being considered proposed rules to establish free tonnage percentages, reserve tonnage percentages, surplus tonnage percentages, and a list specifying the countries to which sale in export of surplus tonnage raisins may be made by or through handlers, as hereinafter set forth, in connection with standard raisins produced from raisin variety grapes grown in California and acquired by handlers during the 1955–56 crop year. These percentages and the list of specified countries are proposed after consideration of the recommendations submitted by the Raisin Administrative Committee and other information available to the Secretary, in accordance with applicable provisions of Marketing Agreement No. 109, as amended, and Order No. 89, as amended (20 F. R. 6435), regulating the handling of raisins produced from raisin variety grapes grown in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

Consideration will be given to any data, views, or arguments pertaining thereto which are filed in triplicate with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D. C., and received not later than the close of business on the fifth day after the date of the publication of this notice in the FEDERAL REGISTER, except that, if said fifth day after publication should fall on a legal holiday, Saturday, or Sunday, such submission should be received by the Director not later than the close of business on the next following business day. In reaching final determinations in this regard, consideration will be given to the information available at that time, including later estimates of production and the then apparent off-grade content of the crop, and such final determinations will differ from the proposed rule set forth herein if necessary to achieve appropriate allocation or other program objectives.

The proposed percentages for standard natural Thompson Seedless raisins are based on the following estimates[1] with respect to such raisins: (1) Handler carrying on September 1, 1955 of about 18,000 tons; (2) preliminary indications of an average size 1955 production approximating 200,000 tons; (3) a total supply of about 218,000 tons (item 1 plus item 2); (4) a historically based estimate of Western Hemisphere and handler carryout (August 31, 1956) needs of about 158,000 tons, which approximates the quantity made available for these purposes in the 1954–55 crop year; (5) application of a free percentage of 70 percent to item 2 for a free tonnage of about 140,000 tons which, added to the handler carryin of 18,000 tons, would make available a total supply of about 158,000 tons to meet the estimated requirements set forth in item 4; (6) a conservative reserve percentage of 10 percent for a reserve tonnage of about 20,000 tons which could be used, if needed, to satisfy increases in domestic demand and is based on the expectation of a generally strong demand and the early need for raisins in both the free and surplus outlets; and (7) a surplus percentage of 20 percent for a surplus tonnage of about 40,000 tons for export to European and other markets outside of the Western Hemisphere.

The total supply of other varietal types of raisins is expected to approximate 32,000 tons and this supply is not deemed to be in excess of that which can be marketed as free tonnage and provide a reasonable carryout.

On the basis of the information now available to the Department, it appears that the estimated average price of raisins to producers for the crop year beginning September 1, 1955 will not exceed the price level contemplated in section 2 (1) of the act.

1. The proposed percentage rule is as follows:

§ 989.209 *Free, reserve, and surplus tonnage percentages for the 1955–56 crop year.* The percentage of each varietal type of standard raisins acquired by handlers during the crop year beginning September 1, 1955 and ending August 31, 1956, which shall be free tonnage, reserve tonnage, and surplus tonnage, respectively, is as follows: (a) Natural (sun-dried) Thompson Seedless raisins: Free tonnage percentage, 70 percent; reserve tonnage percentage, 10 percent; and surplus tonnage percentage, 20 percent; and (b) each of the other varietal types, including natural (sun-dried) Muscat, natural (sun-dried) or artificially dehydrated Sultana, natural (sun-dried) or artificially dehydrated Zante Currants, Layer Muscat, Golden Seedless, Sulfur Bleached, Soda Dipped, or Valencia raisins: Free tonnage percentage, 100 percent; reserve tonnage percentage, zero percent; and surplus tonnage percentage, zero percent.

2. The proposed list of countries is as follows:

§ 989.210 *Countries to which sale in export of surplus tonnage raisins may be made by or through handlers.* The countries to which sale in export of surplus tonnage raisins acquired by handlers during the crop year beginning September 1, 1955, and ending August 31, 1956, may be made by or through handlers shall include all countries outside of the Western Hemisphere except: (a) Australia, Cyprus, Greece (including Crete), Iran, Turkey, Spain, and the Union of South Africa; and (b) those countries and areas listed in Subgroup A of Group R of the Comprehensive Export Schedule, as amended (15 CFR 371.3 (a); 20 F. R. 1048) issued by the Bureau of Foreign Commerce, United States Department of Commerce, or as the same may be further amended during the period while surplus tonnage raisins of such crop year are being sold in export. For purposes of this section, "Western Hemisphere" shall include Greenland and the area east of the International Date Line and West of 30 degrees W. longitude.

Issued at Washington, D. C., this 6th day of October 1955.

[SEAL] S. R. SMITH,
Director,
Fruit and Vegetable Division.

[1] All tonnage figures herein are in terms of natural condition weight.

Agricultural Research Service

[9 CFR Part 40]

IDENTIFICATION SERVICE FOR MEAT AND OTHER PRODUCT

CERTIFICATION

Notice is hereby given in accordance with section 4 (a) of the Administrative Procedure Act (5 U. S. C. 1003 (a)) that the Department of Agriculture, pursuant to the authority conferred by sections 203 and 205 of the Agricultural Marketing Act of 1946 (7 U. S. C. 1622, 1624) as amended and section 520 of the Revised Statutes (5 U. S. C. 511), proposes to amend Part 40 of the Meat Inspection Regulations (9 CFR, 1954 Supp., Part 40, as amended 20 F. R. 2080) as follows:

1. The heading of Part 40 would be amended to read as follows: "Part 40—Identification and Certification Service for Meat and Other Product."

2. Section 40.3 would be amended by adding the following sentence at the end thereof: "In order to meet requirements of a purchaser, or of a supplier, or others that are not imposed or are in addition to those imposed by the Federal Meat Inspection Act or regulations, with respect to such carcass, tank carload, or other basic unit, service may be furnished, upon application, under the regulations in this part to certify such characteristics of or factors concerning the product as may be requested in the application for service."

3. Section 40.4 would be amended to read as follows:

§ 40.4 *Availability of service.* Service under the regulations in this part will be available only with respect to meat or other product which is sound, healthful, wholesome, and fit for human food at the time the service would be furnished; which can be identified as a portion of a carcass, tank carload, or other basic unit which was federally inspected and so marked; and, in the case of identification service, which is on premises other than those of an official establishment.

The proposed amendments would provide for a certification service relating to requirements that are not imposed or are in addition to those imposed by the Federal Meat Inspection Act or regulations.

The additional certification for lard, as an example, could cover such factors as maximum moisture and free fatty acid, melting point, titer range, smoke point, and minimum number of hours stability.

Any interested person who wishes to submit written data, views, or arguments on the proposed amendments may do so by filing them with the Chief of Meat Inspection Branch, Agricultural Research Service, United States Department of Agriculture, Washington 25, D. C. within 30 days after the publication of this notice in the FEDERAL REGISTER.

Done at Washington, D. C., this 5th day of October 1955.

[SEAL] M. R. CLARKSON,
Acting Administrator,
Agricultural Research Service.

Commodity Stabilization Service

HAWAIIAN SUGARCANE

NOTICE OF HEARING ON PRICES AND DESIGNATION OF PRESIDING OFFICERS

Pursuant to the authority contained in subsection (c) (2) of section 301 of the Sugar Act of 1948, as amended (61 Stat. 929; 7 U. S. C. Sup. 1131), and in accordance with the rules of practice and procedure applicable to fair price proceedings (7 CFR 802.1 et seq.), notice is hereby given that a public hearing will be held as follows:

At Hilo, on the Island of Hawaii, in the Auditorium of the Hilo Electric Light Company, Limited, on Kilauea Avenue, on November 7, 1955, at 9:30 a. m.

The purpose of the hearing is to receive evidence likely to be of assistance to the Secretary of Agriculture in determining, pursuant to the provisions of section 301 (c) (2) of said Act, fair and reasonable prices for the 1956 crop of Hawaiian sugarcane to be paid, under either purchase or toll agreements, by producers who process sugarcane grown by other producers and who apply for payments under the said Act.

The hearing after being called to order at the time and place mentioned herein, may be continued from day to day within the discretion of the presiding officers, and may be adjourned to a later day or to a different place without notice other than the announcement thereof at the hearing by the presiding officers.

In the interest of obtaining the best possible information, all interested persons are requested to appear at the hearing to express their views and present appropriate data in regard to the foregoing matter.

A. A. Greenwood, Ward S. Stevenson, and Will N. King are hereby designated as presiding officers to conduct either jointly or severally the foregoing hearing.

Issued this 5th day of October 1955.

[SEAL] THOS. H. ALLEN,
Acting Director, Sugar Division.

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214) and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners and learning periods for certificates issued under general learner regulations (§§ 522.1 to 522.12) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Apparel Industry Learner Regulations (29 CFR 522.20 to 522.24, as amended April 19, 1955, 20 F. R. 2304).

Blount Manufacturing Co., Blountsville, Ala., effective 9–23–55 to 2–15–56; 20 learners for plant expansion purposes (children's pants and boxer longies).

The Butler Shirt Co., Butler, Pa., effective 9–22–55 to 9–21–56; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's sport shirts).

Carolina Underwear Co., Inc., Forsyth Division, Forsyth Street, Thomasville, Ga., effective 10–1–55 to 2–29–56; 15 learners for plant expansion purposes (women's, misses' and children's panties).

Carolina Undergarment Co., Inc., Forsyth Division, Forsyth Street, Thomasville, Ga., effective 10–1–55 to 9–30–56; 10 learners for normal labor turnover purposes (women's, misses' and children's panties).

Cleveland Overall Co., 1768 East 25th Street, Cleveland, Ohio, effective 9–27–55 to 9–26–56; 10 percent of the total number of factory production workers for normal labor turnover purposes (cotton work garments).

Greensboro Manufacturing Corp., 1900 East Bessemer Avenue, Greensboro, N. C., effective 9–25–55 to 9–24–56; 10 percent of the total number of factory production workers for normal labor turnover purposes (women's and children's flannelette and cotton night gowns).

Harde Manufacturing Co., Inc., Blackstone, Va., effective 9–26–55 to 9–25–56; 10 percent of the total number of factory production workers for normal labor turnover purposes (boys' jackets, hobby jeans and walking shorts).

Hartsville Garment Corp., P. O. Box 215, Hartsville, Tenn., effective 9–22–55 to 2–29–56; 25 learners for plant expansion purposes (sport shirts).

F. Jacobson & Sons, Inc., Charlottesville, Va., effective 10–7–55 to 10–6–56; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's pajamas).

Leiter Manufacturing Co., 217 Craik, Marlin, Texas, effective 9–19–55 to 2–29–56; 25 learners for plant expansion purposes. (Learners are not authorized to be employed at subminimum wage rates in the production of separate skirts.) (Ladies' sportswear and dresses.)

Louisville Garment Co., Inc., Louisville, Miss., effective 9–19–55 to 2–29–56; 75 learners for plant expansion purposes. (Replacement certificate.) (Men's and boys' pants.)

Meyers & Son Manufacturing Co., Corner First and Jefferson Streets, Madison, Ind., effective 9–25–55 to 9–24–56; 10 learners for normal labor turnover purposes (men's one piece work suits).

Miller Westernwear, Inc., Walnut Street, Baxley, Ga., effective 9–22–55 to 2–29–56; 25

learners for plant expansion purposes (boys' and girls' Western type shirts).

Old Hickory Co., Inc., 39 Second Street Place SW., Hickory, N. C., effective 9–22–55 to 9–21–56; 8 learners for normal labor turnover purposes (men's overalls, coveralls, dungarees and work pants; ladies' dungarees).

Scottsboro Manufacturing Co., 102 South Houston Street, Scottsboro, Ala., effective 9–19–55 to 9–18–56; 5 learners for normal labor turnover purposes (children's knit and woven sportswear from purchased fabric).

Rosenau Bros., Inc., Fulton Street, Ephrata, Pa., effective 10–6–55 to 10–5–56; 10 percent of the total number of factory production workers for normal labor turnover purposes (children's dresses).

Levi Strauss & Co., 220 North Houston Avenue, Denison, Tex., effective 9–27–55 to 9–26–56; 10 percent of the total number of factory production workers for normal labor turnover purposes (denim coats, jackets, and slacks).

Cigar Industry Learner Regulations (29 CFR 522.80 to 522.85, as amended April 19, 1955, 20 F. R. 2304).

Budd Cigar Co., Dothan, Ala., effective 9–22–55 to 9–21–56; 10 percent of the total number of factory production workers engaged in the occupations listed hereinafter: Cigar machine operating, 320 hours; cigar packing (cigars retailing for 6 cents or less), 160 hours; and machine stripping, 160 hours. All at 65 cents an hour.

Hosiery Industry Learner Regulations (29 CFR 522.40 to 522.43, as amended April 19, 1955, 20 F. R. 2304).

Liberty Hosiery Mills, Inc., Gibsonville, N. C., effective 9–20–55 to 9–19–56; 5 percent of the total number of factory production workers for normal labor turnover purposes (full-fashioned).

C. A. Wanner, Inc., Fleetwood, Pa., effective 9–26–55 to 9–25–56; 5 learners for normal labor turnover purposes (seamless).

Knitted Wear Industry Learner Regulations (29 CFR 522.30 to 522.35, as amended April 19, 1955, 20 F. R. 2304).

Shadowline, Inc., Morgantown, N. C., effective 9–22–55 to 2–29–56; 15 learners for plant expansion purposes (nylon and acetate knitted lingerie).

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.12, as amended February 28, 1955, 20 F. R. 845).

Cox Handmade Leather Goods Co., 165 Fifth Street, Russellville, Ala., effective 9–26–55 to 2–29–56; 10 learners for plant expansion purposes (leather billfolds).

The following special learner certificate was issued in Puerto Rico to the company hereinafter named. The effective and expiration dates, the number of learners, the learner occupations, the length of the learning periods and the learner wage rates are indicated, respectively.

Vega Alta Corp., Vega Alta, P. R., effective 9–12–55 to 3–11–56; 100 learners may be employed in any one work day in the occupations listed hereinafter: (1) Grinding operators; automatic screw machine operators; and tool makers; each for 320 hours at 50 cents an hour; 320 hours at 55 cents an hour; and 320 hours at 60 cents an hour. (2) Heat treat operators; lapping operators; milling machine operators; straightener operators; welding operators; assembly and bench operators (excluding loaders, spring assemblers, filing, rubber stoppers assemblers, assemblying motor to case, and name plate assembler); inspection operators (excluding inspection of plastic cases); and plating operators each for 240 hours at 50 cents an hour, and 240 hours at 60 cents an hour. (3) Punch press operators, for 240 hours at 55 cents an hour. (Electric shavers.)

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be canceled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 29th day of September 1955.

MILTON BROOKE,
Authorized Representative of the Administrator.

[File No. 54–72, etc.]

STANDARD POWER AND LIGHT CORP. ET AL.

NOTICE OF AND ORDER FOR HEARING WITH RESPECT TO FEE CLAIM

OCTOBER 5, 1955.

In the matter of Standard Power and Light Corporation, Standard Gas and Electric Company and Philadelphia Company; File Nos. 54–72, 54–173, 54–191, 54–199.

The above-entitled proceedings involved plans filed pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("Act") to enable the system of Standard Power and Light Corporation, Standard Gas and Electric Company ("Standard Gas"), and Philadelphia Company, all registered holding companies, to effectuate compliance with section 11 (b) of the act and the Commission's orders thereunder requiring the liquidation and dissolution of such companies. These plans together with the Commission's orders approving the same provided, among other things, that the companies would pay only such fees and expenses for services rendered in connection with such plans and related proceedings as the Commission might approve, award or allow.

Applications for allowances of fees and expenses were subsequently filed with the Commission by various participants in the proceedings, including a joint application filed by Guggenheimer & Untermyer and associated counsel ("Guggenheimer & Untermyer") for fees and expenses on account of legal services. Extensive hearings were held in connection with the claim of Guggenheimer & Untermyer, and during the course thereof a settlement was reached and approved by the Commission on May 13, 1955.

On July 28, 1955, Standard Gas filed a petition herein stating, inter alia, that in connection with the proceedings on the Guggenheimer & Untermyer fee application aforesaid, it employed James P. McGranery as a legal expert; that it had received a claim from McGranery for a fee in the amount of $10,000 which it was unwilling to pay; and that pursuant to the Commission's order of December 23, 1953 (Holding Company Act Release No. 12272), it had conducted negotia-

tions with McGranery but had been unable to agree upon a settlement of such claim; and Standard Gas requests that the Commission set down for hearing the aforesaid claim of McGranery and after such hearing, fix the amount of the fee, if any, to be paid by Standard Gas to said McGranery.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors that a hearing be held with respect to the claim asserted by McGranery against Standard Gas:

It is ordered, That a hearing he held on the claim of James P. McGranery as aforesaid, which hearing shall commence on November 7, 1955, at 10 o'clock a. m. at the office of the Commission, 425 Second Street NW., Washington, D. C. On such date the hearing-room clerk in Room 193 will advise as to the room in which the hearing will be held. Any person who is not already a party, or who has not been granted leave to participate in the above-entitled proceedings, and who desires to be heard or otherwise to participate in such hearing shall file with the Secretary of this Commission on or before November 2, 1955, a request relative thereto as provided in Rule XVII of the Commission's Rules of Practice.

It is further ordered, That James G. Ewell or any other officer or officers of the Commission designated by it for that purpose shall preside at such hearing. The officer or officers so designated is and are hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a hearing officer under the Commission's Rules of Practice.

The Division of Corporate Regulation of the Commission having advised the Commission that it has made a preliminary examination of the aforesaid petition filed by Standard Gas with respect to said fee claim, and that on the basis thereof the following matters and questions are presented without prejudice, however, to the presentation of additional matters and questions upon further examination:

1. Whether the services of the said James P. McGranery for which remuneration is sought are compensable and whether it is lawful or appropriate to grant any allowance from the estate of Standard Gas on account of such services;

2. Whether the fee requested by the said James P. McGranery was incurred in rendering services which were necessary in connection with the reorganization plans involved and whether the requested amount is reasonable;

3. Whether there are any other factors apart from the nature and value of the services rendered and the capacity in which rendered which would make improper the claim for compensation asserted by the said James P. McGranery;

It is further ordered, That particular attention be directed at the hearing to the foregoing matters and questions.

It is further ordered, That the Secretary of the Commission shall serve a copy of this Notice and Order by registered mail on Standard Gas and on James P. McGranery; and that notice of the entry of this Notice and Order shall be given to all other persons by general release of the Commission which shall be distributed to the press and mailed to the mailing list for releases issued under the Public Utility Holding Company Act of 1935, and by publication in the FEDERAL REGISTER.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

BLAZE-MASTER, INC.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

OCTOBER 5, 1955.

I. Blaze-Master, Inc., the last known address of which was No. 222 Flint Building, Auburn, New York, having filed with the Commission on May 25, 1953, a notification on Form 1-A and exhibit specified by Rule 219 (b) and an amendment thereto on June 2, 1953, relating to a proposed offering of 50,000 shares of Class "A" stock, $1.00 par value, to be offered at $1.00 per share, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of Section 3 (b) thereof and Regulation A promulgated thereunder; and

II. The Commission, having been advised:

A. That a judgment of permanent injunction was issued on April 5, 1954, in the New York State Supreme Court for Cayuga County, against Blaze-Master, Inc., F. Dale Bacon, its president and director, and Edward T. Wiley, its secretary-treasurer and director, permanently enjoining said persons from engaging in or continuing any business relating to the purchase and sale of any security.

B. That the terms and conditions of Regulation A have not been complied with in that the notification on Form 1-A and exhibit and amendment thereto, filed as part thereof, among other things, failed to disclose: the affiliation between Blaze-Master and Point of View, Inc., the last known address of which was 254 West 31st Street, New York 1, New York, in that both companies were subject to the control of F. Dale Bacon, their president and director.

C. That the issuer failed to file with the Commission, as required by Rule 224, four copies of a report on Form 2-A containing the information called for thereby.

III. *It is ordered*, Pursuant to Rule 223 (a) of the General Rules and Regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission request for a hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place for said hearing will be promptly given by the Commission.

It is further ordered, That this Order and Notice shall be served upon Blaze-Master, Inc., F. Dale Bacon and Edward T. Wiley personally or by registered mail or by confirmed telegraphic notice, and shall be published in the FEDERAL REGISTER.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 24FW-936]

VACTRON CORP.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

OCTOBER 5, 1955.

I. Vactron Corporation (hereinafter referred to as the "issuer"), P. O. Box 11153, Fort Worth, Texas, having filed with the Commission on May 13, 1955, a notification, on Form 1-A relating to a proposed public offering of 300,000 shares of its common stock, $1.00 par value, at $1.00 per share through Zone Investment Company, 2901 Cleburne Road, Fort Worth, Texas, as underwriter (hereinafter referred to as the "underwriter") for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder; and

II. The Commission having reasonable cause to believe:

A. That an exemption under Regulation A is not available to the issuer in that the aggregate offering price of the issuer's securities would exceed the limitation of $300,000 prescribed by Rule 217 (a) since said securities are being offered in excess of $1.00 per share.

B. That the terms and conditions of Regulation A have not been complied with in that the offering circular used in connection with the offering of said securities contains untrue statements of material facts and omits to state material facts necessary in order to make the statements made in the light of the circumstances under which they are made, not misleading, particularly with respect to the following:

1. The amount of underwriting discounts or commissions to be received by the underwriter;

2. The amount of proceeds to be received by the issuer.

C. That the terms and conditions of Regulation A have not been complied with in that the issuer failed to file, as required by Rule 219 (e), the offering circular being used in connection with the offering.

D. That the use of said offering circular would and did operate as a fraud and deceit upon the purchasers of such securities.

III. *It is ordered*, Pursuant to Rule 223 (a) of the General Rules and Regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given, that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place for said hearing will be promptly given by the Commission.

It is further ordered, That this Order and Notice shall be served upon Vactron Corporation, P. O. Box 11153, Fort Worth, Texas, and Zone Investment Company, 2901 Cleburne Road, Fort Worth, Texas, personally or by registered mail or confirmed telegraphic notice, and shall be published in the FEDERAL REGISTER.

By the Commission.

URANIUM AND OIL DEVELOPMENT PROJECT, INC.

ORDER TEMPORARILY DENYING EXEMPTION, STATEMENT OF REASONS THEREFORE, AND NOTICE OF OPPORTUNITY FOR HEARING

OCTOBER 5, 1955.

I. The Uranium and Oil Development Project, Inc., 3411 North 14th Place, Phoenix, Arizona, having filed with the Commission on July 5, 1955, a Notification on Form 1-A and an offering circular, and amendments thereto on September 6, 1955, relating to an offering of 1,250,000 shares of common stock, 10¢ par value, at 10¢ per share, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of Section 3 (b) of the Act and Regulation A promulgated thereunder; and

II. The Commission having reasonable cause to believe:

A. That the terms and conditions of Regulation A have not been complied with in that the Notification and offering circular, filed as part thereof, contain untrue statements of material facts, and omit to state material facts necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading particularly with respect to the following:

1. The statement on page 4 of the offering circular under "Property and Development" in discussing the unpatented mining claims held by the issuer that "The presence of both uranium and rare earths in this dike is believed to be in commercial quantities";

2. The statement on page 6 of the offering circular under "Development Funds Required" that "Development of the Lucky Horse Shoe mining claims and mill site to prepare for mining operation will require approximately $55,382.50";

3. The statement in paragraph 3, page 2 of the "Report on Uranium and Rare Earths Mining Property by P. H. Lund, Registered Mining Engineer", attached as an exhibit to the offering circular, that "A liberal quantity of samples were taken from exposed formation on each claim and thoroughly mixed and quartered down to make an average of the mineral contents of the entire dike as near as possible from surface exposures."

4. The failure to disclose in Item 4 of the Notification that P. H. Lund and P. H. Lund Engineering Company are affiliates of the issuer;

5. The failure to disclose in Item 3 of the Notification information as to the sale of securities by P. H. Lund during the year prior to the filing of the Notification;

6. The failure to disclose in the offering circular that P. H. Lund holds title to oil and gas leases on land adjoining that owned by the issuer and the resulting benefits which may accrue to Lund if a well is drilled on the issuer's properties;

7. The failure to disclose in the offering circular that the portion of Arizona in which the issuer's oil and gas leases are located has been classified as being "unfavorable" in its relative likelihood of yielding oil in commercial quantities;

8. The failure to disclose in the offering circular the distance to the nearest commercial oil production from the issuer's leases and the distance to the nearest commercial gas production;

9. The failure to disclose in the report entitled "Report on Uranium and Rare Earths Mining Property" by P. H. Lund, attached as an exhibit to the Notification, that there is no known rare earths and uranium on the unpatented mining claims held by the issuer; and

10. The failure to disclose in the report entitled "Report on the Marana Potential Oil and Gas Field" by P. H. Lund, attached as an exhibit to the Notification, that no evidence has been furnished to show the existence of the anticlines, folds, domes and faults mentioned in such report.

B. That the use of the offering circular in connection with any offering of the shares to which the Notification relates would operate as a fraud and deceit upon the purchasers thereof;

III. *It is ordered*, Pursuant to Rule 223 (a) of the General Rules and Regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily denied.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of denial should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place of said hearing will be promptly given by the Commission.

It is further ordered, That this Order and Notice shall be served upon The Uranium and Oil Development Project, Inc., 3411 North 14th Place, Phoenix, Arizona, and Emmett R. Feighner, 150 West Palm Lane, Phoenix, Arizona, personally or by registered mail or by confirmed telegraphic notice and shall be published in the FEDERAL REGISTER.

By the Commission.

INTERSTATE COMMERCE COMMISSION

[Rev. S. O. 562, Taylor's I. C. C. Order 59-A]

INDIANA HARBOR BELT RAILROAD CO.

REROUTING OR DIVERSION OF TRAFFIC

Upon further consideration of Taylor's I. C. C. Order No. 59 and good cause appearing therefor: *It is ordered*, That:

(a) Taylor's I. C. C. Order No. 59, be, and it is hereby vacated and set aside.

(b) Effective date: This order shall become effective at 12:01 p. m., October 1, 1955.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., October 1, 1955.

INTERSTATE COMMERCE COMMISSION,
[SEAL] CHARLES W. TAYLOR, *Agent.*

[F. R. Doc. 55-8189; Filed, Oct. 10, 1955; 8:45 a. m.]

[Rev. S. O. 562, Taylor's I. C. C. Order 60]

ST. LOUIS-SAN FRANCISCO RAILWAY CO.

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Charles W. Taylor, Agent, the St. Louis-San Francisco Railway Company due to bridge out of service between Vernon, Texas, and Snyder, Oklahoma, is unable to transport traffic

routed over its line between these points: *It is ordered*, That:

(a) Rerouting traffic: The St. Louis-San Francisco Railway Company is hereby authorized to reroute or divert traffic moving over its lines between Vernon, Texas, and Snyder, Oklahoma, due to bridge out of service, over any available route to expedite the movement. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroad desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to such traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 7:00 a. m., October 4, 1955.

(g) Expiration date: This order shall expire at 11:59 p. m., November 4, 1955, unless otherwise modified, changed, suspended or annulled.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., October 4, 1955.

INTERSTATE COMMERCE COMMISSION,
CHARLES W. TAYLOR,
Agent.

TITLE 7—AGRICULTURE

Chapter VII—Commodity Stabilization Service (Farm Marketing Quotas and Acreage Allotments), Department of Agriculture

[1023 (Peanuts-56)-1, Amdt. 1]

PART 729—PEANUTS

CHANGE OF DATE

Basis and purpose. The amendment herein is issued under the peanut marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1301–1393), for the purpose of correcting an error. Since the amendment is to make a correction, it is hereby determined and found that compliance with the notice, public procedure and effective date requirements of the Administrative Procedure Act (5 U. S. C. 1003) is unnecessary, and the amendment contained herein shall be effective upon the publication of this document in the FEDERAL REGISTER.

Section 729.720 (a) of the Marketing Quota Regulations for the 1956 Crop of Peanuts (20 F. R. 6033) line 31, is amended by changing the year "1955" to "1956".

(Sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375)

Done at Washington, D. C., this 6th day of October 1955. Witness my hand and the seal of the Department of Agriculture.

[SEAL] TRUE D. MORSE,
Acting Secretary of Agriculture.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Tokay Grape Order 2, Amdt. 1]

PART 951—TOKAY GRAPES GROWN IN SAN JOAQUIN AND SACRAMENTO COUNTIES IN CALIFORNIA

LIMITATION OF SHIPMENTS

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 51, as amended (7 CFR Part 951), regulating the handling of Tokay grapes grown in San Joaquin and Sacramento Counties in California, effective under the applicable provision of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendations of the Industry Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such grapes that may be handled during specified allotment periods, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) In the instance of deciduous fruits, determination as to the need for, and the extent of, regulation must be deferred awaiting development of the particular crop. Recommendations for this amendment was made at a meeting of said Industry Committee on October 8, 1955, after consideration of all available information relative to supply and demand conditions for Tokay grapes. It is hereby further found, therefore, that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date hereof until 30 days after publication in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that the time intervening between the date when information upon which this amendment is based and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective date, and good cause exists for making the provisions hereof effective not later than October 13, 1955. Shipments of Tokay grapes of the current crop are subject to regulation by grades and sizes pursuant to Tokay Grape Order 1 (§ 951.319; 20 F. R. 6244), which has been in effect since August 27, 1955, and is to continue until January 1, 1956; the total quantity of such of the Tokay grapes as are eligible for shipment on the basis of such Tokay Grape Order 1 during each allotment period was fixed at 414,375 standard packages

Part 9 (proposed) 7613

pursuant to Tokay Grape Order 2 (§ 951.320; 20 F. R. 6813); Tokay Grape Order 2 will terminate, unless its termination date is postponed, at 12:01 a. m., P. s. t., October 13, 1955; a reasonable determination as to the need for continued regulation of the volume of shipments of Tokay grapes after October 12, 1955, must await the availability of information relative to the probable supply and demand conditions for such grapes; information available to the committee on October 8, 1955, was to the effect that, without regulation of the volume of shipments during the period from October 13, 1955, through October 16, 1955, the supply of eligible Tokay grapes will exceed the demand therefor, and recommendation and supporting information for continued regulation on the same basis as set forth in said Tokay Grape Order 2 was forwarded promptly to the Department and made available to handlers and producers of Tokay grapes; the provisions of this amendment, including the period during which it will be effective, are the same as the aforesaid recommendation of the committee; and compliance with the provisions of this amendment will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

Order, as amended. Tokay Grape Order 2 (§ 951.320; 20 F. R. 6813) is hereby amended by deleting from § 951.320 (b) (1) the date "October 13, 1955" and inserting, in lieu thereof, the date "October 17, 1955."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: October ~~10,~~ 1955.

PART 13—DIGEST OF CEASE AND DESIST ORDERS

MASTERLINE CORP. ET AL.

Subpart—*Advertising falsely or misleadingly:* § 13.70 *Fictitious or misleading guarantees:* § 13.75 *Free goods or services:* § 13.110 *Indorsements, approval and testimonials;* § 13.155 *Prices:* Comparative; Product or quantity covered; § 13.170 *Qualities or properties of product or service;* § 13.260 *Terms and conditions.* Subpart—*Claiming or using indorsements or testimonials falsely or misleadingly:* § 13.330 *Claiming or using indorsements or testimonials falsely or misleadingly.* Subpart—*Offering unfair, improper and deceptive inducements to purchase or deal:* § 13.1955 *Free goods:* § 13.1980 *Guarantee, in general;* § 13.2080 *Terms and conditions.* In connection with the sale or distribution of aluminum storm doors, aluminum storm windows, or aluminum awnings in commerce, and on the part of respondent corporation, its officers, agents, etc. (the complaint having been dismissed as to individual respondents), representing, directly or by implication: (1) That credit customers have free use of items for the period preceding the due date of the initial payment, when in fact they are charged with interest during such period; (2) that any of said products are fully guaranteed, or are unconditionally guaranteed, or are sold with a lifetime guarantee, or that installations are guaranteed for a lifetime of service or that the guarantee assures users of a lifetime of trouble-free performance; (3) that any of said products are guaranteed unless the nature and extent of the guarantee and the manner in which the guarantor will perform are clearly and conspicuously disclosed; (4) that their Alumatic windows are nationally approved; (5) that the locks or latches with which their storm doors and windows are equipped are burglar proof; (6) that any of said products are free or may be purchased at reduced prices, without clearly and conspicuously disclosing in immediate conjunction with any such offer all of the terms and conditions thereof, including the need to purchase additional merchandise, if such is the case; (7) that any of said products are offered at America's lowest price; (8) by pictorial illustrations or otherwise, that the advertised price of any of said products includes any equipment or accessories for which an additional charge is made; and (9) that products are offered for sale when such offer is not a bona fide offer to sell the products, so, and as, offered; prohibited.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Masterline Corporation et al., Philadelphia, Pa., Docket 6291, September 1, 1955]

In the Matter of Masterline Corporation, a Corporation, and Morris Marder, Henry Yusem, Myrna Yusem, and Rita Marder, Individually and as Officers of Said Corporation

This proceeding was heard by Earl J. Kolb, hearing examiner, upon the complaint of the Commission which charged respondents with the use of unfair and deceptive acts and practices in commerce in violation of the provisions of the Federal Trade Commission Act in connection with the sale and distribution of aluminum storm windows, aluminum storm doors, and aluminum awnings.

Respondent corporation failed to file its answer in the proceeding or to appear before the hearing examiner on the date set for initial hearing in the complaint, and was declared in default. Upon motion of the attorney in support of the complaint, the proceeding was continued to May 12, 1955, when he presented an affidavit executed by two of the individual respondents stating that they were officers of respondent corporation at the time of issuance of the complaint and that the other two individuals were nominal officers and not engaged in operation of said corporation; that said corporation was declared bankrupt by order of the U. S. District Court, Eastern District of Pennsylvania, and its assets were being disposed of by a receiver in bankruptcy appointed by said court; that said respondents were no longer engaged in the storm window business and did not intend to resume said business; and that in any business in which they might engage in the future they would not permit themselves to be part of practices of the types alleged in the complaint.

Attorney in support of the complaint thereupon moved that the individual respondents be dismissed, which motion having been sustained by the hearing examiner and default having been entered against corporate respondent, the hearing examiner made his findings as to the facts,[1] conclusions[1] drawn therefrom, and order.

Thereafter said initial decision, including said order as announced and decreed by "Decision of the Commission and Order To File Report of Compliance", dated September 22, 1955, became, on September 1, 1955, pursuant to § 3.21 of the Commission's rules of practice, the decision of the Commission.

Said order to cease and desist is as follows:

It is ordered, That respondent Masterline Corporation, a corporation, and its officers, agents, representatives and employees, directly or through any corporate or other device in connection with the sale or distribution of aluminum storm doors, aluminum storm windows, or aluminum awnings in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, directly or by implication:

1. That credit customers have free use of items for the period preceding the due date of the initial payment, when in fact they are charged with interest during such period.

2. That any of said products are fully guaranteed, or are unconditionally guaranteed, or are sold with a lifetime guarantee, or that installations are guaranteed for a lifetime of service or that the guarantee assures users of a lifetime of trouble-free performance.

3. That any of said products are guaranteed unless the nature and extent of the guarantee and the manner in which the guarantor will perform are clearly and conspicuously disclosed.

4. That their Alumatic windows are nationally approved.

5. That the locks or latches with which their storm doors and windows are equipped are burglar proof.

6. That any of said products are free or may be purchased at reduced prices, without clearly and conspicuously disclosing in immediate conjunction with any such offer all of the terms and conditions thereof, including the need to purchase additional merchandise, if such is the case.

7. That any of said products are offered at America's lowest price.

8. By pictorial illustrations or otherwise, that the advertised price of any of said products includes any equipment or accessories for which an additional charge is made.

9. That products are offered for sale when such offer is not a bona fide offer to sell the products, so, and as, offered.

It is further ordered, That the complaint be, and the same is hereby, dismissed as to the individual respondents Morris Marder, Henry Yusem, Myrna Yusem and Rita Marder.

By said "Decision of the Commission," etc., report of compliance was required as follows:

It is ordered, That respondent Masterline Corporation, a corporation, shall within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist.

Issued: September 22, 1955.

By the Commission.

[SEAL] JOHN R. HEIM,
Acting Secretary.

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53917]

PART 11—PACKING AND STAMPING; MARKING; TRADEMARKS AND TRADE NAMES; COPYRIGHTS

METHOD OF MARKING TO INDICATE COUNTRY OF ORIGIN OF IMPORTED ARTICLES (OR CONTAINERS)

In order to clarify the marking requirements with respect to articles imported into a possession of the United States and reshipped to the United States, § 11.8 (f) of the Customs Regulations is amended to read as follows:

(f) Articles of foreign manufacture or production imported into any possession of the United States outside its customs territory (section 401 (k), Tariff Act of 1930, as amended) and reshipped to the United States are subject to all marking requirements applicable to like articles of foreign origin imported directly from a foreign country to the United States.

(Sec. 624, 46 Stat. 759; 19 U. S. C. 1624. Interprets or applies sec. 304, 46 Stat. 687, as amended; 19 U. S. C. 304)

[SEAL] RALPH KELLY,
Commissioner of Customs.

Approved: October 5, 1955.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

[T. D. 53919]

MISCELLANEOUS AMENDMENTS TO CHAPTER

It has become evident that collectors of customs and their staffs have become conversant with the standards for settling claims for liquidated damages under various customs bonds and that delegation of greater authority to settle such claims in the field is warranted. Therefore, to more effectively serve the public by promoting the prompt disposition of such claims, the Customs Regulations are amended as set forth below.

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

1. Section 10.39 is hereby amended as follows:

a. Paragraph (e) is amended by substituting "$20,000" for "$1,000" in the second sentence.

b. Paragraph (f) is amended by substituting "$20,000" for "$1,000".

(Secs. 308, 623, 46 Stat. 690, as amended 759, as amended; 19 U. S. C. 1308, 1623)

2. Section 10.92 is hereby amended by deleting the parenthetical matter at the end of paragraph (c) and adding a new paragraph (d) reading as follows:

(d) The collector of customs may cancel liquidated damages not in excess of $20,000 incurred under a bond mentioned in this section upon payment of less than the full amount, or without the payment of any amount if no loss of revenue is involved, as he may deem appropriate under the law and in view of the circumstances.

(Par. 1101, sec. 1, 46 Stat. 646, as amended; 19 U. S. C. 1001 (Par. 1101))
(R. S. 161, 251, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 66, 1624)

PART 11—PACKING AND STAMPING: TRADEMARKS AND TRADE NAMES, COPYRIGHTS

Section 11.11 (d) is amended by substituting "$20,000" for "$1,500".

(R. S. 161, 251, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 66, 1624. Interprets or applies secs. 304, 623, 46 Stat. 687, as amended, 759, as amended; 19 U. S. C. 1304, 1623)

PART 18—TRANSPORTATION IN BOND AND MERCHANDISE IN TRANSIT

Section 18.8 is hereby amended by deleting the parenthetical matter at the end of paragraph (c) and by adding a new paragraph (d) reading as follows:

(d) In any case in which liquidated damages imposed in accordance with this section do not aggregate over $20,000 and the collector is satisfied by evidence submitted to him that all the merchandise in respect of which the liquidated damages were incurred has actually been exported or destroyed, and that any failure to obtain customs supervision was without any intent to evade any law or regulation, he may cancel the claim for such liquidated damages upon the payment of any lesser amount, or without the payment of any amount, as he may deem appropriate under the circumstances.

(R. S. 161, 251, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 66, 1624. Interprets or applies secs. 551, 623, 46 Stat. 742, as amended, 623, as amended; 19 U. S. C. 1551, 1623)

PART 21—CARTAGE AND LIGHTERAGE

Section 21.8 is hereby amended by adding a new paragraph (c) reading as follows:

(c) The collector may cancel liquidated damages not in excess of $20,000 incurred under a cartman's bond or a lighterman's bond upon the payment of such lesser amount, or without the payment of any amount, as he may deem appropriate under the circumstances.

(Secs. 565, 624, 46 Stat. 747, 759; 19 U. S. C. 1565, 1624. Interprets or applies sec. 623, 46 Stat. 759, as amended; 19 U. S. C. 1623)

PART 25—CUSTOMS BONDS

Section 25.17 is hereby amended as follows:

1. Paragraph (g) is deleted, paragraph (h) is redesignated as (g), and redesignated paragraph (g) is amended by substituting "$200" for "$100".

2. A new paragraph (h) is added, reading as follows:

(h) If the interested party is not satisfied with the collector's decision on any application for relief from liquidated damages under a bond given pursuant to a law or regulation administered by the Customs Service, he may file a further application with the collector to be forwarded to the Bureau for reconsideration of the case. A statement to that effect shall be contained in the notification to the applicant of the collector's action.

(R. S. 161, 251, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 66, 1624. Interprets or applies sec. 623, 46 Stat. 759, as amended; 19 U. S. C. 1623)

[SEAL] RALPH KELLY,
Commissioner of Customs.

Approved: October 4, 1955.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

TITLE 26—INTERNAL REVENUE, 1954

Chapter I—Internal Revenue Service, Department of the Treasury

Subchapter G—Regulations Under Tax Conventions

[T. D. 6149]

PART 509—THE SWISS CONFEDERATION

General regulations under the income tax convention between the United States and the Swiss Confederation, proclaimed by the President of the United States on October 1, 1951, subject to the protocol of exchange signed on September 27, 1951.

Sec.
509.101 Introductory.
509.102 Applicable provisions of law.
509.103 Scope of the convention.
509.104 Definitions.
509.105 Industrial and commercial profits.
509.106 Control of a United States enterprise by a Swiss enterprise.
509.107 Income from operation of ships or aircraft.
509.108 Dividends.
509.109 Interest.
509.110 Patent and copyright royalties and film rentals.
509.111 Real property income and natural resource royalties.
509.112 Compensation for labor or personal services.
509.113 Government wages, salaries, and pensions.
509.114 Private pensions and life annuities.
509.115 Visiting professors or teachers.
509.116 Students or apprentices.
509.117 Dividends and interest paid by a foreign corporation.
509.118 Credit against United States tax for Swiss tax.
509.119 Exchange of information.
509.120 Double taxation claims.
509.121 Beneficiaries of an estate or trust.
509.122 Swiss partnerships.

AUTHORITY: §§ 509.101 to 509.122, issued under sec. 7805, 68A Stat. 917; 26 U. S. C. 7805.

On June 16, 1955, notice of proposed rule making regarding the general regulations under the income tax convention between the United States and the Swiss Confederation, proclaimed by the President of the United States on October 1, 1951, was published in the FEDERAL REGISTER (20 F. R. 4211). No comments regarding the regulations proposed were received during the 30-day period prescribed in such notice, and the regulations set forth below are hereby adopted:

§ 509.101 *Introductory.* The income tax convention between the United States and the Swiss Confederation, signed May 24, 1951, and proclaimed by the President of the United States on October 1, 1951, subject to the understanding expressed in the protocol of exchange, hereinafter referred to as the convention, provides as follows, effective for taxable years beginning on or after January 1, 1951:

ARTICLE I

(1) The taxes referred to in this Convention are:

(a) In the case of the United States of America: The Federal income taxes, including surtaxes and excess profits taxes.

(b) In the case of The Swiss Confederation: The federal, cantonal and communal taxes on income (total income, earned income, income from property, industrial and commercial profits, etc.).

(2) The present Convention shall also apply to any other income or profits tax of a substantially similar character imposed by either contracting State subsequently to the date of signature of the present Convention.

ARTICLE II

(1) As used in this Convention:

(a) The term "United States" means the United States of America, and when used in a geographical sense means the States, the Territories of Alaska and Hawaii, and the District of Columbia.

(b) The term "Switzerland" means The Swiss Confederation.

(c) The term "permanent establishment" means a branch, office, factory, workshop, warehouse or other fixed place of business, but does not include the casual and temporary use of merely storage facilities, nor does it include an agency unless the agent has and habitually exercises a general authority to negotiate and conclude contracts on behalf of an enterprise or has a stock of merchandise from which he regularly fills orders on its behalf. An enterprise of one of the contracting States shall not be deemed to have a permanent establishment in the other State merely because it carries on business dealings in such other State through a commission agent, broker or custodian or other independent agent acting in the ordinary course of his business as such. The fact that an enterprise of one of the contracting States maintains in the other State a fixed place of business exclusively for the purchase of goods or merchandise shall not of itself constitute such fixed place of business a permanent establishment of such enterprise. The fact that a corporation of one contracting State has a subsidiary corporation which is a corporation of the other State or which is engaged in trade or business in the other State shall not of itself constitute that subsidiary corporation a permanent establishment of its parent corporation. The maintenance within the territory of one of the contracting States by an enterprise of the other contracting State of a warehouse for convenience of delivery and not for purposes of display shall not of itself constitute a permanent establishment within that territory even though offers of purchase have been obtained by an agent of the enterprise in that territory and transmitted by him to the enterprise for acceptance.

(d) The term "enterprise of one of the contracting States" means, as the case may be, "United States enterprise" or "Swiss enterprise".

(e) The term "United States enterprise" means an industrial or commercial enterprise or undertaking carried on in the United States by a resident (including an individual, fiduciary and partnership) of the United States or by a United States corporation or other entity; the term "United States corporation or other entity" means a corporation or other entity created or organized under the law of the United States or of any State or Territory of the United States.

(f) The term "Swiss enterprise" means an industrial or commercial enterprise or undertaking carried on in Switzerland by an individual resident in Switzerland or by a Swiss corporation or other entity; the term "Swiss corporation or other entity" means a corporation or institution or foundation having juridical personality, or a partnership (association "en nom collectif" or "en commandite"), or other association without juridical personality, created or organized under Swiss laws.

(g) The term "competent authorities" means, in the case of the United States, the Commissioner of Internal Revenue as authorized by the Secretary of the Treasury; and in the case of Switzerland, the Director of the Federal Tax Administration as authorized by the Federal Department of Finances and Customs.

(h) The term "industrial or commercial profits" includes manufacturing, mercantile, mining, financial and insurance profits, but does not include income in the form of dividends, interest, rents or royalties, or remuneration for personal services: Provided, however, that such excepted items of income shall, subject to the provisions of this Convention, be taxed separately or together with industrial or commercial profits in accordance with the laws of the contracting States.

(2) In the application of the provisions of the present Convention by one of the contracting States any term not otherwise defined shall, unless the context otherwise requires, have the meaning which such term has under its own tax laws.

ARTICLE III

(1) (a) A Swiss enterprise shall not be subject to taxation by the United States in respect of its industrial and commercial profits unless it is engaged in trade or business in the United States through a permanent establishment situated therein. If it is so engaged the United States may impose its tax upon the entire income of such enterprise from sources within the United States.

(b) A United States enterprise shall not be subject to taxation by Switzerland in respect of its industrial and commercial profits except as to such profits allocable to its permanent establishment situated in Switzerland.

(2) No account shall be taken in determining the tax in one of the contracting States of the mere purchase of merchandise therein by an enterprise of the other State.

(3) Where an enterprise of one of the contracting States is engaged in trade or business in the territory of the other contracting State through a permanent establishment situated therein, there shall be attributed to such permanent establishment the industrial or commercial profits which it might be expected to derive if it were an independent enterprise engaged in the same or similar activities under the same or similar conditions and dealing at arm's length with the enterprise of which it is a permanent establishment.

(4) In the determination of the industrial or commercial profits of the permanent establishment there shall be allowed as deductions all expenses which are reasonably applicable to the permanent establishment, including executive and general administrative expenses so applicable.

(5) The competent authorities of the two contracting States may lay down rules by agreement for the apportionment of industrial and commercial profits.

ARTICLE IV

Where an enterprise of one of the contracting States, by reason of its participation in the management or the financial structure of an enterprise of the other contracting State, makes with or imposes on the latter, in their commercial or financial relations, conditions different from those which would be made with an independent enterprise, any profits which would normally have accrued to one of the enterprises, but by reason of those conditions have not so accrued, may be included in the profits of that enterprise and taxed accordingly.

ARTICLE V

Income which an enterprise of one of the contracting States derives from the operation of ships or aircraft registered in that State shall be taxable only in the State in which such ships or aircraft are registered.

ARTICLE VI

(1) The rate of tax imposed by one of the contracting States upon dividends derived from sources within such State by a resident or corporation or other entity of the other contracting State not having a permanent establishment in the former State shall not exceed 15 percent: Provided, however, that this paragraph shall have no application to Swiss tax in the case of dividends derived from Switzerland by a Swiss citizen (who is not also a citizen of the United States) resident in the United States.

(2) It is agreed, however, that such rate of tax shall not exceed five percent if the shareholder is a corporation controlling, directly or indirectly, at least 95 percent of the entire voting power in the corporation paying the dividend, and if not more than 25 percent of the gross income of such paying corporation is derived from interest and dividends, other than interest and dividends received from its own subsidiary corporations. Such reduction of the rate to five percent shall not apply if the relationship of the two corporations has been arranged or is maintained primarily with the intention of securing such reduced rate.

(3) Switzerland may collect its tax without regard to paragraphs (1) and (2) of this Article but will make refund of the tax so collected in excess of the tax computed at the reduced rates provided in such paragraphs.

ARTICLE VII

(1) The rate of tax imposed by one of the contracting States on interest on bonds, securities, notes, debentures or on any other form of indebtedness (including mortgages or bonds secured by real property) derived from sources within such contracting State by a resident or corporation or other entity of the other contracting State not having a permanent establishment in the former State shall not exceed five percent: Provided, however, that this paragraph shall have no application to Swiss tax in the case of interest derived from Switzerland by a Swiss citizen (who is not also a citizen of the United States) resident in the United States.

(2) Switzerland may collect its tax without regard to paragraph (1) of this Article but will make refund of the tax so collected in excess of the tax computed at the reduced rate provided in such paragraph.

ARTICLE VIII

Royalties and other amounts derived, as consideration for the right to use copyrights, artistic and scientific works, patents, designs, plans, secret processes and formulae, trademarks, and other like property and rights (including rentals and like payments in respect to motion picture films or for the use of industrial, commercial or scientific equipment), from sources within one of the contracting States by a resident or corporation or other entity of the other contracting State not having a permanent establishment in the former State shall be exempt from taxation in such former State.

ARTICLE IX

(1) Income from real property (including gains derived from the sale or exchange of such property but not including interest from mortgages or bonds secured by real property) and royalties in respect of the operation of mines, quarries, or other natural resources, shall be taxable only in the contracting State in which such property, mines, quarries, or other natural resources are situated.

(2) A resident or corporation or other entity of one of the contracting States deriving any such income from such property within the other contracting State may, for any taxable year, elect to be subject to the tax of such other contracting State, on a net basis, as if such resident or corporation or entity were engaged in trade or business within such other contracting State through a permanent establishment therein during such taxable year.

ARTICLE X

(1) An individual resident of Switzerland shall be exempt from United States tax upon compensation for labor or personal services performed in the United States (including the practice of the liberal professions and rendition of services as director) if he is temporarily present in the United States for a period or periods not exceeding a total of 183 days during the taxable year and either of the following conditions is met:

(a) His compensation is received for such labor or personal services performed as an employee of, or under contract with, a resident or corporation or other entity of Switzerland, or

(b) His compensation received for such labor or personal services does not exceed $10,000.

(2) The provisions of paragraph (1) of this Article shall apply mutatis mutandis, to an individual resident of the United States with respect to compensation for such labor or personal services performed in Switzerland.

(3) The provisions of this Article shall have no application to the income to which Article XI (1) relates.

(4) The provisions of paragraph (1) (a) of this Article shall not apply to the compensation, profits, emoluments or other remuneration of public entertainers such as stage, motion picture or radio artists, musicians and athletes.

ARTICLE XI

(1) (a) Wages, salaries and similar compensation, and pensions paid by the United States or by the political subdivisions or territories thereof to an individual (other than a Swiss citizen who is not also a citizen of the United States) shall be exempt from Swiss tax.

(b) Wages, salaries and similar compensation and pensions paid by Switzerland or by any agency or instrumentality thereof or by any political subdivisions or other public authorities thereof to an individual (other than a United States citizen who is not also a citizen of Switzerland) shall be exempt from United States tax.

(2) Private pensions and life annuities derived from within one of the contracting States and paid to individuals residing in the other contracting State shall be exempt from taxation in the former State.

(3) The term "pensions", as used in this Article, means periodic payments made in consideration for services rendered or by way of compensation for injuries received.

(4) The term "life annuities" as used in this Article, means a stated sum payable periodically at stated times during life, or during a specified number of years, under an obligation to make the payments in return for adequate and full consideration in money or money's worth.

ARTICLE XII

A professor or teacher, a resident of one of the contracting States, who temporarily visits the other contracting State for the purpose of teaching for a period not exceeding two years at a university, college, school or other educational institution in the other contracting State, shall be exempted in such other contracting State from tax on his remuneration for such teaching for such period.

ARTICLE XIII

A student or apprentice, a resident of one of the contracting States, who temporarily visits the other contracting State exclusively for the purposes of study or for acquiring business or technical experience shall not be taxable in the latter State in respect of remittances received by him from abroad for the purposes of his maintenance or studies.

ARTICLE XIV

(1) Dividends and interest paid by a corporation other than a United States domestic corporation shall be exempt from United States tax where the recipient is a nonresident alien as to the United States resident in Switzerland or a Swiss corporation, not having a permanent establishment in the United States.

(2) Dividends and interest paid by a corporation other than a Swiss corporation shall be exempt from Swiss tax where the recipient is a resident or corporation of the United States, not having a permanent establishment in Switzerland.

ARTICLE XV

(1) It is agreed that double taxation shall be avoided in the following manner:

(a) The United States in determining its taxes specified in Article I of this Convention in the case of its citizens, residents or corporations may, regardless of any other provision of this Convention, include in the basis upon which such taxes are imposed all items of income taxable under the revenue laws of the United States as if this Convention had not come into effect. The United States shall, however, subject to the provisions of section 131, Internal Revenue Code, as in effect on the date of the entry into force of this Convention, deduct from its taxes the amount of Swiss taxes specified in Article I of this Convention. It is agreed that by virtue of the provisions of subparagraph (b) of this paragraph, Switzerland satisfies the similar credit requirement set forth in section 131 (a) (3), Internal Revenue Code.

(b) Switzerland, in determining its taxes specified in Article I of this Convention in the case of its residents, corporations or other entities, shall exclude from the basis upon which such taxes are imposed such items of income as are dealt with in this Convention, derived from the United States and not exempt from, and not entitled to the reduced rate of, United States tax under this Convention; but in the case of a citizen of the United States resident in Switzerland there shall be excluded all items of income derived from the United States. Switzerland, however, reserves the right to take into account in the determination of the rate of its taxes also the income excluded as provided in this paragraph.

(2) The provisions of this Article shall not be construed to deny the exemptions from United States tax or Swiss tax, as the case may be, granted by Article XI (1) of this Convention.

ARTICLE XVI

(1) The competent authorities of the contracting States shall exchange such information (being information available under the respective taxation laws of the contracting States) as is necessary for carrying out the provisions of the present Convention or for the prevention of fraud or the like in relation to the taxes which are the subject of the present Convention. Any information so exchanged shall be treated as secret and shall not be disclosed to any person other than those concerned with the assessment and collection of the taxes which are the subject of the present Convention. No information shall be exchanged which would disclose any trade, business, industrial or professional secret or any trade process.

(2) Each of the contracting States may collect such taxes imposed by the other contracting State as though such taxes were the taxes of the former State as will ensure that the exemption or reduced rate of tax granted under Articles VI, VII, VIII and XI (2) of the present Convention by such other State shall not be enjoyed by persons not entitled to such benefits.

(3) In no case shall the provisions of this Article be construed so as to impose upon either of the contracting States the obligation to carry out administrative measures at variance with the regulations and practice of either contracting State or which would be contrary to its sovereignty, security or public policy or to supply particulars which are not procurable under its own legislation or that of the State making application.

ARTICLE XVII

(1) Where a taxpayer shows proof that the action of the tax authorities of the contracting States has resulted, or will result, in double taxation contrary to the provisions of the present Convention, he shall be entitled to present the facts to the State of which he is a citizen or a resident, or, if the taxpayer is a corporation or other entity, to the State in which it is created or organized. Should the taxpayer's claim be deemed worthy of consideration, the competent authority of such State shall undertake to come to an agreement with the competent authority of the other State with a view to equitable avoidance of the double taxation in question.

(2) Should any difficulty or doubt arise as to the interpretation or application of the present Convention, or its relationship to Conventions between one of the contracting States and any other State, the competent authorities of the contracting States may settle the question by mutual agreement.

ARTICLE XVIII

(1) The provisions of this Convention shall not be construed to deny or affect in any manner the right of diplomatic and consular officers to other or additional exemptions now enjoyed or which may hereafter be granted to such officers.

(2) The provisions of the present Convention shall not be construed to restrict in any manner any exemption, deduction, credit or other allowance now or hereafter accorded by the laws of one of the contracting States in the determination of the tax imposed by such State.

(3) The citizens of one of the contracting States shall not, while resident in the other contracting State, be subjected therein to other or more burdensome taxes than are the citizens of such other contracting State residing in its territory. The term "citizens" as used in this Article includes all legal persons, partnerships and associations created or organized under the laws in force in the respective contracting States. In this Article the word "taxes" means taxes of every kind or description, whether Federal, State, cantonal, municipal or communal.

ARTICLE XIX

(1) The competent authorities of the two contracting States may prescribe regulations necessary to carry into effect the present Convention within the respective States.

(2) The competent authorities of the two contracting States may communicate with each other directly for the purpose of giving effect to the provisions of this Convention.

ARTICLE XX

(1) The present Convention shall be ratified and the instruments of ratification shall be exchanged at Berne as soon as possible. It shall have effect for the taxable years beginning on or after the first day of January of the year in which such exchange takes place: Provided, however, that if such exchange takes place on or after October 1 of such year, Article VI (except paragraph (2) thereof) and Article VII of the Convention shall have effect only for taxable years beginning on or after the first day of January of the year immediately following the year in which such exchange takes place.

(2) The present Convention shall continue effective for a period of five years beginning with the calendar year in which the exchange of the instruments of ratification takes place and indefinitely after that period, but may be terminated by either of the contracting States at the end of the five-year period or at any time thereafter, provided that at least six months' prior notice of termination has been given and, in such event, the present Convention shall cease to be effective for the taxable years beginning on or after the first day of January next following the expiration of the six-month period.

Done at Washington, in duplicate, in the English and German languages, the two texts having equal authenticity, this 24th day of May, 1951.

For the President of the United States of America:

[SEAL] DEAN ACHESON.

For the Swiss Federal Council:

[SEAL] CHARLES BRUGGMANN.

PROCLAMATION BY THE PRESIDENT OF THE UNITED STATES DATED OCTOBER 1, 1951

* * * * *

And whereas the Senate of the United States of America, by their resolution of September 17, 1951, two-thirds of the Senators present concurring therein, did advise and consent to the ratification of the aforesaid convention, subject to a reservation, as follows:

"The Government of the United States of America does not accept paragraph (4) of Article X of the Convention, relating to the profits or remuneration of public entertainers."

And whereas the text of the aforesaid reservation was communicated by the Government of the United States of America to the Government of the Swiss Confederation and the aforesaid reservation was accepted by the Government of the Swiss Confederation;

And whereas the aforesaid convention was duly ratified by the President of the United States of America on September 20, 1951, in pursuance of the aforesaid advice and consent of the Senate and subject to the aforesaid reservation, and the aforesaid convention was duly ratified on the part of the Swiss Confederation;

And whereas the respective instruments of ratification of the aforesaid convention were duly exchanged at Bern on September 27, 1951, and a protocol of exchange of instruments of ratification, in the English and French languages, was signed at that place and on that date by the respective Plenipotentiaries of the United States of America and the Swiss Confederation, the said protocol containing a statement that it is understood by the two Governments that the convention aforesaid, upon entry into force in accordance with its provisions, is modified in accordance with the aforesaid reservation, so that, in effect, paragraph (4) of Article X of the convention is deemed to be deleted;

And whereas, so far as appertains to an exchange of instruments of ratification prior to October 1 of any year, it is provided in Article XX of the aforesaid convention that upon the exchange of instruments of ratification the convention shall have effect for the taxable years beginning or [sic] after the first day of January of the year in which such exchange takes place;

Now, therefore, be it known that I, Harry S. Truman, President of the United States of America, do hereby proclaim and make public the aforesaid convention to the end that the said convention and each and every article and clause thereof, subject to the aforesaid reservation, may be observed and fulfilled with good faith by the United States of America and by the citizens of the United

States of America and all other persons subject to the jurisdiction thereof.

§ 509.102 *Applicable provisions of law*—(a) *General.* The Internal Revenue Code of 1954 provides in part as follows:

SUBTITLE A—INCOME TAXES

• • • • • •

SEC. 894. *Income exempt under treaty.* Income of any kind, to the extent required by any treaty obligation of the United States, shall not be included in gross income and shall be exempt from taxation under this subtitle.

• • • • • •

SUBTITLE F—PROCEDURE AND ADMINISTRATION

• • • • • •

SEC. 7805. *Rules and regulations*—(a) *Authorization.* Except where such authority is expressly given by this title to any person other than an officer or employee of the Treasury Department, the Secretary or his delegate shall prescribe all needful rules and regulations for the enforcement of this title, including all rules and regulations as may be necessary by reason of any alteration of law in relation to internal revenue.

(b) *Retroactivity of regulations or rulings.* The Secretary or his delegate may prescribe the extent, if any, to which any ruling or regulation, relating to the internal revenue laws, shall be applied without retroactive effect.

• • • • • •

(b) *Internal Revenue Code of 1939.* Any reference in §§ 509.101 to 509.122 to any provision of the Internal Revenue Code of 1954 shall, where applicable, be deemed also to refer to the corresponding provision of the Internal Revenue Code of 1939.

(c) *Effective date of regulations.* Pursuant to sections 894 and 7805 of the Internal Revenue Code of 1954, Article XIX of the convention, and other provisions of the internal revenue laws, §§ 509.101 to 509.122 are hereby prescribed effective for taxable years beginning on or after January 1, 1951. All regulations inconsistent herewith are modified accordingly.

§ 509.103 *Scope of the convention*—(a) *Purposes of convention.* The primary purposes of the convention, to be accomplished on a reciprocal basis, are to avoid double taxation upon certain items of income derived from sources in one country by residents or corporations or other entities of the other country and to provide for administrative cooperation between the competent tax authorities of the two countries looking to the avoidance of double taxation and the prevention of fiscal evasion.

(b) *Exemption from United States tax.* The following items of income from sources within the United States are exempt from United States tax for taxable years beginning on or after January 1, 1951, subject to the respective articles of the convention:

(1) Industrial and commercial profits of a Swiss enterprise having no permanent establishment in the United States (Article III);

(2) Income derived by a Swiss enterprise from the operation of ships or aircraft registered in Switzerland (Article V);

(3) Patent and copyright royalties, and other like amounts, including motion picture film rentals, derived by a nonresident alien who is a resident of Switzerland, or by a Swiss corporation or other entity, if such alien, corporation, or other entity has no permanent establishment in the United States (Article VIII);

(4) Compensation, subject to certain limitations, for personal services performed in the United States by a nonresident alien individual who is a resident of Switzerland (Article X);

(5) Compensation and pensions paid by Switzerland to an alien individual, and to a citizen of Switzerland who is also a citizen of the United States, including such items as are from sources without the United States (Article XI);

(6) Private pensions and life annuities paid to a nonresident alien individual who is a resident of Switzerland (Article XI);

(7) Remuneration derived from certain teaching in the United States by a professor or teacher who is a nonresident alien residing in Switzerland (Article XII); and

(8) Dividends and interest paid by a foreign corporation to a nonresident alien who is a resident of Switzerland, or to a Swiss corporation, if such alien or corporation has no permanent establishment in the United States (Article XIV).

(c) *Students or apprentices.* Remittances received from abroad for the purpose of maintenance or studies by a student or apprentice, a nonresident alien residing in Switzerland, who is temporarily present in the United States under specified circumstances are also exempt from United States tax (Article XIII).

(d) *Reduced rates of United States tax.* Dividends and interest derived from sources within the United States by a nonresident alien who is a resident of Switzerland, or by a Swiss corporation or other entity, are subject to United States tax at reduced rates, if such alien, corporation, or other entity has no permanent establishment in the United States (Articles VI and VII).

(e) *Witholding regulations.* For regulations pertaining to the release of excess tax withheld, and to exemption from, or reduction in the rate of, withholding of United States tax at source, in the case of dividends, interest, patent and copyright royalties, film rentals, private pensions, and life annuities, received from sources within the United States by a nonresident alien who is a resident of Switzerland, or by a Swiss corporation or other entity, see Treasury Decision 5867, approved November 21, 1951 (26 CFR (1939) 7.300 through 7.309).

(f) *United States citizens, residents, and corporations.* (1) Any citizen of Switzerland who is a resident of the United States is liable to United States tax as though the convention had not come into effect; however, such alien resident of the United States is entitled to the foreign tax credit in accordance with Article XV and is also entitled to the benefits of Article XI (1) and Article XVIII.

(2) A citizen of the United States, even though resident in Switzerland, or a domestic corporation, even though engaged in trade or business in Switzerland through a permanent establishment situated therein, is also liable to United States tax as though the convention had not come into effect but is entitled to the foreign tax credit and, to the extent, applicable, to the benefits of Article XI (1).

(g) *Other provisions applicable to Swiss residents and corporations.* Except as otherwise expressly provided by the convention, the United States tax liability of a nonresident alien who is a resident of Switzerland, or of a Swiss corporation or other entity, is determined in accordance with the provisions of the Internal Revenue Code of 1954 relating to nonresident alien individuals and foreign corporations.

§ 509.104 *Definitions*—(a) *General.* Any term defined in the convention or §§ 509.101 to 509.122 shall have the meaning so assigned to it; any term not so defined shall, unless the context otherwise requires, have the meaning which such term has under the internal revenue laws of the United States.

(b) *Specific terms.* As used in §§ 509.101 to 509.122—

(1) *United States tax.* The term "United States tax" means the Federal income taxes, including surtaxes and excess profits taxes, and any other income or profits tax of a substantially similar character imposed by the United States after May 24, 1951.

(2) *Swiss tax.* The term "Swiss tax" means the federal, cantonal, and communal taxes on income—that is, on total income, earned income, income from property, industrial and commercial profits, etc.—and any other income or profits tax of a substantially similar character imposed by Switzerland after May 24, 1951.

(3) *United States.* The term "United States" means the United States of America; and, when used in a geographical sense, means the States, the Territories of Alaska and Hawaii, and the District of Columbia.

(4) *Switzerland.* The term "Switzerland" means the Swiss Confederation.

(5) *Permanent establishment*—(i) *Fixed place of business.* The term "permanent establishment" means an office, factory, workshop, warehouse, branch, or other fixed place of business, but does not include the casual and temporary use of merely storage facilities. It implies the active conduct of a business enterprise. The mere ownership, for example, of timberlands or a warehouse in the United States by a Swiss enterprise does not mean that such enterprise, in the absence of any business activity therein, has a permanent establishment in the United States. Moreover, the maintenance within the United States by a Swiss enterprise of a warehouse for convenience of delivery, and not for purposes of display, does not of itself constitute a permanent establishment in the United States, even though offers of purchase have been obtained by an agent therein of the Swiss enterprise and transmitted by him to the Swiss enterprise for acceptance. The fact that a Swiss enterprise maintains in the United States an office or other fixed place of business used exclusively for the purchase for such enterprise of goods or merchandise shall not of itself constitute such fixed place of business a permanent establishment of such enterprise.

(ii) *Subsidiary corporation.* The fact that a Swiss corporation has a domestic subsidiary corporation, or a foreign subsidiary corporation which is engaged in trade or business in the United States through a permanent establishment situated therein, does not of itself constitute either subsidiary corporation the United States permanent establishment of the Swiss parent corporation.

(iii) *Agency.* A Swiss enterprise which has an agency in the United States does not thereby have a permanent establishment in the United States, unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of such enterprise or unless he has a stock of merchandise from which he regularly fills orders on its behalf. If the enterprise has an agent in the United States who has power to contract on its behalf, but only at fixed prices and under conditions determined by such principal, it does not thereby necessarily have a permanent establishment in the United States. The mere fact that an agent of a Swiss enterprise—assuming he has no general authority to negotiate and conclude contracts on behalf of his principal—maintains samples, or occasionally fills orders from incidental stocks of goods maintained, in the United States does not of itself mean that such enterprise has a permanent establishment in the United States. The mere fact that salesmen, employees of a Swiss enterprise, promote the sale of their employer's products in the United States or that a Swiss enterprise transacts business in the United States by means of mail order activities does not mean that such enterprise has a permanent establishment in the United States. A Swiss enterprise shall not be deemed to have a permanent establishment in the United States merely because it carries on business dealings in the United States through a commission agent, broker, custodian, or other independent agent, acting in the ordinary course of his business as such.

(6) *Enterprise.* The term "enterprise" means any commercial or industrial enterprise or undertaking carried on by any person, for example, by an individual partnership, or corporation. It includes such activities as manufacturing, merchandising, mining, processing, banking, and insuring. It does not include the rendition of personal services. Hence, a nonresident alien individual who is resident of Switzerland and who performs personal services is not, merely by reason of such services, engaged in a Swiss enterprise within the meaning of the convention; consequently, his liability to United States tax is not determined under Article III of the convention, if he has not otherwise carried on a Swiss enterprise.

(7) *Swiss enterprise.* The term "Swiss enterprise" means an enterprise carried on in Switzerland by a nonresident alien individual who is a resident of Switzerland, or by a Swiss corporation or other entity. Thus, an enterprise carried on wholly outside Switzerland by a Swiss corporation is not a Swiss enterprise within the meaning of the convention.

(8) *Swiss corporation or other entity.* The term "Swiss corporation or other entity" means a corporation or institution or foundation having juridical personality, or a partnership (association "en nom collectif" or "en commandite"), or other association without juridical personality, created or organized under Swiss laws.

(9) *United States enterprise.* The term "United States enterprise" means an enterprise carried on in the United States by a resident of the United States (including an individual, fiduciary, and partnership) or by a United States corporation or other entity.

(10) *United States corporation or other entity.* The term "United States corporation or other entity" means a corporation or other entity created or organized under the law of the United States or of any State or Territory of the United States.

(11) *Industrial and commercial profits.* The term "industrial and commercial profits" means profits arising from industrial, commercial, mercantile, manufacturing, and like activities of an enterprise, including mining, financial, and insurance profits. It does not include income in the form of dividends, interests, rents, royalties, or remuneration for personal services. In determining the industrial and commercial profits from sources within the United States of a Swiss enterprise, no profits shall be deemed to arise from the mere purchase of goods or merchandise within the United States by such enterprise. Moreover, in determining such profits of the United States permanent establishment of such enterprise, there shall be allowed as deductions all expenses which are reasonably applicable to the permanent establishment, including executive and general administrative expenses so applicable. See sections 861 through 864, Internal Revenue Code of 1954, and the regulations thereunder.

(12) *Commissioner.* The term "Commissioner" means the Commissioner of Internal Revenue or his authorized representative.

(13) *Director of the Federal Tax Administration.* The term "Director of the Federal Tax Administration" means the Director of the Federal Tax Administration (Direktor der eidgenoessischen Steuerverwaltung) of Switzerland.

§ 509.105 *Industrial and commercial profits*—(a) *General.* (1) Article III of the convention adopts the principle that an enterprise of one of the contracting States shall not be taxable by the other contracting State upon its industrial and commercial profits unless it is engaged in trade or business in the latter State through a permanent establishment situated therein. Accordingly, a Swiss enterprise is subject to United States tax upon its industrial and commercial profits, to the extent of such profits from sources within the United States, only if it is engaged in trade or business in the United States at some time during the taxable year through a permanent establishment situated therein.

(2) From the standpoint of the United States tax the article has application only to a Swiss enterprise and its industrial and commercial profits from sources within the United States. Thus, a nonresident alien individual who is a citizen of Switzerland, or a Swiss corporation or other entity, carrying on an enterprise which is not Swiss, is subject to tax on such income of such enterprise pursuant to section 871 (c) or section 882 (a), Internal Revenue Code of 1954, if such alien, corporation, or other entity has engaged in trade or business in the United States at any time during the taxable year, even though it has not had a permanent establishment therein at any time within such year.

(b) *No United States permanent establishment.* A Swiss enterprise is not subject to United States tax upon its industrial and commercial profits from sources within the United States, nor shall such profits be included in gross income, if it has not at any time during the taxable year engaged in trade or business in the United States through a permanent establishment situated therein. For example, if during the taxable year an enterprise carried on in Switzerland by a nonresident alien individual who is a resident of Switzerland, or by a Swiss corporation, were to sell merchandise, such as watches, dairy products, or liqueurs, in the United States through a commission agent or broker in the United States acting in the ordinary course of his business as such agent or broker, the profits arising from such sale would not be included in gross income and would be exempt from United States tax under Article III of the convention. Similarly, if during the taxable year such enterprise were to secure orders in the United States for such merchandise through its sales agents whose sole function in the United States is sales promotion, the orders being transmitted to Switzerland for acceptance, then the profits arising from such sales would not be included in gross income and would be exempt from United States tax.

(c) *United States permanent establishment*—(1) *General.* A Swiss enterprise is subject to United States tax upon its industrial and commercial profits from sources within the United States to the same extent as are nonresident aliens or foreign corporations which are subject to tax pursuant to section 871 (c) or section 882 (a), Internal Revenue Code of 1954, if such enterprise has at any time during the taxable year engaged in trade or business in the United States through a permanent establishment situated therein. If it is so engaged, it is subject to United States tax upon its entire income from sources within the United States except to the extent otherwise exempt from United States tax.

(2) *Allocation of profits.* In the determination of the income taxable to such enterprise for purposes of the United States tax, all industrial and commercial profits from sources within the United States shall be deemed to be allocable to the permanent establishment in the United States. Hence, if a Swiss

enterprise which has a permanent establishment in the United States at some time during the taxable year were to sell in the United States, through a commission agent therein acting in the ordinary course of his business as such, merchandise which has been produced in Switzerland, the profits arising from such sale would be allocable to the permanent establishment to the extent they are derived from sources within the United States, even though the sale is made independently of the permanent establishment.

(3) *Independent basis.* The industrial and commercial profits of the permanent establishment in the United States shall be determined as if the establishment were an independent enterprise engaged in the same or similar activities under the same or similar conditions and dealing at arm's length, or on an independent basis, with the enterprise of which it is a permanent establishment.

§ 509.106 *Control of a United States enterprise by a Swiss enterprise.* In effect, Article IV of the convention provides that, if a Swiss enterprise by reason of its control of a United States enterprise imposes on the latter enterprise conditions different from those which would result from normal business relations between independent enterprises, the accounts between the enterprises shall be adjusted in order to ascertain the true taxable income of each enterprise. The purpose is to place the controlled United States enterprise on a tax parity with an uncontrolled United States enterprise by determining, according to the standard of an uncontrolled enterprise, the true taxable income from the property and business of the controlled enterprise. The basic objective of the article is that, if the accounting records do not truly reflect the taxable income from the property and business of the United States enterprise, the Commissioner shall intervene and, by making such distributions, apportionments, or allocations as he may deem necessary of gross income, deductions, credits, or allowances, or of any item or element affecting taxable income, between the United States enterprise and the Swiss enterprise by which it is controlled or directed, shall determine the true taxable income of the United States enterprise. The provisions of section 482 of the Internal Revenue Code of 1954, and the regulations thereunder, shall, insofar as applicable, be followed in the determination of the taxable income of the United States enterprise.

§ 509.107 *Income from operation of ships or aircraft.* Under Article V of the convention so much of the income from sources within the United States of a Swiss enterprise as consists of earnings derived from the operation of ships or aircraft documented or registered in Switzerland shall not be included in gross income and shall be exempt from United States tax, even though at some time during the taxable year such enterprise has engaged in trade or business in the United States through a permanent establishment situated therein.

§ 509.108 *Dividends*—(a) *General.* (1) The rate of United States tax imposed by the Internal Revenue Code of 1954 upon dividends derived from sources within the United States by a nonresident alien individual who is a resident of Switzerland, or by a Swiss corporation or other entity, shall not exceed 15 percent under the provisions of Article VI of the convention, if such alien, corporation, or other entity at no time during the taxable year in which such dividends are derived has a permanent establishment in the United States.

(2) If, for example, a nonresident alien individual who is a resident of Switzerland performs personal services within the United States during the taxable year, but has at no time during such year a permanent establishment within the United States, he is entitled to the reduced rate of tax with respect to dividends derived in that year from United States sources, as provided in Article VI of the convention, even though under the provisions of section 871 (c) of the Internal Revenue Code of 1954 he has engaged in trade or business within the United States during such year by reason of his having performed personal services therein.

(b) *Dividends paid by related corporation.* The rate of United States tax imposed by the Internal Revenue Code of 1954 upon dividends derived from sources within the United States by a Swiss corporation shall not exceed 5 percent under the provisions of Article VI (2) of the convention if:

(1) The Swiss corporation is a shareholder which controls, directly or indirectly, at the time the dividend is paid 95 percent or more of the entire voting power in the corporation paying the dividend;

(2) Not more than 25 percent of the gross income of the paying corporation for the three-year period immediately preceding the taxable year in which the dividend is paid consists of dividends and interest (other than dividends and interest received by such paying corporation from its own subsidiary corporations, if any);

(3) The relationship between the paying corporation and the Swiss corporation has not been arranged or maintained primarily with the intention of securing the reduced rate of 5 percent; and

(4) The Swiss corporation at no time during the taxable year in which such dividends are derived has a permanent establishment in the United States.

§ 509.109 *Interest.* The rate of United States tax imposed by the Internal Revenue Code of 1954 upon interest on bonds, securities, notes, debentures, or on any other form of indebtedness, including interest on obligations of the United States, obligations of instrumentalities of the United States, and mortgages and bonds secured by real property, which is derived from sources within the United States by a nonresident alien individual who is a resident of Switzerland, or by a Swiss corporation or other entity, shall not exceed 5 percent under the provisions of Article VII of the convention, if such alien, corporation, or other entity at no time during the taxable year in which such interest is derived has a permanent establishment in the United States.

§ 509.110 *Patent and copyright royalties and film rentals.* Royalties and other amounts representing consideration for the right to use copyrights, artistic and scientific works, patents, designs, plans, secret processes and formulae, trademarks, and other like property and rights, including rentals and like payments in respect to motion picture films or for the use of industrial, commercial, or scientific equipment, which are derived from sources within the United States by a nonresident alien individual who is a resident of Switzerland, or by a Swiss corporation or other entity, are exempt from United States tax under the provisions of Article VIII of the convention if such alien, corporation, or other entity at no time during the taxable year in which such items of income are derived has a permanent establishment in the United States.

§ 509.111 *Real property income and natural resource royalties*—(a) *General.* Income of whatever nature derived by a nonresident alien who is a resident of Switzerland, or by a Swiss corporation or other entity, from real property situated in the United States, including gains derived from the sale or exchange of such property, rentals from such property, and royalties in respect of the operation of mines, quarries, or other natural resources situated in the United States, is not exempt from United States tax by the convention. Such items of income are subject to taxation under the provisions of the Internal Revenue Code of 1954 generally applicable to the taxation of nonresident alien individuals and foreign corporations. See Article IX of the convention. Interest derived from mortgages and bonds secured by real property does not constitute income from real property for purposes of this section but is subject to the provisions applicable to interest generally. See § 509.109.

(b) *Net basis*—(1) *General.* Notwithstanding the provisions of paragraph (a) of this section, a nonresident alien who is a resident of Switzerland, or a Swiss corporation or other entity, who during the taxable year derives from sources within the United States any income from real property as described in such paragraph may elect for such taxable year to be subject to United States tax on a net basis as though such alien, corporation, or other entity were engaged in trade or business in the United States during such year through a permanent establishment situated therein.

(2) *Manner of electing.* Such nonresident alien (including an individual, fiduciary, and member of a partnership) shall signify his election to be subject to tax on such a basis by filing Form 1040B clearly marked at the top of the first page thereof as follows: "Return of Resident of Switzerland Electing to File on a Net Basis Pursuant to Article IX of Swiss Income Tax Convention". Such corporation shall signify its election to be subject to tax on such a basis by filing Form 1120 clearly marked at the top of the first page there of as follows: "Return of Swiss Corporation Electing to File on a Net Basis Pursuant to Article IX of Swiss Income Tax Convention". The election so signified shall be irrevocable for the taxable year for which such election is made. All income from sources within the United States, including gains from the sale or exchange of capital assets or of other property, shall be disclosed on the return so filed. See sections 871 and 882 of the Internal Revenue Code of 1954 and the regulations thereunder.

§ 509.112 *Compensation for labor or personal services*—(a) *Exemption from tax.* Under Article X of the convention compensation received by a nonresident alien individual who is a resident of Switzerland for labor or personal services, including the practice of the liberal professions and the rendition of services as a director, performed in the United States shall not be included in gross income and shall be exempt from United States tax in either of the following situations:

(1) *Swiss employer.* Where such individual is temporarily present in the United States for a period or periods not exceeding in the aggregate a total of 183 days during a taxable year beginning on or after January 1, 1951, any compensation received by him (irrespective of when received, if received in taxable years beginning on or after January 1, 1951) for such labor or personal services performed in the United States during such year as an employee of, or under contract with, a nonresident alien (including a nonresident alien individual and fiduciary) who is a resident of Switzerland, or a Swiss corporation or other entity, whether or not such alien, corporation, or other entity is engaged in trade or business within the United States, shall not be included in gross income and shall be exempt from United States tax.

(2) *Other employers.* Where such individual is temporarily present in the United States for a period or periods not exceeding in the aggregate a total of 183 days during a taxable year beginning on or after January 1, 1951, any compensation received by him (irrespective of when received, if received in taxable years beginning on or after January 1, 1951) for such labor or personal services performed in the United States during such year shall not be included in gross income and shall be exempt from United States tax if such compensation does not exceed $10,000 in the aggregate. Thus, if a nonresident alien individual who is a resident of Switzerland performs personal services in the United States during the taxable year as an employee of a domestic corporation for which he receives compensation of $15,000 in the aggregate, none of such compensation shall be exempt from United States tax even though such individual is present in the United States during such year for a period or periods not exceeding a total of 183 days, since the aggregate compensation received is in excess of $10,000.

(b) *Definitions.* For purposes of this section, the term "compensation for labor or personal services" shall include, but shall not be limited to, the compensation, profits, emoluments, or other remuneration of public entertainers, such as, stage, motion picture, television, or radio artists, musicians, and athletes. For the allocation or segregation as between sources within, and sources without, the United States in the case of compensation for labor or personal services, see sections 861 through 864, Internal Revenue Code of 1954, and the regulations thereunder.

(c) *Exception.* The provisions of this section have no application to the income to which Article XI (1) of the convention relates.

§ 509.113 *Government wages, salaries, and pensions*—(a) *General.* Under Article XI of the convention any wage, salary, or similar compensation, or any pension, paid by Switzerland or any agency or instrumentality thereof, or by any political subdivisions or other public authorities of Switzerland, to any alien individual (whether or not a resident of the United States) or to any individual who occupies the dual status of a citizen of the United States and a citizen of Switzerland shall not be included in gross income and shall be exempt from United States tax, even though at some time during the taxable year such individual has engaged in trade or business in the United States through a permanent establishment situated therein.

(b) *Definition.* As used in this section, the term "pensions" means periodic payments made in consideration for services rendered or by way of compensation for injuries received. Under Article XV (2) of the convention the exclusion from gross income, and exemption from United States tax, provided by this section shall not be denied despite the provisions of Article XV. See § 509.118.

(c) *Cross reference.* For the taxation generally of compensation of alien employees of foreign governments and the consequences of executing and filing the waiver provided for in section 247 (b) of the Immigration and Nationality Act, see section 893 of the Internal Revenue Code of 1954 and the regulations thereunder.

§ 509.114 *Private pensions and life annuities*—(a) *General.* Private pensions and life annuities derived from sources within the United States and paid to a nonresident alien individual who is a resident of Switzerland shall not be included in gross income and shall be exempt from United States tax, in accordance with Article XI of the convention, even though at some time during the taxable year such individual has engaged in trade or business in the United States through a permanent establishment situated therein.

(b) *Definitions.* As used in this section, the terms "pensions" means periodic payments made in consideration for services rendered or by way of compensation for injuries received; and the term "life annuities" means a stated sum payable periodically at stated times during life, or during a specified number of years, under an obligation to make the payments in return for adequate and full consideration in money or money's worth.

§ 509.115 *Visiting professors or teachers*—(a) *General.* Pursuant to Article XII of the convention, a professor or teacher, a nonresident alien who is a resident of Switzerland, who temporarily visits the United States for the purpose of teaching for a period not exceeding two years at any university, college, school, or other educational institution situated within the United States shall, for a period not exceeding two years from the date of his initial arrival in the United States, be exempt from United States tax with respect to his remuneration earned in taxable years beginning on or after January 1, 1951, for such teaching during such period not in excess of two years.

(b) *More than two years.* The exemption granted by Article XII is applicable to remuneration earned during such part of the individual's visit as does not exceed two years from the date of arrival even though the total period of his presence in the United States may extend beyond two years, provided that during such entire period he may be considered to be temporarily visiting the United States.

(c) *Residence.* Such exemption shall not apply to the remuneration of an alien who is a resident of the United States or who is not a resident of Switzerland.

(d) *Nonresidence presumed.* An individual who otherwise qualifies for the exemption from United States tax granted by Article XII shall, for a period of not more than two years immediately succeeding the date of his arrival within the United States for the purpose of such teaching, be deemed to have the tax status of a nonresident alien in the absence of proof of his intention to remain indefinitely in the United States. See section 871 of the Internal Revenue Code of 1954 and the regulations thereunder.

§ 509.116 *Students or apprentices*—(a) *General.* Under Article XIII of the convention, a student or apprentice, a nonresident alien who is a resident of Switzerland, who temporarily visits the United States exclusively for the purposes of study or for acquiring business or technical experience shall not include in gross income, and shall be exempt from United States tax with respect to, amounts derived by him in taxable years beginning on or after January 1, 1951, and received during such years from without the United States as remittances for the purposes of his maintenance or studies.

(b) *Residence.* The exemption shall not apply to remittances received by an alien who is a resident of the United States or who is not a resident of Switzerland.

§ 509.117 *Dividends and interest paid by a foreign corporation*—(a) *General*—(1) *Dividends.* A dividend paid by a foreign corporation constitutes, in whole or in part, income from sources within the United States and is subject to tax by the United States when received by a nonresident alien individual or other foreign corporation, if 50 percent or more of the gross income of the paying corporation for the statutory period was

derived from sources within the United States. See section 861 (a) (2) (B), section 872 (a), and section 882 (b), Internal Revenue Code of 1954; and the regulations thereunder.

(2) *Interest.* Interest on bonds, notes, and other interest-bearing obligations of resident foreign corporations constitutes, in its entirety, income from sources within the United States and is subject to tax by the United States when received by a nonresident alien individual or other foreign corporation, if 20 percent or more of the gross income of the paying corporation for the statutory period was derived from sources within the United States. See section 861 (a) (1) (B), section 872 (a), and section 882 (b), Internal Revenue Code of 1954; and the regulations thereunder.

(b) *Exemption from United States tax.* Notwithstanding the provisions of paragraph (a) of this section, Article XIV (1) of the convention provides that dividends and interest paid by any foreign corporation and derived by a nonresident alien who is a resident of Switzerland, or by a Swiss corporation, shall not be included in gross income and shall be exempt from United States tax if such alien or corporation at no time during the taxable year in which such items of income are derived has a permanent establishment in the United States. The exemption so provided shall apply even though the corporation paying the dividends or interest is a resident foreign corporation at the time of payment and without regard to the percentage of its gross income from sources within the United States.

§ 509.118 *Credit against United States tax for Swiss tax*—(a) *General*—(1) *Taxable as though no convention.* Notwithstanding any other provision of the convention the United States, in determining the United States tax of a citizen or resident of the United States, or of a domestic corporation, may, under Article XV (1) (a) of the convention, include in the basis upon which such tax is imposed all items of income taxable under the revenue laws of the United States, as though the convention had not come into effect. For example, despite the exemption from United States tax granted by Article VIII of the convention with respect to a copyright royalty derived from sources within the United States by a resident of Switzerland, such royalty shall be included in gross income and is subject to United States tax when so derived by a resident of Switzerland who is a citizen of the United States, even though such resident has no permanent establishment in the United States.

(2) *Exception.* Notwithstanding the provisions of subparagraph (1) of this paragraph, the exclusion from gross income, and exemption from United States tax, granted by Article XI (1) of the convention with respect to wages, salaries, and similar compensation, and pensions, paid by Switzerland or any agency or instrumentality thereof, or by any political subdivisions or other public authorities of Switzerland, shall not be denied. See Article XV (2) of the convention.

(b) *Application of credit*—(1) *General.* For the purpose of mitigating double taxation, Article XV (1) (a) of the convention provides that a citizen or resident of the United States, or a domestic corporation, deriving income from sources within Switzerland shall be allowed a credit against the United States tax for the amount of Swiss tax paid or accrued during the taxable year. This credit shall be made in accordance with the provisions of section 131 of the Internal Revenue Code of 1939 as in effect on September 27, 1951, but subject to the provisions of Article XVIII (2) of the convention.

(2) *Similar credit requirement.* (i) Article XV (1) (a) further provides that, by virtue of the provisions of Article XV (1) (b) of the convention, relating to the exclusion from basis for computing the Swiss tax, Switzerland satisfies the similar credit requirement set forth in section 901 (b) (3), Internal Revenue Code of 1954, relating to alien residents of the United States, etc.

(ii) This provision of Article XV (1) (a) shall be taken to mean that, solely by reason of the exclusion granted by it under Article XV (1) (b) and without reference to concessions otherwise made by such country, Switzerland satisfies the similar credit requirement only with respect to taxes paid to Switzerland, and not with respect to taxes paid to another foreign country. Nothing in this subdivision shall be construed, however, to prevent Switzerland from otherwise satisfying the similar credit requirement, in accordance with section 901 of the Internal Revenue Code of 1954 and the regulations thereunder, with respect to taxes paid to another foreign country. Thus, if pursuant to a convention between Switzerland and another foreign country, Switzerland were to exempt from its income taxes the income received from sources within such other foreign country by a United States citizen residing in Switzerland, then Switzerland would, in accordance with such regulations under section 901, satisfy the similar credit requirement of section 901 (b) (3) with respect to income taxes paid to such other country by a Swiss citizen residing in the United States.

§ 509.119 *Exchange of information*—(a) *General.* (1) By Article XVI of the convention the United States and Switzerland adopt the principle of exchange of such information as is necessary for carrying out the provisions of the convention, preventing fraud, or detecting practices which are aimed at the reduction of the revenues of either country, but not including information which would be contrary to public policy or which would disclose any trade, business, industrial, or professional secret or any trade process.

(2) The information and correspondence relative to exchange of information may be transmitted directly by the Commissioner to the Director of the Federal Tax Administration.

(b) *Return of information by withholding agents.* (1) To facilitate compliance with Article XVI of the convention, every United States withholding agent shall make and file in duplicate with the District Director of Internal Revenue, Baltimore 2, Maryland, an information return on Form 1042 Supplement, with respect to persons having addresses in Switzerland, which shall be filed for the calendar year 1955 and subsequent calendar years. This return shall be filed simultaneously with Form 1042.

(2) There shall be reported on such Form 1042 Supplement all items of fixed or determinable annual or periodical income (and amounts described in section 402 (a) (2), section 631 (b) and (c), and section 1235 of the Internal Revenue Code of 1954, which are considered to be gains from the sale or exchange of capital assets) derived from sources within the United States and paid to nonresident aliens (including nonresident alien individuals, fiduciaries, and partnerships) and to nonresident foreign corporations, whose addresses at the time of payment were in Switzerland, including such items of income upon which, in accordance with the withholding regulations under the convention, no withholding of United States tax is required; except that any of such items which constitute interest in respect of which Form 1001–S or substitute Form 1001–S has been filed in duplicate with the withholding agent is not required to be reported on such Form 1042 Supplement.

(c) *Information to be furnished in ordinary course.* In compliance with the provisions of Article XVI of the convention the Commissioner will transmit to the Director of the Federal Tax Administration, as soon as practicable after the close of the calendar year 1955 and of each subsequent calendar year during which the convention is in effect, the following information relating to such preceeding calendar year:

(1) The duplicate copy of each available Form 1042 Supplement filed pursuant to paragraph (b) of this section; and

(2) The duplicate copy of each available ownership certificate, Form 1001–S, and substitute Form 1001–S, filed pursuant to the withholding regulations under the convention, in connection with coupon bond interest.

(d) *Information in specific cases.* Under the provisions and limitations of Article XVI of the convention and upon request of the Director of the Federal Tax Administration, the Commissioner shall furnish to the Director information available to, or obtainable by, the Commissioner relative to the tax liability of any person under the revenue laws of Switzerland in any case in which such information is necessary for carrying out the provisions of the convention or for the prevention of fraud or the like in relation to the taxes which are the subject of the convention.

§ 509.120 *Double taxation claims*—(a) *General.* Under Article XVII of the convention, where the taxpayer shows proof that the action of the tax authorities of the United States or Switzerland has resulted, or will result, in double taxation contrary to the provisions of the convention, he is entitled to present the facts to the country of which he is a citizen; or, if he is not a citizen of either country, to the country of which he is a resident; or, if the taxpayer is a corporation or other entity, to the country in which it is created or organized. The article provides that, should the taxpayer's claim be deemed worthy of consideration, the competent authority of the country to which the facts are presented shall undertake to come to an agreement with the competent authority of the other country with a view to equitable avoidance of the double taxation in question.

(b) *Manner of filing claim.* Such a claim on behalf of a United States citizen, corporation, or other entity, or on behalf of a resident of the United States who is not a Swiss citizen, shall be filed with the Commissioner. The claim shall be set up in the form of a letter addressed to "The Commissioner of Internal Revenue, Washington 25, D. C." and shall show fully all facts and law on the basis of which the claimant alleges that such double taxation has resulted or will result. If the Commissioner determines that there is an appropriate basis for the claim under the convention, he shall take up the matter with the Director of the Federal Tax Administration with a view to arranging an agreement of the character contemplated by Article XVII.

§ 509.121 *Beneficiaries of an estate or trust*—(a) *Qualified beneficiary.* If he otherwise satisfies the requirements of the respective articles concerned, a nonresident alien who is a resident of Switzerland and who is a beneficiary of an estate or trust shall be entitled to the exemption from, or reduction in the rate of, United States tax granted by Articles VI, VII, VIII, and XIV of the convention with respect to dividends, interest, and royalties and other like amounts, to the extent that (1) any amount paid, credited, or required to be distributed by such estate or trust to such beneficiary is deemed to consist of such items and (2) such items would, without regard to the convention, be includible in his gross income.

(b) *Amounts otherwise includible in gross income of beneficiary.* For the determination of amounts which, without regard to the convention, are includible in the gross income of the beneficiary, see subchapter J of chapter 1 of the Internal Revenue Code of 1954, and the regulations thereunder.

§ 509.122 *Swiss partnerships*—(a) *General.* Whether an individual, corporation, or other entity, a member of a partnership created or organized under Swiss laws, is subject to United States tax upon such person's distributive share of the income of such partnership depends upon both the status of the partnership and the status of such member.

(b) *Citizen partner.* A citizen or resident of the United States, or a domestic corporation, is subject to United States tax upon such person's distributive share of the income of such partnership as though the convention had not come into effect, but subject to the provisions of § 509.118; even though other members, by reason of benefits granted by the convention, are not subject to United States tax upon their distributive share of such income.

(c) *Noncitizen partner.* In any case in which income is derived from sources within the United States by a partnership created or organized under Swiss laws, any member of such partnership who has a permanent establishment in the United States or who is either a nonresident alien not a resident of Switzerland or is a foreign corporation which is not Swiss is not entitled, with respect to such member's distributive share of such income, to any benefit granted by the convention solely to nonresident aliens residing in Switzerland, or to Swiss corporations or other entities, having no permanent establishment in the United States. Conversely, any member of such partnership who individually complies with the requirements for obtaining any such benefit will be entitled thereto with respect to such member's distributive share of such income. A member of a Swiss partnership which has a permanent establishment in the United States shall likewise be considered to have a permanent establishment in the United States.

[SEAL] O. GORDON DELK,
Acting Commissioner of Internal Revenue.

Approved: October 6, 1955.

H. CHAPMAN ROSE,
Acting Secretary of the Treasury.

PART 510—NORWAY

General regulations under the income tax convention between the United States and the Kingdom of Norway, proclaimed by the President of the United States on December 13, 1951, subject to the protocol of exchange signed on December 11, 1951.

Sec.

510.101 Introductory.
510.102 Applicable provisions of law.
510.103 Scope of the convention.
510.104 Definitions.
510.105 Industrial and commercial profits.
510.106 Control of a United States enterprise by a Norwegian enterprise.
510.107 Income from operation of ships or aircraft.
510.108 Interest.
510.109 Patent and copyright royalties and film rentals.
510.110 Real property income and natural resource royalties.
510.111 Compensation for labor or personal services.
510.112 Government wages, salaries, and pensions.
510.113 Private pensions and life annuities.
510.114 Visiting professors or teachers.
510.115 Students or apprentices.
510.116 Credit against United States tax for Norwegian tax.
510.117 Exchange of information.
510.118 Double taxation claims.
510.119 Beneficiaries of an estate or trust.
510.120 Norwegian partnerships.

AUTHORITY: §§ 510.101 to 510.120 issued under sec. 7805, 68A Stat. 917; 26 U. S. C. 7805.

On June 16, 1955, notice of proposed rule making regarding the general regulations under the income tax convention between the United States and the Kingdom of Norway, proclaimed by the President of the United States on December 13, 1951, was published in the FEDERAL REGISTER (20 F. R. 4219). No objections to the regulations proposed having been received during the 30-day period prescribed in the notice, the regulations set forth below are hereby adopted:

§ 510.101 *Introductory.* The income tax convention between the United States and the Kingdom of Norway, signed June 13, 1949, and proclaimed by the President of the United States on December 13, 1951, subject to the understanding expressed in the protocol of exchange, hereinafter referred to as the convention, provides as follows, effective for taxable years beginning on or after January 1, 1951:

ARTICLE I

(1) The taxes referred to in this Convention are:

(a) In the case of the United States of America: The Federal income tax, including surtaxes.

(b) In the case of Norway: The national and the communal income taxes, including the old age pension tax, the war pension tax, the tax on bank deposits and the seamen's tax.

(2) The present Convention shall also apply to any other income taxes of a substantially similar character imposed by either contracting State subsequently to the date of signature of the present Convention.

ARTICLE II

(1) As used in this Convention:

(a) The term "United States" means the United States of America, and when used in a geographical sense includes only the States, the Territories of Alaska and Hawaii, and the District of Columbia.

(b) The term "Norway" means the Kingdom of Norway; the provisions of the Convention shall not, however, extend to Svalbard and Jan Mayen, nor do they apply to the Norwegian dependencies outside Europe.

(c) The term "permanent establishment" means a branch office, factory, workshop, warehouse or other fixed place of business, but does not include the casual and temporary use of merely storage facilities, nor does it include an agency unless the agent has and exercises a general authority to negotiate and conclude contracts on behalf of an enterprise or has a stock of merchandise from which he regularly fills orders on its behalf. An enterprise of one of the contracting States shall not be deemed to have a permanent establishment in the other State merely because it carries on business dealings in such other State through a bona fide commission agent, broker or custodian acting in the ordinary course of his business as such. The fact that an enterprise of one of the contracting States maintains in the other State a fixed place of business exclusively for the purchase of goods or merchandise shall not of itself constitute such fixed place of business a permanent establishment of such enterprise. The fact that a corporation of one contracting State has a subsidiary corporation which is a corporation of the other State or which is engaged in trade or business in the other State shall not of itself constitute that subsidiary corporation a permanent establishment of its parent corporation.

(d) The term "enterprise of one of the contracting States" means, as the case may be, "United States enterprise" or "Norwegian enterprise".

(e) The term "enterprise" includes every form of undertaking whether carried on by an individual, partnership, corporation, or any other entity.

(f) The term "United States enterprise" means an enterprise carried on in the United States by a resident of the United States or by a United States corporation or other entity; the term "United States corporation or other entity" means a partnership, corporation or other entity created or organized in the United States or under the law of the United States or of any State or Territory of the United States.

(g) The term "Norwegian enterprise" means an enterprise carried on in Norway by a resident of Norway or by a Norwegian corporation or other entity; the term "Norwegian corporation or other entity" means a partnership, corporation or other entity created or organized in Norway or under Norwegian laws.

(h) The term "competent authorities" means, in the case of the United States, the Commissioner of Internal Revenue or his authorized representative; and in the case of Norway, the Ministry of Finance and Customs.

(2) In the application of the provisions of the present Convention by one of the contracting States any term not otherwise defined shall, unless the context otherwise requires, have the meaning which such term has under its own tax laws.

ARTICLE III

(1) An enterprise of one of the contracting States shall not be subject to taxation in the other contracting State in respect of its industrial and commercial profits unless it is engaged in trade or business in such other State through a permanent establishment situated therein. If it is so engaged such other State may impose its tax upon such profits of the enterprise from sources within such other State.

(2) In determining the industrial or commercial profits from sources within the territory of one of the contracting States of an enterprise of the other contracting State, no profits shall be deemed to arise from the mere purchase of goods or merchandise within the territory of the former contracting State by such enterprise.

(3) Where an enterprise of one of the contracting States is engaged in trade or business in the territory of the other contracting State through a permanent establishment situated therein, there shall be attributed to such permanent establishment the industrial or commercial profits which it might be expected to derive if it were an independent enterprise engaged in the same or similar activities under the same or similar conditions and dealing at arm's length with the enterprise of which it is a permanent establishment and the profits so attributed shall, subject to the law of such other contracting State, be deemed to be income from sources within the territory of such other contracting State.

(4) The competent authorities of the two contracting States may lay down rules by agreement for the apportionment of industrial and commercial profits.

ARTICLE IV

Where an enterprise of one of the contracting States, by reason of its participation in the management or the financial structure of an enterprise of the other contracting State, makes with or imposes on the latter, in their commercial or financial relations, conditions different from those which would be made with an independent enterprise, any profits which would normally have accrued to one of the enterprises, but by reason of those conditions have not so accrued, may be included in the profits of that enterprise and taxed accordingly.

ARTICLE V

(1) Income which an enterprise of one of the contracting States derives from the operation of ships or aircraft shall be exempt from taxation in the other contracting State.

(2) The provisions of this Article shall be deemed to suspend the arrangement between the United States and Norway providing for relief from double income taxation on shipping profits, effected by exchanges of notes dated November 26, 1924, January 23, 1925, and March 24, 1925.

ARTICLE VI

Interest on bonds, securities, notes, debentures, or on any other form of indebtedness derived from sources within one of the contracting States by a resident or corporation or other entity of the other contracting State not having a permanent establishment in the former State shall be exempt from taxation in such former State.

ARTICLE VII

Royalties and other amounts derived, as consideration for the right to use copyrights, artistic and scientific works, patents, designs, secret processes and formulas, trade-marks and other like property (including rentals and like payments in respect of motion picture films), from sources within one of the contracting States by a resident or corporation or other entity of the other contracting State not having a permanent establishment in the former State shall be exempt from taxation in such former State: *Provided*, That each of the contracting States reserves the right according to the principles of Article IV to deny a deduction to the payor thereof for such royalty or any portion thereof as is not considered by the revenue authorities of such State to be reasonable consideration for the right to use the property referred to in this Article.

ARTICLE VIII

(1) Income from real property (not including interest derived from mortgages and bonds secured by real property) and royalties in respect of the operation of mines, quarries, or other natural resources, shall be taxable only in the contracting State in which such property, mines, quarries, or other natural resources are situated.

(2) A resident or corporation of one of the contracting States deriving any such income from sources within the other contracting State may, for any taxable year, elect to be subject to the tax of such other contracting State, on a net basis, as if such resident or corporation were engaged in trade or business within such other contracting State through a permanent establishment therein during such taxable year.

ARTICLE IX

Gains derived from the sale or exchange of real property shall be taxable only in the contracting State in which such property is situated.

ARTICLE X

(1) A resident of Norway shall be exempt from United States tax upon compensation for labor or personal services (including the practice of the liberal and artistic professions) if he is temporarily present in the United States for a period or periods not exceeding a total of 183 days during the taxable year and either of the following conditions is met:

(a) His compensation is received for labor or personal services performed as an employee, or under contract with, a resident, or corporation or other entity of Norway, or

(b) His compensation received for labor or personal services does not exceed $10,000.

(2) The provisions of paragraph (1) of this Article shall apply *mutatis mutandis*, to a resident of the United States with respect to compensation for such labor or personal services performed in Norway.

(3) The provisions of paragraphs (1) and (2) of this Article shall have application to directors' fees representing reasonable compensation for services rendered whether or not the recipient of such fees has been present at any time during the taxable year in the contracting State from which payment of such fees has been made.

(4) The provisions of this Article shall have no application to the income to which Article XI (1) relates.

ARTICLE XI

(1) (a) Wages, salaries and similar compensation, and pensions paid by the United States or by the political subdivisions or territories thereof to an individual (other than a Norwegian citizen who is not also a citizen of the United States) shall be exempt from Norwegian tax.

(b) Wages, salaries and similar compensation, and pensions paid either directly by, or from funds or institutions created by, Norway or Norwegian communities or counties (fylker) to an individual (other than a United States citizen who is not also a citizen of Norway) shall be exempt from United States tax.

(2) Private pensions and life annuities derived from within one of the contracting States and paid to individuals residing in the other contracting State shall be exempt from taxation in the former State.

(3) The term "pensions", as used in this Article, means periodic payments made in consideration for services rendered or by way of compensation for injuries received.

(4) The term "life annuities" as used in this Article means a stated sum payable periodically at stated times during life, or during a specified number of years, under an obligation to make the payments in return for adequate and full consideration in money or money's worth.

ARTICLE XII

A professor or teacher, a resident of one of the contracting States, who temporarily visits the other contracting State for the purpose of teaching for a period not exceeding two years at a university, college, school or other educational institution in the other contracting State, shall be exempted in such other contracting State from tax on his remuneration for such teaching for such period.

ARTICLE XIII

A student or apprentice, a resident of one of the contracting States, who temporarily visits the other contracting State exclusively for the purposes of study or for acquiring business or technical experience shall not be taxable in the latter State in respect of remittances received by him from abroad for the purposes of his maintenance or studies.

ARTICLE XIV

(1) It is agreed that double taxation shall be avoided in the following manner:

(a) The United States in determining its taxes specified in Article I of this Convention in the case of its citizens, residents or corporations may, regardless of any other provision of this Convention, include in the basis upon which such taxes are imposed all items of income taxable under the revenue laws of the United States as if this Convention had not come into effect. The United States shall, however, subject to the provisions of section 131, Internal Revenue Code, as in effect on the date of the entry into force of this Convention, deduct from its taxes the amount of Norwegian taxes specified in Article I of this Convention.

(b) Norway in determining its taxes specified in Article I of this Convention in the case of its residents or corporations may, regardless of any other provision of this Convention, include in the basis upon which

such taxes are imposed all items of income taxable under the revenue laws of Norway as if the Convention had not come into effect. Norway shall, however, deduct from the taxes so calculated that portion of such tax liability which the taxpayer's income from sources in the United States (not exempt from United States tax under this Convention) bears to his entire income. The competent authority of Norway may, however, decide that the deduction shall not exceed the United States tax on income taxable in the United States.

(2) The provisions of this Article shall not be construed to deny the exemptions from United States tax or Norwegian tax, as the case may be, granted by Article XI (1) of this Convention.

ARTICLE XV

With a view to the more effective imposition of the taxes to which the present Convention relates, each of the contracting States undertakes, subject to reciprocity, to furnish such information in the matter of taxation, which the authorities of the State concerned have at their disposal or are in a position to obtain under their own law, as may be of use to the authorities of the other State in the assessment of the taxes in question and to lend assistance in the service of documents in connection therewith. Any information so exchanged shall be treated as secret and shall only be disclosed to persons (including a court) concerned with the assessment, determination and collection of the taxes which are the subject of the present Convention, or the determination of appeals in relation thereto. No information shall be exchanged which would disclose a trade, business, industrial or professional secret. Information and correspondence relating to the subject matter of this Article shall be exchanged between the competent authorities of the contracting States in the ordinary course or on request.

ARTICLE XVI

In accordance with the preceding Article and insofar as may be found to be practicable, the competent authorities of each contracting State shall forward to the competent authorities of the other contracting State as soon as practicable after the close of each calendar year the following information relating to such calendar year:

The names and addresses of all addressees within such other State deriving from sources within the former State dividends, interest, royalties, pensions, annuities, wages, salaries, rents, or other fixed or determinable annual or periodical income, showing the amount of such income with respect to each addressee.

ARTICLE XVII

(1) The contracting States undertake to lend assistance and support to each other in the collection of the taxes which are the subject of the present Convention, together with interest, costs, and additions to the taxes.

(2) In the case of applications for enforcement of taxes, revenue claims of each of the contracting States which have been finally determined may be accepted for enforcement by the other contracting State and may be collected in that State in accordance with the laws applicable to the enforcement and collection of its own taxes.

(3) Any application shall include a certification that under the laws of the State making the application the taxes have been finally determined.

(4) The assistance provided for in this Article shall not be accorded with respect to the citizens, corporations, or other entities of the State to which application is made.

ARTICLE XVIII

The State to which application is made for information or assistance shall comply as soon as possible with the request addressed to it except that such State may refuse to comply with the request for reasons of public policy or if compliance would involve violation of a trade, business, industrial or professional secret.

ARTICLE XIX

Where a taxpayer shows proof that the action of the revenue authorities of the contracting States has resulted, or will result, in double taxation contrary to the provisions of the present Convention, he shall be entitled to lodge a claim with the State of which he is a citizen or, if he is not a citizen of either of the contracting States, with the State of which he is a resident, or, if the taxpayer is a corporation or other entity, with the State in which it is created or organized. Should the claim be upheld, the competent authority of such State shall undertake to come to an agreement with the competent authority of the other State with a view to equitable avoidance of the double taxation in question.

ARTICLE XX

(1) The provisions of this Convention shall not be construed to deny or affect in any manner the right of diplomatic and consular officers to other or additional exemptions now enjoyed or which may hereafter be granted to such officers.

(2) The provisions of the present Convention shall not be construed to restrict in any manner any exemption, deduction, credit or other allowance now or hereafter accorded by the laws of one of the contracting States in the determination of the tax imposed by such State.

(3) Should any difficulty or doubt arise as to the interpretation or application of the present Convention, or its relationship to Conventions between one of the contracting States and any other State, the competent authorities of the contracting States may settle the question by mutual agreement.

ARTICLE XXI

(1) The competent authorities of the two contracting States may prescribe regulations necessary to carry into effect the present Convention within the respective States. With respect to the provisions of this Convention relating to exchange of information, service of documents, and mutual assistance in the collection of taxes, such authorities may, by common agreement, prescribe rules concerning matters of procedure, forms of application and replies thereto, conversion of currency, disposition of amounts collected, costs of collection, minimum amounts subject to collection and related matters.

(2) The competent authorities of the two contracting States may communicate with each other directly for the purpose of giving effect to the provisions of this Convention.

ARTICLE XXII

(1) The present Convention shall be ratified and the instruments of ratification shall be exchanged at Washington as soon as possible. It shall have effect for the taxable years beginning on or after the first day of January of the year in which such exchange takes place.

(2) The present Convention shall continue effective for a period of five years and indefinitely after that period, but may be terminated by either of the contracting States at the end of the five-year period or at any time thereafter, provided that at least six months' prior notice of termination has been given and, in such event, the present Convention shall cease to be effective for the taxable years beginning on or after the first day of January next following the expiration of the six-month period.

Done at Washington, in duplicate, in the English and Norwegian languages, the two texts having equal authenticity, this thirteenth day of June, 1949.

For the President of the United States of America:

[SEAL] JAMES E. WEBB.

For his Majesty the King of Norway:

[SEAL] WILHELM MUNTHE MORGENSTIERNE.

PROCLAMATION OF THE PRESIDENT OF THE UNITED STATES DATED DECEMBER 13, 1951

* * * * *

And whereas the Senate of the United States of America, by their resolution of September 17, 1951, two-thirds of the Senators present concurring therein, did advise and consent to the ratification of the aforesaid convention subject to an understanding as follows:

"It is understood that the application of Article XVII of the convention shall be confined and limited as granting authority to each Contracting State to collect only such taxes imposed by the other Contracting State as will insure that the exemption or reduced rate of tax granted under the present convention by such other State, shall not be enjoyed by persons not entitled to such benefits.";

And whereas the text of the aforesaid understanding was communicated by the Government of the United States of America to the Government of the Kingdom of Norway and the aforesaid understanding was accepted by the Government of the Kingdom of Norway;

And whereas the aforesaid convention was duly ratified by the President of the United States of America on November 26, 1951, in pursuance of the aforesaid advice and consent of the Senate and subject to the aforesaid understanding, and the aforesaid convention was duly ratified on the part of the Kingdom of Norway;

And whereas the respective instruments of ratification of the aforesaid convention were duly exchanged at Washington on December 11, 1951, and a protocol of exchange was signed at that place and on that date by the respective Plenipotentiaries of the United States of America and the Kingdom of Norway, the said protocol containing a statement that it is understood by the two Governments that, upon entry into force of the aforesaid convention in accordance with its provisions, Article XVII thereof shall be applied in accordance with the aforesaid understanding;

And whereas it is provided in Article XXII of the aforesaid convention that the convention shall have effect for the taxable years beginning on or after the first day of January of the year in which the exchange of instruments of ratification takes place;

Now, therefore, be it known that I, Harry S. Truman, President of the United States of America, do hereby proclaim and make public the aforesaid convention to the end that the said convention and each and every article and clause thereof, subject to the aforesaid understanding, may be observed and fulfilled with good faith by the United States of America and by the citizens of the United States of America and all other persons subject to the jurisdiction thereof.

§ 510.102 *Applicable provisions of law*—(a) *General.* The Internal Revenue Code of 1954 provides in part as follows:

SUBTITLE A—INCOME TAXES

* * * * *

SEC. 894. *Income exempt under treaty.* Income of any kind, to the extent required by any treaty obligation of the United States, shall not be included in gross income and shall be exempt from taxation under this subtitle.

* * * * *

SUBTITLE F—PROCEDURE AND ADMINISTRATION

• • • • •

SEC. 7805. *Rules and regulations*—(a) *Authorization.* Except where such authority is expressly given by this title to any person other than an officer or employee of the Treasury Department, the Secretary or his delegate shall prescribe all needful rules and regulations for the enforcement of this title, including all rules and regulations as may be necessary by reason of any alteration of law in relation to internal revenue.

(b) *Retroactivity of regulations or rulings.* The Secretary or his delegate may prescribe the extent, if any, to which any ruling or regulation, relating to the internal revenue laws, shall be applied without retroactive effect.

• • • • •

(b) *Internal Revenue Code of 1939.* Any reference in §§ 510.101 to 510.120 to any provision of the Internal Revenue Code of 1954 shall, where applicable, be deemed also to refer to the corresponding provision of the Internal Revenue Code of 1939.

(c) *Effective date of regulations.* Pursuant to sections 894 and 7805 of the Internal Revenue Code of 1954, Article XXI of the convention, and other provisions of the internal revenue laws, §§ 510.101 to 510.120 are hereby prescribed effective for taxable years beginning on or after January 1, 1951. All regulations inconsistent herewith are modified accordingly.

§ 510.103 *Scope of the convention*—(a) *Purpose of convention.* The primary purposes of the convention, to be accomplished on a reciprocal basis, are to avoid double taxation upon certain items of income derived from sources within one country by residents or corporations or other entities of the other country and to provide for administrative cooperation between the competent tax authorities of the two countries looking to the avoidance of double taxation and the prevention of fiscal evasion.

(b) *Exemption from United States tax.* The following items of income from sources within the United States are exempt from United States tax for taxable years beginning on or after January 1, 1951, subject to the respective articles of the convention:

(1) Industrial and commercial profits of a Norwegian enterprise having no permanent establishment in the United States (Article III);

(2) Income derived by a Norwegian enterprise from the operation of ships or aircraft (Article V);

(3) Interest derived by a nonresident alien who is a resident of Norway, or by a Norwegian corporation or other entity, if such alien, corporation, or other entity has no permanent establishment in the United States (Article VI);

(4) Patent and copyright royalties, and other like amounts, including motion picture film rentals, derived by a nonresident alien who is a resident of Norway, or by a Norwegian corporation or other entity, if such alien, corporation, or other entity has no permanent establishment in the United States (Article VII);

(5) Compensation, subject to certain limitations, for personal services performed in the United States by a nonresident alien individual who is a resident of Norway (Article X);

(6) Compensation and pensions paid by Norway to an alien individual, and to a citizen of Norway who is also a citizen of the United States, including such items as are from sources without the United States (Article XI);

(7) Private pensions and life annuities paid to a nonresident alien individual who is a resident of Norway (Article XI); and

(8) Remuneration derived from certain teaching in the United States by a professor or teacher who is a nonresident alien residing in Norway (Article XII).

(c) *Students or apprentices.* Remittances received from abroad for the purpose of maintenance or studies by a student or apprentice, a nonresident alien residing in Norway, who is temporarily present in the United States under specified circumstances are also exempt from United States tax (Article XIII).

(d) *Withholding regulations.* For regulations pertaining to the release or refund of excess tax withheld, and to exemption from withholding of United States tax at source, in the case of interest, patent and copyright royalties, film rentals, private pensions, and life annuities, received from sources within the United States by a nonresident alien who is a resident of Norway, or by a Norwegian corporation or other entity, see Treasury Decision 5956, approved December 9, 1952 (26 CFR (1939) 7.100 through 7.109).

(e) *United States citizens, residents, and corporations.* (1) Any citizen of Norway who is a resident of the United States is liable to United States tax as though the convention had not come into effect; however, such alien resident of the United States is entitled to the foreign tax credit in accordance with Article XIV of the convention and is also entitled to the benefits of Article XI (1) and Article XX.

(2) A citizen of the United States, even though resident in Norway, or a domestic corporation, even though engaged in trade or business in Norway through a permanent establishment situated therein, is also liable to United States tax as though the convention had not come into effect but is entitled to the foreign tax credit and, to the extent applicable, to the benefits of Article XI (1).

(f) *Other provisions applicable to Norwegian residents and corporations.* Except as otherwise expressly provided by the convention, the United States tax liability of a nonresident alien who is a resident of Norway, or of a Norwegian corporation or other entity, is determined in accordance with the provisions of the Internal Revenue Code of 1954 relating to nonresident alien individuals and foreign corporations.

§ 510.104 *Definitions*—(a) *General.* Any term defined in the convention or §§ 510.101 to 510.120 shall have the meaning so assigned to it; any term not so defined shall, unless the context otherwise requires, have the meaning which such term has under the internal revenue laws of the United States.

(b) *Specific terms.* As used in §§ 510.101 to 510.120—

(1) *United States tax.* The term "United States tax" means the Federal income tax, including surtaxes, of the United States and any other income tax of a substantially similar character imposed by the United States after June 13, 1949.

(2) *Norwegian tax.* The term "Norwegian tax" means the national and the communal income taxes of Norway, including the old age pension tax, the war pension tax, the tax on bank deposits and the seamen's tax, and any other income tax of a substantially similar character imposed by Norway after June 13, 1949.

(3) *United States.* The term "United States" means the United States of America; and, when used in a geographical sense, includes only the States, the Territories of Alaska and Hawaii, and the District of Columbia.

(4) *Norway.* The term "Norway" means the Kingdom of Norway, but does not include Svalbard, Jan Mayen, or the Norwegian dependencies outside Europe.

(5) *Permanent establishment* — (i) *Fixed place of business.* The term "permanent establishment" means a branch office, factory, workshop, warehouse, or other fixed place of business, but does not include the casual and temporary use of merely storage facilities. It implies the active conduct of a business enterprise. The mere ownership, for example, of timberlands or a warehouse in the United States by a Norwegian enterprise does not mean that such enterprise, in the absence of any business activity therein, has a permanent establishment in the United States. The fact that a Norwegian enterprise maintains in the United States an office or other fixed place of business used exclusively for the purchase for such enterprise of goods or merchandise shall not of itself constitute such fixed place of business a permanent establishment of such enterprise.

(ii) *Subsidiary corporation.* The fact that a Norwegian corporation has a domestic subsidiary corporation, or a foreign subsidiary corporation which is engaged in trade or business in the United States through a permanent establishment situated therein, does not of itself constitute either subsidiary corporation the United States permanent establishment of the Norwegian parent corporation.

(iii) *Agency.* A Norwegian enterprise which has an agency in the United States does not thereby have a permanent establishment in the United States, unless the agent has and exercises a general authority to negotiate and conclude contracts on behalf of such enterprise or unless he has a stock of merchandise from which he regularly fills orders on its behalf. If the enterprise has an agent in the United States who has power to contract on its behalf, but only at fixed prices and under conditions determined by such principal, it does not thereby necessarily have a permanent establishment in the United States. The mere fact that an agent of a Norwegian enterprise—assuming he has no general authority to negotiate and conclude contracts on behalf of his principal—maintains samples, or occasionally fills orders from incidental stocks of goods maintained, in the United States does not of itself mean that such enterprise has a permanent establishment in the United States. The mere fact that salesmen, employees of a Norwegian enterprise, promote the sale of their employer's products in the United States or that a Norwegian enterprise transacts business in the United States by means of mail order activities does not mean that such enterprise has a permanent establishment in the United States. A Norwegian enterprise shall not be deemed to have a permanent establishment in the United States merely because it carries on business dealings in the United States through a bona fide commission agent, broker, or custodian, acting in the ordinary course of his business as such.

(6) *Enterprise.* The term "enterprise" means any commercial or industrial undertaking carried on by any person, for example, by an individual, partnership, or corporation. It includes such activities as manufacturing, merchandising, mining, processing, banking, and insuring. It does not include the rendition of personal services. Hence, a nonresident alien individual who is a resident of Norway and who performs personal services is not, merely by reason of such services, engaged in a Norwegian enterprise within the meaning of the convention; consequently, his liability to United States tax is not determined under Article III of the convention, if he has not otherwise carried on a Norwegian enterprise.

(7) *Norwegian enterprise.* The term "Norwegian enterprise" means an enterprise carried on in Norway by a nonresident alien individual who is a resident of Norway, or by a Norwegian corporation or other entity. Thus, an enterprise carried on wholly outside Norway by a Norwegian corporation is not a Norwegian enterprise within the meaning of the convention.

(8) *Norwegian corporation or other entity.* The term "Norwegian corporation or other entity" means a partnership, corporation, or other entity created or organized in Norway or under Norwegian laws.

(9) *United States enterprise.* The term "United States enterprise" means an enterprise carried on in the United States by an individual who is a resident of the United States or by a United States corporation or other entity.

(10) *United States corporation or other entity.* The term "United States corporation or other entity" means a partnership, corporation, or other entity created or organized in the United States or under the law of the United States or of any State or Territory of the United States.

(11) *Industrial and commercial profits.* The term "industrial and commercial profits" means profits arising from industrial, commercial, mercantile, manufacturing, and like activities of an enterprise. It does not include dividends, interest, rents, royalties, or other mere investment income, or remuneration for personal services. In determining the industrial and commercial profits from sources within the United States of a Norwegian enterprise, no profits shall be deemed to arise from the mere purchase of goods or merchandise within the United States by such enterprise.

(12) *Commissioner.* The term "Commissioner" means the Commissioner of Internal Revenue or his authorized representative.

(13) *Ministry of Finance and Customs.* The term "Ministry of Finance and Customs" means the Ministry of Finance and Customs (Finans- og Tolldepartementet) of Norway.

§ 510.105 *Industrial and commercial profits*—(a) *General.* (1) Article III of the convention adopts the principle that an enterprise of one of the contracting States shall not be taxable by the other contracting State upon its industrial and commercial profits unless it is engaged in trade or business in the latter State through a permanent establishment situated therein. Accordingly, a Norwegian enterprise is subject to United States tax upon its industrial and commercial profits, to the extent of such profits from sources within the United States, only if it is engaged in trade or business in the United States at some time during the taxable year through a permanent establishment situated therein.

(2) From the standpoint of the United States tax the article has application only to a Norwegian enterprise and its industrial and commercial profits from sources within the United States. Thus, a nonresident alien individual who is a citizen of Norway, or a Norwegian corporation or other entity, carrying on an enterprise which is not Norwegian, is subject to tax on such income of such enterprise pursuant to section 871 (c) or section 882 (a), Internal Revenue Code of 1954, if such alien, corporation, or other entity has engaged in trade or business in the United States at any time during the taxable year, even though it has not had a permanent establishment therein at any time within such year.

(b) *No United States permanent establishment.* A Norwegian enterprise is not subject to United States tax upon its industrial and commercial profits from sources within the United States, nor shall such profits be included in gross income, if such enterprise at no time during the taxable year in which such profits are derived has engaged in trade or business in the United States through a permanent establishment situated therein. For example, if during the taxable year an enterprise carried on in Norway by a nonresident alien individual who is a resident of Norway, or by a Norwegian corporation, were to sell merchandise, such as textiles, furs, or canned fish products, in the United States through a bona fide commission agent or broker in the United States acting in the ordinary course of his business as such agent or broker, the profits arising from such sale would not be included in gross income and would be exempt from United States tax under Article III of the convention. Similarly, if during the taxable year such enterprise were to secure orders in the United States for such merchandise through its sales agents whose sole function in the United States is sales promotion, the orders being transmitted to Norway for acceptance, then the profits arising from such sales would not be included in gross income and would be exempt from United States tax.

(c) *United States permanent establishment*—(1) *General.* A Norwegian enterprise is subject to United States tax upon its industrial and commercial profits from sources within the United States to the same extent as are nonresident aliens or foreign corporations which are subject to tax pursuant to section 871 (c) or section 882 (a), Internal Revenue Code of 1954, if such enterprise at any time during the taxable year in which such profits are derived has engaged in trade or business in the United States through a permanent establishment situated therein. If it is so engaged, it is subject to United States tax upon its entire income from sources within the United States except to the extent otherwise exempt from United States tax.

(2) *Allocation of profits.* In the determination of the income taxable to such enterprise for purposes of the United States tax, all industrial and commercial profits from sources within the United States shall be deemed to be allocable to the permanent establishment in the United States. Hence, if a Norwegian enterprise which has a permanent establishment in the United States at some time during the taxable year were to sell in the United States, through a bona fide commission agent therein acting in the ordinary course of his business as such, merchandise which has been produced in Norway, the profits arising from such sale would be allocable to the permanent establishment to the extent they are derived from sources within the United States, even though the sale is made independently of the permanent establishment.

(d) *Independent basis.* The industrial and commercial profits of the permanent establishment in the United States shall be determined as if the establishment were an independent enterprise engaged in the same or similar activities under the same or similar conditions and dealing at arm's length, or on an independent basis, with the enterprise of which it is a permanent establishment. Any such profits so attributed to such permanent establishment shall, subject to the provisions of the Internal Revenue Code of 1954, be deemed to be income from sources within the United States.

§ 510.106 *Control of a United States enterprise by a Norwegian enterprise.* In effect, Article IV of the convention provides that, if a Norwegian enterprise by reason of its control of a United States enterprise imposes on the latter enterprise conditions different from those which would result from normal business relations between independent enterprises, the accounts between the enterprises shall be adjusted in order to ascertain the true taxable income of each enterprise. The purpose is to place the controlled United States enterprise on a tax parity with an uncontrolled United States enterprise by determining, according to the standard of an uncontrolled enterprise, the true taxable in-

come from the property and business of the controlled enterprise. The basic objective of the article is that, if the accounting records do not truly reflect the taxable income from the property and business of the United States enterprise, the Commissioner shall intervene and, by making such distributions, apportionments, or allocations as he may deem necessary of gross income, deductions, credits, or allowances, or of any item or element affecting taxable income, between the United States enterprise and the Norwegian enterprise by which it is controlled or directed, shall determine the true taxable income of the United States enterprise. The provisions of section 482 of the Internal Revenue Code of 1954, and the regulations thereunder, shall, insofar as applicable, be followed in the determination of the taxable income of the United States enterprise.

§ 510.107 *Income from operation of ships or aircraft*—(a) *Exempt from tax.* Under Article V of the convention so much of the income from sources within the United States of a Norwegian enterprise as consists of earnings derived from the operation of ships or aircraft, whether or not they are documented or registered in or under the laws of Norway, shall not be included in gross income and shall be exempt from United States tax, even though at some time during the taxable year such enterprise has engaged in trade or business in the United States through a permanent establishment situated therein.

(b) *Prior arrangement suspended.* The provisions of Article V shall be deemed to suspend the arrangement between the United States and Norway providing for relief from double income taxation on shipping profits, effected by exchanges of notes dated November 26, 1924, January 23, 1925, and March 24, 1925 (Executive Agreement Series, No. 15; 47 Stat. 2617). Accordingly, while the provisions of Article V are in effect, no exemption from United States tax shall be accorded pursuant to, or by reason of, any agreement effected by the exchange of such notes. This paragraph shall not be construed, however, to restrict any exemption which, without reference to an exchange of notes, is accorded by section 872 (b) and section 883 of the Internal Revenue Code of 1954. See Article XX (2) of the convention.

§ 510.108 *Interest.* (a) Interest on bonds, securities, notes, debentures, or on any other form of indebtedness, including interest on obligations of the United States, interest on obligations of instrumentalities of the United States, and interest on mortgages and bonds secured by real property, which is derived from sources within the United States by a nonresident alien individual who is a resident of Norway, or by a Norwegian corporation or other entity, shall not be included in gross income and shall be exempt from United States tax under the provisions of Article VI of the convention if such alien, corporation, or other entity at no time during the taxable year in which such interest is derived has a permanent establishment in the United States.

(b) If, for example, a nonresident alien individual who is a resident of Norway performs personal services within the United States during the taxable year, but has at no time during such year a permanent establishment within the United States, he is entitled to the exemption from United States tax with respect to interest derived in that year from United States sources, as provided in Article VI of the convention, even though under the provisions of section 871 (c) of the Internal Revenue Code of 1954 he has engaged in trade or business within the United States during such year by reason of his having performed personal services therein.

§ 510.109 *Patent and copyright royalties and film rentals*—(a) *General.* Royalties, and other amounts, representing consideration for the right to use copyrights, artistic and scientific works, patents, designs, secret processes and formulas, trademarks, and other like property, including rentals and like payments in respect of motion picture films, which are derived from sources within the United States by a nonresident alien individual who is a resident of Norway, or by a Norwegian corporation or other entity, shall not be included in gross income and shall be exempt from United States tax under the provisions of Article VII of the convention if such alien, corporation, or other entity at no time during the taxable year in which such items of income are derived has a permanent establishment in the United States.

(b) *Items not deductible.* Under the provisions of Article VII the United States reserves the right, according to the principles of Article IV and § 510.106, to deny a deduction to the payer thereof for such royalties and other like amounts, or any portion thereof, as is considered by the Commissioner not to be reasonable consideration for the right to use the property involved.

§ 510.110 *Real property income and natural resource royalties*—(a) *General.* Income of whatever nature derived by a nonresident alien who is a resident of Norway, or by a Norwegian corporation or other entity, from real property situated in the United States, including gains derived from the sale or exchange of such property, rentals from such property, and royalties in respect of the operation of mines, quarries, timber, or other natural resources situated in the United States, is not exempt from United States tax by the convention. Such items of income are subject to taxation under the provisions of the Internal Revenue Code of 1954 generally applicable to the taxation of nonresident alien individuals and foreign corporations. See Articles VIII (1) and IX of the convention. Interest derived from mortgages and bonds secured by real property does not constitute income from real property for purposes of this section but is subject to the provisions applicable to interest generally. See § 510.108.

(b) *Net basis*—(1) *General.* Notwithstanding the provisions of paragraph (a) of this section, a nonresident alien who is a resident of Norway, or a Norwegian corporation, who during the taxable year derives from sources within the United States any income from real property as described in such paragraph may elect for such taxable year to be subject to United States tax on a net basis as though such alien or corporation were engaged in trade or business in the United States during such year through a permanent establishment situated therein. See Article VIII (2) of the convention.

(2) *Manner of electing.* Such nonresident alien (including an individual, fiduciary, and member of a partnership) shall signify his election to be subject to the tax on such a basis by filing Form 1040B clearly marked at the top of the first page thereof as follows: "Return of Resident of Norway Electing to File on a Net Basis Pursuant to Article VIII of Norwegian Income Tax Convention." Such corporation shall signify its election to be subject to tax on such a basis by filing Form 1120 clearly marked at the top of the first page thereof as follows: "Return of Norwegian Corporation Electing to File on a Net Basis Pursuant to Article VIII of Norwegian Income Tax Convention". The election so signified shall be irrevocable for the taxable year for which such election is made. All income from sources within the United States, including gains from the sale or exchange of capital assets or of other property, shall be disclosed on the return so filed. See sections 871 and 882 of the Internal Revenue Code of 1954 and the regulations thereunder.

§ 510.111 *Compensation for labor or personal services*—(a) *Exemption from tax.* Under Article X of the convention compensation received by a nonresident alien individual who is a resident of Norway for labor or personal services, including the practice of the liberal and artistic professions, performed in the United States shall not be included in gross income and shall be exempt from United States tax in either of the following situations:

(1) *Norwegian employer.* Where such individual is temporarily present in the United States for a period or periods not exceeding in the aggregate a total of 183 days during a taxable year beginning on or after January 1, 1951, any compensation received by him (irrespective of when received, if received in taxable years beginning on or after January 1, 1951) for such labor or personal services performed in the United States during such year as an employee of, or under contract with, a nonresident alien (including a nonresident alien individual and fiduciary) who is a resident of Norway, or a Norwegian corporation or other entity, whether or not such alien, corporation, or other entity is engaged in trade or business within the United States, shall not be included in gross income and shall be exempt from United States tax.

(2) *Other employers.* Where such individual is temporarily present in the United States for a period or periods not exceeding in the aggregate a total of

183 days during a taxable year beginning on or after January 1, 1951, any compensation received by him (irrespective of when received, if received in taxable years beginning on or after January 1, 1951) for such labor or personal services performed in the United States during such year shall not be included in gross income and shall be exempt from United States tax if such compensation does not exceed $10,000 in the aggregate. Thus, if a nonresident alien individual who is a resident of Norway performs personal services in the United States during the taxable year as an employee of a domestic corporation for which he receives compensation of $15,000 in the aggregate, none of such compensation shall be exempt from United States tax even though such individual is present in the United States during such year for a period or periods not exceeding a total of 183 days, since the aggregate compensation received is in excess of $10,000.

(b) *Definitions.* For purposes of this section, the term "compensation for labor or personal services" shall include, but shall not be limited to, the compensation, profits, emoluments, or other remuneration of public entertainers, such as, stage, motion picture, television, or radio artists, musicians, and athletes. It shall also include directors' fees representing reasonable compensation for services rendered, whether or not the recipient of such fees has been present at any time during the taxable year in the contracting State from which payment of such fees has been made. For the allocation or segregation as between sources within, and sources without, the United States in the case of compensation for labor or personal services, see sections 861 through 864, Internal Revenue Code of 1954, and the regulations thereunder.

(c) *Exception.* The provisions of this section have no application to the income to which Article XI (1) of the convention relates.

§ 510.112 *Government wages, salaries, and pensions*—(a) *General.* Under Article XI of the convention any wage, salary, or similar compensation, or any pension, paid directly by the Government of Norway or by Norwegian communities or counties (fylker), or paid from funds or institutions created by such Government, communities, or counties, to any alien individual (whether or not a resident of the United States) or to any individual who occupies the dual status of a citizen of the United States and a citizen of Norway shall not be included in gross income and shall be exempt from United States tax, even though at some time during the taxable year such individual has engaged in trade or business in the United States through a permanent establishment situated therein.

(b) *Definition.* As used in this section, the term "pensions" means periodic payments made in consideration for services rendered or by way of compensation for injuries received. Under Article XIV (2) of the convention the exclusion from gross income, and exemption from United States tax, provided by this section shall not be denied despite the provisions of Article XIV. See § 510.116.

(c) *Cross reference.* For the taxation generally of compensation of alien employees of foreign governments and the consequences of executing and filing the waiver provided for in section 247 (b) of the Immigration and Nationality Act, see section 893 of the Internal Revenue Code of 1954 and the regulations thereunder.

§ 510.113 *Private pensions and life annuities*—(a) *General.* Private pensions and life annuities derived from sources within the United States and paid to a nonresident alien individual who is a resident of Norway shall not be included in gross income and shall be exempt from United States tax, in accordance with Article XI of the convention, even though at some time during the taxable year in which such items of income are derived such individual has engaged in trade or business in the United States through a permanent establishment situated therein.

(b) *Definitions.* As used in this section, the term "pensions" means periodic payments made in consideration for services rendered or by way of compensation for injuries received; and the term "life annuities" means a stated sum payable periodically at stated times during life, or during a specified number of years, under an obligation to make the payments in return for adequate and full consideration in money or money's worth.

§ 510.114 *Visiting professors or teachers*—(a) *General.* Pursuant to Article XII of the convention a professor or teacher, a nonresident alien who is a resident of Norway, who temporarily visits the United States for the purpose of teaching for a period not exceeding two years at any university, college, school, or other educational institution situated within the United States shall, for a period not exceeding two years from the date of his initial arrival in the United States, be exempt from United States tax with respect to his remuneration earned in taxable years beginning on or after January 1, 1951, for such teaching during such period not in excess of two years.

(b) *More than two years.* The exemption granted by Article XII is applicable to remuneration earned during such part of the individual's visit as does not exceed two years from the date of arrival even though the total period of his presence in the United States may extend beyond two years, provided that during such entire period he may be considered to be temporarily visiting the United States.

(c) *Residence.* Such exemption shall not apply to the remuneration of an alien who is a resident of the United States or who is not a resident of Norway.

(d) *Nonresidence presumed.* An individual who otherwise qualifies for the exemption from United States tax granted by Article XII shall, for a period of not more than two years immediately succeeding the date of his arrival within the United States for the purpose of such teaching, be deemed to have the tax status of a nonresident alien in the absence of proof of his intention to remain indefinitely in the United States. See section 871 of the Internal Revenue Code of 1954 and the regulations thereunder.

§ 510.115 *Students or apprentices*—(a) *General.* Under Article XIII of the convention a student or apprentice, a nonresident alien who is a resident of Norway, who temporarily visits the United States exclusively for the purposes of study or for acquiring business or technical experience shall not include in gross income, and shall be exempt from United States tax with respect to, amounts derived by him in taxable years beginning on or after January 1, 1951, and received during such years from without the United States as remittances for the purposes of his maintenance or studies.

(b) *Residence.* The exemption shall not apply to remittances received by an alien who is a resident of the United States or who is not a resident of Norway.

§ 510.116 *Credit against United States tax for Norwegian tax*—(a) *General*—(1) *Taxable as though no convention.* Notwithstanding any other provision of the convention the United States, in determining the United States tax of a citizen or resident of the United States, or of a domestic corporation, may, under Article XIV (1) (a) of the convention, include in the basis upon which such tax is imposed all items of income taxable under the revenue laws of the United States, as though the convention had not come into effect. For example, despite the exemption from United States tax granted by Article VI of the convention with respect to interest derived from sources within the United States by a resident of Norway, such interest shall be included in gross income and is subject to United States tax when so derived by a resident of Norway who is a citizen of the United States, even though such resident has no permanent establishment in the United States.

(2) *Exception.* Notwithstanding the provisions of subparagraph (1) of this paragraph, the exclusion from gross income, and exemption from United States tax, granted by Article XI (1) of the convention with respect to wages, salaries, and similar compensation, and pensions, paid by Norway or Norwegian communities or counties shall not be denied. See Article XIV (2) of the convention.

(b) *Application of credit.* For the purpose of mitigating double taxation Article XIV (1) (a) of the convention provides that a citizen or resident of the United States, or a domestic corporation, deriving income from sources within Norway shall be allowed a credit against the United States tax for the amount of Norwegian tax paid or accrued during the taxable year. This credit shall be made in accordance with the provisions of section 131 of the Internal Revenue Code of 1939 as in effect on December 11, 1951, but subject to the provisions of Article XX (2) of the convention.

§ 510.117 *Exchange of information*—(a) *General.* (1) By Article XV of the

convention the United States and Norway adopt the principle of exchange of such information as may be of use for carrying out the provisions of the convention, preventing fraud, or detecting practices which are aimed at the reduction of the revenues of either country, but not including information which would be contrary to public policy or which would disclose any trade, business, industrial, or professional secret.

(2) The information and correspondence relative to exchange of information may be transmitted directly by the Commissioner to the Ministry of Finance and Customs.

(b) *Return of information by withholding agents.* (1) To facilitate compliance with Article XVI of the convention, every United States withholding agent shall make and file in duplicate with the District Director of Internal Revenue, Baltimore 2, Maryland, an information return on Form 1042 Supplement, with respect to Norwegian addressees, which shall be filed for the calendar year 1955 and subsequent calendar years. This return shall be filed simultaneously with Form 1042.

(2) There shall be reported on such Form 1042 Supplement all items of fixed or determinable annual or periodical income (and amounts described in section 402 (a) (2), section 631 (b) and (c), and section 1235 of the Internal Revenue Code of 1954, which are considered to be gains from the sale or exchange of capital assets) derived from sources within the United States and paid to nonresident aliens (including nonresident alien individuals, fiduciaries, and partnerships) and to nonresident foreign corporations, whose addresses at the time of payment were in Norway, including such items of income upon which, in accordance with the withholding regulations under the convention, no withholding of United States tax is required; except that any of such items which constitute interest in respect of which Form 1001–NO or substitute Form 1001–NO has been filed in duplicate with the withholding agent is not required to be reported on such Form 1042 Supplement.

(c) *Information to be furnished in ordinary course.* In compliance with the provisions of Article XVI of the convention the Commissioner will transmit to the Ministry of Finance and Customs, as soon as practicable after the close of the calendar year 1955 and of each subsequent calendar year during which the convention is in effect, the following information relating to such preceding calendar year:

(1) The duplicate copy of each available Form 1042 Supplement filed pursuant to paragraph (b) of this section; and

(2) The duplicate copy of each available ownership certificate, Form 1001–NO, and substitute Form 1001–NO, filed pursuant to the withholding regulations under the convention, in connection with coupon bond interest.

(d) *Information in specific cases.* Under the provisions and limitations of Articles XV and XVIII of the convention and upon request of the Ministry of Finance and Customs, the Commissioner shall furnish to the Ministry information available to, or obtainable by, the Commissioner relative to the tax liability of any person under the revenue laws of Norway in any case in which such information is necessary to the administration of the provisions of the convention or of statutory provisions against tax avoidance, or in which such information is necessary for the prevention of fraud.

§ 510.118 *Double taxation claims*—(a) *General.* Under Article XIX of the convention, where the taxpayer shows proof that the action of the revenue authorities of the United States or Norway has resulted, or will result, in double taxation contrary to the provisions of the convention, he is entitled to lodge a claim with the country of which he is a citizen; or, if he is not a citizen of either country, with the country of which he is a resident; or, if the taxpayer is a corporation or other entity, with the country in which it is created or organized. The article provides that, should the claim be upheld, the competent authority of the country with which the claim is lodged shall undertake to come to an agreement with the competent authority of the other country with a view to equitable avoidance of the double taxation in question.

(b) *Manner of filing claim.* Such a claim on behalf of a United States citizen, corporation, or other entity, or on behalf of a resident of the United States who is not a Norwegian citizen, shall be filed with the Commissioner. The claim shall be set up in the form of a letter addressed to "The Commissioner of Internal Revenue, Washington 25, D. C." and shall show fully all facts and law on the basis of which the claimant alleges that such double taxation has resulted or will result. If the Commissioner determines that there is an appropriate basis for the claim under the convention, he shall take up the matter with the Ministry of Finance and Customs with a view to arranging an agreement of the character contemplated by Article XIX.

§ 510.119 *Beneficiaries of an estate or trust*—(a) *Qualified beneficiary.* If he otherwise satisfies the requirements of the respective articles concerned, a nonresident alien who is a resident of Norway and who is a beneficiary of an estate or trust shall be entitled to the exemption from United States tax granted by Articles VI and VII of the convention with respect to interest, and patent royalties and other like amounts, to the extent that (1) any amount paid, credited, or required to be distributed by such estate or trust to such beneficiary is deemed to consist of such items and (2) such items would, without regard to the convention, be includible in his gross income.

(b) *Amounts otherwise includible in gross income of beneficiary.* For the determination of amounts which, without regard to the convention, are includible in the gross income of the beneficiary, see subchapter J of chapter 1 of the Internal Revenue Code of 1954, and the regulations thereunder.

§ 510.120 *Norwegian partnerships*—(a) *General.* Whether an individual, corporation, or other entity, a member of a partnership created or organized in Norway or under Norwegian laws, is subject to United States tax upon such person's distributive share of the income of such partnership depends upon both the status of the partnership and the status of such member.

(b) *Citizen partner.* A citizen or resident of the United States, or a domestic corporation, is subject to United States tax upon such person's distributive share of the income of such partnership as though the convention had not come into effect, but subject to the provisions of § 510.116; even though other members, by reason of benefits granted by the convention, are not subject to United States tax upon their distributive share of such income.

(c) *Noncitizen partner.* In any case in which income is derived from sources within the United States by a partnership created in Norway or under Norwegian laws, any member of such partnership who has a permanent establishment in the United States or who is either a nonresident alien not a resident of Norway or is a foreign corporation which is not Norwegian is not entitled, with respect to such member's distributive share of such income, to any benefit granted by the convention solely to nonresident aliens residing in Norway, or to Norwegian corporations or other entities, having no permanent establishment in the United States. Conversely, any member of such partnership who individually complies with the requirements for obtaining any such benefit will be entitled thereto with respect to such member's distributive share of such income. A member of a Norwegian partnership which has a permanent establishment in the United States shall likewise be considered to have a permanent establishment in the United States.

[SEAL] O. GORDON DELK,
Acting Commissioner of Internal Revenue.

Approved: October 6, 1955.

H. CHAPMAN ROSE,
Acting Secretary of the Treasury.

TITLE 29—LABOR

Chapter V—Wage and Hour Division, Department of Labor

PART 516—RECORDS TO BE KEPT BY EMPLOYERS

MISCELLANEOUS AMENDMENTS

On August 6, 1955, notice was published in the FEDERAL REGISTER (20 F. R. 5701), of a proposal to amend §§ 516.5 (a) (2) (iv) and 516.18 (a) (2) of Part 516, issued pursuant to section 11 (c) of the Fair Labor Standards Act. Interested persons were given 30 days in which to submit their views and comments relative to the proposed amendment. No objections have been received, but cognizance is hereinafter taken of suggestions for clarification.

Accordingly, pursuant to authority contained in section 11 (c) of the Fair Labor Standards Act of 1938, as amended, (29 U. S. C. 201 et seq.) and General Order No. 45–A (15 F. R. 3290), I hereby amend §§ 516.5 (a) (2) (iv) and 516.18 (a) (2) of this part to read as follows:

Section 516.5 (a) (2) (iv) is amended to read:

(iv) Written agreements or memoranda summarizing the terms of oral agreements or understandings under section 7 (f) of the Act, and

Section 516.18 (a) (2) is amended to read:

(2) A copy of the written agreement or, if there is no such agreement, a memorandum summarizing the terms of the oral agreement or understanding to use this method of computation. If the employee is part of a group, all of whom have agreed to use this method of computation, a single memorandum will suffice.

These amendments shall become effective on the 14th day of November 1955.

(Sec. 11, 52 Stat. 1066, as amended; 29 U. S. C. 211)

Signed at Washington, D. C., this 6th day of October 1955.

NEWELL BROWN,
Administrator, Wage and Hour Division, United States Department of Labor.

[F. R. Doc. 55–8265; Filed, Oct. 11, 1955; 8:55 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter B—Claims and Accounts

PART 536—CLAIMS AGAINST THE UNITED STATES

BURIAL EXPENSES

Sections 536.51 through 536.57 are revoked and the following substituted therefor:

§ 536.51 *Categories of eligibles.* (a) Members of the United States Army and the reserve components thereof who die while on extended active duty.

(b) Members of the Army Reserve, members of the federally recognized National Guard (in respect of duty for which they are entitled by law to receive pay from the Federal Government), and members of the National Guard of the United States, who die while:

(1) On active duty for training or while performing authorized travel to or from such service.

(2) On inactive duty training pursuant to proper authority.

(3) Hospitalized or undergoing treatment at Government expense, as authorized by law, for injuries, illness, or disease contracted or incurred while on active duty for training or performing authorized travel thereto or therefrom, or while on inactive duty training pursuant to proper authority.

(c) Members of the Reserve Officers' Training Corps of the Army, who die while:

(1) Attending training camps pursuant to proper authority, or while performing authorized travel to or from such camps.

(2) Hospitalized or undergoing treatment at Government expense, as authorized by law, for injury, illness, or disease contracted or incurred while attending such camps or while on such authorized travel.

(d) Accepted applicants for enlistment in the Army.

(e) Former enlisted members of the Army who will have been discharged in United States Government hospitals and who continue as patients in such hospitals to the date of their death.

(f) Retired members of the Army, and the reserve components thereof, hospitalized during periods of extended active duty, who continue as patients in United States Government hospitals to the date of their death.

(g) Military prisoners (defined as persons, other than prisoners of war or internees, in custody or in confinement within military jurisdiction) who die (or are executed) while in the custody of the Army.

(h) The following civilian employees paid from appropriate funds of the Army and/or the Department of the Army:

(1) *Citizen employees.* As used in this section "United States citizens" include citizens of the United States of America, its Territories and possessions.

(i) An employee who is a United States citizen who, while traveling on official business in the Territory or country of his domicile, dies away from his home and away from his official station.

(ii) An employee who is a United States citizen who dies while traveling on official business outside the country or Territory of his domicile.

(iii) An employee who is a United States citizen who dies while on assignment to a post outside the country or Territory of his domicile, or who dies while performing authorized travel to or from such assignment.

(iv) Foreign nationals: An employee who is a foreign national who dies while on assignment to a post outside the country of his domicile or while en route to or from such assignment, provided the employee would be entitled to travel to his home at Army expense upon termination of his employment.

(i) Enemy prisoners of war and interned enemy aliens who die while in the custody of the United States Army.

(j) Indigent patients who die in hospitals maintained and operated by the Army, and persons who die on Army reservations, provided proper disposition of such remains cannot otherwise be made.

(k) Dependents of members of the Army on active duty, when the dependent dies abroad while residing with the sponsoring member of the Army at a place of duty outside continental United States, or while on authorized travel to or from such place of duty abroad.

(l) Dependents of civilian employees enumerated in paragraph (h) (1) (iii) of this section, when the dependent dies abroad while residing with the sponsoring employee at his place of duty or while traveling to or from such place of duty.

§ 536.52 *Authorized expenses*—(a) *For personnel described in paragraphs (a) through (g) of § 536.51.* (1) Recovery and identification of remains.

(2) Items of care and preparation.

(i) Notification to the next of kin or other appropriate person.

(ii) Embalming and other preservative measures.

(iii) Hearse for removing remains from the place of death to a funeral director's establishment and for delivery of remains to a local cemetery or to a railroad station.

(iv) Funeral director's services.

(v) Casket (or suitable receptacle for cremation purposes) and/or urn, with outside box when required.

(vi) Burial and shipping permits.

(3) Cremation upon request of the person recognized as the one to direct disposition of remains.

(4) Clothing. (i) The clothing of the deceased will be used to clothe the remains, if available and in a clean and serviceable condition.

(ii) Necessary clothing will be provided when decedent's own is not available or is not suitable for use.

(5) An interment flag to drape the casket and to be presented to the person recognized as the one to direct disposition of remains, except that a flag will not be authorized in the case of a prisoner whose sentence includes a discharge other than honorable or in case of nonmilitary persons.

(6) Transportation. (i) Necessary transportation is authorized to ship the remains (accompanied by an escort of one person) to any town or city, in either the United States or its possessions or in a foreign country, designated by the person directing disposition of remains, or to a national or post cemetery, either prior to or after temporary interment.

(ii) If the destination designated is a common carrier terminal, common carrier transportation will be used for the entire distance. If the destination designated is not a common carrier terminal, common carrier transportation will be used from the place of death to the common carrier terminal nearest the destination and hearse transportation may be used from the common carrier terminal nearest the destination to the destination.

(iii) For method of shipment and by whom determined, see § 633.6 of this chapter.

(7) Services incident to interment.

(i) When interment is made in a private cemetery—an allowance not to exceed $125.

(ii) When interment is made in a national or post cemetery—an allowance not to exceed $75.

(b) *For civilian employees described in § 536.51 (h) (1) (i).* (1) Preparation of remains, at a cost not to exceed $150, including embalming, cremation if requested by the person recognized as the one to direct disposition of remains, clothing, and casket.

(2) Transportation.

(i) Hearse service, including removal of remains from place where death occurred to a funeral director's establishment, removal from funeral director's establishment to a common carrier, and one removal at the place of interment from the common carrier to a funeral

director's establishment or other place of immediate delivery.

(ii) Procurement of burial and shipping permits.

(iii) Furnishing of outside box for shipment (including, when necessary, the sealing of such shipping case). No allowance for outside case will be made if conveyance is by hearse.

(iv) Shipment of remains by common carrier to the home or official station of the decedent or to such other place as may be designated as the appropriate place of interment, provided that in no case will the cost incurred by the Army for transportation of the remains to the place designated exceed the cost which would have been incurred had the remains been transported to the home or the official station of the decedent, whichever is the greater distance. Transportation expenses of an escort for the remains will not be allowed; however, this will not be construed to prohibit the use by an escort of one of the two tickets required to ship the remains as baggage by railroad when that mode of transportation is utilized. Instead of conveyance by common carrier, removal of remains overland by hearse (including ferry charges, bridge tolls, and similar items) may be allowed provided the total charges for transportation do not exceed the total cost of transportation had conveyance been made by common carrier.

(c) *For civilian employees described in § 536.51 (h) (1) (ii) and (iii) and (2).* (1) Preparation of remains, including all the ordinary costs of:

(i) Embalming.

(ii) Cremation, if requested by the person recognized as the one to direct disposition of remains.

(iii) Necessary clothing.

(iv) Casket or container suitable for shipment to the place of interment.

(v) Any expenses necessarily incurred in complying with local laws and laws at the port of entry relative to the preparation of remains for transportation and burial.

(2) Transportation. (i) Hearse service, including removal of remains from the place where death occurred to a funeral director's establishment, removal from the funeral director's establishment to a common carrier, and one removal at the place of interment from the common carrier.

(ii) Shipment of remains by common carrier to the home or official station of the decedent, or to such other place as may be designated as the appropriate place of interment, provided that in no case will the cost incurred by the Army for transportation of the remains to the place designated exceed the cost which would have been incurred had the remains been transported to the home or official station of the decedent, whichever is the greater distance. Transportation expenses of an escort for the remains will not be allowed; however, this will not be construed to prohibit the use by an escort of one of the two tickets required to ship the remains as baggage by railroad when that mode of transportation is utilized. The remains may be transported by means other than by common carrier, provided that when conveyance by common carrier is available there will be allowed toward the expense of such other transportation an amount not in excess of the sum allowable had the remains been transported by common carrier.

(d) *For enemy prisoners of war and interned enemy aliens.* (1) Notification to the next of kin or other appropriate person.

(2) Preparation of the remains for burial, including cremation.

(3) Casket and/or urn, with outside box when required.

(4) Necessary articles of clothing.

(5) Transportation of remains by the most economical means to the town, city, or cemetery designated by The Quartermaster General.

(6) Interment of the remains at a cost not to exceed $125.

(e) *For indigent patients and other persons described in § 536.51 (j).*

(1) Notification to next of kin or other appropriate person.

(2) Preparation of remains for burial, including cremation.

(3) Casket and/or urn, with outside box when required.

(4) Necesary articles of clothing.

(5) Transportation of remains, by the most economical means, to a cemetery designated by The Quartermaster General.

(6) Interment of the remains at a cost not to exceed $125.

(f) *For dependents of members of the Army and civilian employees of the Army.* Transportation from the place of death to the home (or to such other place as may be designated as the appropriate place of interment) in accordance with the procedures and limitations set forth in pertinent Army regulations.

• § 536.53 *Disposition of remains.* (a) The general policy is that disposition of remains will be effected immediately in accordance with the wishes of the person recognized as having the right to direct disposition of the remains.

(b) If temporary disposition is required because of local health laws or inability to contact the person recognized as having the right to direct disposition of the remains, disposition of remains of Army personnel will be made in accordance with instructions in pertinent Army regulations. When final disposition may be effected, such disposition will be in accordance with the wishes of the person recognized as having the right to direct disposition of the remains.

(c) If disposition of remains is made at Government expense in accordance with the expressed wishes of the person having the right to direct disposition, subsequent disinterment or shipment of the remains will not be made at Government expense.

(d) If the person recognized to direct disposition insists that the Army dispose of the remains, the only disposition which will be effected is burial in a national cemetery.

§ 536.54 *Reimbursement of expenses borne by individuals.* (a) When expenses for personnel enumerated in § 536.51 (a) through (h) are borne by individuals, reimbursement may be made to such individuals in an amount not in excess of the cost normally incurred in furnishing such supplies and services as are authorized.

(b) In the case of civilian employees enumerated in § 536.51 (h) (1) (i), applicable limitation is contained in § 536.52 (b). For all other personnel enumerated in § 536.51 (a) through (h), if at the time and place of death a Contract for Care of Remains was in force, the amount to be allowed for items normally obtained under such contract will be limited to the sum that such contract would have allowed for a similar case. However, if no such contract was in effect at the time and place of death, determination of the amount to be allowed will be made by The Quartermaster General. It is not compulsory for relatives to utilize the services of the contract funeral director where a contract is in effect, but the Department of the Army may allow for reimbursement on the items covered by the contract only the amount the Department would have paid thereunder for such items.

§ 536.55 *Cremation*—(a) *When remains may be cremated.* Remains may be cremated only upon written request of the person recognized as the one to direct the disposition of remains.

(1) Remains will not be cremated when there is any doubt whatever as to what person may have the ultimate legal right to direct disposition.

(2) Even when the cause of death or the condition of remains precludes shipment of the body in accordance with the wishes of the person recognized as having the right to direct disposition of remains, cremation will be effected only with the consent of such person.

(3) Under no circumstances will cremation be suggested by Army authorities as an expedient in effecting disposition of remains, and every effort will be made to discourage such suggestion by a funeral director.

(4) Because of custom or religious tenets, cremation is to certain peoples the accepted mode of disposal of remains; therefore, there is no objection to informing relatives of decedents of oriental ancestry that cremation may be effected upon written request of the person recognized as the one to direct disposition of the remains.

(b) *Where remains may be cremated.* When cremation is requested, Army authorities will arrange for cremation prior to delivery to ultimate destination provided facilities are available at or in the immediate vicinity of the place of death or at a port of entry or an armed forces command through which remains normally will be shipped. If facilities for cremation are not available at the place of death (or at an installation or command through which remains will normally be shipped), the person directing disposition of remains will be so informed and advised of costs which may be allowed if relatives arrange for cremation at destination.

(c) *Costs.* (1) The cost of cremation, including the cost of a suitable urn if no casket was furnished for shipment of remains to final destination, and any costs necessary to transport the remains to a local crematory are expenses allowable in addition to the costs of normal preparation, shipment, and allowance toward interment. If cremation is arranged for by military authorities, cost of cremating will not exceed the prevailing rate in the locality in which cremation is effected, and the cost of a suitable urn normally should not exceed $100.

(2) If cremation is arranged for by relatives, reimbursement of allowable costs incurred may be obtained; however, claim must be accompanied by authorization for cremation signed by the person recognized as the one to direct disposition of remains. The amount allowed for cremation will be in accordance with the prevailing charge in the locality in which remains were cremated. Allowance for a suitable urn normally will not exceed $100; however, no allowance will be made for an urn when the casket in which remains were shipped to final destination has been provided at Army expense. When relatives have purchased both a casket and an urn, allowance may be made for either the casket or the urn but not for both.

[AR 638-40 and AR 638-45, 17 August 1955] (R. S. 161; 5 U. S. C. 22. Interpret or apply sec. 1, 54 Stat. 743, 68 Stat. 478, 5 U. S. C. 103a, 5 U S. C. Sup. 2151-2163. E. O. 8557, 5 F. R. 3888; 3 CFR 1940 Supp., as amended by E. O. 10209, 16 F. R. 1001; 3 CFR, 1951 Supp.)

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter II—Corps of Engineers, Department of the Army

PART 203—BRIDGE REGULATIONS

CHUCKATUCK CREEK, VA.

Pursuant to the provisions of section 4 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), § 203.245 governing the operation of drawbridges where constant attendance of draw tenders is not required over navigable waters discharging into the Atlantic Ocean south of and including Chesapeake Bay and into the Gulf of Mexico, except the Mississippi River and its tributaries and outlets, is hereby amended prescribing subparagraph (f) (13-a), to govern the operation of the Virginia Department of Highways bridge across Chuckatuck Creek, Virginia, as follows:

§ 203.245 *Navigable waters discharging into the Atlantic Ocean south of and including Chesapeake Bay and into the Gulf of Mexico, except the Mississippi River and its tributaries and outlets; bridges where constant attendance of draw tenders is not required.* • • •

(f) *Waterways discharging into Chesapeake Bay.* • • •

(13-a) Chuckatuck Creek, Va.; Virginia Department of Highways bridge at Crittenden. Between 9:00 p. m. and 5:00 a. m., at least 30 minutes' advance notice required to be given to the person in charge of the Nansemond River Bridge Toll Plaza. Between 5:00 a. m. and 9:00 p. m., the regulations contained in § 203.240 shall govern the operation of this bridge.

• • • • • •

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix C—Public Land Orders

[Public Land Order 1235]

[Misc. 62646]

FLORIDA

RESERVING CERTAIN PUBLIC LANDS AS ADDITION TO NATIONAL KEY DEER REFUGE

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands in Monroe County, Florida, are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining but not the mineral-leasing laws, and reserved under jurisdiction of the Department of the Interior as an addition to the National Key Deer Refuge:

TALLAHASSEE MERIDIAN

T. 66 S., R. 28 E.,
Sec. 23, lots 4 and 10.
T. 66 S., R. 28 E.,
Sec. 8, lot 2;
Sec. 18, lot 4;
Sec. 20, lot 8.

The areas described aggregate 70.97 acres.

FRED G. AANDAHL,
Assistant Secretary of the Interior.

OCTOBER 6, 1955.

[F. R. Doc. 55-8250; Filed, Oct. 11, 1955; 8:52 a. m.]

TITLE 45—PUBLIC WELFARE

Chapter I—Office of Education, Department of Health, Education, and Welfare

PART 109—FEDERAL ASSISTANCE UNDER TITLE IV, SINCE JULY 1, 1955, IN THE CONSTRUCTION OF MINIMUM SCHOOL FACILITIES IN AREAS AFFECTED BY FEDERAL ACTIVITIES

Part 109 is added to 45 CFR, Subtitle B, Chapter I, and, among other things, establishes regulations for the filing and processing of applications for Federal grants for school construction under Title IV of Public Law 815, 81st Congress (64 Stat. 967), as added by Public Law 246, 83d Congress (67 Stat. 522), and as extended and amended by Public Law 382, 84th Congress (69 Stat. 713); establishes a cutoff date for filing such applications; and provides for priority indices to establish the order of approval of such applications and of making payments from funds available on the cutoff date.

Part 109 reads as follows:

Subpart A—Filing and Processing of Complete Applications

Sec.
109.1 Definitions.
109.2 Procedure if funds are inadequate to make all payments.
109.3 Determination of priority indices for applications under Section 401.
109.4 Determination of available and usable school facilities.
109.5 Certification of payments.
109.6 Priority and approval of applications; conditioned upon readiness to proceed with construction.
109.10 Preceding provisions not exhaustive of jurisdiction of the Commissioner.

Subpart B—Establishment of Deadline for Filing Applications

Sec.
109.20 Deadline for applications during fiscal year 1956.

AUTHORITY: §§ 109.1 to 109.20 issued under sec. 208, 64 Stat. 975; 20 U. S. C. 278. Interpret or apply sec. 210, 64 Stat. 976; secs. 1, 2, 67 Stat. 522, sec. 6, 69 Stat. 713; 20 U. S. C. 280.311.

SUBPART A—FILING AND PROCESSING OF COMPLETE APPLICATIONS

§ 109.1 *Definitions.* All terms used in this part which are defined in Public Law 815, 81st Congress (64 Stat. 967), as added by Public Law 246, 83d Congress (67 Stat. 522), and as amended by Public Law 731, 83d Congress (68 Stat. 1005), and Public Law 382 (69 Stat. 713), and not defined in this section shall have the meaning given to them in Public Law 815 as amended. As used in this part, for purposes of this part and determinations under the Act as hereinafter defined, the following terms shall have the meaning indicated in paragraphs (a) to (q) of this section:

(a) *Act.* "The Act" means title IV of Public Law 815, 81st Congress (64 Stat. 967), as added by Public Law 246, 83d Congress (67 Stat. 522), and as extended and amended by Public Law 382 (69 Stat. 713), and such provisions of titles I and II of Public Law 815 as are made applicable to title IV by Public Law 246.

(b) *Title IV.* "Title IV" means title IV of Public Law 815, 81st Congress, as added by Public Law 246, 83d Congress, extended and amended by Public Law 382, 84th Congress, and such provisions of titles I and II of Public Law 815 as are made applicable to it by Public Law 246.

(c) *Commissioner.* "Commissioner" means the Commissioner of Education, Department of Health, Education, and Welfare or his delegatee.

(d) *Local educational agency.* "Local educational agency" means a board of education or other legally constituted local school authority (including, where applicable, a State agency which directly operates and maintains facilities for providing free public education) having exclusive administrative control and direction of free public education, or some phase thereof, in a county, township, independent, or other school district located within a State. If the local

educational agency so defined does not have responsibility for providing school facilities and such responsibility is vested in a State agency, the term shall include such State agency together with the agency having exclusive administrative control and direction of other phases of free public education.

(e) *Free public education.* "Free public education" means education which is provided at public expense, under public supervision and direction, and which is provided as elementary or secondary school education in the applicable State. Elementary education may include kindergarten education meeting the above criteria for the first year prior to the first elementary grade.

(f) *Applicant.* An "Applicant" is a local educational agency which has filed a complete application for assistance in school construction under the act and this part.

(g) *Complete application.* Where an applicant submits only one project by a filing date, the "complete application" at that time consists of both Part I (Maximum Grant) and Part II (Project) of the application Form RSF–2 prescribed by the Commissioner for use under this act, properly completed and executed, together with all documents, amendments, and communications in support thereof. Where applicant submits more than one project by a filing date, the Part I form and all Part II forms, properly executed and completed, together with all documents, amendments, and communications in support thereof on file at that time, shall be considered as the "complete application." Where more than one Part II application is submitted by an applicant, the applicant shall indicate the order in which its project applications are to be considered by the Commissioner. Only applications meeting the conditions for approval under title IV and this part shall be considered complete applications under title IV.

(h) *Project application.* "Project application" means Form RSF–2, Part II, properly completed and executed, making application for Federal assistance for providing school facilities under title IV.

(i) *Filing of applications.* An application will not be deemed to be "filed" unless all necessary parts of the complete application, bearing the required certifications and verifications by the State educational agency, are received by the Commissioner, or enclosed in a cover addressed to the Commissioner and postmarked, on or before the applicable filing date as established by Subpart B of this part.

(j) *Minimum school facilities.* "Minimum school facilities" means those instructional and auxiliary rooms (and initial equipment), exclusive of single purpose auditoriums, single purpose gymnasiums and any built-in spectator space, necessary to operate a program of free public education for the school members of the applicant at normal capacity in accordance with the laws and customs of the State.

(k) *Available and usable school facilities.* "Available and usable school facilities" means those facilities containing pupil stations counted in ascertaining children who are "unhoused" or "without minimum school facilities."

(l) *Normal capacity.* The "normal capacity" of a school room is the number of pupil stations which the room accommodates under ordinary conditions in accordance with the laws and customs of the State governing free public education, provided that where kindergartens may be conducted on a two-session-per-day basis the number of pupil stations of the rooms used for that purpose shall be doubled in determining kindergarten needs.

(m) *Children who are unhoused or without minimum school facilities.* Children who are "unhoused" or "without minimum school facilities" are those children in excess of the normal capacity of available and usable minimum school facilities.

(n) *Membership.* Unless governed by State law or State regulation, a pupil is a "member" of a class or school from the date he presents himself at school and is placed on the current roll until he permanently leaves the class or school for one of the causes recognized as sufficient by the State. The date of permanent withdrawal should be the date on which it is officially known that the pupil has left school, and not necessarily the first day after the date of last attendance.

(o) *Average daily membership.* In a given school year, the "average daily membership" for a given school is the aggregate days of membership of individual children in the school divided by the number of days school was actually in session. Only days on which pupils were under the guidance and direction of teachers in the teaching process may be considered as days in session. The average daily membership for groups of schools having varying lengths of terms is the sum of the average daily memberships obtained for the individual schools.

(p) *Priority indices.* The "priority indices" are the indices established pursuant to this part based on relative urgency of need for the purpose of determining, under title IV, the order of approval of applications and the order of payments.

(q) *Substantial percentage.* An application will not be considered to meet the "substantial percentage" requirement under section 401 (a) (1) of title IV which does not show that the total number of children who reside on Federal property (for whom the applicant is providing or, upon completion of the school facilities for which provision is made in section 401 (a), will provide free public education, and whose membership in the schools of such applicant has not formed and will not form the basis for payments under title II or title III of Public Law 815, as amended) is in excess of 15 and represents at least 10 percent of the total number of children for whom the applicant is providing free public education.

§ 109.2 *Procedure if funds are inadequate to make all payments.* Section 401 (c), title IV, reads in part as follows:

In determining the order in which such applications shall be approved, the Commissioner shall consider the relative educational and financial needs of the local educational agencies which have submitted approvable applications and the nature and extent of the Federal responsibility.

§ 109.3 *Determination of priority indices for applications under section 401.* When the Commissioner has set a date by which complete applications must be filed, the priority indices for approval of such applications shall be determined as follows:

(a) A priority index will be determined for the first construction project for each applicant under section 401 by adding (1) the percentage that the estimated membership of the eligible federally connected children of the school district is of the total estimated membership of all children of such school district at the close of the regular school year 1955–56 to (2) the percentage of the estimated school membership within the school district which at the same time is without minimum school facilities: *Provided*, That in no case shall the total of the two percentages used in determining the priority index exceed twice the percentage in subparagraph (1) of this paragraph.

(b) In those cases where an applicant has filed more than one project application, the priority index for the second project will be determined by: (1) Dividing the normal capacity of the first project by the total estimated membership at the close of the regular school year 1955–56; and (2) reducing the applicant's priority index by twice the percentage so obtained. Where more than two project applications have been filed, the applicant's priority index for each succeeding project shall be reduced by the cumulative total capacity, as provided in the first sentence of this paragraph, of all the approved projects of the applicant.

§ 109.4 *Determination of available and usable school facilities.* The following school facilities shall be counted as usable and available in determining "unhoused children" or "children without school facilities":

(a) All school facilities which were constructed for school use and which have been used continuously for classroom purposes shall be considered as available and usable unless such facilities have become unsafe or otherwise unusable to the extent that use of such facilities or partial use of such facilities has been abandoned or must be abandoned during the fiscal year in which the application is approved. Basement rooms, hallways, or other space the use of which for classroom purposes, in view of their character, inaccessibility, or other equally cogent reason, seriously prejudices educational objectives or has impaired or will impair the health or safety of the school children, will not be considered to be available and usable. These criteria shall apply to all facilities owned by other Federal agencies which are available or which may be made available for the education of children counted by applicants.

(b) All school facilities for the construction of which contracts have been let on or before any final date for filing applications shall be considered to be available and usable for the purpose of the applications filed on such date; and all school facilities which have been approved under title II, title III, or title IV of Public Law 815 shall be considered as available and usable as of the date of approval.

(c) All minimum school facilities which with full utilization of practically available financial resources could be provided from local, State, or other Federal sources shall be considered as available and usable in making determinations under title IV. The capacity of school facilities which could be so provided shall be determined by dividing the sum of such resources by the cost per pupil of providing minimum school facilities in the applicant's school district.

§ 109.5 *Certification of payments.* Payments to an applicant will be made only on the basis of a complete application satisfying conditions for payment under the act and this part, and will be restricted in amount to the cost of providing minimum school facilities for unhoused children; however: Payments under title IV shall not exceed the portion of the cost of minimum school facilities which the Commissioner estimates is attributable to children who reside on Federal property, and which has not been, and is not to be, recovered by the applicant from other sources, including payments by the United States under any other provisions of Public Law 815, 81st Congress, as amended, or any other law; and such payments may be upon such terms and in such amounts, subject to the provisions of title IV, as the Commissioner may consider to be in the public interest.

§ 109.6 *Priority and approval of applications; conditioned upon readiness to proceed with construction.* Initial approval of a project application meeting the conditions for approval under the act and under this part will be subject to cancellation in the event the applicant is not ready to proceed with construction within 90 days after the date of initial approval, unless such period is extended by the Commissioner for good cause shown; and the applicant's rights to approval and payment may be subordinated by reason thereof to other project applications of lower rank or the applicant may forfeit its priority in the discretion of the Commissioner.

§ 109.7 *Preceding provisions not exhaustive of jurisdiction of the Commissioner.* No provision of this part now or hereafter promulgated shall be deemed exhaustive of the jurisdiction of the Commissioner under the act. The provisions of this part may be modified or further regulations may be issued hereafter as circumstances may warrant.

SUBPART B—ESTABLISHMENT OF DEADLINE FOR FILING APPLICATIONS

§ 109.20 *Deadline for applications during fiscal year 1956.* Pursuant to section 401 (c) of title IV, February 15, 1956, is fixed as the date on or before which all complete applications for payments to which applicants may be entitled under title IV from funds then available shall be filed.

Dated: October 2, 1955.

[SEAL] S. M. BROWNELL,
United States Commissioner of Education.

Approved: October 6, 1955.

M. B. FOLSOM,
Secretary of Health, Education, and Welfare.

[F. R. Doc. 55–8267; Filed, Oct. 11, 1955; 8:55 a. m.]

PART 110—FEDERAL ASSISTANCE IN THE CONSTRUCTION OF MINIMUM SCHOOL FACILITIES UNDER TITLE III IN AREAS AFFECTED BY FEDERAL ACTIVITIES WITH RESPECT TO APPLICATIONS FILED AFTER JULY 15, 1955

Part 110 is added to 45 CFR, Subtitle B, Chapter I, and, among other things, establishes regulations for the filing and processing of applications for Federal Grants for school construction under title III of Public Law 815, 81st Congress (64 Stat. 967), as added by Public Law 246, 83d Congress (67 Stat. 522), and as amended by Public Law 731, 83d Congress (68 Stat. 1005), and by Public Law 382, 84th Congress (69 Stat. 713); establishes regulations for a new method of determining available facilities; establishes a second cutoff date for filing applications with respect to funds available during fiscal year 1956; and provides for priority indices to establish the order of approval of applications and of making payments from funds available on a cutoff date.

Part 110 reads as follows:

Subpart A—Filing and Processing of Complete Applications

Sec.
110.1 Definitions.
110.2 Procedure if funds are inadequate to make all payments.
110.3 Determination of priority indices for applications under section 305.
110.4 Determination of available and usable school facilities.
110.5 Criteria for waiver under section 305 (e), title III of the act.
110.6 School facilities for children whose membership is of temporary duration only.
110.7 Certification of payments.
110.8 Additional payments under section 308 of the act.
110.9 Priority and approval of applications; conditioned upon readiness to proceed with construction.
110.10 Preceding provisions not exhaustive of jurisdiction of the Commissioner.

Subpart B—Establishment of Deadlines for Filing Applications

110.20 Second deadline for applications with respect to funds available during fiscal year 1956.

AUTHORITY: §§ 110.1 to 110.20 issued under sec. 205, 64 Stat. 975; 20 U. S. C. 278. Interpret or apply secs. 210, 301–311, 64 Stat. 975, secs. 1, 2, 67 Stat. 522, secs. 1–8, 68 Stat. 1005, secs. 4, 5, 7, 69 Stat. 713; 20 U. S. C. 273, 280, 291–301.

SUBPART A—FILING AND PROCESSING OF COMPLETE APPLICATIONS

§ 110.1 *Definitions.* All terms used in this part which are defined in Public Law 815, 81st Congress (64 Stat. 967), as added by Public Law 246, 83d Congress (67 Stat. 522), and as amended by Public Law 731, 83d Congress (68 Stat. 1005), and Public Law 382, 84th Congress (69 Stat. 713), and not defined in this section shall have the meaning given to them in Public Law 815 as amended. As used in this part, for purposes of this part and determinations under the act as hereinafter defined, the following terms shall have the meaning indicated in paragraphs (a) to (q) of this section:

(a) *Act.* "The act" means title III of Public Law 815, 81st Congress (64 Stat. 967), as added by Public Law 246, 83d Congress (67 Stat. 522), and as amended by Public Law 731, 83d Congress (68 Stat. 1005) and Public Law 382, 84th Congress (69 Stat. 713), and such provisions, of titles I and II of Public Law 815, as amended, as are made applicable to title III by Public Law 246, as amended.

(b) *Title III.* "Title III" means title III of Public Law 815, 81st Congress, as added by Public Law 246, 83d Congress, and as amended by Public Law 731, 83d Congress, and Public Law 382, 84th Congress, and such provisions of titles I and II of Public Law 815, as amended, as are made applicable to it by Public Law 246, as amended.

(c) *Commissioner.* "Commissioner" means the Commissioner of Education, Department of Health, Education, and Welfare or his delegatee.

(d) *Local educational agency.* "Local educational agency" means a board of education or other legally constituted local school authority (including, where applicable, a State agency which directly operates and maintains facilities for providing free public education) having exclusive administrative control and direction of free public education, or some phase thereof, in a county, township, independent, or other school district located within a State. If the local educational agency so defined does not have responsibility for providing school facilities and such responsibility is vested in a State agency, the term shall include such State agency together with the agency having exclusive administrative control and direction of other phases of free public education.

(e) *Free public education.* "Free public education" means education which is provided at public expense, under public supervision and direction, and which is provided as elementary or secondary school education in the applicable State. Elementary education may include kindergarten education meeting the above criteria.

(f) *Applicant.* An "applicant" is a local educational agency which has filed a complete application for assistance in school construction under the act and this part.

(g) *Complete application.* Where an applicant submits only one project by a filing date, the "complete application" at that time consists of both Part I (Maximum Grant) and Part II (Project) of the application Form RSF–2 prescribed by the Commissioner for use un-

der this act, properly completed and executed, together with all documents, amendments, and communications in support thereof. Where applicant submits more than one project by a filing date, the Part I form and all Part II forms, properly executed and completed, together with all documents, amendments, and communications in support thereof on file at that time, shall be considered as the "complete application." Where more than one Part II application is submitted by an applicant, the applicant shall indicate the order in which its project applications are to be considered by the Commissioner. Only applications meeting the conditions for approval under title III (other than section 306 (b) (3)) and this part shall be considered complete applications under title III.

(h) *Project application.* "Project application" means Form RSF–2, Part II, properly completed and executed, making application for Federal assistance for constructing school facilities under title III.

(i) *Filing of applications.* An application will not be deemed to be "filed" unless all necessary parts of the complete application, bearing the required certifications and verifications by the State educational agency, are received by the Commissioner, or enclosed in a cover addressed to the Commissioner and postmarked, on or before the applicable filing date as may be established by Subpart B of this part.

(j) *Minimum school facilities.* "Minimum school facilities" means those instructional and auxiliary rooms (and initial equipment), exclusive of single purpose auditoriums, single purpose gymnasiums and any built-in spectator space, necessary to operate a program of free public education for the school members of the applicant at normal capacity in accordance with the laws and customs of the State.

(k) *Available and usable school facilities.* "Available and usable school facilities" means those facilities containing pupil stations counted in ascertaining children who are "unhoused" or "without minimum school facilities."

(l) *Normal capacity.* The "normal capacity" of a school room is the number of pupil stations which the room accommodates under ordinary conditions in accordance with the laws and customs of the State governing free public education, provided that where kindergartens may be conducted on a two-session-per-day basic the number of pupil stations of the rooms used for that purpose shall be doubled in determining kindergarten needs.

(m) *Children who are unhoused or without minimum school facilities.* Children who are "unhoused" or "without minimum school facilities" are those children in excess of the normal capacity of available and usable minimum school facilities.

(n) *Membership.* Unless governed by State law or State regulation, a pupil is a "member" of a class or school from the date he presents himself at school and is placed on the current roll until he permanently leaves the class or school for one of the causes recognized as sufficient by the State. The date of permanent withdrawal should be the date on which it is officially known that the pupil has left school, and not necessarily the first day after the date of last attendance.

(o) *Average daily membership.* In a given school year, the "average daily membership" for a given school is the aggregate days of membership of individual children in the school divided by the number of days school was actually in session. Only days on which pupils were under the guidance and direction of teachers in the teaching process may be considered as days in session. The average daily membership for groups of schools having varying lengths of terms is the sum of the average daily memberships obtained for the individual schools.

(p) *Membership of children of temporary duration only.* "Membership of children of temporary duration only" means the school membership of children whose residence in the school area the Commissioner determines probably will be for less than six years beyond the date of the approval of the complete applications and whose number is required to be excluded from computation of maximum payments under section 305.

(q) *Priority indices.* The "priority indices" are the indices established pursuant to this part based on relative urgency of need for the purpose of determining, under title III, the order of approval of applications, and the order of payments.

§ 110.2 *Procedure if funds are inadequate to make all payments.* Section 303, title III, reads in part as follows:

> The Commissioner shall from time to time set dates, the last of which shall not be later than June 30, 1956, by which applications for payments under this title with respect to construction projects must be filed. If the funds appropriated under this title and remaining available on any such date for payments to local educational agencies are less than the Federal share of the cost of the projects with respect to which applications have been filed prior to such date (and for which funds under this title have not already been obligated), the Commissioner shall by regulation prescribe an order of priority, based on relative urgency of need, for approval of such applications.

§ 110.3 *Determination of priority indices for applications under section 305.* When the Commissioner has set a date by which complete applications must be filed, the priority indices for approval of such applications shall be determined as follows:

(a) A priority index will be determined for the first construction project for each applicant under section 306 by adding (1) the percentage that the estimated membership of the eligible Federally-connected children in the school district (or in the approved attendance area) is of the total estimated membership of all children in such area at the close of the regular school year 1955–56 to (2) the percentage of the estimated school membership within the school district (or in the approved attendance area) which at the same time is without minimum school facilities: *Provided,* That in no case shall the total of the two percentages used in determining the priority index exceed twice the percentage in subparagraph (1) of this paragraph. No priority shall be established for any applicant having less than 20 unhoused children in the school district (or in the approved attendance area).

(b) In those cases where an applicant has filed more than one project application, the priority index for the second project will be determined by: (1) Dividing the normal capacity of the first project by the total estimated membership at the close of the regular school year 1955–56; and (2) reducing the applicant's priority index by twice the percentage so obtained. Where more than two project applications have been filed, the applicant's priority index for each succeeding project shall be reduced by the cumulative total capacity, as provided in the first sentence of this paragraph, of all the approved projects of the applicant.

(c) In those cases where the jurisdictional area of the applicant with respect to which the application is made comprises an extensive territory and the Federal activity is localized within the area served by one or more attendance centers, and the other attendance centers within the district are practically unavailable to meet the needs of the attendance areas affected by Federal activities, then, in such case, the percentages described in subparagraphs (1) and (2) of paragraph (a) of this section will be determined with respect to the "Federally affected attendance areas," and not with respect to the entire school district. (The conditions of this paragraph may be met only in large county unit school systems and, possibly, in other extensive districts having large housing projects constructed for defense workers or military personnel which have overburdened one or more attendance centers to such an extent that additional school facilities are required to house the children.)

§ 110.4 *Determination of available and usable school facilities.* The following school facilities shall be counted as usable and available in determining "unhoused children" or "children without school facilities":

(a) All school facilities which were constructed for school use and which have been used continuously for classroom purposes shall be considered as available and usable unless such facilities have become unsafe or otherwise unusable to the extent that use of such facilities or partial use of such facilities has been abandoned or must be abandoned during the fiscal year in which the application is approved. Basement rooms, hallways, or other space the use of which for classroom purposes, in view of their character, inaccessibility or other equally cogent reason, seriously prejudices educational objectives or has impaired or will impair the health or safety of the school children will not be considered to be available and usable. These criteria shall apply to all facilities owned by other Federal agencies which are available or which may be made available for the education of children counted by applicants.

(b) Effective December 1, 1954, section 5 (a) of P. L. 382, 84th Congress, amends section 304 (a) of title III of P. L. 815, as amended, to provide that the estimated number of children who will be in membership of the schools of a local educational agency at the close of the regular school year 1955–56, and who will otherwise be without minimum school facilities at such time "shall be determined by reference to those facilities which (1) are built or under contract as of the earliest date set by the Commissioner under section 303, on or before which the application for such project is filed, or (2) as of the date the application for such project is approved, are included in a project for which funds have been set aside under title II, or in a project the application for which has been approved under this title." Thus contracts for the construction of school facilities after any cut-off date on or before which the applicant filed an application shall not be counted as capacity available, with respect to such application regardless of the appropriation under which the applicant receives its approval and payment for such application. This change in subsection 304 (a) will apply to those applications with respect to which December 1, 1954, was the cut-off date, as well as to subsequent applications with respect to which later cut-off dates are established by the Commissioner under title III of P. L. 815, as amended.

§ 110.5 *Criteria for waiver under section 305 (e) of the act.* (a) The Commissioner's authority in section 305 (e) of the act to waive or reduce the percentage requirement or requirements in section 305 (c), to waive the requirement contained in the first sentence of subsection 305 (d) thereof, or to reduce the percentage specified in clause (2) of such sentence will not be exercised unless:

(1) The applicant meets all conditions of eligibility under title III or, on the basis of the authorized waiver or reduction of one or more of the requirements, would meet such conditions;

(2) The applicant specifically states the extent to which it desires the Commissioner to exercise his authority to waive or reduce one or more of such requirements and makes appropriate requests therefor, agreeing that, if such a request is granted in whole or in part, in computing maximum payment under title III only membership of children within the federally impacted attendance area shall be considered;

(3) The applicant has two or more attendance centers, and its jurisdictional area is county-wide or is sufficiently extensive as to be reasonably analogous to a county-wide school system;

(4) There has been an unusually large Federal impact from the close of the regular school year 1953–54 to the close of the regular school year 1955–56 in an attendance area affecting one or more attendance centers;

(5) It would not be practicable to transport students in the federally impacted attendance area to other available school facilities of the applicant because of distance, topography or other equally cogent reasons; and

(6) The Commissioner of Education determines that other exceptional circumstances exist which in his judgment require such waiver or reduction to avoid inequity and to avoid defeating the purposes of title III.

(b) If the Commissioner, on the basis of the minimum criteria above set forth, determines, under subsection 305 (e), to exercise his authority to waive or reduce one or more of the specified requirements:

(1) He shall determine which requirement or requirements he will waive, or reduce, and if the latter, the extent of such reduction;

(2) He shall determine the geographical area of the applicant which shall be considered as constituting the "federally impacted attendance area"; and

(3) The application otherwise will be processed under title III and this part, taking into consideration only the established "federally impacted attendance area" but in no case shall payments hereunder exceed the amounts computable on the basis of the district as a whole taking into consideration the waivers or reductions approved by the Commissioner.

§ 110.6 *School facilities for children whose membership is of temporary duration only.* (a) If the Commissioner determines that the membership of some of the children of the applicant, representing otherwise countable Federal increases under section 305 of the act, will be of temporary duration only, as defined in § 110.1 (p), the membership of such children will be excluded in computing maximum payments under section 305.

(b) The Commissioner, when proper request therefor is made in a Part I application, (1) may make available to such applicant such temporary school facilities as may be necessary to take care of the membership of such children as the Commissioner determines will be members of the applicant's school system for a sufficient period of time to justify the expense; or (2) he may, where the applicant gives assurance in a complete application that at least minimum school facilities will be provided for such children, pay (on such terms and conditions as he deems appropriate to carry out the purposes of title III) to such applicant for use in constructing school facilities an amount not greater than the amount which he estimates will be necessary to make available temporary facilities for such children, provided that the amount so paid shall not exceed the cost, in the school district of the applicant, of constructing minimum school facilities for such children. In no case will provision for such children be made unless they are deemed to be without minimum school facilities.

(c) Section 4 of P. L. 382 (amending sections 203 and 309 of P. L. 815) authorizes the transfer of temporary school facilities built and owned by the Federal Government pursuant to section 203 or 309 of P. L. 815 to the local educational agency concerned; and provides that "any such transfer shall be without charge, but may be made on such other terms and conditions, and at such time, as the Commissioner deems appropriate to carry out the purposes of" titles II and III. It will be the policy of the Commissioner to transfer such facilities in those cases where there is need on a continuing basis for such facilities for school purposes, and where the use of such facilities is not inconsistent with overall State plans for providing school facilities. Applications for such transfers shall contain or be supported by the assurances required under section 205 (b) (1) (B), (C) and (F).

§ 110.7 *Certification of payments.* Payments to an applicant will be made only on the basis of a complete application satisfying conditions for payment under the act and this part, and will be restricted in amount to the cost of providing minimum school facilities for unhoused children; however:

(a) Within the maximum otherwise payable under title III (except as provided in § 110.8), the Federal share of the cost of a title III project which will be certified for payment shall be equal to the cost but shall in no case exceed the cost in the school district of the applicant of constructing minimum school facilities and shall in no case exceed the cost in such district of constructing minimum school facilities for the estimated number of children who will be in the membership of the school of such applicant at the close of the regular school year 1955–56 and who will otherwise be unhoused.

(b) Nothing contained in the regulations in this part shall be deemed to bar an applicant under title III, with the approval of the State educational agency, from using for an approved project, in addition to the Federal grant, monies otherwise obtained to provide a higher type or larger or better implemented school facility. The applicant will be required to show in such cases that the added cost is being thus independently met.

§ 110.8 *Additional payments under section 308 of the act.* Pursuant to the authority vested in the Commissioner by section 308 of the act:

(a) Not to exceed 10 per centum of any amount appropriated under title III (exclusive of any sums appropriated for administration) is reserved and may be used by the Commissioner to make grants to applicants under title III when (1) the application would be approved under the title but for the applicant's inability, unless aided by such grant, to finance the non-Federal share of the cost of a project; or (2) after the approval of the application the project cannot, without such grant, be completed because of flood, fire or similar emergency affecting either the work on the project or the applicant's ability to finance the non-Federal share of the cost of the project.

(b) Under the authority of paragraph (a) (1) of this section, a complete application under title III (except an application with respect to which the Commissioner has waived or reduced eligibility requirements under section 305 (e) of the act and § 110.5) may be considered for payment of part or all of the non-Federal share of the cost of any project

which does not include more than minimum facilities for unhoused children, provided: (1) That the application contains a request for payment hereunder; (2) that the estimated number of children countable for payment under title III for the school year 1955–56 equals or exceeds the number obtained by taking 10 percent of the average daily membership of the applicant district for the school year 1953–54; (3) that the applicant has exhausted all fiscal resources, including State aid, bonding authority and Federal aid, which are practicably available to it and is unable to pay the non-Federal share of the cost of the project; (4) that it has been reached on the priority indices established by this part; and (5) that Federal monies reserved under paragraph (a) of this section are available. The additional payment to the applicant under this provision shall not exceed the non-Federal share of the cost of the project less all financial resources practicably available to the applicant; nor shall it exceed the difference between the average cost in the State of providing minimum school facilities for the federally connected pupils eligible for payment under the act, and the Federal funds made available to the school district under section 305 of the act.

(c) Under the authority of paragraph (a) (2) of this section, a request by the applicant may be considered for the additional payment of part or all of the funds required to complete a project (to the extent that the completed project will not provide more than minimum school facilities for unhoused children) for which a project application under title III has been approved, provided: (1) Federal monies reserved under paragraph (a) of this section are available; (2) the applicant cannot complete the project because of flood, fire or similar emergency affecting either the work on the project or the applicant's ability to finance the non-Federal share of the cost of the project; and (3) that the applicant has exhausted all financial resources practicably available to it, including State aid, bonding authority and Federal aid. The payment to be made under this paragraph shall not exceed the amount required to pay the additional cost caused by the emergency less any financial resources of the applicant practicably available for such purpose, including the proceeds of any insurance.

§ 110.9 *Priority and approval of applications; conditioned upon readiness to proceed with construction.* Initial approval of a project application meeting the conditions for approval under the act and under this part will be subject to cancellation in the event the applicant is not ready to proceed with construction within 90 days after the date of initial approval, unless such period is extended by the Commissioner for good cause shown; and the applicant's rights to approval and payment may be subordinated by reason thereof to other project applications of lower rank or the applicant may forfeit its priority in the discretion of the Commissioner.

§ 110.10 *Preceding provisions not exhaustive of jurisdiction of the Commissioner.* No provisions of this part now or hereafter promulgated shall be deemed exhaustive of the jurisdiction of the Commissioner under the act. The provisions of this part may be modified or further regulations may be issued hereafter as circumstances may warrant.

SUBPART B—ESTABLISHMENT OF DEADLINES FOR FILING APPLICATIONS

§ 110.20 *Second deadline for applications with respect to funds available during fiscal year 1956.*[1] Pursuant to section 303 of title III, December 1, 1955, is fixed as the date on or before which all complete applications for payments to which applicants may be entitled under title III from funds then available shall be filed. Complete applications heretofore filed in compliance with the act since June 30, 1954, and for which funds have not been reserved shall be considered as filed for the purposes of this section subject to the right of the applicant to modify or amend the same on or before December 1, 1955.

Dated: October 2, 1955.

[SEAL] S. M. BROWNELL,
United States Commissioner of Education.

Approved: October 6, 1955.

M. B. FOLSOM,
Secretary of Health, Education, and Welfare.

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR (1954) Part 31]

EMPLOYMENT TAXES; APPLICABLE ON AND AFTER JANUARY 1, 1955

NOTICE OF PROPOSED RULE MAKING

Pursuant to the Administrative Procedure Act, approved June 11, 1946, proposed regulations under sections 3401 (a), 6001, and 6051 of the Internal Revenue Code of 1954 were published in tentative form with a notice of proposed rule making in the FEDERAL REGISTER for March 30, 1955 (20 F. R. 1973). After consideration of all relevant matter presented by interested persons regarding the rules proposed, notice is hereby given that such proposed regulations are hereby withdrawn.

Further, notice is hereby given, pursuant to the Administrative Procedure Act, that the regulations set forth in tentative form in the attached appendix are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, in substitution for the proposed regulations hereinbefore withdrawn. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: T:P, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 6051 and 7805 of the Internal Revenue Code of 1954 (68A Stat. 747, 917; 26 U. S. C. 6051, 7805).

[SEAL] T. COLEMAN ANDREWS,
Commissioner of Internal Revenue.

The following regulations are hereby prescribed under sections 3401 (a), 6001, and 6051 of the Internal Revenue Code of 1954:

§ 31.3401 (a) *Statutory provisions; definitions; wages.*

SEC. 3401. *Definitions*—(a) *Wages.* For purposes of this chapter, the term "wages" means all remuneration (other than fees paid to a public official) for services performed by an employee for his employer, including the cash value of all remuneration paid in any medium other than cash; except that such term shall not include remuneration paid—• • •

§ 31.3401 (a)–1 *Wages.* • • •

(b) *Certain specific items.* • • •

(8) *Amounts paid under wage continuation plans*—• • •

(ii) *Amounts paid after December 31, 1955—(a) In general.* The term "wage continuation payment", as used in this subdivision, means any payment to an employee which is made after December 31, 1955, under a wage continuation plan (as defined in § 1.105–4 (a) of this chapter) for a period of absence from work on account of personal injuries or sickness, to the extent such payment is attributable to contributions made by the employer which were not includible in the employee's gross income or is paid by the employer. Any such payment, whether or not excluded from gross income under section 105 (d), constitutes "wages" (unless specifically excepted under any of the numbered paragraphs of section 3401 (a) or under section 3402 (e)) and withholding thereon is required except as provided in (*b*) and (*c*) of this subdivision.

(*b*) *Amounts paid by employer for whom services are performed.* Withholding is not required with respect to any or all employees upon the amount of any wage continuation payment made to an employee directly by the employer for whom he performs services to the extent that such payment is excludable from the gross income of the employee

[1] See § 108.21 of this chapter for first deadline date.

under section 105 (d), provided the records maintained by the employer—

(*1*) Separately show the amount of each such payment and the excludable portion thereof, and

(2) Establish the facts necessary to show that the employee is entitled, with respect to such amount, to the exclusion provided by section 105 (d), either by means of a written statement from the employee as to the injury, illness, or hospitalization, or by any other information which the employer reasonably believes to be accurate and which he is willing to accept for purposes of payments under the wage continuation plan.

For purposes of this section, computation of the amount excludable from the gross income of the employee under section 105 (d) shall be made on the basis of the wage continuation payments which are made directly by the employer for whom the employee performs services, without regard to any such payments made on behalf of the employer by a person who is regarded as an employer under section 3401 (d) (1) or made by any other employer.

(*c*) *Amounts paid by person other than the employer for whom services are performed.* No tax shall be withheld upon any wage continuation payment, whether or not such payment is excluded from gross income under section 105 (d), made to an employee by a person who is not the employer for whom the employee performs services but who is regarded as an employer under section 3401 (d) (1). For example, no tax shall be withheld with respect to accident or health benefits paid by an insurance company under an accident or health policy, by a separate trust under an accident or health plan, or by a State agency from a sickness and disability fund maintained under State law.

(*d*) *Cross references.* See sections 6001 and 6051 and the provisions thereunder in subpart G of the regulations in this part for rules with respect to the records which must be maintained in connection with wage continuation payments and for rules with respect to the statements which must be furnished an employee in connection with wage continuation payments, respectively. See also section 105 and the provisions thereunder in Part 1 of this chapter.

§ 31.6001 *Statutory provisions; notice or regulations requiring records, statements, and special returns.*

SEC. 6001. *Notice or regulations requiring records, statements, and special returns.* Every person liable for any tax imposed by this title, or for the collection thereof, shall keep such records, render such statements, make such returns, and comply with such rules and regulations as the Secretary or his delegate may from time to time prescribe. Whenever in the judgment of the Secretary or his delegate it is necessary, he may require any person, by notice served upon such person or by regulations, to make such returns, render such statements, or keep such records, as the Secretary or his delegate deems sufficient to show whether or not such person is liable for tax under this title.

§ 31.6001–5 *Additional records in connection with collection of income tax at source on wages.* (a) Every employer required under section 3402 to deduct and withhold income tax upon the wages of employees shall keep records of all remuneration paid to such employees. Such records shall show with respect to each employee—

• • • • •

(12) In the case of the employer for whom services are performed, with respect to payments made after December 31, 1955, under a wage continuation plan as defined in § 1.105–4 (a) of this chapter—

(i) The amount and date of each such payment to the extent that it was attributable to contributions made by the employer which were not includible in the employee's gross income or was paid directly by the employer (for rules relating to determination of amount attributable to employer contributions, see the provisions relating to section 105 (a) as set forth in Part 1 of this chapter);

(ii) The weekly rate of each such payment (for rules relating to determination of the weekly rate of payment, see the provisions relating to section 105 (d) as set forth in Part 1 of this chapter); and

(iii) The beginning and ending dates of each period of absence from work on account of which such payment was made.

Such records shall be maintained whether or not such payment is excludable from gross income under section 105 (d), and whether such payment is made directly by the employer or on his behalf by a person who is regarded as an employer under section 3401 (d) (1), but the employer is not required to maintain any records with respect to payments made on his behalf by a governmental agency from a sickness and disability fund maintained under the law of a State, Territory, or the District of Columbia.

§ 31.6051 *Statutory provisions; receipts for employees.*

SEC. 6051. *Receipts for employees*—(a) *Requirement.* Every person required to deduct and withhold from an employee a tax under section 3101 or 3402, or who would have been required to deduct and withhold a tax under section 3402 if the employee had claimed no more than one withholding exemption, shall furnish to each such employee in respect of the remuneration paid by such person to such employee during the calendar year, on or before January 31 of the succeeding year, or, if his employment is terminated before the close of such calendar year, on the day on which the last payment of remuneration is made, a written statement showing the following:

(1) The name of such person,

(2) The name of the employee (and his social security account number if wages as defined in section 3121 (a) have been paid),

(3) The total amount of wages as defined in section 3401 (a),

(4) The total amount deducted and withheld as tax under section 3402,

(5) The total amount of wages as defined in section 3121 (a), and

(6) The total amount deducted and withheld as tax under section 3101.

(b) *Special rule as to compensation of members of Armed Forces.* In the case of compensation paid for service as a member of the Armed Forces, the statement shall show, as wages paid during the calendar year, the amount of such compensation paid during the calendar year which is not excluded from gross income under chapter 1 (whether or not such compensation constituted wages as defined in section 3401 (a)); such statement to be furnished if any tax was withheld during the calendar year or if any of the compensation paid is includible under chapter 1 in gross income.

(c) *Additional requirements.* The statements required to be furnished pursuant to this section in respect of any remuneration shall be furnished at such other times, shall contain such other information, and shall be in such form as the Secretary or his delegate may by regulations prescribe.

(d) *Statements to constitute information returns.* A duplicate of any statement made pursuant to this section and in accordance with regulations prescribed by the Secretary or his delegate shall, when required by such regulations, be filed with the Secretary or his delegate.

§ 31.6051–1 *Statements for employees*—(a) *Requirement if wages are subject to withholding of income tax*—(1) *General rule.* • • •

(iii) (*a*) In the case of statements furnished by the employer for whom services are performed, with respect to wages paid after December 31, 1955, "the total amount of wages as defined in section 3401 (a)", as used in section 6051 (a) (3), shall include all payments made by and on behalf of such employer under a wage continuation plan which constitute wages in accordance with § 31.3401 (a)–1 (b) (8) (ii) (*a*). Such payments are included in wages even though they are not subject to withholding in accordance with § 31.3401 (a)–1 (b) (8) (ii) (*b*) or (*c*). However, any payments made on behalf of the employer by a governmental agency from a sickness and disability fund maintained under the law of a State, Territory, or the District of Columbia shall not be included.

(*b*) In the case of any such statement, the amount of any wages on which tax was not withheld in accordance with § 31.3401 (a)–1 (b) (8) (ii) (*b*) shall be shown separately on Form W–2, with proper identification and in such manner that it may be read on each copy of the form.

[F. R. Doc. 55–8271; Filed, Oct. 11, 1955; 8:56 a. m.]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 3]

[Docket No. 11514; FCC 55–992]

TELEVISION BROADCAST STATIONS

TABLE OF ASSIGNMENTS

In the matter of amendment of § 3.606 *Table of assignments,* rules governing television broadcast stations; Docket No. 11514; FCC 55–992.

1. Notice is hereby given that the Commission has received a proposal for rule making in the above-entitled matter.

2. On April 6, 1955, WJPB–TV, Inc., permittee of television Station WJPB–TV, Fairmont, West Virginia, filed a petition requesting rule making to amend the television Table of Assignments, contained in § 3.606 of the Commission's rules and regulations, so as to make Channel 5, presently assigned to Weston,

West Virginia, and reserved for non-commercial educational use, available for commercial applicants. A letter supplementing this petition was filed on May 27, 1955, by WJPB–TV, Inc. A letter in support of petitioner's proposal was filed by Fairmont State College on June 24, 1955. An Opposition to the instant petition was filed on May 25, 1955, by Salem College, Salem, West Virginia; and letters in opposition to the petition were filed by Congressman Cleveland M. Bailey, Third District, West Virginia; West Virginia's Research Center, Inc.; and West Virginia University, Morgantown, West Virginia.

3. In support of the requested amendment, petitioner submits that since Station WJPB–TV ceased operation on Channel 35 at Fairmont, a large number of persons in north central West Virginia are without adequate or even any television service; that Channel 12 at Clarksburg, West Virginia, is the only VHF assignment in the area; and that no application has been filed for Channel 5, reserved for non-commercial educational use at Weston, for a period of one year. Petitioner urges that a station on Channel 5 at Weston would serve a large area and population; that if the proposed amendment is adopted, WJPB–TV, Inc. will file an application for a station at Weston with auxiliary studios at Fairmont; and that in the event an application for the new station is granted to petitioner, a minimum of 25 percent of the total air time of the station will be offered, without charge, to West Virginia's Research Center, Inc., and all other educational groups in the area. In support of petitioner's proposal, Fairmont State College states that, while it agrees with the other educational institutions in the area that an educational station would be a fine thing, it lacks the funds for entering into such a venture, as well as the staff and means for carrying on extensive television programming. The College believes that in the event petitioner is permitted to construct a commercial station on Channel 5, Fairmont State College will be offered all the time it is presently equipped to use profitably.

4. The parties opposing the instant proposal urge that the request for rule making to delete the educational reservation at Weston is untimely and basically unfair to the educational interests in the central West Virginia area. They point out that the educational reservation at Weston has been available for application for only a year and that it has not been reserved long enough to justify its deletion. They assert that, as educational developments go, one year is an extremely short period and that considerably more time is needed to permit the educational institutions in this area to develop their educational television plans to the point where an application can be filed. They state that a continuing effort is being made to promote an educational station at Weston and that there is a growing interest for the establishment of such a station; but that because of the drastic economic conditions in West Virginia during the past year, it has not, as yet, been possible to secure the funds necessary to construct a station. It is urged that this condition is only temporary and that as economic conditions in the state improve, funds will become available for the establishment of an educational station. It is further urged that a reasonable chance should be given educational interests to establish a station on Channel 5 since there is a great need for educational television in the central West Virginia area, and Weston, which is located in the center of an area surrounded by seven educational institutions, is ideally suited for an educational station.

5. The Commission is of the view that rule-making proceedings should be instituted in this matter in order that all interested parties may submit their views and the Commission may have the benefit of such views prior to taking final action.

6. Authority for the adoption of the proposed amendment is contained in sections 4 (i), 301, 303 (c), (d), (f), and (r), and 307 (b) of the Communications Act of 1934, as amended.

7. Any interested party who is of the opinion that the amendment proposed by petitioner should not be adopted, or should not be adopted in the form set forth herein, may file with the Commission on or before November 7, 1955, a written statement or brief setting forth his comments. Comments in support of the proposed amendment may also be filed on or before the same date. Comments or briefs in reply to the original comments may be filed within 10 days from the last day for filing said original comments or briefs. No additional comments may be filed unless (1) specifically requested by the Commission or (2) good cause for the filing of such additional comments is established.

8. In accordance with the provisions of § 1.764 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs, or comments shall be furnished the Commission.

Adopted: October 5, 1955.

Released: October 6, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 55–8221; Filed, Oct. 11, 1955; 8:45 a. m.]

[47 CFR Part 3]

[Docket No. 11515; FCC 55–993]

TELEVISION BROADCAST STATIONS

TABLE OF ASSIGNMENTS

In the matter of amendment of § 3.606 *Table of assignments,* rules governing television broadcast stations; Docket No. 11515; FCC 55–993.

1. Notice is hereby given that the Commission has received a proposal for rule making in the above-entitled matter.

2. The Commission has before it for consideration a petition filed on July 5, 1955, by John M. Lawrence III, individually and as trustee for W. C. Mitchell, Frank Seale, G. S. Parker, Brazos A. Varisco, and John M. Lawrence, all of Brazos County, Texas, requesting it to amend the Table of Assignments in § 3.606 of its rules and regulations, by removing the reservation for non-commercial educational use from Channel 3, presently assigned to College Station, Texas, and making it available for commercial use. Petitioner proposes that since Bryan and College Station are one unit for commercial purposes, Channel 3 be assigned jointly to both cities for commercial use, and that either Channel 48, assigned to College Station, or Channel 54, assigned to Bryan, be reserved for non-commercial educational use in place of Channel 3.

3. In support of the proposed amendment petitioner urges that there has been no application for Channel 3 in College Station and that there appears to be no prospect of an application for educational use within the foreseeable future. Petitioner notes that no local action was taken, or interest indicated, to have Channel 3 designated for non-commercial educational use at College Station when it was originally assigned. Petitioner submits that Bryan and College Station are rapidly developing cities in need of local television service; that the Bryan-College Station area receives outside VHF signals and is consequently equipped with VHF receivers; and that a commercial station located at Bryan-College Station should therefore be VHF. Petitioner represents that if Channel 3 is made available for commercial use, he will apply for a station.

4. The Commission is of the view that rule-making proceedings should be instituted in this matter in order that interested parties may submit their views, and that the Commission may be apprised of such views prior to taking further action.

5. Authority for the issuance of the instant Notice is contained in sections 4 (i), 301, 303 (c) (d), (f), and (r), and 307 (b) of the Communications Act of 1934, as amended.

6. Any interested person who is of the view that the proposal herein should not be adopted may file with the Commission on or before November 7, 1955, written data, views, or arguments setting forth his comments. Comments in support of the proposal may also be filed on or before the same date. Comments or briefs in reply to such original comments as may be submitted should be filed within 10 days from the last day for filing said original comments or briefs. No additional comments may be filed unless (1) specifically requested by the Commission or (2) good cause for filing such additional comments is established. The Commission will consider all such additional comments submitted before taking further action in this matter, and if any comments appear to warrant the holding of a hearing, oral argument, or demonstration, notice of the time and place of such hearing, oral argument or demonstration will be given.

7. In accordance with the provisions of § 1.764 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs or comments shall be furnished the Commission.

Adopted: October 5, 1955.

Released: October 6, 1955.

FEDERAL COMMUNICATIONS COMMISSION,

[47 CFR Parts 6, 9]

[Docket No. 11513; FCC 55–987]

PUBLIC RADIOCOMMUNICATIONS SERVICES; AVIATION SERVICES

USE OF SINGLE SIDEBAND TRANSMISSION IN CERTAIN FIXED RADIOTELEPHONE SERVICE

In the matter of amendment of Parts 6 and 9 of the Commission's rules and regulations to require the use of single sideband transmission in fixed radiotelephone service below 25,000 kc, except Alaskan and maritime fixed; Docket No. 11513; FCC 55–987.

1. Notice is hereby given of proposed rule making in the above entitled matter.

2. The purpose of this proceeding is to carry out the Commission's obligation to provide for the growing public need for radio communication facilities by making available for additional use radio frequency space now occupied by emissions not actually necessary for satisfactory communications in the fixed service using radiotelephony in the frequency spectrum below 25,000 kc.

3. Existing Commission rules for the use of amplitude modulation (AM) radiotelephone communication are patterned after the type of radio equipment developed soon after World War I. Conventional AM systems transmit two sidebands, one above the carrier frequency and the other below with the same intelligence being transmitted in each sideband. One sideband is, however, sufficient for satisfactory communication. An objective of the instant proposal is to provide for the emission of one sideband only for each radiotelephone communication, thus freeing the spectrum space now occupied by the other superfluous sideband for new or additional communication facilities.

4. The Commission believes that the benefits in terms of spectrum savings which would be achieved by the universal employment of single sideband telephony in all cases where double sideband now is employed will not be fully obtainable unless all users in the fixed and mobile services take parallel action. However, there is at present no international agreement to this effect and there would have to be, in any event, a decision on the part of the Commission to require single sideband in lieu of double sideband before the United States could propose or become a party to such an international agreement. As a forerunner to more universal use of single sideband techniques, it is proposed herein to amend the Commission's Rules so as to require such techniques in the fixed service using telephony. Many stations already are voluntarily using this transmission method in the foreign and overseas radiotelephone service. At present most of the stations in this service use single sideband techniques for their transmissions in both directions. On the other hand, for those stations in the fixed service not now employing such techniques, the Commission is quite aware of the obsolescence problem which will be created in converting from double sideband to single sideband operation and believes, therefore, that this factor should be taken into account in establishing schedules for change-over to single sideband operation.

5. Accordingly, the Commission proposes to amend its rules to require single sideband type of transmission by all radio stations in the fixed service, except Alaskan and maritime fixed, now employing amplitude modulation for telephony in the frequency bands below 25,000 kc. It is further proposed that any such amendments provide adequate periods of time, e. g. five to ten years, for continued use of existing apparatus so that minimum inconvenience would result, consistent with the need for improved spectrum utilization. Moreover, it may be that in certain branches of the fixed service, the problem will be more complex than in others and different time schedules may be appropriate for these different branches. Further notice of proposed rule making in this matter may be issued with respect to certain types of stations in the fixed service should the comments appear to so warrant.

6. The Commission desires comments with respect to the foregoing proposal and, in particular, with respect to the following matters.

(a) Rules, standards, and technical specifications covering single sideband AM telephone communication systems, including but not limited to the following items:

(1) Earliest date, within a period of approximately two to five years, by which new AM telephone transmitters authorized at a station in the fixed service should be capable of single sideband operation.

(2) Earliest date by which all AM telephone transmissions, except for tests, at fixed stations should be by means of single sideband techniques.

(3) The degree of carrier reduction.

(4) Whether receiver response characteristics should be specified in the Commission's rules.

(5) Bandwidth requirements for single and multichannel operation.

(b) Economic effect of and the manner of achieving an orderly transition to the single sideband system.

(c) Any other matters considered pertinent.

7. Any interested person who is of the opinion that the proposed amendments should not be adopted, or should not be adopted as proposed herein, may file with the Commission on or before December 30, 1955, written data, views or briefs setting forth his comments. Comments in support of the proposed amendments may also be filed on or before the same date. Comments in reply to original comments may be filed within 10 days from the last day for filing said original comments. No additional comments may be filed unless: (1) Specifically requested by the Commission, or (2) good cause for the filing of additional comments is established. The Commission will consider all such comments prior to taking final action in this matter; and if comments are submitted warranting oral argument, notice of the time and place of such oral argument will be given.

8. This proposal is issued under the authority contained in section 4 (i) and 303 of the Communications Act of 1934, as amended.

9. Pursuant to the provisions of § 1.764 of the Commission's rules, an original and 14 copies of all statements, briefs or comments should be furnished the Commission.

Adopted: October 5, 1955.

Released: October 5, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

NOTICES

DEPARTMENT OF LABOR

Office of the Secretary

MINNESOTA

CERTIFICATION OF COMMISSIONER OF DEPARTMENT OF EMPLOYMENT SECURITY

The Department of Employment Security of the State of Minnesota having duly submitted to the Secretary of Labor, pursuant to the provisions of section 3303 (b) (3) of the Internal Revenue Code of 1954, as amended, the Minnesota Employment Security Law; and

The Secretary of Labor having considered the provisions of said law to determine whether or not reduced rates of contributions are allowable thereunder under conditions fulfilling the requirements of section 3303 of the Internal Revenue Code of 1954;

The Secretary of Labor hereby finds that:

(1) Said law provides for a pooled fund as defined in section 3303 (c) (2) of the Internal Revenue Code of 1954; and

(2) Reduced rates of contributions under said law to such pooled fund are allowable only in accordance with the provisions of section 3303 (a) (1) of the Internal Revenue Code of 1954.

Pursuant to the provisions of section 3303 (b) (3) of the Internal Revenue Code of 1954, the Secretary of Labor hereby directs that the foregoing findings be certified to the Commissioner of the Department of Employment Security of the State of Minnesota.

Dated: October 5, 1955.

JAMES P. MITCHELL,
Secretary of Labor.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Misc. 67318]

NEBRASKA AND WYOMING

ORDER PROVIDING FOR OPENING OF PUBLIC LANDS RESTORED FROM NORTH PLATTE IRRIGATION DISTRICT

OCTOBER 6, 1955.

An order of the Bureau of Reclamation of June 21, 1954, concurred in by the Acting Director, Bureau of Land Management, July 23, 1954, as amended by an order of March 16, 1955, concurred in by the Associate Director, Bureau of Land Management, April 25, 1955, revoked the Departmental orders of February 11 1903, May 3, 1904, November 21, 1904, December 5, 1904, September 21, 1906, October 23, 1907, April 23, 1908, August 10, 1908, September 1, 1908, January 20, 1909, May 5, 1909, October 6, 1909, July 8, 1916, February 28, 1931, and October 13, 1933, so far as they withdrew under the provisions of the Reclamation Act of June 17, 1902 (32 Stat. 388), the following-described lands in connection with the North Platte Project, Nebraska and Wyoming, and provided that such revocation should not affect the withdrawal of any other lands by said orders or affect any other orders withdrawing or reserving the lands described:

NEBRASKA

SIXTH PRINCIPAL MERIDIAN

T. 21 N., R. 51 W.,
Sec. 11, E½SW¼;
Sec. 14, S½NW¼NW¼, SW¼NW¼, NW¼SW¼;
Sec. 15, NE¼;
Sec. 22, E½SE¼ W½NE¼;
Sec. 27, SE¼.
T. 22 N., R. 52 W.,
Sec. 35, NE¼NE¼, S½NE¼, NE¼SE¼.
T. 22 N., R. 53 W.,

Sec. 1, lots 1 and 2.
T. 26 N., R. 64 W.,
Sec. 20, SW¼NE¼;
Sec. 24, N½SE¼;
Sec. 35, lots 5 and 6.
T. 26 N., R. 65 W.,
Sec. 12, N½NE¼.
T. 27 N., R. 67 W.,
Sec. 3, W½SE¼;
Sec. 10, NE¼, NW¼SE¼.
T. 26 N., R. 84 W.,
Sec. 30, SE¼NW¼.

The areas described aggregate 3,480.24 acres.

1. The following-described lands are included in allowed homestead entries and are, therefore, not subject to the provisions of the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, granting preference rights to veterans of World War II, the Korean Conflict, and others:

NEBRASKA

SIXTH PRINCIPAL MERIDIAN

T. 21 N., R. 51 W.,
Sec. 11, E½SW¼;
Sec. 14, S½NW¼NW¼, SW¼NW¼, NW¼SW¼;
Sec. 15, NE¼;
Sec. 22, W½NE¼;
Sec. 27, SE¼.
T. 22 N., R. 52 W.,
Sec. 35, NE¼NE¼, S½NE¼, NE¼SE¼.
T. 22 N., R. 53 W.,
Sec. 1, lot 1, SE¼NE¼;
Sec. 13, S½NE¼.
T. 23 N., R. 54 W.,
Sec. 13, NW¼.

WYOMING

SIXTH PRINCIPAL MERIDIAN

T. 24 N., R. 60 W.,
Sec. 8, W½NE¼, E½E½NW¼, NW¼SE¼;
Sec. 9, SW¼NE¼, SE¼NW¼, NE¼SW¼, NW¼SE¼.
T. 23 N., R. 61 W.,
Sec. 20, S½NE¼;
Sec. 30, N½NE¼, SW¼NE¼.
T. 25 N., R. 62 W.,
Sec. 27, SE¼SW¼, S½SE¼;
Sec. 34, NE¼NW¼.

The areas described aggregate 1,939.95 acres.

2. The E½W½, sec. 10, and N½NW¼, NW¼NE¼, N½SE¼NW¼, sec. 26, T. 24 N., R. 58 W., 6th P. M., Nebraska, are patented lands. The remaining lands, aggregating approximately 1,440.39 acres, vary from choppy sand hills with deep sandy soils to nearly level lands with very heavy clay soils. Due to the topography and soils, none of the lands are suitable for the growing of domestic agricultural crops. No water rights are attached to any of these lands. The sandy soils support a stand of native grasses and sage brush, while the heavy clay soils support a stand of short and mid grasses.

3. No application for the lands may be allowed under the homestead, desert-land, small tract, or any other nonmineral public-land law unless the lands have already been classified as valuable or suitabe for such type of application, or shall be so classified upon the consideration of an application. Any application that is filed will be considered on its merits. The lands will not be subject to occupancy or disposition until they have been classified. The Desert Land Laws do not apply to lands in Nebraska.

4. Subject to any existing valid rights and the requirements of applicable law, the lands described are hereby opened to filing of applications, selections, and locations in accordance with the following:

a. Applications and selections under the nonmineral public-land laws and applications and offers under the mineral-leasing laws may be presented to the Manager mentioned below, beginning on the date of this order. Such applications, selections, and offers will be considered as filed on the hour and respective date shown for the various classes enumerated in the following paragraphs:

(1) Applications by persons having prior existing valid settlement rights, preference rights conferred by existing laws, or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph.

(2) All valid applications under the Homestead, Desert Land, and Small Tract Laws by qualified veterans of World War II or of the Korean Conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284 as amended), presented prior to 10:00 a. m. on November 11, 1955, will be considered as simultaneously filed at that hour. Rights under such preference right applications filed after that hour and before 10:00 a. m. on February 10, 1956, will be governed by the time of filing.

(3) All valid applications and selections under the nonmineral public-land laws, other than those coming under paragraphs (1) and (2) above, and applications and offers under the mineral-leasing laws, presented prior to 10:00 a. m. on February 10, 1956, will be considered as simultaneously filed at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing.

b. The lands will be open to location under the United States mining laws, beginning 10:00 a. m., on February 10, 1956.

5. Persons claiming veteran's preference rights under Paragraph a (2) above must enclose with their applications proper evidence of military or naval service, preferably a complete photostatic copy of the certificate of honorable discharge. Persons claiming preference rights based upon valid settlement, statutory preference, or equitable claims must enclose properly corroborated statements in support of their applications, setting forth all facts relevant to their claims. Detailed rules and regulations governing applications which may be filed pursuant to this notice can be found in Title 43 of the Code of Federal Regulations.

Inquiries regarding the lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Cheyenne, Wyoming.

EDWARD WOOZLEY,
Director.

Bureau of Reclamation

MOUNTAIN HOME DIVISION, SNAKE RIVER PROJECT, IDAHO

ORDER OF REVOCATION

NOVEMBER 25, 1952.

Pursuant to the authority delegated by Department Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of April 30, 1951, insofar as said order affects the following described land: *Provided, however,* That such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the land hereinafter described:

BOISE MERIDIAN, IDAHO

T. 4 S., R. 2 E.,
Sec. 5, Lot 4.

The above area aggregates 36.32 acres.

ALFRED R. GOLZE,
Acting Assistant Commissioner.

[Misc. 61715]

OCTOBER 6, 1955.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The lands were classified as power sites (Power Site Classification No. 435) by order of the Acting Director, Geological Survey of August 16, 1955 (20 F. R. 6105).

EDWARD WOOZLEY,
Director,
Bureau of Land Management.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 55-995]

[Amdt. 0-13]

STATEMENT OF ORGANIZATION, DELEGATIONS OF AUTHORITY AND OTHER INFORMATION

MISCELLANEOUS AMENDMENTS

In the matter of amendment to Part 0 of the Commission's rules to abolish the Office of the Chief Accountant and transfer its component divisions to the Common Carrier and Broadcast Bureaus.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 5th day of October 1955.

The Commission having under consideration the abolition of the Office of the Chief Accountant; and

It appearing that the amendments herein ordered would promote greater efficiency in Commission operations; and

It further appearing that the amendments herein ordered are procedural in nature, and, therefore, compliance with public notice and rule-making procedure required by sections 4 (a) and (b) of the Administrative Procedure Act is not required;

It is ordered, That pursuant to sections 4 (f) and 5 (g) of the Communications Act of 1934, as amended, the Office of the Chief Accountant is abolished and Part 0 of the Commission's Rules is hereby amended, effective October 31, 1955, as set forth below.

Released: October 6, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

Section 0.5 is amended to read as follows:

SEC. 0.5 *General description of Commission organization.* The Commission's staff is divided into the following principal units:

(a) Broadcast Bureau.
(b) Common Carrier Bureau.
(c) Field Engineering and Monitoring Bureau.
(d) Safety and Special Radio Services Bureau.
(e) Office of Hearing Examiners.
(f) Office of Administration.
(g) Office of General Counsel.
(h) Office of Chief Engineer.
(i) Office of the Secretary.
(j) Office of Opinions and Review.
(k) Office of Reports and Information.
(l) Office of Defense Coordination.

Section 0.13 is amended to read as follows:

SEC. 0.13 *Units in the Bureau.* The Broadcast Bureau is divided into the following units:

(a) The Office of the Chief of Bureau.
(b) Broadcast Facilities Division.
(c) Renewal and Transfer Division.
(d) Hearing Division.
(e) Rules and Standards Division.
(f) Economics Division.
(g) License Division.

Add new section 0.19 as follows:

SEC. 0.19 *Economics Division.* The Economics Division prepares and compiles economic data and compiles economic reports to the Commission on the condition and status of the broadcast industry; studies the social and economic factors affecting communications; provides technical advice and assistance to the bureau and the Commission on statistical aspects of questionnaires, sampling, industry economic trends and statistical methods, and acts as a clearing house on sources for obtaining pertinent economic data from within the Commission and from government and private organizations.

Section 0.24 is amended to read as follows:

SEC. 0.24 *The Office of the Bureau Chief.* The immediate Office of the Chief of the Bureau includes:

(a) Office of the Field Coordinator which supervises and coordinates the work of the field offices;

(b) Office of Administrative Assistant which performs the administrative function of the Bureau; and

(c) Office of Accounting Systems which formulates uniform systems of accounts, annual report forms and related rules and regulations, and cooperates with the NARUC committees dealing with these matters.

Section 0.26 is amended by deleting the expression "Office of Chief Accountant" and substituting therefore "Office of Accounting Systems".

Section 0.28 is amended to read as follows:

SEC. 0.28 *Telephone Division.* The Telephone Division is responsible for the Bureau's functions pertaining to domestic telephone matters and telegraph operations of carriers engaged principally in non-record communication; for rules and applications relating to authorizations for domestic common carrier radio services, including domestic telegraph radio services; and, in addition, for international telephone rate matters. The Telephone Division includes a Services and Facilities Branch, an Accounting Compliance Branch, a Rates and Revenue Requirements Branch, and a Depreciation Rates Branch.

Delete the heading following section 0.92 which reads "Office of Chief Accountant".

Delete the following sections:

Section 0.101.
Section 0.102.
Section 0.103.
Section 0.104.

Section 0.111 (g) is amended by deleting the expression "and the Chief Accountant".

Section 0.121 (d) is amended by deleting the expression "and the Chief Accountant".

Section 0.241 is amended by adding a new paragraph as follows:

(q) To administer, interpret, and apply orders or rules of practice and procedure promulgated by the Commission relating to financial and statistical data of stations in the broadcast service and broadcast networks and chains, including applications for extension of time in which to file financial and statistical statements and reports.

Section 0.254 is amended to read as follows:

SEC. 0.254 *Authority concerning section 220 of the Act.* The Chief of the Common Carrier Bureau or, in his absence, the Acting Chief of the Common Carrier Bureau, is delegated authority to interpret the regulations and to act upon the administration of such regulations promulgated by the Commission pursuant to section 220 of the Communications Act, relating to accounts, records, and memoranda to be kept by carrier subject to the jurisdiction of the Commission.

Delete the heading following section 0.301 which reads: "Chief Accountant".

Delete the following sections:

Section 0.311.
Section 0.312.

[Docket Nos. 6584, 6585; FCC 55M-851]

ALBUQUERQUE BROADCASTING CO. (KOB)

ORDER CONTINUING HEARING

In re applications of Albuquerque Broadcasting Company (KOB), Albuquerque, New Mexico, Docket No. 6584, File No. BMP-1738; for modification of construction permit. Albuquerque Broadcasting Company (KOB), Albuquerque, New Mexico, Docket No. 6585, File No. BL-1799, BZ-1583; for license to cover construction permit as modified and authority to determine operating power by direct measurement of antenna power.

The Hearing Examiner having under consideration the record of a formal prehearing conference in the above-entitled proceeding which, pursuant to appropriate notice, was held on September 23, 1955, in the offices of this Commission, Washington, D. C., and attended by counsel for all of the parties thereto, as well as the Baptist General Convention of Texas (KWBU), a proposed intervenor therein; and

It appearing that the unanimous opinion was expressed therein by the attending parties that a postponement of the hearing beyond the date now scheduled, namely, October 17, 1955, is necessary in order to provide such parties additional time within which to effectuate stipulations of the evidence to be adduced under the issues presently specified therein and to afford the Commission an opportunity to rule on the numerous petitions now pending before it affecting the status of parties and the addition, deletion or modification of issues to be resolved therein; and

It further appearing that all of the parties to the proceeding have been making diligent efforts to arrive at stipulations on the evidence to be presented and that substantial results can reasonably be expected therefrom but that additional time is needed for this purpose, in view of the number, complexity and uncertain status of the issues to be resolved therein; and

It further appearing that it is impossible to proceed with the hearing until after such time as the Commission has ruled on the above pleadings, involving a determination of the rights of parties to participate in the proceeding, the number and character of the issues to be resolved therein and other questions vitally affecting the scope and course of such hearing; and

It further appearing that all of the parties in attendance have agreed that another pre-hearing conference should be held on December 1, 1955, for the purpose of submitting to the Hearing Examiner on that date all stipulations which can be effectuated between them of evidence relating to the issues presently specified in the proceeding; and

It further appearing that if such proposed stipulations are effectuated the result would be to shorten and simplify the hearing and thus facilitate a review of the record by the Hearing Examiner and the Commission; and

It further appearing that under the above circumstances a continuance of the hearing in the above-entitled proceeding is necessary and would be conducive to its expedition, in conformance with the Commission's directive, as set forth in its Memorandum Opinion and Order, adopted on May 26, 1955; and

It further appearing from the foregoing that a compelling showing has been made that such continuance would serve the public interest, convenience and necessity;

It is ordered, This 4th day of October 1955, that the hearing in the above-entitled proceeding is hereby continued without date; that a pre-hearing conference will be called by the Hearing Examiner immediately subsequent to the Commission's actions on the various petitions now pending therein, at which a definite date will be set for the commencement of the hearing; and that another pre-hearing conference will be held at 10:00 o'clock a. m., on Friday, December 1, 1955, in the offices of this Commisson, Washington, D. C., for the purpose of receiving stipulations on the evidence to be presented under all of the issues presently specified in the proceeding.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 55-8225; Filed, Oct. 11, 1955; 8:46 a. m.]

[Docket No. 11202, etc.; FCC 55-1001]

MINERS BROADCASTING SERVICE, INC., ET AL.

ORDER AMENDING ISSUES

In re applications of Miners Broadcasting Service, Inc., Ambridge, Pennsylvania, Docket No. 11202, File No. BP-9102; Louis Rosenberg, Tarentum, Pennsylvania, Docket No. 11203, File No. BP-9192; Theodore H. Oppegard and Carl R. Lee, d/b as Somerset Broadcasting Company, Painesville, Ohio, Docket No. 11204, File No. BP-9358; for construction permits.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 5th day of October 1955;

The Commission having under consideration (1) petition for reconsideration filed August 4, 1955, by Theodore H. Oppegard and Carl R. Lee, d/b as Somerset Broadcasting Company, Painesville, Ohio; (2) opposition to said petition filed August 15, 1955, by Louis Rosenberg; and (3) reply to said petition filed August 15, 1955, by Chief, Broadcast Bureau;

It appearing that, by order dated June 29, 1955, the Commission denied the petition of Theodore H. Oppegard and Carl R. Lee, d/b as Somerset Broadcasting Company, filed May 6, 1955, requesting the severance of the proceeding on its application from the consolidated proceedings involving the applications of Miners Broadcasting Service, Inc., Ambridge, Pennsylvania, and Louis Rosenberg, Tarentum, Pennsylvania; and that by the subject petition Somerset is now requesting that the Commission reconsider this denial;

It further appearing that Somerset Broadcasting Company contends that evidence now of record establishes that its proposal complies with section 3.28 (c) of the Commission's Rules ("10% Rule"); that operation of its proposed station will not cause sufficient interference to either of the other two proposals so as to cause either to be in violation of section 3.28 (c), and hence its application is not mutually exclusive with either; and that Miners and Rosenberg on the one hand have agreed with Somerset to accept whatever interference may result to either from the operation of the Somerset proposal while Somerset has agreed to accept whatever interference may result to the Somerset operation from the operation of either of the other proposals;

It further appearing that, because of the foregoing, Somerset contends that the proceeding on its application may be severed from the proceeding on the other two applications without having an impact upon that proceeding; and that by such severance, a grant of its application may be made sooner than if retained in the consolidated proceeding;

It further appearing that Louis Rosenberg opposes the petition on the ground that a grant thereof would deny substantive rights of the other applicants;

It further appearing that the evidence of record indicates that the mutual interference which would result between the Somerset proposal and either one of the other two proposals, together with any interference which would result from existing stations, would not cause the Somerset proposal or either one of the other two proposals to violate section 3.28 (c) of the Commission's Rules;

It further appearing that, in view of the limited extent of the mutual interference and in view of the above-described agreement among the parties, mutual interference and any questions presented by such interference are not substantive factors requiring resolution in a consolidated proceeding; and that the rights of the other parties would not be prejudiced by a severance of the application of Somerset Broadcasting Company;

It further appearing that a severance of the Somerset application would result in an earlier consideration of its application and under the circumstances here, would be conducive to the proper dispatch of the Commission's business;

It is ordered, That the application of Theodore H. Oppegard and Carl R. Lee d/b as Somerset Broadcasting Company is retained in hearing docket (Docket No. 11204); and that the proceeding on the Somerset application is severed from the proceeding on the applications of Miners Broadcasting Service, Inc. and Louis Rosenberg;

It is further ordered, That the issues on which the Somerset application was designated for hearing are deleted; and that the following issues are substituted therefor:

1. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed station, and the availability of other primary service to such areas and populations.

2. To determine whether the operations proposed by the Somerset Broadcasting Company and the Miners Broadcasting Service, Inc. would involve objectionable interference with each other, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations.

3. To determine whether the operations proposed by Louis Rosenberg and the Somerset Broadcasting Company would involve objectionable interference with each other, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations.

4. To determine whether the installation and operation of the station proposed by Somerset Broadcasting Co. would be in compliance with the Commission's Rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations, with particular reference to providing the required minimum of interference-free service within its normally protected daytime contour (0.5 mv/m) because of interference from Station WBNS, Columbus, Ohio, and either the proposal of Miners Broadcasting Service, Inc., or the proposal of Louis Rosenberg.

It is further ordered, That Issue No. 3 (a) as now promulgated in the above-entitled consolidated proceeding is deleted; and that the remaining issues thereof are retained as the issues in the consolidated proceeding on the applications of Miners Broadcasting Service, Inc. (Docket No. 11202), and Louis Rosenberg (Docket No. 11203).

Released: October 6, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[Docket No. 11446 etc.; FCC 55M-852]

CERRITOS BROADCASTING CO. ET AL.

ORDER SCHEDULING HEARING

In re applications of Raymond B. Torian, John W. Doran, Foster Earl Rutledge and Harold B. Shideler, a partnership d/b as The Cerritos Broadcasting Co., Signal Hill, California, Docket No. 11446; File No. BP-8734; Melvin F. Berstler and Roy R. Cone, a partnership d/b as Oceanside-Carlsbad Broadcasting Co., Oceanside, California, Docket No. 11447, File No. BP-9207; Albert John Williams, Inglewood, California, Docket No. 11448, File No. BP-9509; Neil W. Owen and Julia C. Owen, a partnership d/b as Palomar Broadcasting Co., Escondido, California, Docket No. 11449, File No. BP-9676; for construction permits.

The Hearing Examiner having under consideration: (1) A Petition and Supplemental Petition for Leave to Amend Application with the associated amendment filed by the applicant Williams on August 4 and September 6, 1955; (2) a joint Petition for Reconsideration of an order of continuance filed September 27, 1955 by the three applicants Cerritos, Oceanside-Carlsbad and Williams; (3) a Petition for Leave to Amend and accompanying amendment filed September 26, 1955 by Oceanside Carlsbad, and an Opposition thereto filed October 3, 1955 by Palomar; (4) the procedural facts shown by the docket files in this proceeding; and (5) the statements made by counsel for Broadcast Bureau and for each applicant except Palomar who attended at an informal oral argument this day conducted upon Items 1 through 3 above; and

It appearing that the Williams Petition to Amend as supplemented shows good cause for allowing the amendment which increases the proposed power from 500 watts to 1000 watts, changes the antenna site and other engineering and construction cost information as specified in the amendment, and that no objection to the amendment has been interposed by any party, and accordingly that said petition should be granted; and

It further appearing that the Oceanside-Carlsbad petition and amendment and the Palomar opposition present controversial questions upon which the Hearing Examiner desires to be advised further by briefs of the adversary parties which were requested at the oral argument, and accordingly action on this matter should be postponed; and

It further appearing that the joint Petition for Reconsideration requests that a date certain, not later than November 21, 1955, be fixed for the commencement of the hearing in this proceeding in lieu of the indefinitely continued date which was ordered by the Hearing Examiner's order dated September 27, 1955, and that counsel for the applicants represented at the oral argument[1] and counsel for the Broadcast Bureau have agreed to the fixing of the hearing date as hereinafter ordered; and

It further appearing that counsel for each represented applicant stated that the applicants will be ready to proceed with the hearing on Thursday, December 1, 1955, and that the applicants and their engineers and attorneys will confer among themselves and with Bureau officials sufficiently in advance of the scheduled prehearing conference date of November 15, 1955, so as to be prepared at that prehearing conference to submit and exchange all written direct affirmative case exhibits to be offered in evidence pursuant to the issues as they are now constituted in this proceeding (which issues pertain only to engineering questions of interference and matters pertinent to the Section 307 (b) inquiry specified in Issue No. 5 of the hearing order dated July 6, 1955), and accordingly that good cause exists for fixing the dates for exchange of exhibits and for commencement of the hearing as above indicated and as hereinafter ordered; and

It further appearing that the parties, their locations and their representatives are so numerous and diversified[2] as to render impractical, inconvenient, expensive, and dilatory the holding of prehearing conferences in the manner and sequence contemplated by sections 1.813 and 1.841 of the Commission's Rules, and that the purposes of the usual first prehearing conference will be served by the informal conferences referred to above, and accordingly that it will conduce to the orderly dispatch of the Commission's business and to the ends of justice to omit a formal prehearing conference prior to the exchange of the written direct affirmative case exhibits at the time and place above indicated and hereinafter ordered; now therefore

It is ordered, This 4th day of October 1955, that the Petition and Supplemental Petition to Amend filed by the applicant Williams, Item 1 above, be and it is hereby granted, and the amendment therewith tendered is accepted; and

[1] The applicant Palomar was not represented by counsel at the oral argument, but its Petition for Continuance which prompted the September 27 order, herein reconsidered and modified, requested a hearing date not earlier than November 7, 1955; consequently, it is expected that Palomar will be ready to proceed to prehearing and hearing on the specified dates which comport with the relief first requested.

[2] There are nine parties (individuals, partnerships, corporations, a trustee and the Bureau Chief) in this proceeding: four applicants, four respondents, and the Chief of the Broadcast Bureau. Three applicants and three respondents and Bureau are represented by attorneys in Washington, D. C., one applicant is represented by an attorney in California, and one respondent does not appear to be represented by any attorney. The business residences of the eight private parties are in eight cities in California.

It is further ordered, That the Oceanside-Carlsbad Petition to Amend, Item 3 above, be and the same is hereby taken under advisement; and

It is further ordered, That the joint Petition for Reconsideration, Item 2 above, as modified by counsels' statements, be and it is hereby granted, and so much of the order of September 27, 1955 as continued the hearing to an indefinite date is hereby set aside; and

It is further ordered and directed, Pursuant to sections 1.813 and 1.841 of the Commission's Rules, that the applicants herein shall hold informal conferences, of which informal and reasonable notice and opportunity for participation shall be extended to all other parties herein, so as to enable the applicants to exchange at the prehearing conference on November 15, 1955, their written direct affirmative case exhibits upon the matters now at issue; and

It is further ordered, That the hearing of evidence in this proceeding shall be commenced at 10:00 a. m. on Thursday, December 1, 1955, at the offices of the Commission in Washington, D. C.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

MOBILE RADIO TELEPHONE SERVICE

FUTURE SINGLE SIDEBAND OPERATION

OCTOBER 6, 1955.

The Commission plans future consideration of single sideband operation in all of the mobile service and Alaskan and maritime fixed service now using radiotelephone on frequencies below 25,000 kilocycles. Among the radio stations that would be affected are those in the Public Safety, Maritime Mobile, Aeronautical Mobile, Industrial, and Remote Pickup Broadcast services. At present, stations in these services use conventional double sideband operation, which requires a radio frequency channel more than twice as wide as the band of frequencies actually needed for communication. Since only one sideband is necessary for communications, the elimination of the extra sideband offers a possible means for reducing the radio frequency bandwidth occupied by each station. Additional channels might, thereby, be made available for new stations or to relieve congestion on existing channels.

Single sideband has been used for many years in the international radiotelephone service. Looking toward further use of this transmission method, the Commission today adopted a Notice of Proposed Rule Making proposing the use of single sideband transmission by all radiotelephone stations in the fixed service except Alaskan and maritime fixed, below 25,000 kc. In the mobile service, and Alaskan and maritime fixed service, however, there are special problems involving equipment and operation. Consequently, the Commission is not proposing to require single sideband operation in these services at this time. At a future date, however (in about one year), the Commission plans to give further consideration to requiring single sideband operation in the mobile service and the Alaskan and maritime fixed services. In the meantime, it is expected that users, manufacturers and professional groups with expert knowledge in this field of radio communication will conduct tests, studies and analyses to provide a sound technical background for the future consideration of this matter. This announcement is being made at this time to enable all interested parties to prepare to offer constructive comments to help in enlarging the use of this improved transmission method.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. G-8420]

BILLY BRIDEWELL AND R. H. HEDGE

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 5, 1955.

Take notice that Billy Bridewell and R. H. Hedge (Applicant), independent producers of natural gas, with a principal office in Tyler, Texas, filed on January 31, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to produce natural gas from the Fulshear Field, Fort Bend County, Texas, which will be sold in interstate commerce to Texas Illinois Natural Gas Pipe Line Company for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 15, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of Section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before November 3, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-8233; Filed, Oct. 11, 1955; 8:49 a. m.]

[Docket No. G-8871]

COLORADO INTERSTATE GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 5, 1955.

Take notice that Colorado Interstate Gas Company (Applicant), a Delaware corporation having its principal place of business in Colorado Springs, Colorado, filed, on May 9, 1955, as supplemented July 13, 1955, an application for a certificate of public convenience and necessity pursuant to sectoin 7 (c) of the Natural Gas Act, authorizing the construction and operation of certain natural gas facilities and the sale of natural gas for resale as hereinafter described.

Applicant proposes to construct and operate the following facilities and to make the following sales: (A), a meter and regulator station and 5.5 miles of 2-inch pipeline from its 20-inch Lakin-Denver line to the town of Kit Carson, Cheyenne County, Colorado, and to sell natural gas to Eastern Colorado Utility Company for resale in said town. Estimated cost of facilities is $20,832 and estimated firm peak day requirements in the third year of operation in the town of Kit Carson are 405 Mcf. (B), a meter and regulator station on its Lakin-Denver line, and to sell natural gas to Eastern Colorado Utility Company for resale in the town of Sheridan Lake, Kiowa County, Colorado. Estimated cost of facilities is $2,751 and estimated firm peak day requirements in the third year of operation are 128 Mcf. (C), a meter and regulator station on its 22-inch, Bivins-Denver pipeline, and to sell natural gas to Pueblo Gas and Fuel Company for resale in the town of Vineland, Colorado. Estimated cost of facilities is $2,179 and estimated firm peak day requirements in the third year of operation are 111 Mcf.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on October 28, 1955, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before October 26, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-8234; Filed, Oct. 11, 1955; 8:49 a. m.]

[Docket No. G-9142]

MANUFACTURERS LIGHT AND HEAT CO.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 5, 1955.

Take notice that The Manufacturers Light and Heat Company (Applicant), a Pennsylvania Corporation with its principal place of business in Pittsburgh, Pennsylvania, filed an Application on July 18, 1955, as supplemented on August 29, 1955, for a disclaimer of jurisdiction or, in the alternative for a certificate of public convenience and necessity; pursuant to section 7 of the Natural Gas Act, for authorization to construct and operate certain facilities necessary for the sale and delivery of natural gas from existing transmission lines for industrial interruptible service to McLain Firebrick Division of H. K. Porter Company, Inc. (McLain), National Galvanizing Company (National), Layton Brick Company (Layton) and Aircraft-Marine Products, Inc. (Aircraft-Marine), as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application, which is on file with the Commission and open to public inspection.

The facilities necessary to initiate service to McLain consist of approximately 676 feet of 6-inch line to be connected to Applicant's existing 8-inch transmission line No. 5 in Columbiana County, Ohio, two meters, a regulator and miscellaneous equipment.

The facilities proposed by Applicant to initiate service to National consist of 15 feet of 4-inch line to be connected to its existing 8-inch transmission line 1011 in Allegheny County, Pennsylvania, two meters, a regulator and miscellaneous valves and fittings.

The facilities necessary to serve Layton consist of approximately 10 feet of 4-inch line to be connected to applicant's existing 6-inch transmission line 7191 in Fayette County, Pennsylvania, two meters, a regulator and miscellaneous equipment.

Aircraft-Marine will be served from Applicant's existing 6-inch line No. 136 at a point in Codorus Township, York County, Pennsylvania. The facilities necessary to serve this new customer consist of approximately 40 feet of 4-inch line, a meter, two regulators and miscellaneous equipment.

The annual and peak day requirements of the respective customers for 1955-56 are as follows:

Customer	Annual	Peak day
	Mcf	*Mcf*
McLain	230,000	710
National	20,000	80
Layton	96,000	285
Aircraft-Marine	9,000	50

The total estimated cost of the proposed facilities is $23,967 and will be financed by applicant out of funds on hand.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 8, 1955, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before October 20, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-8235; Filed, Oct. 11, 1955; 8:49 a. m.]

[Docket No. G-9228]

SIGNAL OIL AND GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 5, 1955.

Take notice that Signal Oil and Gas Company (Signal), a Delaware corporation having its principal place of business in Los Angeles, California, filed an application on August 15, 1955, and a supplement thereto on August 28, 1955, pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing Signal to sell natural gas to Montana-Dakota Utilities Co., and render the service hereinafter described subject to the jurisdiction of the Commission, all as more fully represented in the application and supplement on file with the Commission and open for public inspection.

The application of Signal recites that it proposes to sell the residue gas resulting from the processing of casinghead gas at its Tioga Plant in Williams County, North Dakota, which will comprise 12.5 percent of the quantity of gas which Montana-Dakota may dispose of in Williston, North Dakota, and in Fairview, Sidney, Savage and Glendive, Montana, plus 12.5 percent of the quantity of gas which can be transported through Montana-Dakota's present facilities from Willison, North Dakota to its Baker, Montana storage reservoir in excess of the quantity disposed of in the above-mentioned towns, provided such total quantity shall not be less than 1935 Mcf daily.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 14, 1955, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR, 1.8 or 1.10) on or before November 1, 1955. Failure of any part to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Signal to appear or be represented at the hearing.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-8236; Filed, Oct. 11, 1955; 8:49 a. m.]

[Docket No. G-9253]

MONTANA-DAKOTA UTILITIES CO.

NOTICE OF APPLICATION

OCTOBER 5, 1955.

Take notice that Montana-Dakota Utilities Co. (Montana-Dakota), a Delaware corporation with its principal place of business at Minneapolis, Minnesota, filed an application on August 23, 1955, and a supplement thereto on September 22, 1955, pursuant to section 7 of the

Natural Gas Act for a certificate of public convenience and necessity, authorizing the construction and operation of (1) approximately 41.8 miles of 12¾ inch O. D. natural gas transmission pipeline extending from Tioga to Williston, North Dakota, (2) for lateral pipelines extending from (a) to Ray (8,000 feet of 3-inch), to Wheelock (2,100 feet of 2-inch), to Epping (1,000 feet of 2-inch), and to Springbrook (380 feet of 2-inch), all in North Dakota, and in which Montana-Dakota proposes to operate local distribution systems, and (3) authority to establish an emergency connection between the proposed Tioga-Williston interstate line, all as more fully described in the application and supplement on file with the Commission and open for public inspection.

The application of Signal Oil and Gas Company in Docket No. G–9228 recites that it proposes to sell the residue gas resulting from the processing of casinghead gas at its Tioga Plant in Williams County, North Dakota, which will comprise 12.5 percent of the quantity of gas which Montana-Dakota may dispose of in Williston, North Dakota, and in Fairview, Sidney, Savage and Glendive, Montana, plus 12.5 of the quantity of gas which can be transported through Montana-Dakota's present facilities from Williston, North Dakota to its Baker, Montana, storage reservoir in excess of the quantity disposed of in the abovementioned towns, provided such total quantity shall not be less than 1935 Mcf daily.

The application of Montana-Dakota recites that the proposed Tioga-Williston line will transport gas west from Signal's plant at Tioga, North Dakota, to Montana-Dakota's interstate system in Montana and South Dakota, and will provide a new source of gas supply (peak-day flow westward from Tioga of 19,910 Mcf and a flow of 9,290 per day eastward from Tioga to Minot during the 1958–59 heating season is indicated) for Montana-Dakota's system.

The application of Montana-Dakota further recites that the total estimated construction cost of the transmission mains involved is $1,257,020, and will in part be defrayed from funds to be made available from bank loans approximately $6,500,000 which will be funded during the year 1956.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before October 24, 1955.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55–8237; Filed, Oct. 11, 1955; 8:49 a. m.]

[Docket Nos. G–4454 and G–9250]

HOPE NATURAL GAS CO.

NOTICE OF APPLICATIONS AND DATE OF HEARING

OCTOBER 6, 1955.

Take notice that Hope Natural Gas Company, a West Virginia Corporation (Applicant), with a principal office in Clarksburg, West Virginia, filed on October 19, 1954, an application for a certificate of public convenience and necessity, and on August 22, 1955, an application for permission to abandon service, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render and terminate service as described in the respective applications, subject to the jurisdiction of the Commission, all as more fully represented in the applications which are on file with the Commission and open for public inspection.

The application in Docket No. G–4454 recites Applicant produces natural gas in the named counties and sells in interstate commerce to the named buyers: Logan County to South Penn Natural Gas Company; Roane County to United Fuel Gas Company; Barbour County to Cumberland and Allegheny Company; Raleigh County to Amere as Utilities; Monongalia County to Carnegie Natural Gas Company; Boone County to Pond Fork Oil and Gas Company; all in West Virginia.

The application in Docket No. G–9250 recites that declining production from Applicant's wells Nos. 9544, 9545 and 9559 in Monongalia County, West Virginia, has caused a loss, and that continued operation of the designated wells has made operation economically unprofitable; and that Applicant and Carnegie Natural Gas Company have mutually agreed to terminate their contracts, and the wells will be sold to the landowners for domestic consumption purposes.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 16, 1955 at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before November 4, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G–6939]

CASE POMEROY OIL CORP.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 6, 1955.

Take notice that Case Pomeroy Oil Corporation (Applicant), independent producer of natural gas, with a principal office in New York, New York, filed on November 30, 1954, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant produces natural gas from the Benezette Field, Elk County, Pennsylvania, which is sold in interstate commerce to (1) The Sylvania Corporation, (2) The Manufacturers Light & Heat Company, and (3) New York State Natural Gas Corporation for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 18, 1955, at 9:50 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before November 4, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55–8239; Filed, Oct. 11, 1955; 8:50 a. m.]

[Docket Nos. G–8762 and G–9238]

D. L. JOHNSON ET AL.

NOTICE OF APPLICATIONS AND DATE OF HEARING

OCTOBER 6, 1955.

In the matters of D. L. Johnson, et al., Docket No. G–8762; Cities Service Gas Company, Docket No. G–9238.

Take notice that D. L. Johnson, Ira L. McCollister, George Rahal and Leonard C. Blood, independent producers of natural gas with a principal office in Dallas, Texas, filed an application in Docket No. G–8762 on April 13, 1955, and Cities Service Gas Company, a Delaware corporation with a principal office in Oklahoma City, Oklahoma, filed an application in Docket No. G–9238 for certificates of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing each Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the applications which are on file with the Commission and open for public inspection.

Applicants at Docket No. G–8762 propose to produce natural gas from the North Schlegel Field, Payne County, Oklahoma, which will be sold in interstate commerce to Cities Service Gas Company for resale. Cities Service Gas Company in Docket No. G–9238 proposes to construct and operate a meter setting and appurtenances in Payne County, Oklahoma, to take gas from D. L. Johnson, et al., named in Docket No. G–8762.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on November 17, 1955, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceeding pursuant to the provisions of Section 1.30 (c) (1) or (c) (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before November 4, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[Docket No. G–9135]

SOURBOURNE OIL AND GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 6, 1955.

Take notice that Sourbourne Oil and Gas Company (Applicant), an independent producer of natural gas, with a principal office in Grantsville, West Virginia, filed on July 13, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to produce natural gas from the Lee District, Calhoun County, West Virginia, which will be sold in interstate commerce to Hope Natural Gas Company for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 18, 1955, at 9:40 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before November 4, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

SUMMERS OIL AND GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 6, 1955.

Take notice that Summers Oil and Gas Company (Applicant), an independent producer of natural gas, with a principal office in Grantsville, West Virginia, filed on July 15, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to produce natural gas from the Lee District, Calhoun County, West Virginia, which will be sold in interstate commerce to Hope Natural Gas Company for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 18, 1955, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before November 4, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G–9195]

F. E. KEITH GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 6, 1955.

Take notice that F. E. Keith Gas Company (Applicant), independent producer

of natural gas, with a principal office in Millstone, West Virginia, filed on August 4, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to produce natural gas from the Washington District, Calhoun County, West Virginia, which will be sold in interstate commerce to Hope Natural Gas Company for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission's Rules of Practice and Procedure, a hearing will be held on November 17, 1955, at 9:40 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before November 4, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[Docket No. G-9245]

PRICE GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 6, 1955.

Take notice that Price Gas Company, Independent producer of natural gas (Applicant), by C. W. Beecher, as agent, with a principal office in Big Bend, West Virginia, filed on August 19, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to produce natural gas from the Millstone Field, Calhoun County, West Virginia, which will be sold in interstate commerce to Hope Natural Gas Company for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 16, at 9:40 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before November 4, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[Project No. 2135]

MONTANA POWER CO. AND BUFFALO HYDROELECTRIC DEVELOPMENT

NOTICE OF LAND WITHDRAWAL; MONTANA

OCTOBER 6, 1955.

Conformable to the provision of Section 24 of the Act of June 10, 1920, as amended, notice is hereby given that the lands hereinafter described, insofar as title thereto remains in the United States, are included in power project No. 2135 for which completed amendatory application for preliminary permit was filed July 23, 1953 by the Montana Power Company of Butte, Montana for the Buffalo Hydroelectric Development. Under said section 24 all lands of the United States lying within the boundaries of the project, as delimited upon the map (Amended Exhibit H) filed in support thereof, are from said date of filing, reserved from all forms of disposal under the laws of the United States until otherwise directed by the Commission or by Congress.

MONTANA PRINCIPAL MERIDIAN

T. 22 N., R. 21 W.,
Sec. 10, Lots 1, 2 and 3;
Sec. 11, Lots 1, 2, 3, 4, 5 and 9;
Sec. 14, NWNW;
Sec. 15, Lots 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 and 11;
Sec. 21, Lots 1, 2, 7 and 8;
Sec. 22, Lots 1, 2, 3, 4, 5, 6 and NWNE.

The area reserved pursuant to the filing of this application is approximately 952.70 acres, wholly within the Flathead Indian Reservation, all of which have previously been reserved in connection with application for earlier project No. 5. Of this area 912.70 acres were reserved by the Secretary of the Interior, June 29, 1908, for water power purposes under Acts of April 23, 1904 (33 Stat., 302) and June 21, 1906 (34 Stat. 325-355) and 40.00 acres were withdrawn by the Secretary of the Interior, February 23, 1910 for power sites or reservoirs under Act of March 3, 1909 (35 Stat. 796), in the interest of the Flathead Indians. Copies of the amended project map (FPC 2135-1) have been transmitted to the Bureau of Land Management, Geological Survey and the Bureau of Indian Affairs.

[Docket No. G-6358]

AMERE GAS UTILITIES CO. ET AL.

ORDER FIXING DATE OF HEARING

In the matters of Amere Gas Utilities Company, Atlantic Seaboard Corporation, Central Kentucky Natural Gas Company, United Fuel Gas Company, The Ohio Fuel Gas Company, Cumberland and Allegheny Gas Company, Home Gas Company, The Manufacturers Light and Heat Company, and Natural Gas Company of West Virginia.

On November 30, 1954, Amere Gas Utilities Company, et al., subsidiaries of The Columbia Gas System, Inc., hereinafter referred to as Columbia Companies, filed a petition for the issuance of a declaratory order, relating to the methods of depreciation permitted by section 167 of the Internal Revenue Code of 1954. Columbia Companies state that the Uniform System of Accounts Prescribed for Natural Gas Companies makes no provisions for the accounting treatment of the depreciation methods permitted by said section 167 of the Internal Revenue Code and that an uncertainty has arisen as to the proper treatment of such permitted depreciation for both accounting and rate purposes. Columbia Companies request a declaratory order to permit them to book normal depreciation and to set up in a reserve the difference in taxes resulting from the use of the new depreciation methods; and to allow both normal depreciation and normal taxes for rate making purposes.

The Commission *orders:*

(A) Pursuant to the authority contained in and subject to the jurisdiction of the Federal Power Commission, particularly sections 8, 9, 10, 15 and 16 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 7, 1955, at 10:00 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C. concerning the matters involved in and the issues presented by such petition of the Columbia Companies, filed on November 30, 1954.

(B) Interested State Commissions may participate as permitted by section 9 of the Natural Gas Act and in the manner provided by sections 1.8 and 1.37 (f) of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.37 (f).)

Adopted: October 5, 1955.

Issued: October 6, 1955.

By the Commission.

[Docket No. G-7240]

PLAINS EXPLORATION CO.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 6, 1955.

Take notice that Plains Exploration Company for itself as Operator, and on behalf of Creek-More-Drilling Company and William E. Porter (Applicant), independent producer of natural gas, with a principal office in Denver, Colorado, filed on December 1, 1954, an application for a certificate of public convenience and necessity pursuant to Section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant produces natural gas from the Johnson Hill, East Field, Logan County, Colorado, which is sold in interstate commerce to Kansas-Nebraska Natural Gas Company, Inc., for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 22, 1955, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules and Practice and Procedure (18 CFR 1.8 or 1.10) on or before November 8, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 55-8274; Filed, Oct. 11, 1955; 8:57 a. m.]

[Docket No. G-5259]

TENNESSEE GAS TRANSMISSION CO.

ORDER SEPARATING ZONING ISSUE FOR SEPARATE HEARING AND FIXING NEW DATE FOR RECONVENING OF HEARING

The Presiding Examiner has certified to the Commission an appeal by Tennessee Gas Transmission Company from his ruling at the hearing on September 7 and 8, 1955, in the above case, where the Examiner received in evidence a zoning proposal by certain New England interveners under which the current Tennessee method of allocating cost-of-service between its existing zones would be changed, to the advantage of the New England zone. The Examiner also certified an appeal by interveners in other zones, who would suffer a disadvantage if the New England proposal were adopted, from a ruling requiring that their alternative zoning proposals, if any, must be presented at a session scheduled for October 17, 1955. The non-New England interveners contend that they would need from four to six months to prepare their zoning presentation, and the Staff alleges that it would need at least four months to make the necessary study of the Tennessee system in connection with the zoning question which has now been injected into the instant rate case.

This proceeding involves an application under section 4 (e) of the Natural Gas Act for a rate increase. The proposals by the New England interveners raise a question as to whether under section 4 (e) the Commission has authority to make an apportionment of the total cost of service between customers or between zones. Section 4 (e) provides that when a company files for a change in rates, the Commission, after a hearing, "may make such orders with reference thereto as would be proper in a proceeding initiated after it had become effective." A "proceeding initiated after it [a rate] had become effective" can only be one under section 5 (a) of the Act (Hope Natural Gas Company v. Federal Power Commission, 196 F. 2d 803, 805). Under Section 5 (a) the Commission's authority extends, inter alia, to the question as to whether rates are "unduly discriminatory or preferential." The scope of the authority under section 4 (e) in this respect therefore is as broad as that under section 5 (a) and embraces all issues relating to the determination and apportionment of costs between interstate wholesale customers whether or not the customers be assigned to one zone or to different zones. Accordingly, the Examiner correctly ruled that the question of possible unlawful rates between zones is a relevant issue in a rate proceeding, as we have held in Opinion No. 281, In the Matter of Northern Natural Gas Company and in other cases.

The zone boundaries and rate differentials between the zones served by Tennessee have not been prescribed by a Commission order but have been carried only in the rate schedules filed by Tennessee. In a system as complex as that operated by Tennessee the charges of unjustness in the rates as between zones require a thorough and exhaustive study to determine proper zone boundaries and what method of allocating costs between zones would be fair and equitable to all concerned, in order that just and reasonable rates may be prescribed for each zone.

By reason of the peculiar circumstances in the present case, the question of zone rates may reasonably be separated for hearing purposes from the question of the cost of service involved in the balance of this rate proceeding. It seems appropriate, therefore, to separate the zoning issue from the pending rate proceeding, allowing the interested parties sufficient time to prepare the evidence in the zoning case.

The Commission orders: The hearing previously scheduled by the Presiding Examiner in the instant rate case for October 17, 1955, is hereby postponed to November 21, 1955, to resume at 10:00 o'clock a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., at which time the testimony and evidence shall be confined to the question of cost of service to the Tennessee Gas Transmission Company as a whole and the rate level. Upon the conclusion of the testimony with respect to the cost of service and the rate level, the Examiner should allow such period as may be necessary for the preparation of evidence respecting the reasonableness of the suspended rates which are involved in this proceeding.

Adopted: October 5, 1955.

Issued: October 6, 1955.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 55-8275; Filed, Oct. 11, 1955; 8:57 a. m.]

[Docket No. G-6504]

DELHI-TAYLOR OIL CORP. AND MAYFAIR MINERALS, INC.

ORDER REVERSING RULING OF PRESIDING EXAMINER AND GRANTING CONTINUANCE OF THE PROCEEDINGS

On September 21, 1955, Delhi-Taylor Oil Corporation (Delhi) and Mayfair Minerals, Inc. (Mayfair), filed with the Commission an appeal from the Ruling of the Presiding Examiner made in the foregoing designated proceedings, denying the request of Delhi and Mayfair for a continuance of these proceedings in

order to present the balance of its evidence in support of its proposed increase in rates.

Pursuant to order of the Commission, hearings in the foregoing designated proceedings were held on September 12, 13, and 14, 1955. On September 14, 1955, at the conclusion of the presentation of the available direct evidence, Delhi and Mayfair made a motion for a continuance of the proceedings until October 24, 1955, at which time Delhi and Mayfair expected that further evidence will be available for presentation. The Presiding Examiner denied the motion for a continuance and granted a recess in the proceedings until October 10, 1955, for the preparation of cross-examination. In the appeal, Delhi and Mayfair state that the serious illness of an important witness, the unavailability of another vital witness, and the impossibility of preparing complete statistical evidence have all combined to prevent the presentation of their complete direct evidence at the hearings already held in these proceedings, and it is now expected that their further evidence will not be available until approximately November 7, 1955.

The Commission finds adequate grounds have been shown to justify a continuance of these proceedings in order to permit Delhi and Mayfair to complete the presentation of all of its evidence, and, in view of Staff commitments, the first available date for further resumption of hearings is November 21, 1955.

The Commission orders:

(A) The ruling of the Presiding Examiner denying Delhi and Mayfair a continuance of the proceedings in order to present further evidence be and the same is hereby reversed.

(B) These proceedings be and the same are hereby continued to reconvene on November 21, 1955, at the same time and place specified by the Presiding Examiner.

Adopted: October 5, 1955.

Issued: October 6, 1955.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

INTERSTATE COMMERCE COMMISSION

FOURTH SECTION APPLICATIONS FOR RELIEF

OCTOBER 7, 1955.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 31168: *Petroleum carbon coke and briquettes—Missouri points to Western Trunk-line points.* Filed by W. J. Prueter, Agent, for interested rail carriers. Rates on petroleum carbon (petroleum coke), and petroleum coke briquettes, carloads, from Kansas City, Mo.-Kans., and Sugar Creek, Mo., to specified points in Iowa, Minnesota, North Dakota, South Dakota, and Wisconsin.

Grounds for relief: Modified short-line distance formula and circuity.

Tariff: Supplement 20 to Agent W. J. Prueter's I. C. C. A-3863.

FSA No. 31169: *Latex—Naugatuck, Conn., to Alabama and Louisiana.* Filed jointly by C. W. Boin and O. E. Swenson, Agents, for interested rail carriers. Rates on latex (liquid crude rubber), natural or synthetic, carloads, from Naugatuck, Conn., to Birmingham, Ala., Baton Rouge and New Orleans, La.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 58 to Agent O. E. Swenson's I. C. C. 610.

FSA No. 31170: *Grain and products—Nebraska to Colorado, Kansas and Missouri.* Filed by W. J. Prueter, Agent, for interested rail carriers. Rates on grain, grain products, and related articles, carloads, from specified points in Nebraska to specified points in Colorado, Kansas, and Missouri.

Grounds for relief: Carrier competition and circuity.

Tariff: Supplement 19 to Agent W. J. Prueter's I. C. C. A-3992.

FSA No. 31171: *Crude sulphur—Charleston, S. C., to Spartanburg, S. C.* Filed by R. E. Boyle, Jr., Agent, for the Piedmont and Northern Railway Company and the Seaboard Air Line Railroad Company. Rates on crude sulphur (brimstone), carloads, from Charleston, S. C., to Spartanburg, S. C.

Grounds for relief: Circuitous routes through North Carolina.

Tariff: Supplement 108 to Agent C. A. Spaninger's I. C .C. 1221.

FSA No. 31172: *Iron and steel articles—Cincinnati, Ohio, to North Atlantic ports.* Filed by H. R. Hinsch, Agent, for interested rail carriers. Rates on iron and steel bars, ingots, and slabs, carloads, from Cincinnati, Ohio, to specified Hampton Roads and North Atlantic ports.

Grounds for relief: Competition with Gulf ports and circuity.

Tariff: Supplement 73 to Agent H. R. Hinsch's I. C. C. 4350.

FSA No. 31173: *Logs—Virginia Points to Points in North Carolina.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on logs, native and Canadian wood, or Mexican pine, carloads, from specified points in western Virginia to Cleveland, Lenoir, and Statesville, N. C.

Grounds for relief: Short-line distance scale and circuity.

Tariff: Supplement 89 to Agent C. A. Spaninger's I. C. C. 1297.

FSA No. 31174: *Methanol—Sterlington, La., to Chicago, Ill.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on methanol (methyl alcohol), tank-car loads, from Sterlington, La., to Chicago, Ill., and specified points in the inner zone of the Chicago switching district.

Grounds for relief: Barge competition and circuity.

Tariff: Supplement 82 to Agent F. C. Kratzmeir's I. C. C. 4064.

AGGREGATE OF INTERMEDIATES

FSA No. 31175: *Methanol—Sterlington, La., to Chicago, Ill.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on methanol (methyl alcohol), tank-car loads, from Sterlington, La., to Chicago, Ill., and specified points in the inner zone of the Chicago switching district.

Grounds for relief: Maintenance of proposed rates without requiring their use as factors in constructing combination rates lower than present through one-factor rates from or to points beyond the considered points.

Tariff: Supplement 82 to Agent F. C. Kratzmeir's I. C. C. 4064.

By the Commission.

[Notice 81]

MOTOR CARRIER APPLICATIONS

OCTOBER 7, 1955.

Protests, consisting of an original and two copies to the granting of an application must be filed with the Commission within 30 days from the date of publication of this notice in the FEDERAL REGISTER and a copy of such protest served on the applicant. Each protest must clearly state the name and street number, city and state address of each protestant on behalf of whom the protest is filed (49 CFR 1.240 and 1.241). Failure to seasonably file a protest will be construed as a waiver of opposition and participation in the proceeding unless an oral hearing is held. In addition to other requirements of Rule 40 of the General Rules of Practice of the Commission (39 CFR 1.40), protests shall include a request for a public hearing, if one is desired, and shall specify with particularity the facts, matters, and things, relied upon, but shall not include issues or allegations phrased generally. Protests containing general allegations may be rejected. Requests for an oral hearing must be supported by an explanation as to why the evidence cannot be submitted in forms of affidavits. Any interested person, not a protestant, desiring to receive notice of the time and place of any hearing, pre-hearing conference, taking of depositions, or other proceedings shall notify the Commission by letter or telegram within 30 days from the date of publication of this notice in the FEDERAL REGISTER.

Except when the circumstances require immediate action, an application for approval, under Section 210a (b) of the Act, of the temporary operations of motor carrier properties sought to be acquired in an application under Section 5 (2) will not be disposed of sooner than 10 days from the date of publication of this notice in the FEDERAL REGISTER. If a protest is received prior to action being taken, it will be considered.

APPLICATIONS OF MOTOR CARRIERS OF PROPERTY

No. MC 339 Sub 4, filed September 8, 1955, LINCOLN MOVING & STORAGE COMPANY, INC., 1217 East Pike Street, Seattle 22, Wash. Applicant's attorney: John M. Hickson, Yeon Building, Portland 4, Oreg. For authority to operate as a *common carrier*, over irregular routes, transporting: *Household goods*, as defined by the Commission, and *emigrant moveables*, between points in Grant County, Wash. Applicant is authorized to conduct operations in California, Oregon and Washington.

No. MC 8948 Sub 31, filed July 29, 1955, WESTERN TRUCK LINES, LTD., 2835 Santa Fe Avenue, Los Angeles 58, Calif. For authority to operate as a *common carrier*, over regular routes, transporting: *Class A, B and C explosives*, as defined by the Commission, *ammunition*, not included in Class A, B and C explosives, and *component parts* thereof, between all points presently authorized to be served in the performance of regular, alternate, and irregular route operations in and through Arizona, California, and Texas, and the site of the Hughes Aircraft Co. Plant, located approximately 5½ miles south of Tucson, Ariz.

NOTE: Applicant states that the authority sought herein will also be used in interchanging traffic with other authorized carriers.

No. MC 11185 Sub 92, filed September 21, 1955, J-T TRANSPORT COMPANY, INC., 6504 East 37th Street, Kansas City, Mo. Applicant's attorney: James W. Wrape, Sterick Building, Memphis, Tenn. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Uncrated aircraft assemblies*, in special equipment, from Hawthorne and El Segundo, Calif., to points in St. Louis County, Mo. Applicant is authorized to conduct operations throughout the United States and the District of Colombia.

No. MC 11207 Sub 189, filed September 26, 1955, DEATON TRUCK LINE, INC., 3409 10th Avenue North, P. O. Box 1271, Birmingham, Ala. Applicant's attorney: John W. Cooper, 818-821 Massey Building, Birmingham 3, Ala. For authority to operate as a *common carrier*, over irregular routes, transporting: *Aircraft engines*, between Brookley Field, near Mobile, Ala., on the one hand, and, on the other, Air Force Installations and contractors' and interchange points located in Texas, Oklahoma, Arkansas, Louisiana, Mississippi, Kentucky, Tennessee, Georgia, North Carolina, South Carolina, and Florida.

NOTE: Applicant has authority to transport "Machinery" between points in Alabama, on the one hand, and, on the other, points in Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee. Applicant states, however, that a question has arisen as to whether or not airplane engines are included in the "machinery" authorization. This application is filed as a precaution in the event aircraft engines are not included and also to seek new territorial authority consisting of points in Arkansas, Oklahoma, and Texas. Applicant has authority to conduct operations in Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee.

No. MC 14978 Sub 3, filed September 26, 1955, JOHN GRASS COMPANY, a corporation, Dunbar, Pa. Applicant's attorney: Herbert Baker, 50 West Broad Street, Columbus 15, Ohio. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Explosives* and *blasting supplies*, between Mount Braddock, Pa., and points in Fayette County, Pa., within ten miles of Mount Braddock, on the one hand, and on the other, points in Tennessee. Applicant is authorized to conduct operations in Illinois, Indiana, Kentucky, Maryland, Missouri, New York, Ohio, Pennsylvania, Virginia, and West Virginia.

No. MC 16650 Sub 6, filed August 22, 1955, DODSON S. WAUGH, doing business as WAUGH TRUCKING COMPANY, 312 Fairfax St., Berkeley Springs, W. Va. For authority to operate as a *common carrier*, over irregular routes, transporting: (1) *Empty tin cans* and *can lids*, from Baltimore, Md., to Amaranth, Pa., and (2) *tomatoes*, in cans, from Amaranth, Pa., to points in Virginia, points in that part of Ohio on and east of U. S. Highway 21, and those points in Maryland, Pennsylvania, West Virginia, and the District of Columbia. Applicant is authorized to conduct operations in Maryland, Ohio, Pennsylvania, Virginia, West Virginia, and the District of Columbia.

No. MC 17593 Sub 21, filed September 8, 1955, PIERCE AUTO FREIGHT LINES, INC., 2825 N. W. Yeon Ave., Portland 10, Oreg. Applicant's attorney: Wm. P. Ellis, 1102 Equitable Building, Portland 4, Oreg. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, including *those of unusual value, Class A and B explosives, household goods* as defined by the Commission, and *those requiring special equipment*, but excluding commodities in bulk, (1) between Portland, Oreg., and Hubbard, Oreg., over U. S. Highway 99W from Portland to junction Oregon Highway 57, thence over Oregon Highway 57 to junction Oregon Highway 51, thence over Oregon Highway 51 to junction U. S. Highway 99E, thence over U. S. Highway 99E to Hubbard, and return over the same route, serving all intermediate points, (2) between North Junction Salem, Oreg. By-Pass and U. S. Highway 99E, and South Junction Salem, Oreg. By-Pass and U. S. Highway 99E, over Salem, Oreg. By-Pass, serving no intermediate points, (3) between North Junction unnumbered highway and U. S. Highway 99E, and South Junction unnumbered highway and U. S. Highway 99E, over said unnumbered highway through Jefferson, Oreg., serving the intermediate point of Jefferson, Oreg., (4) between Eugene, Oreg., and junction U. S. Highway 99 and Oregon Highway 225 at or near Goshen, Oreg., over U. S. Highway 126 from Eugene to junction Oregon Highway 225, thence over Oregon Highway 225 to junction U. S. Highway 99, and return over the same route, serving all intermediate points, (5) between Anlauf, Oreg., and Rice Hill, Oreg., over Oregon Highway 45 through Drain, Oreg., serving all intermediate points, (6) between Oakland, Oreg., and Shady Point, Oreg., over Oregon Highway 234, serving all intermediate points, and (7) between Sweet Home, Oreg., and Foster, Oreg., over U. S. Highway 20, serving all intermediate points. Applicant is authorized to conduct operations in California and Oregon.

NOTE: This application with the exception of the route specified under item (7) is in effect a request to have present authority amended because of relocation of portions of U. S. Highway 99E and 99W so that carrier may use the new highways recently constructed in connection with operations over the older more circuitous highways.

No. MC 23942 Sub 5, filed August 15, 1955, ATLANTIC COAST LINE RAILROAD COMPANY, A Corporation, Box 461, Wilmington, N. C. Applicant's attorney: U. B. Ellis, Law Department, Atlantic Coast Line Railroad Company (same address as applicant). SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3419]

CONSOLIDATED NATURAL GAS CO. AND EAST OHIO GAS CO.

NOTICE OF FILING REGARDING PROPOSED INCREASE IN NUMBER OF AUTHORIZED SHARES AND REDUCTION OF PAR VALUE OF COMMON STOCK BY PUBLIC UTILITY COMPANY AND ISSUANCE OF NEW SHARES FOR OLD SHARES HELD BY PARENT HOLDING COMPANY

OCTOBER 5, 1955.

Notice is hereby given that Consolidated Natural Gas Company ("Consolidated"), a registered holding company, and The East Ohio Gas Company ("East Ohio"), a wholly owned gas utility subsidiary of Consolidated, have filed with this Commission an application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("Act"), and have designated sections 6 (a), 7, 9, 10 and 12 of said Act as applicable to the proposed transactions which are summarized as follows:

East Ohio proposes to increase the number of its presently authorized shares from 750,000 shares of capital stock of the par value of $100 each, of which 697,129 shares are issued and outstanding, to 2,500,000 shares of the par value of $50 each, of which 2,091,387 shares, having an aggregate par value of $104,569,350, will be issued.

The new shares will be substituted for the 697,129 shares of the presently issued and outstanding $100 par value shares which have an aggregate par value of $69,712,900 and the sum of $34,856,450 will be transferred from the earned surplus account to the capital stock account of East Ohio, thus making the capital stock account total $104,569,350.

The transactions proposed by East Ohio have been approved by The Public Utilities Commission of Ohio.

It is estimated that the expenses to be incurred in connection with the issuance of the new shares will be $44,000 of which $38,500 represents Federal stamp tax.

It is requested that the Commission's order herein be issued to become effective by October 25, 1955.

Notice is further given that any interested person may, not later than October 21, 1955, at 5:30 p. m., request the Commission in writing that a hearing be held on this matter, stating the nature of his interest, the reason for such request, and the issues of fact or law, if any, raised by such filing which he proposes to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application-declaration, as filed or as it may hereafter be amended, may be granted and permitted to become effective as provided in Rule U-23 of the Rules and Regulations promulgated under the Act, or the Commission may grant exemption from its rules as provided in Rules U-20 (a) and U-100 or take such other action as it may deem appropriate.

By the Commission.

AMERICAN & FOREIGN POWER CO., INC., ET AL.

NOTICE OF APPLICATION FOR UNLISTED TRADING PRIVILEGES, AND OF OPPORTUNITY FOR HEARING

OCTOBER 5, 1955.

The San Francisco Stock Exchange, pursuant to section 12 (f) (2) of the Securities Exchange Act of 1934 and Rule X-12F-1 thereunder, has made application for unlisted trading privilege in the 35 stocks itemized below. All of these stocks are listed and registered on the New York Stock Exchange. All are listed or admitted to unlisted trading on the Los Angeles Stock Exchange, the purpose of this application being substantially to enhance the usefulness of the direct wire recently installed between the San Francisco and Los Angeles Stock Exchanges. Four of the stocks are listed on the Midwest Stock Exchange, and one on the Pittsburgh Stock Exchange.

Upon receipt of a request prior to October 17, 1955, from any interested person, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person requesting the hearing and the position he proposes to take thereat. If no one requests a hearing, the application will be determined by order of the Commission on the basis of the facts stated in the application and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10638

AUTHORIZING THE DIRECTOR OF THE OFFICE OF DEFENSE MOBILIZATION TO ORDER THE RELEASE OF STRATEGIC AND CRITICAL MATERIALS FROM STOCK PILES IN THE EVENT OF AN ATTACK UPON THE UNITED STATES

WHEREAS section 5 of the Strategic and Critical Materials Stock Piling Act, as amended by the act of July 23, 1936, 60 Stat. 596 (50 U. S. C. 98d), provides, in part, that during a national emergency with respect to common defense proclaimed by the President strategic and critical materials may be released from stock piles for use, sale, or other disposition on the order of such agency as may be designated by the President; and

WHEREAS the existence of a national emergency with respect to common defense has been proclaimed by the President by Proclamation No. 2914 of December 16, 1950; and

WHEREAS an enemy attack on the continental United States might create shortages of strategic and critical materials requiring immediate release of such materials from stock piles to meet military and essential civilian requirements:

NOW, THEREFORE, by virtue of the authority vested in me by the said section 5 of the Strategic and Critical Materials Stock Piling Act, it is hereby ordered as follows:

In the event of enemy attack upon the continental United States (exclusive of Alaska), the Director of the Office of Defense Mobilization is authorized and directed to order the release by the Administrator of General Services of such materials from stock piles established under the Strategic and Critical Materials Stock Piling Act, in such quantities, for such uses, and on such terms and conditions, as the Director determines to be necessary in the interests of the national defense.

DWIGHT D. EISENHOWER

THE WHITE HOUSE,
October 10, 1955.

TITLE 7—AGRICULTURE

Chapter IV—Federal Crop Insurance Corporation

[Amdt. 1]

PART 424—BARLEY CROP INSURANCE

SUBPART—REGULATIONS FOR THE 1956 AND SUCCEEDING CROP YEARS

MISCELLANEOUS AMENDMENTS

The above identified regulations (19 F. R. 9315) are hereby amended, effective beginning with the 1956 crop year, as follows:

1. Section 424.3 is amended to read as follows:

§ 424.3 *Application for insurance.* Application for insurance on a form prescribed by the Corporation may be made by any person to cover his interest as landlord, owner-operator, or tenant, in a barley crop. For any crop year applications shall be submitted to the county office on or before the following applicable closing date preceding such crop year except that in the state of Washington an application for insurance may be filed until the February 28 following the closing date provided that in such cases, winter barley will not be insured for the first crop year of the contract.

State and Closing Date

California, August 31.
Washington, October 31.
All other states, March 31.

2. Subsection (a) of section 13 of the policy shown in § 424.6 is amended to read as follows:

(a) Subject to the provisions of this section, the contract shall be in effect for the first crop year specified on the application and shall continue in effect for each succeeding crop year until canceled by either the insured or the Corporation. Cancellation may be made by either party giving written notice to the other party on or before the applicable cancellation date, which shall be the April 30 for California, the June 30 for Washington, and the December 31 for all other states, preceding the crop year for which the cancellation is to become effective: *Provided, however,* That the contract shall terminate as if canceled by the Corporation prior to such cancellation date (1) if by the March 31 following such cancellation date for all counties with a December 31 cancellation date any amount

Chapter VIII—Commodity Stabilization Service (Sugar), Department of Agriculture

Subchapter C—Determination of Proportionate Shares

[Sugar Determination 855.3]

PART 855—MAINLAND CANE SUGAR AREA

1956 CROP

Pursuant to the provisions of section 302 of the Sugar Act of 1948, as amended (hereinafter referred to as "act"), the following determination is hereby issued:

§ 855.3 *Proportionate shares for sugarcane farms in the Mainland Cane Sugar Area for the 1956 crop*—(a) *Farm proportionate share.* A 1956-crop proportionate share for each sugarcane farm in the mainland cane sugar area shall be established in terms of acres (acreage or acres as used herein means the area on which sugarcane is grown on the farm and marketed (or processed) for the extraction of sugar or liquid sugar, or harvested for seed, and the area of sugarcane abandoned and classified as bona fide abandonment under procedure issued by the Commodity Stabilization Service) as follows:

(1) *Farm bases.* The farm base for each farm for which a proportionate share was established pursuant to § 855.2 (Determination of Proportionate Shares for the 1955 Crop) shall be such share, except that if the 1955 acreage on any farm was less than 80 percent of its 1955 proportionate share, due to a cause other than drought, flood, storm, freeze, disease, or insects, as determined by the appropriate Agricultural Stabilization and Conservation County Committee (hereinafter referred to as County Committee) the base shall be the larger of 5 acres or 125 percent of such 1955 acreage.

(2) *Farms with bases.* The proportionate share for any farm for which a farm base is established under subparagraph (1) of this paragraph shall be the largest of (i) 5 acres; (ii) the farm base, but not in excess of 25.0 acres; and (iii) 87.0 percent of such farm base.

(3) *New farms.* The proportionate share for any farm without a farm base and on which there was no sugarcane acreage during the 1955-crop year, shall be 5.0 acres.

(4) *Transfer of farm bases*—(i) *Land acquired by Federal or State Agency.* The base established, or which would have been established pursuant to subparagraph (1) of this paragraph for any land which is removed from sugarcane production because of acquisition by purchase or lease by any Federal or State Agency having the right of eminent domain shall be available for use in providing an equitable base for land owned, purchased, or leased by the owner of the land so acquired by any of such agencies. Upon application to the appropriate Agricultural Stabilization and Conservation State Office (hereinafter referred to as State Office) within five years from the date of such acquisition, any such owner shall be entitled to a base for any other land owned, purchased, or leased by him equal to the farm base which would have been established for such other land, plus the farm base which would have been established for the land so acquired, as determined by the appropriate State Office.

(ii) *Dividing or combining ownership tract acreage records.* (a) Where an ownership tract of land (a farm or a portion of a farm which is separately owned) which was part of a farm as constituted for the 1955 program becomes a part of another farm or a separate farm under the 1956 program, a base for such tract shall be determined by multiplying the 1955 proportionate share for the farm of which such tract was a part by the percentage that the total acreage of sugarcane for the tract for the crop years 1951–54 plus the 1955 measured acreage within the proportionate share is of the total sugarcane acreage within the farm's proportionate shares in this period for all tracts comprising the 1955 farm of which it was a part. Where an ownership tract of land which was part of a 1955 farm is subdivided, the base for each subdivision shall be determined by multiplying the base established for the tract in accordance with the above method by the percentage that the total cropland acreage in each subdivision of the tract suitable for the production of sugarcane is of the total acreage of such cropland in the tract. Where a 1955 farm consisting of one ownership tract is subdivided, the base for each subdivision shall be obtained by multiplying the 1955 proportionate share by the percentage that the total cropland acreage suitable for the production of sugarcane in each subdivision of the tract is of the total acreage of such cropland in the ownership tract. Where the County Committee determines that the use of the cropland relationships in any case results in the establishment of a base which is not representative of the crops growing on the 1955 farm at the time of subdivision or combination or is inconsistent with written evidence of sugarcane acreage records supplied by the parties affected, such base shall be adjusted by the County Committee taking into consideration the foregoing factors.

(b) The base for such tract or subdivision thereof determined as heretofore provided shall, for the purposes of determining a farm base under subparagraph (1) of this paragraph, be considered as the 1955-crop proportionate share for such tract or subdivision thereof, if it becomes a separate farm, or as a part of the 1955-crop proportionate share of the farm of which the tract or subdivision thereof becomes a part.

(c) Where two or more farms, for each of which a 1955 proportionate share was established, are combined as one farm for the 1956 crop, the sum of the 1955 proportionate shares established for each of the farms combined shall, for the purposes of determining a farm base under subparagraph (1) of this paragraph, be considered as the 1955-crop porportionate share for such combined farm.

(d) A farm proportionate share shall be established as provided in this section for each farm involved in a division or combination under this paragraph.

(5) *Appeals.* (i) A producer of sugarcane who believes that the proportionate share established for his farm pursuant to this section is inequitable may file an appeal in writing at the local county Agricultural Stabilization and Conservation office (hereinafter referred to as county office) not later than July 1, 1956. The county committee shall make such adjustments as are necessary due to the use of any incorrect data in determining the proportionate share. In other cases, the county committee shall, after review of all of the facts, forward the case, together with its recommendation, to the State Committee. The State Committee shall consider the appeal and the county committee's recommendation in light of the interest of the appellant as related to the interests of all other producers of sugarcane in the State and shall return the case to the county committee, indicating the appropriate disposition.

(ii) Upon receipt thereof, the county committee shall notify the producer in writing as soon as possible regarding the decision on his appeal. If the producer is dissatisfied with the decision, he may appeal in writing before September 1, 1956, to the Director of the Sugar Division, Commodity Stabilization Service, U. S. Department of Agriculture, Washington 25, D. C., whose decision shall be final.

(6) *Delegation.* Farm bases and farm proportionate shares shall be established by the county committee in accordance with this section.

(b) *Share tenant and sharecropper protection and compliance with other conditions for payment.* In addition to compliance with the proportionate share for the farm in accordance with this section, eligibility for payment of any producer of sugarcane shall be subject to the following conditions:

(1) That the number of share tenants or sharecroppers engaged in the production of sugarcane of the 1956 crop on the farm shall not be reduced below the number so engaged with respect to the previous crop, unless such reduction is approved by the State Committee. In considering such approval the State Committee shall be guided by whether the reduction was the result of a voluntary action of the share tenant or sharecropper, or whether the reduction was beyond the control of the producer;

(2) That such producer shall not have entered into any leasing or cropping agreement for the purpose of diverting to himself or any other producer any payments to which share tenants or sharecroppers would be entitled if their leasing or cropping agreements for the previous crop were in effect; and

(3) That such producer has met the requirements of the act with respect to child labor, wage rates and, in the case of a processor-producer, prices paid for sugarcane.

STATEMENT OF BASES AND CONSIDERATIONS

Sugar Act requirements. Section 301 (b) of the Act provides as a condition for payment to producers that there shall not have been marketed (or processed) an amount of sugarcane grown on the farm and used for the production of sugar or liquid sugar in excess of the proportionate share for the farm as de-

termined by the Secretary pursuant to section 302 of the act. For the mainland cane sugar area, the term "proportionate share" means the individual farm's share of the total acreage of sugarcane required to enable the area to meet the quota (and provide a normal carryover inventory) as estimated by the Secretary, for the calendar year during which the larger part of the sugar from such crop normally would be marketed.

Section 302 (a) of the Act provides that the amount of sugar with respect to which payment may be made shall be the amount of sugar commercially recoverable from the sugarcane grown on the farm and marketed (or processed by the producer) not in excess of the proportionate share for the farm.

Section 302 (b) provides that in determining the proportionate share for a farm, the Secretary may take into consideration the past production on the farm of sugarcane marketed (or processed) for the extraction of sugar or liquid sugar and the ability to produce such sugarcane, and that the Secretary shall, insofar as practicable, protect the interests of new producers and small producers, and the interests of producers who are cash tenants, share tenants or sharecroppers.

General. Pursuant to the foregoing provisions of the act, proportionate shares for sugarcane farms must be established for each crop since the marketing of sugarcane within such shares by producers constitutes one of the conditions for payment. Restrictive proportionate shares are required in any area when the indicated production will be greater than the quantities needed to fill the quota and provide a normal carryover inventory for such area.

Restrictive proportionate shares, as established for the 1954 and 1955 crops, were designed to maintain a proper balance between sugar supplies and marketing quotas. However, new varieties of sugarcane, improved production practices and unusually favorable weather conditions have resulted in increased yields of sugar per planted acre and increases in the effective inventory of sugar (i. e., sugar on hand at the beginning of the calendar year, plus sugar processed after January 1 from the sugarcane crop of the previous year's designation).

During the First Session of the 84th Congress, several bills were introduced providing for amendments to the Sugar Act of 1948, as amended, which would have increased the quotas for the domestic sugar-producing areas, including the mainland sugarcane area. However, no legislation in this respect was enacted. It is likely that further consideration will be given to this matter in the next Session of Congress.

The Senate adopted a resolution urging the Department to carry out loans, purchases or other operations with respect to 100,000 tons of sugar produced from the 1955 or previous crops in the continental United States sugar-producing areas to help alleviate the inventory situation in such areas.

Situation indicated for 1956. The effective inventory of sugar on January 1, 1955, was approximately 396,000 tons, or about 110,000 tons higher than a year earlier. The August 1955 crop estimate by the Department indicates a 1955 crop in the mainland sugarcane area of about 560,000 tons of sugar if the recovery of sugar per ton of cane approximates the average recovery for the past three years. A crop of this size, together with the effective inventory of 396,000 tons on January 1, 1955, and 1955 marketings within the present quota of 500,000 tons, would result in an effective inventory of about 456,000 tons on January 1, 1956. This would exceed the average for the six-year period, 1950 through 1955, by approximately 236,000 tons and would exceed the average of the five-year period 1950 through 1954, by approximately 271,000 tons. If the upward trend in yields of sugar per planted acre achieved during the past few years continues for the 1955 crop, production would exceed that based on the August Crop Report. Clearly, restrictions are required for the 1956 crop to prevent the further accumulation of stocks greater than those needed to fill the quota and provide a normal carryover inventory.

Public hearing. An informal public hearing was held in New Orleans on July 13, 1955, for the purpose of receiving information and recommendations for establishing farm proportionate shares for the 1956 crop. To provide a basis for discussion at the hearing, the Department issued a press release on June 28, 1955, suggesting that the provisions of the 1956-crop determination be similar to those issued for the 1955 crop. In addition, the Department asked for views on the quantity of sugar which should be considered as a normal inventory, taking into consideration the probable effective inventory on January 1, 1956, and freeze and other possible damage to the 1956 crop. It was pointed out that while the normal carryover inventory should be established at a level which would provide for deficiencies, it should, nevertheless, be low enough to prevent the accumulation of future abnormally high surpluses of sugar in the area. The hearing was attended by approximately 40 persons from Louisiana and Florida. Testimony was presented by four persons with one individual testifying on behalf of growers producing a large percentage of the sugarcane in the area. In addition, two briefs were filed.

There was general concurrence with the Department's proposal relative to the establishment of proportionate shares. However, no recommendations were received with respect to the 1956 acreage objective in view of the uncertainty existing at the time of the hearing relative to the outcome of legislation then pending relative to amendments to the act. The briefs filed since the hearing include recommendations that the acreage level for 1956 not be reduced below the 1955 acreage level.

Determinaton. In determining the level of 1956 sugarcane acreage, the basic problem is to make available an acreage which will enable the area to fill its quota and provide a normal carryover inventory. Accordingly, consideration must be given to the factors which affect production, such as variations in yields of sugar per acre and the possibilities of crop damage from freeze. In developing this determination, consideration has been given to the foregoing factors as well as to the testimony presented at the hearing, to the possibility of additional marketings, to the prospective sugar supply and inventory situation, and to experience under the current and previous proportionate share programs.

Although the carryover inventory resulting from the acreage provided for in this determination may be large and in excess of what may constitute a normal carryover under most conditions, it would be too drastic to attempt to reduce inventories to average conditions quickly. In the circumstances, therefore, this determination will permit the production of sufficient sugar to enable the area to fill its quota and provide a normal carryover.

The determination repeats in large part the provisions issued for the 1955 crop. Farm bases will be established generally from the proportionate shares established under the 1955-crop determination, thus reflecting the same weightings assigned to the standards of "ability to produce" and "past production" and the results obtained under the provisions relating to special classes of farms.

The adjustment factor of 0.87, which will be applied to farm bases for large farms, was obtained by subtracting the estimated 1956 acreage resulting from the provisions relating to small farms, new farms, appeals and minimum shares from the estimated total acreage required (including an allowance for deficit plantings within individual proportionate shares) and dividing the result by the total of the bases for the farms subject to the factor.

As was the case under the 1955 determination, new producers will be entitled to a proportionate share of 5 acres, which will also be the minimum proportionate share for all old producers.

Three new provisions have been incorporated in this determination. They relate to: (1) A limitation on the farm base of 125 percent of the 1955 acreage if such acreage is less than 80 percent of the 1955 proportionate share due to a cause other than drought, flood, storm, freeze, disease or insects; (2) the transfer of base acreage history to other land in cases where land previously devoted to the production of sugarcane is expropriated by a Federal or State agency; and (3) the basis upon which acreage history is to be divided in cases involving the transfer of the control of land.

The limitation under (1) above, will have the effect of reducing the farm base for a farm where for reasons within the control of the producer he did not utilize up to 80 percent of the 1955 proportionate share. The provision referred to under (2) above, permits a land owner to transfer within five years the proportionate share rights attached to his land to other land under his control when the original land is expropriated by a Federal or State Agency. Under the provision referred to in (3), above, the base acreage history for part of a farm involved in a transfer will be established on the basis of the relationship between the sugarcane acreage on the part to be transferred and the acreage of the entire farm during the crop years 1951 through 1955. Where an ownership tract is subdivided, the relationship between the sugarcane cropland acreage on each of the parts of the subdivision and the sugarcane cropland of the whole tract will be used. In any case involving a subdivision or combination where the county committee determines that the use of cropland acreage results in the establishment of an inequitable base, the base may be adjusted in a manner that will result in equity. Although a recommendation was received suggesting that the division of a farm's proportionate share be accomplished by agreement between the parties involved, the use of this method where acreage records are available would be contrary to the provisions of the act.

The provisions relating to share tenant and sharecropper protection remain unchanged from last year's determination. However, guides have been added to assist the State Committee in determining whether reductions in the number of share tenants or sharecroppers are justifiable. At the public hearing it was unanimously recommended that provision be made to permit the giving of special consideration by the State Committee to producers who are located in one isolated mill district and who are thus limited to marketing sugarcane to one sugar mill because of relatively high transportation charges to other mills. In this area, sugarcane is produced for both sugar and sirup. Because of the marketing of sugarcane for sirup, certain producers have not utilized fully their proportionate shares. This has reduced seriously the cane supply for the processing facility and it is alleged that unless larger supplies are obtained, processing may be discontinued. Although extensive effort has been devoted to developing a special provision of the determination to give effect to this recommendation, no satisfactory legal basis has been found to justify the establishment of disproportionately large shares for certain of these producers.

It is believed that this determination, with its various special provisions, provides an equitable basis for establishing proportionate shares. Accordingly, I hereby find and conclude that the foregoing determination will effectuate the applicable provisions of the act.

(Sec. 403, 61 Stat. 932; 7 U. S. C. 1153. Interprets or applies sec. 302, 61 Stat. 930; 7 U. S. C. 1132)

Issued this 10th day of October 1955.

[SEAL] TRUE D. MORSE,
Acting Secretary.

Subchapter H—Determination of Wage Rates

[Sugar Determination 864.3]

PART 864—WAGES; SUGARCANE; LOUISIANA

FAIR AND REASONABLE WAGE RATES FOR PERSONS EMPLOYED IN HARVESTING OF 1955 CROP AND PRODUCTION AND CULTIVATION DURING CALENDAR YEAR 1956

Pursuant to the provisions of section 301 (c) (1) of the Sugar Act of 1948, as amended (herein referred to as "act"), after investigation, and consideration of the evidence obtained at the public hearing held in Thibodaux, Louisiana, on July 29, 1955, the following determination is hereby issued:

§ 864.3 *Fair and reasonable wage rates for persons employed in Louisiana in the harvesting of the 1955 crop of sugarcane and production and cultivation of sugarcane during the calendar year 1956—*(a) *requirements.* A producer of sugarcane in Louisiana shall be deemed to have complied with the wage provisions of the act if all persons employed on the farm in the harvesting of the 1955 crop of sugarcane and the production and cultivation of sugarcane during the calendar year 1956 shall have been paid in accordance with the following:

(1) *Wage rates.* All such persons shall have been paid in full for all such work and shall have been paid wages in cash therefor at rates as agreed upon between the producer and the worker, but not less than the rates specified below. Wage rates applicable to the harvesting of the 1955 crop shall be effective on the date of publication of this section in the FEDERAL REGISTER and wage rates applicable to production and cultivation of sugarcane during the calendar year 1956 shall be effective on January 1, 1956.

(i) *For work performed on a time or piecework basis.*

Class of Worker or Operation	*Rate per hour*
Harvest of 1955 crop:	
Cutters, toppers, strippers, scrappers	$0.475
Loaders, spotters, ropemen, grabmen	.550
Cutters and loaders, pilers, hoist operators	.500
Tractor drivers, truck drivers	.575
Teamsters	.550
Operators of mechanical loading or harvesting equipment	.625
All other harvesting workers	.425
	Rate per ton
Cutting top and bottom:	
Large barrel varieties [1]	$1.000
Small barrel varities [2]	1.200
	Rate per hour
Production and cultivation, calendar year 1956:	
Tractor drivers	$0.500
All other production and cultivation workers	.400

[1] Large barrel varieties: Co. 290, C. P. 29/103; C. P. 29/116; C. P. 32/243; C. P. 36/13; C. P. 36/105; C. P. 29/120; C. P. 43/47; C. P. 44/101; C. P. 44/155; and N. Co. 310.

[2] Small barrel varities: All other.

(ii) *Workers between 14 and 16 years of age when employed on a time basis.* For workers between 14 and 16 years of age, the wage rate per hour (maximum employment is 8 hours per day for such workers without deduction from Sugar Act payments to the producer) shall be not less than three-fourths of the applicable hourly wage rate for adults provided under subdivision (i) of this subparagraph.

(iii) *Other piecework rates.* The piecework rate for any operation specified in subdivision (i) of this subparagraph, when performed on a unit basis other than a ton, or the piecework rate for any operation not specified shall be that as agreed upon between the producer and the worker: *Provided*, That for such agreed upon piecework rate the hourly rate of earnings of each worker, for the time involved, shall be not less than the applicable hourly rate specified in subdivisions (i) and (ii) of this subparagraph.

(2) *Compensable working time.* For work performed under subparagraph (1) of this paragraph, compensable working time includes all time which the worker spends in the performance of his duties except time taken out for meals during the work day. Compensable working time commences at the time the worker is required to start work and ends upon completion of work in the field. However, if the producer requires the operator of mechanical equipment, driver of animals, or any other class of worker to report to a place other than the field, such as an assembly point, tractor shed, etc., located on the farm, time spent in transit to and from the field is compensable working time. Any time spent in performing work directly related to the principal work performed by the worker, such as servicing equipment, is compensable working time. Time of the worker while being transported from a central recruiting point or labor camp to the farm is not compensable working time.

(3) *Equipment necessary to perform work assignment.* The producer shall furnish without cost to the worker any equipment required in the performance of any work assignment. However, a charge may be made for equipment furnished any worker for the cost of such equipment in the event of its loss or destruction through negligence of the worker. Equipment includes, but is not limited to, hand and mechanical tools and special wearing apparel, such as boots and raincoats, required to discharge the work assignment.

(b) *Subterfuge.* The producer shall not reduce the wage rates to workers below those determined herein through any subterfuge or device whatsoever.

(c) *Claim for unpaid wages.* Any person who believes he has not been paid in accordance with this section may file a wage claim with the local County Agricultural Stabilization and Conservation Office against the producer on whose farm the work was performed. Detailed instructions and wage claim forms are available at that office. Such claim must be filed within two years from the date the work with respect to which the claim is made was performed. Upon receipt of a wage claim the county office shall thereupon notify the producer against whom the claim is made

concerning the representation made by the worker. The county ASC Committee shall arrange for such investigation as it deems necessary and the producer and worker shall be notified in writing of its recommendation for settlement of the claim. If either party is not satisfied with the recommended settlement, an appeal may be made to the State Agricultural Stabilization and Conservation Office, 1517 Sixth Street, Alexandria, Louisiana, which shall likewise consider the facts and notify the producer and worker in writing of its recommendation for settlement of the claim. If the recommendation of the State ASC Committee is not acceptable, either party may file an appeal with the Director of the Sugar Division, Commodity Stabilization Service, U. S. Department of Agriculture, Washington 25, D. C. All such appeals shall be filed within 15 days after receipt of the recommended settlement from the respective committee, otherwise such recommended settlement will be applied in making payments under the act. If a claim is appealed to the Director of the Sugar Division, his decision shall be binding on all parties insofar as payments under the act are concerned.

STATEMENT OF BASES AND CONSIDERATIONS

(a) *General.* The foregoing determination establishes fair and reasonable wage rates to be paid for work performed by persons employed on the farm in the harvesting of the 1955 crop of sugarcane and in the production and cultivation of sugarcane during the 1956 calendar year, as one of the conditions with which producers must comply to be eligible for payments under the act.

(b) *Requirements of the act and standards employed.* Section 301 (c) (1) of the act requires that all persons employed on the farm in the production, cultivation, or harvesting of sugar beets or sugarcane with respect to which an application for payment is made shall have been paid in full for all such work, and shall have been paid wages therefor at rates not less than those that may be determined by the Secretary to be fair and reasonable after investigation and due notice and opportunity for public hearing; and in making such determinations the Secretary shall take into consideration the standards therefor formerly established by him under the Agricultural Adjustment Act, as amended (i. e., cost of living, prices of sugar and by-products, income from sugarcane, and cost of production), and the differences in conditions among various producing areas.

(c) *1955 harvest and 1956 production and cultivation wage determination.* This determination differs from the wage determination applicable to the harvesting of the 1954 crop and the production and cultivation of sugarcane during the calendar year 1955 in the following respects: (1) Wage rates on a time basis for the several classes of workers or operations are increased on the average by about five percent, and are expressed on an hourly basis instead of on a 9-hour-day basis: (2) piecework rates for hand harvesting of sugarcane are increased on the average by about 10 percent and the number of hand operations covered is one operation instead of five which were applicable to prior crops; (3) the wage-price escalator provision is eliminated; and (4) the provision requiring producers to furnish workers the customary perquisites has also been eliminated. Further, minor revisions in language have been made and an additional variety of sugarcane has been added to the large barrel category for piecework rate purposes.

A public hearing was held in Thibodaux, Louisiana on July 29, 1955 at which interested persons offered testimony with respect to fair and reasonable wage rates for work performed during the 1955 harvest season and for production and cultivation work during the calendar year 1956. Representatives of the Labor Committee of the American Sugar Cane League and the Louisiana Farm Bureau testified for producers, while workers' views were presented by representatives of the United Packinghouse Workers of America, CIO, and the National Agricultural Workers' Union, American Federation of Labor.

Representatives of producers recommended that no changes be made in the 1955–56 wage determination, except that an additional large barrel variety of sugarcane be included for piecework rate purposes. Representatives of workers recommended a minimum wage of $1.00 per hour for unskilled workers; the maintenance of existing differentials for higher skilled jobs; and the elimination of the wage-price escalator. One of the representatives recommended that the perquisite provision be eliminated.

Consideration has been given to the recommendations made at the public hearing, to the returns, costs, and profits of sugarcane producers obtained by survey in a recent prior year and restated for the current year in terms of price and production conditions likely to prevail, to information obtained as a result of investigations of labor conditions in the production and harvesting of sugarcane in Louisiana and to other pertinent factors.

The increases in time and piecework rates provided in this determination are within producers' ability to pay as indicated by an analysis of costs, returns, and profits of sugarcane production. The analysis indicates that the average sugarcane producer has operated at a profit during recent years and it is expected that 1955 crop operations will also be profitable. Further, there have been substantial gains in labor productivity on sugarcane farms, many of which are associated with the marked improvement in yields of recent years, and there is evidence that additional gains may be achieved. The rates provided in this determination are lower than prevailing wages being paid generally for work on sugarcane farms. During each of the preceding three years actual wages paid to workers have exceeded wage rates under applicable determinations by about 15 percent.

The wage rates on a time basis provided by this determination are expressed in terms of an hourly wage rather than the 9-hour-day basis used in prior years. Recent investigations indicate that many producers have adopted the hourly basis. This change is in keeping with the generally accepted expression of minimum wage rates and it will provide a better basis for producers to appraise labor costs in relation to wages and man-hour inputs.

A wage-price escalator provision has been included in wage determinations since 1949. Most producers have reported that wage increases have been made when the average price of raw sugar increased above the base price range although compensating downward adjustments in wages have not been made when the raw sugar price declines. Further, since the average prevailing wage paid in recent years has been in excess of the determination minimum rates the action of the wage-price escalator has largely been nullified. The elimination of the wage-price escalator is not expected to have any appreciable effect on wage rates.

Approximately 90 percent of the 1954 crop of sugarcane in Louisiana was mechanically harvested. Investigation of the use of piecework rates in Louisiana indicates that such rates are used primarily by producers who do not mechanically harvest their sugarcane. Most producers who use the piecework rate system of payment hire workers for the operation of cutting sugarcane top and bottom. Very few producers employ workers to strip sugarcane and to load sugarcane by hand. The piecework rates specified in this determination are for the operations most commonly used and reflect to a closer degree the average wage levels which have been paid in recent years. The piecework method of payment may be used for other hand harvesting operations and, in such cases, the piecework rate is to be as agreed upon between the producer and worker. However, such rates are subject to a minimum hourly guarantee of earnings to workers.

Determinations in prior years have specified that producers must furnish workers in addition to cash wages the perquisites which customarily have been furnished. Currently the items of perquisites furnished to workers vary significantly from farm to farm. The perquisite requirement tends to perpetuate inequities among both producers and workers. Representatives of producers have indicated that those perquisites required to obtain and retain labor would continue to be furnished to workers in the absence of a requirement in the determination. However, the elimination of the provision will afford an opportunity for a reevaluation and appropriate adjustments in the perquisite system.

After consideration of all the factors the wage rates and other provisions of the determination are deemed to be fair and reasonable.

Accordingly, I hereby find and conclude that the foregoing wage determination will effectuate the wage provisions of the Sugar Act of 1948, as amended.

(Sec. 403, 61 Stat. 932; 7 U. S. C. 1153. Interprets or applies sec. 301, 61 Stat. 929; 7 U. S. C. 1131)

Issued this 10th day of October 1955.

[SEAL] TRUE D. MORSE, *Acting Secretary.*

[F. R. Doc. 55-8308; Filed, Oct. 12, 1955; 8:50 a. m.]

Subchapter I—Determination of Prices

[Sugar Determination 874.8]

PART 874—SUGARCANE: LOUISIANA

1955 CROP

Pursuant to the provisions of section 301 (c) (2) of the Sugar Act of 1948, as amended (herein referred to as "Act"), after investigation, and due consideration of the evidence presented at the public hearing held in Thibodaux, Louisiana, on July 29, 1955, and September 7, 1955, the following determination is hereby issued:

§ 874.8 *Fair and reasonable prices for the 1955 crop of Louisiana sugarcane.* A producer of sugarcane in Louisiana who is also a processor of sugarcane (hereinafter referred to as "processor") shall have paid, or contracted to pay, for sugarcane of the 1955 crop grown by other producers and processed by him, prices determined in accordance with the following requirements:

(a) *Definitions:* For the purpose of this section the term:

(1) "Price of raw sugar" means the price of 96° raw sugar quoted by the Louisiana Sugar Exchange, Inc.; except that if the Director of the Sugar Division determines that such price does not reflect the true market value of sugar, because of inadequate volume, failure to report sales in accordance with the rules of such Exchange or other factors, he may designate the price to be effective under this determination, which he determines will reflect the true market value of sugar.

(2) "Price of blackstrap molasses" means the price per gallon of blackstrap molasses quoted by the Louisiana Sugar Exchange, Inc.; except that if the Director of the Sugar Division determines that such price does not reflect the true market value of blackstrap molasses, because of inadequate volume, failure to report sales in accordance with the rules of such Exchange or other factors, he may designate the price to be effective under this determination, which he determines will reflect the true market value of blackstrap molasses.

(3) "Standard sugarcane" means sugarcane, free of trash, containing 12 percent sucrose in the normal juice with a purity of at least 76.00 but not more than 76.49.

(4) "Net sugarcane" means the quantity of sugarcane obtained by deducting the weight of trash from the combined weight of sugarcane and trash delivered by a producer.

(5) "Salvage sugarcane" means sugarcane containing either less than 9.5 percent sucrose in the normal juice or less than 68 purity in the normal juice.

(6) "Trash" means green or dried leaves, loose sugarcane tops, attached sugarcane tops at or above the green leaf roll, dirt and all other extraneous material which is representative of the quantity of sugarcane from which the sample for trash determination is taken.

(b) *Basic price.* (1) The basic price for standard sugarcane shall be not less than $1.06 per ton for each one cent per pound of the average price of raw sugar determined in accordance with either of the following as agreed upon:

(i) The simple average of the daily prices of raw sugar for the week in which the sugarcane is delivered; or

(ii) The simple average of the weekly prices of raw sugar for the period October 7, 1955, through April 26, 1956; *Provided,* That the average price of raw sugar as determined under this subdivision (i) of this subparagraph or this subdivision may be reduced by not more than the following:

(*a*) 0.022 cent for all mills except those located in the areas defined in (*b*) and (*c*) below;

(*b*) 0.097 cent for mills located north of Bayou Goula between the Atchafalaya and Mississippi Rivers and southeast of New Iberia west of the Atchafalaya River; or

(*c*) 0.147 cent for mills located north and west of New Iberia west of the Atchafalaya River.

(2) The basic price for salvage sugarcane shall be as agreed upon between the processor and the producer, subject to the approval of the State Administrative Officer of the Louisiana State Agricultural Stabilization and Conservation Office (hereinafter referred to as "State Officer.")

(c) *Conversion of net sugarcane to standard sugarcane.* Net sugarcane (except for salvage sugarcane) shall be converted to standard sugarcane as follows:

(1) By multiplying the quantity of net sugarcane by the applicable quality factor in accordance with the following table:

Percent sucrose in normal juice of net sugarcane:	*Standard sugarcane quality factor* [1]
9.5	.60
10.0	.70
10.5	.80
11.0	.90
11.5	.95
12.0	1.00
12.5	1.05
13.0	1.10
13.5	1.15
14.0	1.20
14.5	1.25

[1] The quality factor for sugarcane of intermediate percentages of sucrose in normal juice shall be interpolated and for sugarcane having more than 14.5 percent sucrose in the normal juice shall be computed in proportion to the immediately preceding interval.

and,

(2) By multiplying the quantity determined pursuant to subparagraph (1) of this paragraph by the applicable purity factor in the following table:

STANDARD SUGARCANE PURITY FACTOR [1]

Purity of normal juice		Percent sucrose in normal juice																
		At least 9.50	9.70	9.90	10.10	10.30	10.50	11.00	11.50	12.00	12.50	13.00	13.50	14.00	14.50	15.00	15.50

[1] Factors applicable to higher sucrose and purity of the normal juice than shown in this table shall be determined by the same method of calculation used to compute the factors specified and shall be furnished by the Louisiana State ASC Office, Alexandria, Louisiana upon request.

(d) *Molasses payment.* For each ton of net sugarcane (except salvage sugarcane) there shall be paid an amount equal to the product of 7.2 and one-half of the average price per gallon of blackstrap molasses in excess of 6 cents. The average price of blackstrap molasses shall be either the simple average of the daily prices for the week in which the sugarcane is delivered, or the simple average of the weekly prices of blackstrap molasses for the period October 7, 1955 through February 23, 1956, as agreed upon between the processor and the producer.

(e) *General.* (1) The sucrose and purity of the normal juice shall be determined by acceptable methods of analysis on sugarcane as delivered, such methods to be subject to the approval of the State Officer.

(2) Because of decreased boiling house efficiency deductions may be made from the payment for frozen sugarcane accepted by the processor provided such deductions are at rates not in excess of 1.5 percent of the payment, computed without regard to the molasses payment, for each 0.1 cc. of acidity above 2.50 cc. of N/10 alkali per 10 cc. of juice but not in excess of 4.75 cc. (intervening fractions are to be computed to the nearest multiple of 0.05 cc.). Frozen sugarcane testing in excess of 4.75 cc. of acidity shall be considered as having no value. Sugarcane shall not be considered as frozen, even after being subjected to freezing temperature, unless and until there is evidence of damage having taken place because of the freeze, such evidence to be certified by the State Officer.

(3) In the event a general freeze causes abnormally low recoveries of raw sugar by a processor in relation to the sucrose and purity tests of sugarcane, payment for such sugarcane may be made as mutually agreed upon between the producer and the processor, subject to approval by the State Officer: *Provided,* That the payment for each ton of net sugarcane shall be not less than an amount equal to the total returns from raw sugar and molasses actually recovered from such sugarcane, determined on the basis of the simple average of the weekly price of raw sugar for the period October 7, 1955 through April 26, 1956 and the simple average of the weekly prices of blackstrap molasses for the period October 7, 1955 through February 23, 1956, less an amount not to exceed $3.00 per gross ton of sugarcane for processing and less actual costs of hoisting, field weighing and transporting such sugarcane.

(4) A processor who paid the costs for hoisting and weighing sugarcane of the 1954 crop shall also pay such costs with respect to the 1955 crop: *Provided,* That nothing in this subparagraph shall be construed as prohibiting negotiations with respect to such costs, any change to be approved by the State Officer.

(5) A processor who made allowances to producers for transporting sugarcane from the customary delivery points to the mill for the 1954 crop, shall also make such allowances for the 1955 crop: *Provided,* That nothing in this subparagraph shall be construed as requiring the processor to make allowances to producers in excess of the actual costs or rates charged by a commercial carrier for the customary method of transportation: *Provided further,* That where the only available practicable means of transportation is by railroad and the distance to the nearest mill is in excess of 50 miles or where, because of unusual circumstances, the cost of transporting sugarcane is in excess of customary allowances, such costs may be shared by the processor and the producer by agreement, subject to the approval of the State Officer.

(6) If a processor and the producers delivering sugarcane to such processor mutualy agree upon a plan for improving harvesting and delivery operations, there may be deducted from the price per ton of sugarcane an amount equal to one-half of the cost of such plan. Such deduction may not be made until the plan has been approved by the State Officer.

(7) The processor shall not reduce the returns to the producer below those determined herein through any subterfuge or device whatsoever.

STATEMENT OF BASES AND CONSIDERATIONS

(a) *General.* The foregoing determination establishes fair and reasonable prices to be paid for sugarcane of the 1955 crop by a producer who processes sugarcane grown by other producers. It establishes the minimum requirements with respect to prices for sugarcane which must be met by such producer as one of the conditions for payment under the act.

(b) *Requirements of the act.* Section 301 (c) (2) of the act provides that the producer on the farm who is also, directly or indirectly, a processor of sugarcane, as may be determined by the Secretary, shall have paid, or contracted to pay under either purchase or toll agreements, for any sugarcane grown by other producers and processed by him at rates not less than those that may be determined by the Secretary to be fair and reasonable after investigation and due notice and opportunity for public hearing.

(c) *1955 price determination.* The 1955 price determination is the same as the 1954 determination except that (1) the raw sugar pricing period used as the basis for computing the payment for sugarcane delivered by producers has been extended to cover a period of approximately seven months; (2) the area freight rate differentials have been readjusted to compensate processors for an increase in freight rates on raw sugar; (3) the definition of standard sugarcane has been changed by lowering the purity factor; and (4) the molasses payment to producers is based on 7.2 gallons per ton of sugarcane to reflect the most recent 5-year average recovery. Minor changes in language also have been made in certain provisions of the determination.

A public hearing was held in Thibodaux, Louisiana, on July 29, 1955, regarding fair and reasonable prices for the 1955 crop of sugarcane. At this hearing a representative of the Louisiana Grower-Processor Committee stated that the Committee was not prepared to offer recommendations because of unresolved problems relating to marketing allotments and other considerations involving the 1955 crop. This representative requested a recess in the hearing until a later date. The hearing was reconvened on September 7, 1955, and testimony was presented by one processor representative and two producer representatives. The processor representative recommended that the raw sugar pricing period used as the basis for payments for sugarcane be extended through April 1956, that an adjustment be made in the raw sugar freight differential to compensate processors for increases in raw sugar freight costs, and that producers share in the average cost of storing raw sugar which is not marketable during the calendar year 1955. A producer representative recommended that no change be made in the determination except that the raw sugar pricing period be extended through April 1956. Another producer representative recommended that the standard sugarcane purity factor be revised downward by 1.25 points in relation to normal juice sucrose, that the normal juice sucrose quality factors be revised to reflect a closer relationship to sugar recoveries at low sucrose levels, that no change be made which would require producers to bear any portion of the increases in freight rates on raw sugar, and that processors be required to continue to absorb all costs of storing raw sugar which is not marketable in the year in which produced.

Consideration has been given to the recommendations made at the public hearing, to information obtained as a result of investigations, to the returns, costs and profits of producing and processing sugarcane obtained by survey for recent years and restated in terms of prospective conditions for the 1955 crop and to other pertinent factors.

Analysis of the economic position of producers and processors indicates that a close relationship is expected to exist in the sharing of costs and returns with respect to the 1955 crop. The changes in the freight and purity provisions of this determination will not appreciably affect the distribution of total returns between producers and processors. Because of the expected equitable relationship the recommendation of processors that producers absorb a portion of the storage expense on raw sugar which is not marketable during the calendar year 1955 has not been adopted.

An examination of the standard sugarcane purity factor scale as related to normal juice sucrose of sugarcane indicates that during recent years changes in sugarcane varieties and in methods of harvesting have resulted in a sucrose-purity relationship which does not appear to be equitable to producers. Accordingly, the former purity scale has been adjusted downward in relation to the normal juice sucrose scale. Prior determinations defined standard sugarcane as sugarcane containing 12.0 percent sucrose in normal juice with a purity of at least 76.50, but not more than 76.99. This determination defines standard sugarcane as containing 12.0 percent sucrose in normal juice with a purity of at least 76.00 but not more than 76.49. Sucrose-purity relationships at other levels have also been adjusted.

Freight rates on sugarcane and raw sugar were increased substantially during 1954. Processors recommended that the raw sugar freight differentials applicable to certain mill areas under prior determinations be increased to recognize the raw sugar freight rate increase. The freight allowances provided in this determination reflect the increase in freight rates on raw sugar and maintain the customary differentials heretofore established.

Recent determinations have provided for a raw sugar pricing period from approximately the first week in October to the last week of February. In view of the large quantities of raw sugar which cannot be marketed until 1956, processors and producers believed that a longer pricing period will be required. The pricing period recommended by both groups has been adopted.

On the basis of analysis of all pertinent factors the provisions of this determination are deemed to be fair and reasonable.

Accordingly, I hereby find and conclude that the foregoing price determination is fair and reasonable and will effectuate the price provisions of the Act.

(Sec. 403, 61 Stat. 932; 7 U. S. C. 1153. Interprets or applies sec. 301, 61 Stat. 929; 7 U. S. C. 1131)

Issued this 10th day of October, 1955.

[SEAL] TRUE D. MORSE,
Acting Secretary.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Supp. 30]

PART 42—IRREGULAR AIR CARRIER AND OFF-ROUTE RULES

MAINTENANCE REQUIREMENTS

The purpose of this supplement is to revise § 42.32-2 (b) by removing the restrictive language with respect to the maintenance of air carrier aircraft by persons other than air carriers. As a result of this revision, the requirements relative to the maintenance of air carrier aircraft will be identical with the general requirements for maintenance of aircraft set forth in §§ 18.10 and 18.11 of this subchapter.

Section 42.32-2 (b) is revised to read as follows and subparagraphs (1) and (2) of paragraph (b) are deleted.

§ 42.32-2 *Arrangements acceptable to the Administrator (CAA policies which apply to § 42.32 (a)).* • • •

(b) The inspection, maintenance, overhaul, and repair of the air carrier's aircraft, inoluding airframes, powerplants, propellers, and appliances is performed, inspected, and/or approved by an appropriately rated certificated repair station, appropriate certificated air carrier, or manufacturer in accordance with §§ 18.10 (b), (d), or (e), 18.11 (a) (2), (3), or (4), and 18.11 (b) (2), (3), or (4); *Provided,* That maintenance, minor repairs, and minor alterations may be performed and/or approved by a certificated mechanic in accordance with §§ 18.10 (a) and 18.11 (a) (1) of this subchapter.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies secs. 601, 605, 52 Stat. 1007, 1010, as amended; 49 U. S. C. 551, 555)

This supplement shall become effective November 1, 1955.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

[F. R. Doc. 55-8283; Filed, Oct. 12, 1955; 8:45 a. m.]

[Supp. 2]

PART 52—REPAIR STATION CERTIFICATES

LISTING OF SUPERVISORY PERSONNEL

Currently, Civil Aeronautics Manual 52 requires a listing on Form ACA-394 of the names of the management officials, the chief inspector, inspectors, and technical supervisors. In addition, a roster of and employment summaries for all supervisory and inspection personnel are required. The purpose of this supplement is (1) to require only the listing on Form ACA-394 of the name of the individual responsible for the overall management of the repair station and the name(s) of the individual(s) responsible for the release of items from the repair station, and (2) to require employment summaries for only those individuals responsible for the release of items from the repair station. As a result of these changes, an applicant for a repair station certificate need not submit a roster of and employment summaries for all supervisory and inspection personnel; and the holder of a certificate need not amend the original application whenever changes occur in station personnel.

This revision is a relaxation of requirements and is minor in nature. Therefore, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is unnecessary and not required.

The following revisions are hereby adopted:

1. Section 52.5-1 is revised by changing paragraph (b) (1) (i) and (ii), and paragraph (c) (2) to read as follows: and by deleting subparagraph (4) of paragraph (c).

§ 52.5-1 *Procedure for applying for a repair station certificate (CAA rules which apply to § 52.5).* • • •

(b) *Application file.* (1) • • •

(i) An executed application for a Certificated Repair Station, Form ACA-394. Item 8a of this form shall include only the name of the individual responsible for the overall management of the repair station. Item 8b of this form shall include only the name(s) of the individual(s) responsible for the release of items from the repair station.

(ii) Employment summaries, providing the information in numerical sequence as required by § 52.24-1 for the chief inspector or other individual(s) having technical responsibility for final release of items from the repair station. If the management official retains the privilege of final airworthiness determination, an employment summary shall be included for such official.

• • • • • •

(c) *Modifications or amendments to certificate.* • • •

(2) Changes in personnel involving officials responsible for overall management and individuals responsible for release of items from the repair station.

2. Section 52.24-1 is revised by deleting the last sentence of paragraph (b) and adding a new paragraph (c) to read as follows:

§ 52.24-1 *Records of supervisory and inspection personnel. (CAA rules which apply to §§ 52.5 and 52.24).* • • •

(c) *Maintenance of records.* The roster and employment summaries required by paragraph (a) of this section and any changes made in accordance with paragraph (b) of this section shall be submitted to the local Aviation Safety Agent for personnel evaluation and shall thereafter be retained in the repair station administrative office. The current roster and employment summaries shall be made available for inspection by any authorized representative of the Administrator or Board on request.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply secs. 601, 607, 52 Stat. 1007, 1011, as amended; 49 U. S. C. 551, 557)

This supplement shall become effective November 1, 1955.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

[F. R. Doc. 55-8282; Filed, Oct. 12, 1955; 8:45 a. m.]

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 136]

PART 608—RESTRICTED AREAS

ALTERATIONS

The restricted area alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy and the Air Force, through the Air Coordinating Committee, Airspace Panel, and are adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedure, and effective date, provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

1. In § 608.15, the Camp Hale, Colorado, temporary area (R-482), published on September 13, 1955 in 20 F. R. 6699, is amended by changing the "Time of Designation" column to read: "September 13, to June 30, 1956."

2. In § 608.18, the Oak Hill, Florida, area (R-68), amended on April 9, 1955 in 20 F. R. 2301, is rescinded.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on October 15, 1955.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

[F. R. Doc. 55-8281; Filed, Oct. 12, 1955; 8:45 a. m.]

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

PART 16—LAND TRANSPORTATION RADIO SERVICES

RECAPITULATION OF REGULATIONS

Because of the number of outstanding amendments to Part 16 since it was last recapitulated in the FEDERAL REGISTER (March 21, 1953, 18 F. R. 1616), Part 16 is recapitulated as of September 1, 1955, to read as set forth below.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

Subpart A—General Information

Sec.
16.1 Basis and purpose.
16.2 General limitations on use.
16.3 Cooperative use of facilities.
16.4 General citizenship restrictions.
16.5 Transfer and assignment of station authorization.
16.6 Definition of terms.
16.8 Policy governing the assignment of frequencies.

Subpart B—Applications, Authorizations, and Notifications

16.51 Station authorization required.
16.52 Procedure for obtaining a radio station authorization and for commencement of operation.
16.53 Special temporary authority.
16.54 Filing of applications.
16.55 Who may sign applications.
16.56 Standard forms to be used.
16.58 Supplemental information to be submitted with application.
16.59 Partial grant.
16.60 Defective applications.
16.61 Amendment or dismissal of applications.
16.62 Construction period.
16.63 License term.
16.64 Change in authorized stations.
16.65 Discontinuance of station operation.

Subpart C—Technical Standards

16.101 Frequencies.
16.102 Frequency stability.
16.103 Types of emission.
16.104 Emission limitations.
16.105 Modulation requirements.
16.106 Power and antenna height.
16.107 Transmitter control requirements.
16.108 Transmitter measurements.
16.109 Acceptability of transmitters for licensing.
16.110 Type acceptance of equipment.

Subpart D—Station Operating Requirements

16.151 Permissible communications.
16.152 Station identification.
16.153 Suspension of transmissions required.
16.154 Operator requirements.
16.155 Posting of operator license.
16.156 Transmitter identification card and posting of station license.
16.157 Inspection of stations.
16.158 Inspection and maintenance of tower marking and associated control equipment.
16.159 Answers to a notice of violation.
16.160 Station records.

Subpart E—Developmental Operation

16.201 Eligibility.
16.202 Showing required.
16.203 Limitations on use.
16.204 Frequencies available for assignment.
16.205 Interference.
16.206 Special provisions.
16.207 Authorization subject to change or cancellation: Supplementary statement required.
16.208 Report of operation.

Subpart F—Motor Carrier Radio Service

16.251 Eligibility for license.
16.252 Frequencies available for base and mobile stations.
16.253 Frequencies available for operational fixed stations.
16.254 Frequencies available for Base, Mobile and Operational Fixed Stations.
16.255 Limitations on installation and use.
16.256 Amortization period.
16.257 Modification of licenses to shift frequencies.

Subpart G [Reserved]

Subpart H—Railroad Radio Service

16.351 Eligibility.
16.352 Frequencies available for base and mobile stations.
16.353 Frequencies available for fixed stations.
16.354 Operator requirements, fixed and base stations.
16.355 Relay stations.
16.356 Frequencies available for Base, Mobile and Operational Fixed Stations.

Subpart I—Taxicab Radio Service

16.401 Eligibility.
16.402 Frequencies available for Base Stations and Mobile Stations.
16.403 Special limitations.
16.404 Frequencies available for Base, Mobile and Operational Fixed Stations.

Subpart J [Reserved]

Subpart K—Automobile Emergency Radio Service

16.501 Eligibility.
16.502 Permissible communications.
16.503 Frequencies available for base and mobile stations.
16.504 Frequencies available for Base, Mobile and Operational Fixed Stations.

AUTHORITY: §§ 16.1 to 16.504 issued under sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply secs. 301, 303, 48 Stat. 1081, 1082, as amended; 47 U. S. C. 301, 303.

SUBPART A—GENERAL INFORMATION

§ 16.1 *Basis and purpose.* (a) The basis for the rules following in this part is the Communications Act of 1934, as amended, and applicable treaties and agreements to which the United States is a party. The rules in this part are issued pursuant to the authority contained in Title III of the Communications Act of 1934, as amended, which vests authority in the Federal Communications Commission to regulate radio transmissions and to issue licenses for radio stations.

(b) The purpose of the rules and regulations in this part is to prescribe the conditions under which parts of the radio spectrum may be employed for radiocommunication and control facilities in certain land transportation operations.

§ 16.2 *General limitations on use.* The radio facilities authorized under this part shall not be used to render a communications common carrier service or to carry program material of any kind for use in connection with radio broadcasting.

§ 16.3 *Cooperative use of facilities.* (a) A person who is engaged in any one of the transportation operations for which a radio service is available may receive radiocommunication service from a base station licensed to another person operating transportation facilities in the same service or from a non-profit corporation or association licensed in the same service and organized for the sole purpose of furnishing such a radiocommunication service. The rendition of such service, however, will not be required of the base station licensee without his consent except as provided in § 16.252. Such cooperative arrangements will be governed by the following:

(1) Persons who are to receive mobile radiocommunication service from a base station licensed to another person may, themselves, be the licensees of the radio units to be installed in their respective vehicles: *Provided*, That prior to receiving an authorization for the mobile units the person from whom the service is to be received files a request for authority to render such communication service to each person who is to receive service. The request must be notarized but may be in letter form submitted in duplicate. Upon approval of the request the Commission will designate the persons to whom service may be rendered on the base station authorization.

(2) The licensee of a base station may install licensed mobile units in the vehicles of other persons engaged in the same type of transportation: *Provided*, That in each case such persons shall enter into a written agreement verifying that the licensee has the sole right of control of the mobile radio units, that the vehicle operators shall operate the radio units subject to the orders and instructions of the base station operator and that the licensee shall at all times have such access to and control of the mobile equipment as will enable him to carry out his responsibilities under the license. A copy of the agreement with vehicle owners required hereby shall be kept with the station records and held available for inspection by the Commission representatives.

(b) All cooperative arrangements entered into under the provisions of this section shall be governed by the following requirements as to costs and charges:

(1) The arrangement must be established on a non-profit, cost-sharing basis by written contract between the parties and a copy of the contract must be kept with the records of the base station and held available for inspection by Commission representatives.

(2) Contributions to capital and operating expenses may be accepted only on a cost-sharing, non-profit basis, said costs to be prorated on an equitable basis among all persons who are parties to the cooperative arrangement. Records which reflect the cost of the service and its non-profit, cost-sharing nature, shall be maintained by the base station licensee and held available for inspection

by Commission representatives. An audited financial statement reflecting the non-profit, cost-sharing nature of the arrangement shall be submitted annually to the Commission's Washington office no later than three months after the close of the licensee's fiscal year.

§ 16.4 *General citizenship restrictions.* A station license may not be granted to or held by:

(a) Any alien or the representative of any alien;

(b) Any foreign government or the representative thereof;

(c) Any corporation organized under the laws of any foreign government;

(d) Any corporation of which any officer or director is an alien;

(e) Any corporation of which more than one-fifth of the capital stock is owned of record or voted by: Aliens or their representatives; a foreign government or representative thereof; or any corporation organized under the laws of a foreign country;

(f) Any corporation directly or indirectly controlled by any other corporation of which any officer or more than one-fourth of the directors are aliens, if the Commission finds that the public interest will be served by the refusal or revocation of such license; or

(g) Any corporation directly or indirectly controlled by any other corporation of which more than one-fourth of the capital stock is owned of record or voted by: Aliens or their representatives; a foreign government or representatives thereof; or any corporation organized under the laws of a foreign government—if the Commission finds that the public interest will be served by the refusal or revocation of such license.

§ 16.5 *Transfer and assignment of station authorization.* A station authorization, the frequencies authorized to be used by the grantee of such authorization, and the rights therein granted by such authorization shall not be transferred, assigned, or in any manner either voluntarily or involuntarily disposed of, or indirectly by transfer of control of any corporation holding such authorization, to any person, unless the Commission shall, after securing full information, decide that the said transfer is in the public interest. Requests for authority to assign a station authorization may be submitted in accordance with § 16.56 (b) while a request for authority to transfer control of a corporation, as by sale of controlling stock interest, shall be submitted in accordance with § 16.56 (d).

§ 16.6 *Definition of terms.* For the purpose of this part, the following definitions shall be applicable. For other definitions, refer to Part 2 of this chapter, Frequency Allocations and Treaty Matters; General Rules and Regulations.

(a) *Assigned frequency.* The frequency appearing on a station authorization, from which the carrier frequency may deviate by an amount not to exceed that permitted by the frequency tolerance.

(b) *Authorized bandwidth.* The frequency band, specified in kilocycles and centered on the carrier frequency, containing those frequencies upon which a total of 99 percent of the radiated power appears, extended to include any discrete frequency upon which the power is at least 0.25 percent of the total radiated power.

(c) *Base station.* See paragraph (l) of this section, Land station.

(d) *Control station.* An operational fixed station, the transmissions of which are used to automatically control the emissions or operation of another radio station at a specified location.

(e) *Fixed service.* A service of radio communication between specified points.

(f) *Harmful interference.* Any radiation or any induction which endangers the functioning of a radionavigation service or of a safety service or obstructs or repeatedly interrupts a radio service operating in accordance with the regulations in this part. (For purposes of this definition only, a safety service is any radio service whose operation is directly related, whether permanently or temporarily, to the safety of human life and the safeguarding of property.)

(g) *Motor Carrier Radio Service.* A radiocommunication service for use in connection with the operation of a motor carrier land transportation system.

(h) *Motor Carrier.* Any streetcar, bus, truck or other land motor vehicle operated over public streets or highways by a common or contract carrier and used for the transportation of passengers or property (freight) for compensation: *Provided, however*, That motor vehicles used as taxicabs, livery vehicles or school buses, and motor vehicles used for sightseeing or special charter purposes, shall not be included within the meaning of this term as used in the Motor Carrier Radio Service.

(i) *Land station.* A station in the mobile service not intended for operation while in motion. (Of the various types of land stations, only the Base station is pertinent to this part, and will be used interchangeably with Land stations.)

(j) *Landing area.* A landing area means any locality, either of land or water, including airports and intermediate landing fields, which is used, or approved for use for the landing and take-off of aircraft, whether or not facilities are provided for the shelter, servicing, or repair of aircraft, or for receiving or discharging passengers or cargo.

NOTE: Consideration of aeronautical facilities not in existence at the time of the filing of the application for radio facilities will be given only when proposed airport construction or improvement plans are on file with the CAA as of the filing date of the application for such radio facilities.

(k) *Mobile service.* A service of radiocommunication between mobile and land stations, or between mobile stations.

(l) *Mobile station.* A station in a mobile service intended to be used while in motion or during halts at unspecified points.

(m) *Operational fixed station.* A fixed station, not open to public correspondence, operated by, and for the sole use of those agencies operating their own radiocommunication facilities in the Public Safety, Industrial, Land Transportation, or Aviation Services. (This term includes all stations licensed in the fixed service under this part.)

(n) *Person.* An individual, partnership, association, joint stock company, trust, or corporation.

(o) *Railroad Radio Service.* The term "Railroad Radio Service" as used in this part means a radiocommunication service for use in connection with the operation and maintenance of a railroad common carrier.

(p) *Fixed relay station.* An operational fixed station in the fixed service, established to receive radio signals directed to it from any source and to retransmit them automatically on a fixed service frequency for reception at one or more fixed points.

(q) *Mobile relay station.* A base station in the mobile service, authorized primarily to retransmit automatically on a mobile service frequency communications originated by mobile stations. (Authorized in the railroad radio service only.)

(r) *Station authorization.* Any construction permit, license, or special temporary authority issued by the Commission.

(s) *Taxicab Radio Service.* The term "Taxicab Radio Service", as used in this part, means a radiocommunication service for use in connection with the transportation facilities of a taxicab common carrier.

(t) *Telemetering.* Automatic radiocommunication, in a fixed or mobile service, intended to indicate or record a measurable variable quantity at a distance.

(u) *Common Carrier.* As used in the Motor Carrier Radio Service, a person who holds himself out to the general public to engage in the transportation of passengers or property without discrimination, for compensation as a regular occupation or business.

(v) *Automobile Emergency Radio Service.* The term "Automobile Emergency Radio Service" as used in this part means a radiocommunication service for use in connection with the dispatching of emergency road service vehicles by associations of owners of private automobiles and public garages.

(w) *Antenna structure.* The term "antenna structure" includes the radiating system and its supporting structures.

(x) *Contract carrier.* As used in the Motor Carrier Radio Service, a person who under individual contracts or agreements engages in the transportation of passengers or property for compensation as a regular occupation or business.

(y) *Urban area.* As used in the Motor Carrier Radio Service, one or more contiguous, incorporated or unincorporated, cities, boroughs, towns, or villages, having aggregate population of 2,500 or more persons.

§ 16.8 *Policy governing the assignment of frequencies.* (a) The frequencies which may be assigned to stations operating in the Land Transportation Radio Services are listed in the applicable subpart of this part. Each frequency or band of frequencies, available for assignment to stations in these services is available on a shared basis only, and will

not be assigned to more than one station in the same area on the same frequency except as provided in paragraph (b) of this section. Assignments will be made only when the proposed operation will not cause harmful interference to the operation of any station using the same frequency in accordance with the allocation table in this part.

(b) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(c) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(d) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(e) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(f) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(g) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(h) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(i) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(j) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(k) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(l) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(m) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(n) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(o) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(p) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(q) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(r) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(s) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(t) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(u) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(v) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(w) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(x) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

(y) Where the applicant for a station in the Motor Carrier Radio Service is a motor carrier operating in two or more urban areas, the Commission may assign the same frequency to stations in those areas, provided the applicant shows that the stations will not cause harmful interference to each other.

not be assigned for the exclusive use of any one applicant. All applicants for, and licensees of, stations in these services shall cooperate in the selection and use of the frequencies assigned in order to minimize interference and thereby obtain the most effective use of the authorized facilities. In the event that two or more licensees are unable to make an equitable division of transmission time the Commission, at its discretion, may specify a time sharing arrangement. The use of any of these frequencies may be restricted to one or more geographical areas.

(b) Outside the continental limits of the United States and waters adjacent thereto, frequencies above 152 Mc, listed elsewhere in this part as available for assignment to Base Stations or Mobile Stations in particular Services are also available for assignment to Operational Fixed Stations in the same Service on condition that no harmful interference be caused to mobile service operations.

(c) Frequencies assigned to Federal Government radio stations under Executive order of the President may be authorized for use by stations licensed under this part upon appropriate showing by the applicant that such assignment is necessary for inter-communication with Federal Government stations or required for coordination with activities of the Federal Government, provided the Commission determines, after consultation with the appropriate government agency or agencies, that such assignment is necessary.

(d) The following criteria shall govern the authorization and use of frequencies within the band 72–76 Mc to and by fixed stations:

(1) All authorizations are subject to the condition that no harmful interference will be caused to television reception on Channels 4 and 5.

(2) The applicant agrees to eliminate any harmful interference caused by his operation to TV reception on either Channel 4 or 5 that might develop by whatever means are found necessary within 90 days of the time knowledge of said interference is first brought to his attention by the Commission. If said interference is not cleared up within the 90-day period, operation of the fixed station will be discontinued.

(3) Vertical polarization is used.

(4) Whenever it is proposed to locate a 72–76 Mc fixed station less than 80, but more than 10 miles from the site of a TV transmitter operating on either Channel 4 or 5, or from the post office of a community in which such channels are assigned but are not in operation, the fixed station shall be authorized only if:

(i) There are fewer than 100 family dwelling units[1] located within a circle centered at the location of the proposed fixed station[2] the radius of which shall be determined by use of the chart entitled, "Chart for Determining Radius From Fixed Station in 72–76 Mc Band to Interference Contour Along Which 10 Percent of Service From Adjacent Channel Television Station Would Be Destroyed." Two charts are provided, one for Channel 4 and one for Channel 5: *Provided, however,* That the Commission may, in a particular case, authorize the location of a fixed station within a circle as determined under subdivision (i) of this subparagraph containing 100 or more family dwelling units upon a showing that:

(*a*) The proposed site is the only suitable location.

(*b*) It is not feasible, technically or otherwise to use other available frequencies.

(*c*) The applicant has a plan to control any interference that might develop to TV reception from his operations.

(*d*) The applicant is financially able and agrees to make such adjustments in the TV receivers affected as may be necessary to eliminate interference caused by his operations.

(5) All applications seeking authority to operate with a separation of less than 10 miles will be returned without action.

[1] As defined by the U. S. Bureau of Census.

[2] Family dwelling units 70 or more miles distant from the TV antenna site are not to be counted.

SUBPART B—APPLICATIONS, AUTHORIZATIONS, AND NOTIFICATIONS

§ 16.51 *Station authorization required.* No radio transmitter shall be operated in the Land Transportation Radio Services except under and in accordance with a valid station authorization granted by the Federal Communications Commission.

§ 16.52 *Procedure for obtaining a radio station authorization and for commencement of operation.* (a) Persons desiring to install and operate radio transmitting equipment should first submit an application for a radio station authorization in accordance with § 16.56 (a).

(b) When construction permit only has been issued for a base, fixed or mobile station and installation has been completed in accordance with the terms of the construction permit and the applicable rules of the Commission, the permittee shall proceed further as follows:

(1) Notify the Engineer-in-Charge of the local radio district of the date on which the transmitter will first be tested in such manner as to produce radiation, giving name of the permittee, station location, call sign, and frequencies on which tests are to be conducted. This notification shall be made in writing at least two days in advance of the test date. FCC Form 456 may be used for this purpose. No reply from the radio district office is necessary before the tests are begun.

(2) After testing, but on or before the date when the station is first used for operational purposes, mail to the Commission in Washington, D. C., an application on FCC Form 400 for license or modification of license, as appropriate in the particular case. The station may thereafter be used as though licensed, pending Commission action on the license application.

(c) When a construction permit and license for a new base, fixed or mobile station are issued simultaneously the licensee shall notify the Engineer-in-Charge of the local radio district of the date on which the transmitter will be placed in operation, giving name of licensee, station location, call sign, and operating frequencies. This notification shall be made in writing on or before the day on which operation is commenced. FCC Form 456 may be used for this purpose.

(d) When a construction permit and modification of license for a base, fixed or mobile station are issued simultaneously, operation may be commenced without notification to the Engineer-in-Charge of the local radio district, except where operation on a new, or different frequency results by reason of such modification, in which event the notification procedure set forth in paragraph (c) of this section must be observed.

§ 16.53 *Special temporary authority.* (a) (1) In cases of emergency found by the Commission involving danger to life or property, or due to damage to equipment, temporary authorization for the construction and operation of a radio station may be granted for the duration of such emergency. Requests for such temporary authorization may be filed without regard to the provisions of § 16.56 in letter form or by telegram, but shall contain the following information:

(i) Name, address, and citizenship status of applicant;

(ii) Statement of facts upon which the request for emergency authorization is based, including estimated duration of emergency, and explanation why a formal application could not have been submitted in time to get a regular license;

(iii) Class of station and nature of service;

(iv) Location of station including, when appropriate, geographical coordinates;

(v) Equipment to be used, specifying manufacturer, model number and number of units, frequencies desired, plate power input to final radio frequency stage, and type of emission.

If any of the foregoing information is presently on file with the Commission, such information may be included by reference. The applicant may be required, whenever such action may be considered necessary by the Commission, to supplement the information enumerated by filing as soon as practicable a formal application on the prescribed form.

(2) In cases where an urgent need is shown for operation of an authorized station for a limited time only, in a manner other than that specified in the existing authorization, but not in conflict with the rules, or

(3) For the purpose of conducting a field survey to determine necessary data in connection with the filing of formal applications for installation of a radio system in some service under this part. In this case, the authority, if issued, will be for developmental operation only, and the applicable sections of Subpart E of this part shall also apply to the grant.

(b) An application for special temporary authority other than that to which paragraph (a) (1) of this section applies, may be filed as an informal application in the manner prescribed by § 16.56 (g) and shall contain the following information:

(1) Name, address, and citizenship status of applicant.

(2) Need for special action.

(3) Type of operation to be conducted.

(4) Purpose of operation.

(5) Time and date of operation desired.

(6) Class of station and nature of service.

(7) Location of station.

(8) Equipment to be used, specifying manufacturer.

(9) Frequency(s) desired.

(10) Plate power input to final radio frequency stage.

(11) Type of emission.

§ 16.54 *Filing of applications.* (a) To assure that necessary information is supplied in a consistent manner by all persons, standard forms are prescribed for use in connection with the majority of applications and reports submitted for Commission consideration. Standard numbered forms applicable to the Land Transportation Radio Services are discussed in § 16.56, and may be obtained from the Washington, D. C., office of the Commission, or from any of its engineering field offices. Concerning matters where no standard form is applicable, the procedure outlined in § 16.56 (g) should be followed.

(b) Any application for radio station authorization, and all correspondence relating thereto, shall be submitted to the Commission's office at Washington 25, D. C., and should be directed to the attention of the Secretary.

(c) Unless otherwise specified, an application shall be filed at least sixty days prior to the date on which it is desired that Commission action thereon be completed.

(d) Failure on the part of the applicant to provide all the information required by the application form, or to supply the necessary exhibits or supplementary statements may constitute a defect in the application.

(e) Applications involving operation at temporary locations:

(1) When a base station or a fixed station is to remain at a single location for less than one year, the location is considered to be temporary. An application for authority to operate at temporary locations shall specify the general geographic area within which the operation will be confined. The area specified may be a city, a county or counties, a state or states, "Gulf Coast area", "Eastern U. S.", etc.

(2) When a base station or fixed station authorized to operate at temporary locations remains at a single location for more than one year, an application for modification of the station authorization to specify the permanent location shall be filed within thirty days after expiration of the one year period.

§ 16.55 *Who may sign applications.* One copy of each application for an authorization shall be signed under oath or affirmation by the applicant if the applicant be an individual, or any one of the partners if an applicant be a partnership, by an officer if the applicant be a corporation, or by a member who is an officer if the applicant be an unincorporated association: *Provided, however,* That applications may be signed by the attorney for an applicant in case of (a) physical disability of the applicant, or (b) his absence from the continental United States. If it be made by a person other than the applicant, he must set forth in the verification the grounds of his belief as to all matters not stated upon his knowledge and the reason why it is not made by the applicant.

§ 16.56 *Standard forms to be used.* (a) A separate application shall be submitted on FCC Form 400 for the following:

(1) New station authorization for a base or fixed station.

(2) New station authorization for any required number of mobile units (including hand-carried or pack-carried units) to be operated in the same service.

NOTE: An application for mobile units may be combined with an application for a single base station for such mobile units as will operate with that base station only.

(3) License for any class of station upon completion of construction or installation in accordance with the terms and conditions set forth in the construction permit.

(4) Modification of a combined construction permit and station license for changes outlined in § 16.64 (a).

(5) Modification of construction permit.

(6) Modification of station license.

Any of the foregoing applications will, upon approval and authentication by the Commission, be returned to the applicant as a specifically designated type of authorization.

(b) When the holder of a station authorization desires to assign to another person the privilege to construct or use a radio station, he shall submit to the Commission a letter setting forth his desire to assign all right, title, and interest in and to such authorization, stating the call sign and location of station. This letter shall also include a statement that the assignor will submit his current station authorization for cancellation upon completion of the assignment. Enclosed with this letter shall be an application for Assignment of Authorization on FCC Form 400 prepared by and in the name of the person to whom the station is being assigned.

(c) A separate application may be submitted on FCC Form 400–A for certain changes to authorized stations as specified in § 16.64 (b).

(d) A separate application shall be submitted on FCC Form 703 whenever it is proposed to change the control of a corporate permittee or licensee.

(e) FCC Form 456 "Notification of Completion of Radio Station Construction" may be used to advise the Engineer-in-Charge of the local district office that construction of the station is complete and that operational tests will begin.

(f) Application for renewal of station license shall be submitted on FCC Form 405–A. Unless otherwise directed by the Commission, each application for renewal of license shall be filed during the last 60 days of the license term. In any case in which the licensee has, in accordance with the Commission's rules made timely and sufficient application for renewal of license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.

(g) Informal applications:

(1) An application not submitted on a standard form prescribed by the Commission is considered to be an informal application. Each informal application shall be submitted in duplicate, normally in letter form, and with the original signed under oath or affirmation. Each application shall be clear and complete within itself as to the facts presented and action desired.

(2) A request for special temporary authorization must include full particulars as to the purpose for which the request is made and such request should be submitted at least 10 days prior to the date of the proposed operation. A request received within less than 10 days may be accepted upon due showing of sufficient reason for the delay in submitting the request. The information necessary to Commission action on requests for Special Temporary Authority is set forth in § 16.53 of this subpart.

§ 16.58 *Supplemental information to be submitted with application.* Each application for station authorization shall be accompanied by such supplemental information listed below as may be required:

(a) Any statements or showings required by the applicable subpart of this part, in connection with the use of the frequency requested.

(b) Statements justifying the need when more frequencies are desired than are normally assigned to a single applicant under the applicable subpart of this part.

(c) Statement describing the type of emission to be used if it cannot be described as "8A3" or "40F3" pursuant to Subpart C of this part.

(d) Description of the antenna system, on FCC Form 401–A in quadruplicate, in all cases when:

(1) The antenna structure proposed to be erected will exceed an over-all height of 170 feet above ground level: *Provided, however,* That FCC Form 401–A is not required when the antenna is mounted on top of an existing man-made structure and does not increase the over-all height of such man-made structure by more than 20 feet; or

(2) The antenna structure proposed to be erected will exceed an over-all height of one foot above the established airport (landing area) elevation for each 200 feet of distance, or fraction thereof, from the nearest boundary of such landing area: *Provided, however,* That FCC Form 401–A is not required when the antenna does not exceed 20 feet above the ground or is mounted on top of an existing man-made structure or natural formation and does not increase the

over-all height of such man-made structure or natural formation by more than 20 feet.

(e) A functional system diagram and a detailed description of the manner in which the interrelated stations will operate when the station is, or will be, part of a system involving two or more stations at different fixed locations.

(f) Copies of all agreements and statements which may be required under § 16.3 if operation is desired in connection with any cooperative or joint use of the proposed radio communication facilities.

(g) Statements required by the Rules in connection with developmental operation. See §§ 16.202, 16.203, 16.207.

(h) Description of any equipment, proposed to be used, which does not appear on the Commission's List of Equipments Acceptable for Licensing, and designated for use in the Public Safety, Industrial and Land Transportation Radio Services.

(i) Any statements or other data required under special circumstances as set forth in the applicable subpart of this part, or required upon request by the Commission.

§ 16.59 *Partial grant.* Where the Commission, without a hearing, grants an application in part, or with any privileges, terms or conditions other than those requested, the action of the Commission shall be considered as a grant of such application unless the applicant shall, within 20 days from the date on which public announcement of such grant is made, or from its effective date if a later date is specified, file with the Commission a written request rejecting the grant as made. Upon receipt of such request, the Commission will vacate its original action and set the application for hearing.

§ 16.60 *Defective applications.* (a) An application which is not prepared in accordance with the Commission's rules or other requirements will be considered defective and will be returned to the applicant.

(b) If an applicant is requested by the Commission to file any documents or information not included in the prescribed application form, a failure to comply with such request will constitute a defect in the application.

(c) Applications which are not in accordance with the Commission's rules, regulations or other requirements will be considered defective unless accompanied by a petition to amend any rule or regulation with which the application is in conflict.

§ 16.61 *Amendment or dismissal of applications.* Any application may be amended or dismissed without prejudice upon request of the applicant prior to the time the application is granted or designated for hearing. Each amendment to, or request for dismissal of an application shall be signed, authenticated, and submitted in the same manner and with the same number of copies as required for the original application. All subsequent correspondence or other material which the applicant desires to have incorporated as a part of an application already filed shall be submitted in the form of an amendment to the application.

§ 16.62 *Construction period.* (a) Each radio station construction permit issued by the Commission will specify the date of grant as the earliest date of commencement of construction and installation, and a maximum of eight months thereafter as the time within which construction shall be completed and the station ready for operation, unless otherwise determined by the Commission in any particular case.

(b) In cases where the station is not ready for operational use on or before the expiration date of the construction permit, application for extension of time to construct shall be filed on FCC Form 400–A.

§ 16.63 *License term.* (a) For all stations in the Land Transportation Radio Services, except those engaged in developmental operation the license period shall be as follows:

(1) Each station license will be issued for a term of from one to five years from the effective date of grant, the term varying as may be necessary to permit the orderly scheduling of renewal applications.

(2) Each station license normally will be renewed, upon proper application, for a term of four years from the effective date of renewal.

(b) Instruments of authorization for stations engaged in developmental operation will be made upon a temporary basis for a specific period of time, but in no event to extend beyond one year from date of grant.

§ 16.64 *Changes in authorized stations.* Authority for certain changes in authorized stations must be obtained from the Commission before these changes are made, while other changes do not require prior Commission approval. The following paragraphs describe the conditions under which prior Commission approval is or is not necessary:

(a) Proposed changes which will result in operation inconsistent with any of the terms of the current authorization require that an application for modification of construction permit and/or license be submitted to the Commission and, except as set forth in paragraph (b) of this section, shall be on Form 400 and shall be accompanied by exhibits and supplementary statements as required by § 16.58.

(b) Any of the following changes to authorized stations may be made upon approval by the Commission of a "Request for Amendment of Radio Station Authorization" submitted on FCC Form 400–A:

(1) Change in presently authorized location of transmitter control point.

(2) Addition or deletion of control point(s) for presently authorized transmitter.

(3) Reduction in antenna height. If painting and/or lighting of the antenna supporting structure is required, FCC Form 401–A must also be submitted.

(4) A reduction in the over-all number of transmitters authorized for mobile use.

(5) An increase in the over-all number of transmitters authorized for mobile use. This form may be used only when adding mobile transmitters which are included in the Commission's "List of Equipments Acceptable for Licensing" and designated for use in the Public Safety, Industrial, and Land Transportation Radio Services.

(6) An extension of the time limit specified in a construction permit.

(c) Proposed changes which will not depart from any of the terms of the outstanding authorization for the station involved may be made without prior Commission approval. Included in such changes is the substitution of various makes of transmitting equipment at any station provided the particular equipment to be installed is included in the Commission's "List of Equipments Acceptable for Licensing" and designated for use in the Public Safety, Industrial, and Land Transportation Radio Services and provided the substitute equipment employs the same type of emission and does not exceed the power limitations as set forth in the station authorization.

§ 16.65 *Discontinuance of station operation.* In case of permanent discontinuance of operation of a station in this service, the licensee shall forward the station license to the Washington, D. C. office of the Commission for cancellation. A copy of the request for cancellation of the license shall be forwarded to the Commission's Engineer in Charge of the district in which the station is located. For purposes of this rule, a station which is not operated for a period of one year is considered to have been permanently discontinued.

SUBPART C—TECHNICAL STANDARDS

§ 16.101 *Frequencies.* The frequencies available for use in these services are listed in the applicable subpart of this part. The separation shown between assignable frequencies in the various bands does not necessarily indicate the actual amount of separation required for satisfactory operation of two or more systems within the same geographical area. Accordingly, grants of adjacent channel assignments in all bands will be in the discretion of the Commission.

§ 16.102 *Frequency stability.* (a) The carrier frequency of each authorized transmitter in these services shall be maintained within the following percentage of the assigned frequency, except as provided in paragraph (b) of this section:

Frequency range:	Frequency tolerance (percent)
Below 50 Mc	0.01
From 50–220 Mc	.005
Above 220 Mc	(1)

[1] To be specified in the authorization.

(b) For transmitters authorized to operate with a maximum plate power input to the final radio frequency stage of 3 watts or less, the frequency may be maintained as shown in the table below in lieu of the requirements in paragraph (a) of this section:

Frequency range:	Frequency tolerance (percent)
Below 50 Mc	0.02
From 50–220 Mc	.01

§ 16.103 *Types of emission.* (a) Except as provided in paragraph (b) of this section, stations in these services will be authorized to use only A3 or F3 emission for radiotelephony. The authorization to use A3 or F3 emission will be construed to include the use of tone signals or signaling devices whose sole function is to establish and maintain communication between stations.

(b) Other types of emission not described in paragraph (a) of this section may be authorized upon a satisfactory showing of need therefor. An application requesting such authorization shall fully describe the emission desired, shall indicate the bandwidth required for satisfactory communication, and shall state the purpose for which such emission is required. For information regarding the classification of emissions and the calculation of the bandwidth, reference should be made to Part 2 of this subchapter.

§ 16.104 *Emission limitations.* (a) Each authorization issued to a station operating in these services will show, as the prefix to the emission classification, a figure specifying the maximum authorized bandwidth in kc to be occupied by the emission. The specified band shall contain those frequencies upon which a total of 99 percent of the radiated power appears extended to include any discrete frequency upon which the power is at least 0.25 percent of the total radiated power. Any radiation in excess of the limits specified in paragraph (c) of this section is considered to be an unauthorized emission.

(b) The emission prefix figures referred to in paragraph (a) of this section for the types of emission covered by § 16.103 (a) are listed in the table below:

Type of emission:	Authorized bandwidth (kc.)
A–3	8
F–3	40

(c) For purpose of demonstrating compliance with paragraph (a) of this section, the following limits apply:

(1) Any emission appearing on any frequency removed from the carrier frequency by at least 50 percent, but not more than 100 percent, of the maximum authorized bandwidth shall be attenuated not less than 25 db below the unmodulated carrier.

(2) Any spurious or harmonic emission appearing on any frequency removed from the carrier frequency by at least 100 percent of the maximum authorized bandwidth shall be attenuated below the unmodulated carrier by not less than the amount indicated in the following table:

Maximum authorized plate power input to the final radio frequency stage	Attenuation (db)
3 watts or less	40
Over 3 watts and including 150 watts	60
Over 150 watts and including 600 watts	70
Over 600 watts	80

(d) When an unauthorized emission results in harmful interference, the Commission may, in its discretion, require appropriate technical changes in equipment to alleviate the interference.

§ 16.105 *Modulation requirements.* (a) The maximum frequency required for satisfactory radiotelephone intelligibility in these services is considered to be 3000 cycles per second, and the transmission of higher frequencies is unauthorized.

(b) When amplitude modulation is used for telephony, the modulation percentage shall be sufficient to provide efficient communication and shall be normally maintained above 70 percent on peaks, but shall not exceed 100 percent on negative peaks.

(c) When phase or frequency modulation is used for telephony, the deviation arising from modulation shall not exceed plus or minus 15 kc from the unmodulated carrier.

(d) Each transmitter authorized or installed after July 1, 1950 shall be provided with a device which will automatically prevent modulation in excess of that specified in paragraphs (b) and (c) of this section which may be caused by greater than normal audio level: *Provided, however,* That this requirement shall not be applicable to transmitters authorized to operate with a maximum plate power input to the final radio frequency stage of 3 watts or less.

§ 16.106 *Power and antenna height.* (a) The power which may be used by a station in these services shall be no more than the minimum required for the satisfactory technical operation commensurate with the size of the area to be served and local conditions which affect radio transmission and reception. In cases of harmful interference, the Commission may order a change in power or antenna height, or both.

(b) Except where the power that may be used on a designated frequency is specifically limited to a lower value, plate power input to the final radio frequency stage will not be authorized in excess of the following tabulation:

Frequency:	Maximum plate power input to the final radio stage (watts)
30–100 Mc	500
100–220 Mc	120
Above 220 Mc	(1)

[1] To be specified in authorization.

(c) The plate power input to the final r. f. stage under actual operation shall not exceed by more than 10 percent the plate power input shown in the Radio Equipment List, Part C, for transmitters included in this list, or the manufacturer's rated plate power input for the particular transmitter specifically listed on the authorization.

§ 16.107 *Transmitter control requirements.* (a) Each transmitter shall be so installed and protected that it is not accessible to or capable of operation by persons other than those duly authorized by the licensee.

(b) A control point is an operating position which meets all of the following conditions:

(1) The position must be under the control and supervision of the licensee;

(2) It is a position at which the monitoring facilities required by this section are installed; and

(3) It is a position at which an operator responsible for the operation of the transmitter is stationed.

(c) Each station shall be provided with a control point, the location of which will be specified in the license. It will be assumed that the location of the control point is the same as that of the transmitting equipment unless the application includes a request for a different location. Authority must be obtained from the Commission for the installation of additional control points.

(d) A dispatch point is a position from which messages may be transmitted under the supervision of a control point operator. Dispatch points may be installed without authorization from the Commission.

(e) At each control point the following facilities shall be installed:

(1) A carrier operated device which will provide continuous visual indication when the transmitter is radiating; or, in lieu thereof, a pilot lamp or meter which will provide continuous visual indication when the transmitter control circuits have been placed in a condition to produce radiation: *Provided, however,* That the provisions of this subparagraph shall not apply to hand-carried or pack-carried transmitters;

(2) Equipment to permit the operator to aurally monitor all transmissions originating at dispatch points under his supervision;

(3) Facilities which will permit the operator either to disconnect the dispatch point circuits from the transmitter or to render the transmitter inoperative from any dispatch point under his supervision; and

(4) Facilities which will permit the operator to turn the transmitter carrier on and off at will.

§ 16.108 *Transmitter measurements.* (a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter, authorized to operate with a plate input power to the final radio frequency stage in excess of three watts, is maintained within the tolerance prescribed in this part. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

(1) When the transmitter is initially installed;

(2) When any change is made in the transmitter which may affect the carrier frequency or the stability thereof;

(3) At intervals not to exceed six months, for transmitters employing crystal-controlled oscillators;

(4) At intervals not to exceed one month, for transmitters not employing crystal-controlled oscillators.

(b) The licensee of each station shall employ a suitable procedure to determine that the plate power input to the final radio frequency stage of each base station or fixed station transmitter, authorized to operate with a plate power input to the final radio frequency stage in excess of three watts, does not exceed the maximum figure specified on the current instrument of authorization. Where the transmitter is so constructed that a direct measurement of plate cur-

rent in the final radio frequency stage is not practicable, the plate power input may be determined from a measurement of the cathode current in the final radio frequency stage. When the plate input to the final radio frequency stage is determined from a measurement of the cathode current, the required record entry shall indicate clearly the quantities that were measured, the measured values thereof, and the method of determining the plate power input from the measured values. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

(1) When the transmitter is initially installed;

(2) When any change is made in the transmitter which may increase the transmitter power input;

(3) At intervals not to exceed six months.

(c) The licensee of each station shall employ a suitable procedure to determine that the modulation of each transmitter, authorized to operate with a plate power input to the final radio frequency stage in excess of three watts, does not exceed the limits specified in this part. This determination shall be made and the results thereof entered in the station records, in accordance with the following:

(1) When the transmitter is initially installed;

(2) When any change is made in the transmitter which may affect the modulation characteristics;

(3) At intervals not to exceed six months.

(d) The determinations required by paragraphs (a), (b) and (c) of this section may, at the option of the licensee, be made by any qualified engineering measurement service, in which case, the required record entries shall show the name and address of the engineering measurement service as well as the name of the person making the measurements.

(e) In the case of mobile transmitters, the determinations required by paragraphs (a) and (c) of this section may be made at a test or service bench: *Provided*, The measurements are made under load conditions equivalent to actual operating conditions: *And provided further*, That after the installation the transmitter is given a routine check to determine that it is capable of being received satisfactorily by an appropriate receiver.

§ 16.109 *Acceptability of transmitters for licensing.* (a) From time to time the Commission will publish a list of equipment entitled "Radio Equipment List, Part C, List of Equipment Acceptable for Licensing." Copies of this list are available for inspection at the Commission's Offices in Washington, D. C. and at each of its field offices. This list will include type approved and type accepted equipment and equipment which was included in this list on May 16, 1955. Such equipment will continue to be included on the list unless it is removed therefrom by Commission action.

(b) Except for transmitters used at developmental stations, each transmitter utilized by a station authorized for operation under these rules must be of a type which is included on the Commission's current "List of Equipment Acceptable for Licensing" and designated for use in this service or be of a type which has been type accepted by the Commission for use in this service. Until January 1, 1965, however, equipment presently in use may continue to be used by the licensee, his successors, or assigns in business provided the operation of such equipment does not result in harmful interference due to the failure of such equipment to comply with the current technical standards of the rules.

§ 16.110 *Type acceptance of equipment.* (a) Any manufacturer of a transmitter to be built for use in this service may request "type acceptance" for such transmitter following the type acceptance procedure set forth in Part 2 of this chapter.

(b) Type acceptance for an individual transmitter may also be requested by an applicant for a station authorization by following the type acceptance procedure set forth in Part 2 of this chapter. Such transmitters, if accepted, will not normally be included on the Commission's "Radio Equipment List, Part C, List of Equipment Acceptable for Licensing" but will be individually enumerated on the station authorization.

(c) Additional rules with respect to type acceptance are set forth in Part 2 of this chapter. These rules include information with respect to withdrawal of type acceptance, modification of type accepted equipment and limitations on the findings upon which type acceptance is based.

SUBPART D—STATION OPERATING REQUIREMENTS

§ 16.151 *Permissible communications.* (a) Except as provided in § 16.502, stations licensed under this part may transmit the following types of communications:

(1) Any communication related directly to the safety of life or the protection of important property;

(2) Communications required for the efficient operation of the transportation system, as described in the application for authorization and defined in the rule of eligibility for the particular service; subject to the condition that harmful interference is not caused to safety communications of stations licensed under this part, and further subject to the condition that the transmission of each message shall be accomplished as quickly as possible and without superfluous language.

(b) A station licensed under this part may communicate with other stations without restriction as to type, service, or license when the communications to be transmitted are related directly to the safety of life or protection of important property.

(c) For transmission of all communications other than those described in paragraph (a) (1) of this section, a station licensed under this part shall communicate only as follows:

(1) Each unit of a mobile station is authorized primarily to communicate with other units of the mobile station, and with associated base stations. Secondarily, each unit of a mobile station is authorized to communicate with associated fixed stations.

(2) Each base station is authorized primarily to communicate with the units of an associated mobile station. Secondarily, each base station may communicate with an associated base station, fixed stations, or fixed receiver when:

(i) The messages to be transmitted are of immediate importance to mobile units; or

(ii) Wireline communication facilities between such points are inoperative, economically impracticable, or unavailable from communications common carrier sources;

(3) Each fixed station is authorized primarily to communicate with associated fixed stations and fixed receivers. Secondarily, each fixed station is authorized to communicate with units of an associated mobile station, and, subject to the limitations of subparagraph (2) of this paragraph, with associated base stations.

(4) Subject to the other conditions of this paragraph, stations licensed under this part may communicate with stations of other licensees and with U. S. Government stations in those cases which require cooperation or coordination of activities: *Provided, however*, That where communication is desired with stations authorized to operate under the authority of a foreign jurisdiction, prior approval of this Commission must be obtained.

(d) All communications, regardless of their nature, shall be restricted to the minimum practicable transmission time, and a standard uniform operating procedure shall be employed by each licensee. Continuous radiation of an unmodulated carrier is prohibited, except when necessary for test purposes, or when specifically authorized in writing by the Commission.

(e) The licensee of any station in these services may, during a period of emergency in which the normal communication facilities are disrupted as a result of hurricane, flood, earthquake, or similar disaster, utilize such station for emergency communication without regard to the limitations of this section: *Provided*, That:

(1) As soon as possible after the beginning of such emergency use, notice be sent to the Commission in Washington, D. C., and to the Engineer in Charge of the Radio District in which the station is located, stating the nature of the emergency and the use to which the station is being put;

(2) The emergency use of the station shall be discontinued as soon as substantially normal communication facilities are again available, and the Commission in Washington, D. C., and the Engineer in Charge be notified immediately when such special use of the station is terminated; and

(3) The Commission may at any time order the discontinuance of such special use of the authorized facilities.

(f) Tests may be conducted by any licensed station, as required for proper station and system maintenance, but such tests shall be kept to a minimum

and precautions shall be taken to avoid interference to other stations.

§ 16.152 *Station identification.* (a) A base station or mobile in the Land Transportation Service must be identified at the end of each transmission, except, that in event of a continued exchange of communications, identifications shall be made at the end of a series of such transmissions or at the end of each 15-minute period if the exchange continues without substantial interruption.

(b) Identification shall be by assigned call letters unless a different method is specifically authorized by the Commission. Licensees may submit to the Commission's Engineer in Charge of the local area a proposal for special mobile unit designations and, upon receipt from the Commission of a notification or authorization, may identify individual mobile units by this method in lieu of the use of assigned call letters. However, this authority will not be granted in those cases where there is a possibility of harmful international interference, such as might be caused by stations operating on frequencies below 50 Mc. or stations operating in areas within 50 miles of an international boundary, or in those instances where it appears to the Engineer in Charge that the proposed method of identification will not serve to clearly distinguish the mobile units of the applicant from the mobile units of other licensees in the area.

(c) Stations in the Railroad Radio Service may be identified, in lieu of the use of assigned call letters, by the name of the railroad and the train number, caboose number, engine number or name of fixed wayside station; or, if that is not practicable, by such other number or name as may be specified by the railroad concerned for the use of employees of the railroad to identify the fixed point or mobile unit. Where identification is made other than by train number, caboose number or engine number, a list of such identification shall be maintained by the railroad. An abbreviated name or initial letters of the railroad may be used where such name or initial letters are in general usage. In those cases where it is shown that no difficulty would be encountered in identifying the transmissions of a particular station, as for example where stations of one licensee are located in a yard isolated from other radio installations, approval may be given to a request of the licensee for permission to omit station identification.

§ 16.153 *Suspension of transmissions required.* The radiations of the transmitter shall be suspended immediately upon detection or notification of a deviation from the technical requirements of the station authorization until such deviation is corrected, except for transmissions concerning the immediate safety of life or property, in which case the transmissions shall be suspended as soon as the emergency is terminated.

§ 16.154 *Operator requirements.* (a) All transmitter adjustments or tests during or coincident with the installation, servicing, or maintenance of a radio station, which may affect the proper operation of such station, shall be made by or under the immediate supervision and responsibility of a person holding a first or second class commercial radio operator license, either radiotelephone or radiotelegraph, who shall be responsible for the proper functioning of the station equipment: *Provided, however,* That only persons holding a first or second class commercial radiotelegraph operator license shall perform such functions at radiotelegraph stations transmitting by any type of the Morse Code.

(b) Except under the circumstances specified in paragraph (a) of this section, only a person holding a commercial radiotelegraph operator license or permit of any class issued by the Commission shall operate a station during the course of normal rendition of service when transmitting radiotelegraphy by any type of the Morse Code.

(c) Except under the circumstances specified in paragraphs (a) and (b) of this section, except as limited by paragraphs (g) through (j) of this section, an unlicensed person may operate a mobile station during the course of normal rendition of service when transmitting on frequencies above 25 Mc. after being authorized to do so by the station licensee.

(d) Except under the circumstances specified in paragraphs (a) and (b) of this section, except as limited by paragraphs (g) through (j) of this section, only a person holding a commercial radio operator license or permit of any class issued by the Commission shall operate a mobile station during the course of normal rendition of service when transmitting on frequencies below 25 Mc.: *Provided, however*, That an unlicensed person, after being authorized to do so by the station licensee, may operate such a mobile station during the course of normal rendition of service when transmitting on frequencies below 25 Mc. while it is associated with and under the operational control of a base station.

(e) Except under the circumstances specified in § 16.354 and in paragraphs (a) and (b) of this section and except as limited by paragraphs (g) through (j) of this section, base stations and fixed stations shall be operated in accordance with the following when transmitting during the course of normal rendition of service:

(1) From a control point, only a person holding a commercial radio operator license or permit of any class issued by the Commission shall operate a base station or fixed station.

(2) From a dispatch point, an unlicensed person may operate a base station or fixed station after being authorized to do so by the station licensee: *Provided, however*, That such operation shall be under the direct supervision and responsibility of a person who (i) holds a commercial radio operator license or permit of any class issued by the Commission, and who (ii) is on duty at a control point meeting the requirements of Subpart C of this part.

(f) Except under the circumstances specified in paragraph (a) of this section, except as limited by paragraphs (g) through (j) of this section, no person, whether or not a licensed operator, is required to be in attendance at a station when transmitting during the course of normal rendition of service and when either (1) transmitting for telemetering purposes or (2) retransmitting by self-actuating means a radio signal received from another radio station or stations.

(g) The provisions of this section authorizing certain unlicensed persons to operate certain stations when transmitting during the course of normal rendition of service, shall be applicable only to stations in the domestic service except that the provisions of paragraph (e) (2) of this section shall be applicable to stations in either the domestic or international service. For the purposes of this section, a station in the domestic service is one which is located within the United States, its territories or possessions and which, when communicating with other stations, is in communication exclusively with one or more other United States stations which are also located in the United States, its territories or possessions; a station in the International service is one which is not in the domestic service as just defined.

(h) The provisions of this section authorizing certain unlicensed persons to operate mobile stations shall not be construed to change or diminish in any respect the responsibility of station licensees to have and to maintain control over the stations licensed to them (including all transmitter units thereof), or for the proper functioning and operation of those stations (including all transmitter units thereof) in accordance with the terms of the licenses of those stations.

(i) Notwithstanding any other provisions of this section, unless the transmitter is so designed that none of the operations necessary to be performed during the course of normal rendition of service may cause off-frequency operation or result in any unauthorized radiation, such transmitter shall be operated by a person holding a first or second class commercial radio operator license (either radiotelephone or radiotelegraph as may be appropriate for the type of emission being used), issued by the Commission.

(j) Any reference in this section to a commercial radio operator license or permit of any class issued by the Commission shall not be construed to include Aircraft Radiotelephone Operator Authorizations.

§ 16.155 *Posting of operator license.* (a) The original license of each base or fixed station operator, other than an operator exclusively performing service and maintenance duties, shall be posted or kept immediately available at the place where he is on duty as an operator: *Provided, however*, That if an operator who is on duty holds a restricted radiotelephone operator permit of the card form (as distinguished from such document of the diploma form) or holds a valid license verification card (FCC Form 758–F) attesting to the existence of any other valid commercial radio operator license, he may have such permit or verification card, as the case may be, in his personal possession in lieu of complying with the above requirement.

(b) Whenever a licensed operator is required for a mobile station, the original license of each such operator, other than an operator exclusively performing service and maintenance duties, shall be kept in his personal possession whenever he performs the duties of an operator at such station: *Provided*, That in lieu of an original license of the diploma form (as distinguished from such document of the card form) he may have in his personal possession a valid verification card attesting to its existence.

(c) The original license of every station operator who exclusively performs service and maintenance duties at that station shall be posted at the transmitter involved whenever the transmitter is in actual operation while service or maintenance work is being performed by him or under his immediate supervision and responsibility: *Provided*, That in lieu of posting his license, he may have on his person his license or a valid verification card.

§ 16.156 *Transmitter identification card and posting of station license.* (a) The current authorization for each mobile station shall be retained as a permanent part of the station record, but need not be posted. A Transmitter Identification Card (FCC Form No. 452–C, Revised) properly executed shall be affixed to each mobile transmitter or associated control equipment. When the transmitter is not in view from the control position or is not readily accessible for inspection, the identification card should be affixed to the control equipment at the transmitter operating position. The following information shall be entered on the card by the permittee or licensee:

(1) Name of permittee or licensee;

(2) Station call signal assigned by the Commission;

(3) Exact location or locations of the transmitter records;

(4) Frequency or frequencies on which the transmitter to which attached is adjusted to operate; and

(5) Signature of the permittee or licensee, or a designated official thereof.

(b) The current authorization for each base or fixed station shall be posted at the principal control position of that station, except that in the Railroad Radio Service a licensee may post a full size photocopy in lieu of the original license. At all other control points listed on the station authorization, a photocopy of the authorization shall be posted. In addition, a Transmitter Identification Card (FCC Form No. 452–C, Revised) properly executed shall be affixed to each transmitter operated at a fixed location, when such transmitter is not in view from the control position or is not readily accessible for inspection.

(c) In lieu of the Transmitter Identification Card, FCC Form 452–C, Revised, as required by paragraphs (a) and (b) of this section, a permittee or licensee may at his option employ a plate of metal or other substantial material which shall bear the title "Radio Transmitter Identification," and shall clearly display all the information required to be shown on the FCC Form 452–C, Revised, with the exception of the signature.

§ 16.157 *Inspection of stations.* All stations and records of stations in these services shall be made available for inspection at any time while the station is in operation or shall be made available for inspection upon reasonable request of an authorized representative of the Commission.

§ 16.158 *Inspection and maintenance of tower marking and associated control equipment.* The licensee of any radio station which has an antenna structure required to be painted or illuminated pursuant to the provisions of section 303 (q) of the Communications Act of 1934, as amended, and/or Part 17 of this subchapter, shall operate and maintain the tower marking and associated control equipment in accordance with the following:

(a) The tower lights shall be observed at least once each 24 hours, either visually or by observing an automatic and properly maintained indicator designed to register any failure of such lights, to insure that all such lights are functioning properly as required; or, alternatively, there shall be provided and properly maintained an automatic alarm system designed to detect any failure of the tower lights and to provide indication of such failure to the licensee.

(b) Any observed or otherwise known failure of a code or rotating beacon light or top light not corrected within thirty minutes, regardless of the cause of such failure, shall be reported immediately by telephone or telegraph to the nearest Airways Communication Station or office of the Civil Aeronautics Administration. Further notification by telephone or telegraph shall be given immediately upon resumption of the required illumination.

(c) All automatic or mechanical control devices, indicators, and alarm systems associated with the tower lights shall be inspected at intervals not to exceed three months, to insure that such apparatus is functioning properly.

(d) All lighting shall be exhibited from sunset to sunrise unless otherwise specified in the instrument of station authorization.

(e) A sufficient supply of spare lamps shall be maintained for immediate replacement purposes at all times.

(f) All towers shall be cleaned or repainted as often as is necessary to maintain good visibility.

§ 16.159 *Answers to a notice of violation.* Any licensee receiving official notice of a violation of the terms of the Communications Act of 1934, as amended, any legislative act or treaty to which the United States is a party, or the rules and regulations of the Federal Communications Commission, shall, within 3 days from such receipt, send a written answer to the office of the Commission originating the official notice. If an answer cannot be sent, or an acknowledgment made within such 3-day period, acknowledgment and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay. The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. The reply shall set forth the steps taken to prevent a recurrence of improper operation.

§ 16.160 *Station records.* Each licensee in these services shall maintain station records in accordance with the following:

(a) For all stations, the results and dates of the transmitter measurements required by § 16.108, and the name of the person or persons making the measurements.

(b) For all stations, when service or maintenance duties are performed which may affect their proper operation, the responsible operator shall sign and date an entry in the station record concerned, giving:

(1) Pertinent details of all duties performed by him or under his supervision;

(2) His name and address; and

(3) The class, serial number, and expiration date of his license: *Provided, however*, That the information called for under subparagraphs (2) and (3) of this paragraph, so long as it remains unchanged, is not required to be repeated in the case of a person who is regularly employed on a full-time basis at the station.

(c) For base stations and fixed stations at which licensed operators are required, the name or names of persons responsible for the operation of the transmitting equipment each day, together with the period of their duty.

(d) For base stations at which licensed operators are required when they communicate with other base stations or with fixed stations:

(1) Call signal of other station;

(2) Nature of such communications; and

(3) Date, time, and approximate duration of each transmission.

(e) When a Base Station or Fixed Station has an antenna structure which is required to be illuminated, appropriate entries shall be made as follows:

(1) The time the tower lights are turned on and off each day, if manually controlled.

(2) The time the daily check of proper operation of the tower lights was made.

(3) In the event of any observed or otherwise known failure of a tower light:

(i) Nature of such failure.

(ii) Date and time the failure was observed or otherwise noted.

(iii) Date, time and nature of the adjustments, repairs, or replacements made.

(iv) Identification of Airways Communication Station (Civil Aeronautics Administration) notified of the failure of any code or rotating beacon light not corrected within thirty minutes, and the date and time such notice was given.

(v) Date and time notice was given to the Airways Communication Station (Civil Aeronautics Administration) that the required illumination was resumed.

(4) Upon completion of the three-month periodic inspection required by § 16.158:

(i) The date of the inspection and the condition of all tower lights and associated tower lighting control devices, indicators and alarm systems.

(ii) Any adjustments, replacements, or repairs made to insure compliance with the lighting requirements and the

date such adjustments, replacements, or repairs were made.

(f) The records shall be kept in an orderly manner, and in such detail that the data required are readily available. Key letters or abbreviations may be used if proper meaning or explanation is set forth in the record.

(g) Each entry in the records of each station shall be signed by a person qualified to do so by reason of having actual knowledge of the facts to be recorded.

(h) No record or portion thereof shall be erased, obliterated or wilfully destroyed within the required retention period. Any necessary correction may be made only by the person originating the entry, who shall strike out the erroneous portion, initial the correction made and indicate the date of correction.

(i) Records required by this part shall be retained by the licensee for a period of at least one year.

SUBPART E—DEVELOPMENTAL OPERATION

§ 16.201 *Eligibility.* An authorization for developmental operation in any of the services under this part will be issued only to those persons who are eligible to operate stations in such service on a regular basis.

§ 16.202 *Showing required.* (a) Except as provided in paragraph (b) of this section, each application for developmental operation shall be accompanied by a showing that:

(1) The applicant has an organized plan of development leading to a specific objective.

(2) A point has been reached in the program where actual transmission by radio is essential to the further progress thereof.

(3) The program has reasonable promise of substantial contribution to the expansion or extension of the radio art, or is along lines not already investigated.

(4) The program will be conducted by qualified personnel.

(5) The applicant is legally and financially qualified, and possesses adequate technical facilities for conduct of the program as proposed; and

(6) The public interest, convenience, or necessity will be served by the proposed operation.

(b) The provisions of paragraph (a) of this section do not apply when an application is made for developmental operation solely for the reason that the frequency requested is limited to developmental use.

§ 16.203 *Limitations on use.* Stations used for developmental operation shall be constructed and used in such a manner as to conform with all of the technical and operating requirements of Subparts C and D of this part, unless deviation therefrom is specifically provided in the instrument of authorization.

§ 16.204 *Frequencies available for assignment.* Stations engaged in developmental operation may be authorized to use a frequency, or frequencies, available for the particular service in which they propose to operate. The number of channels assigned will depend upon the specific requirements of the developmental program and the number of frequencies available in the particular area where the station will be operated.

§ 16.205 *Interference.* The operation of any station engaged in developmental work shall be subject to the condition that no harmful interference is caused to the operation of stations licensed on a regular basis under any part of the Commission's rules.

§ 16.206 *Special provisions.* (a) The developmental program as described by the applicant in the application for authorization shall be substantially followed unless the Commission shall otherwise direct.

(b) Where some phases of the developmental program are not covered by the general rules of the Commission and the rules in this part, the Commission may specify supplemental or additional requirements or conditions in each case, as deemed necessary in the public interest, convenience, or necessity.

(c) The Commission may, from time to time, require a station engaged in developmental work to conduct special tests which are reasonable and desirable to the authorized developmental program.

§ 16.207 *Authorization subject to change or cancellation: Supplementary statement required.* Every application for authority to engage in developmental operation shall be accompanied by a statement signed by the applicant in which it is agreed that any authorization issued pursuant thereto will be accepted with the express understanding of the applicant that it is subject to change in any of its terms or to cancellation in its entirety at any time, upon reasonable notice but without a hearing, if, in the opinion of the Commission, circumstances should so require.

§ 16.208 *Report of operation.* A report on the results of the developmental program shall be filed with and made a part of each application for renewal of authorization, or in cases where no renewal is requested, such report shall be filed within 60 days of the expiration of such authorization. Matters which the applicant does not wish to disclose publicly may be so labeled; they will be used solely for the Commission's information, and will not be publicly disclosed without permission of the applicant. The report shall include comprehensive and detailed information on the following:

(a) The final objective.

(b) Results of operation to date.

(c) Analysis of the results obtained.

(d) Copies of any published reports.

(e) Need for continuation of the program.

(f) Number of hours of operation on each frequency.

SUBPART F—MOTOR CARRIER RADIO SERVICE

§ 16.251 *Eligibility for license.* (a) Authorizations for stations in the Motor Carrier Radio Service will be issued only to:

(1) Persons primarily engaged in providing a common or contract motor carrier passenger transportation service between urban areas.

(2) Persons primarily engaged in providing a common or contract motor carrier passenger transportation service within a single urban area.

(3) Persons primarily engaged in providing a common or contract motor carrier property transportation service between urban areas.

(4) Persons solely engaged in providing a common or contract carrier transportation service limited to the local distribution or collection of property which is destined for or continued in intercity, interstate, or international shipment.

(5) A non-profit corporation or association organized for the purpose of furnishing a radiocommunication service on cost-sharing basis to persons all of whom are actually engaged in activities set forth in one of the preceding subparagraphs of this paragraph.

(b) For the purpose of establishing eligibility under paragraph (a) of this section, proof of the possession of a valid certificate of public convenience and necessity, or permit, issued by the Interstate Commerce Commission, or equivalent document issued by a state, territorial or local regulatory body, shall be submitted by each applicant or, in the case of a non-profit corporation or association for which provision is made in this section, the application shall be accompanied by a listing of all persons to whom radiocommunication service will be furnished together with proof of the possession of such certificate or permit by each such participant. Certificates, permits or similar documents to which reference is made for the purpose of establishing eligibility under the provisions of this section shall be identified by document title and number, together with the name of the issuing jurisdiction and date of issuance. In addition, applications submitted by common or contract motor carriers eligible under paragraph (a) (4) of this section shall be accompanied by supporting letters from the principal carriers served attesting to the extent, the need, and the importance of the service rendered.

§ 16.252 *Frequencies available for base and mobile stations.* (a) The following frequencies are available to the Motor Carrier Radio Service for assignment to Base Stations and Mobile Stations of common and contract carriers of passengers operating between urban areas:

Mc	*Mc*
43.70	43.90
43.74	43.94
43.78	43.98 [1]
43.82	44.02 [1]
43.86	44.06 [1]

[1] The frequencies 43.98, 44.02, and 44.06 Mc are available on a shared basis with stations of common and contract carriers of property.

(b) The following frequencies are available to the Motor Carrier Radio Service for assignment to base stations and mobile stations of common and contract carriers of passengers within a single urban area.

Mc	*Mc*
44.46	44.54
44.50	44.58

(c) The following frequencies are available to the Motor Carrier Radio Service on a shared basis with other services, for assignment to base stations and mobile stations of common and contract carriers of passengers within a single urban area.

Mc	*Mc*
30.66	30.94
30.70	30.98
30.74	31.02
30.78	31.06
30.82	31.10
30.86	31.14
30.90	

(d) The following frequencies are available to the Motor Carrier Radio Service for assignment to Base and Mobile Stations of common or contract carriers of property operating between urban areas, (1) for communications with vehicles when such vehicles are themselves engaged in the transportation of property between urban areas regardless of the location of the vehicles at the time a particular communication takes place; or (2) for communications with vehicles used to supervise, tow, repair or maintain the vehicles referred to in subparagraph (1) of this paragraph.

Mc.	*Mc.*
43.98 [1]	44.22
44.02 [1]	44.26
44.06 [1]	44.30
44.10	44.34
44.14	44.38
44.18	44.42

[1] The frequencies 43.98, 44.02 and 44.06 Mc are available on a shared basis with stations of common and contract carriers of passengers.

(e) Only those frequencies listed in paragraph (f) of this section are available to motor carriers of property who are eligible under the provisions of § 16.251 (a) (4) of this subpart.

(f) The following frequencies are available to all persons eligible in the Motor Carrier Radio Service on a shared basis with stations in the Railroad Radio Service, under the terms of a developmental authorization only:

Base and Mobile (Mc.)	*Mobile Only (Mc.)*
452.65	457.65
452.75	457.75
452.85	457.85
452.95	457.95

(g) Frequencies in the bands listed below are available for assignment to Base Stations and Mobile Stations in the Motor Carrier Radio Service on a shared basis with other services, under the terms of a developmental grant only; the exact frequency or the authorized channel will be specified in the authorization:

Mc.	*Mc.*
[1] [2] 2450–2500	[2] 6425–6575
[2] 3500–3700	[2] 11700–12200

[1] Use of frequencies in the band 2450–2500 Mc is subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 2450 Mc.

[2] Subject to the proceedings in Docket No. 10797.

§ 16.253 *Frequencies available for operational fixed stations.* (a) Frequencies listed in this Section are available for assignment for fixed service operations in this service on a limited basis; however, extensive licensing of point-to-point systems must await further development of the Commission's microwave program. Accordingly, requests for point-to-point facilities will be considered on a case-by-case basis. In general, requests for such point-to-point facilities should clearly establish either (1) that a number of fixed stations at permanent locations are required to provide communications between isolated establishments or from such establishments to points at which established communication facilities are available, or (2) that the use of a remotely located base station, with which a requested fixed control and fixed relay link is proposed to be used, is necessary to maintain communications with mobile units for the conduct of authorized communications. Point-to-point facilities will not be authorized for the transmission of any type of signal or communication between two locations within the same Standard Metropolitan Area except for the purpose of providing a fixed control and fixed relay link where the remote placement of a base station has been justified.

(b) Subject to the conditions that no harmful interference will be caused to reception of television channel No. 4 or 5, the following frequencies are available for assignment to operational fixed stations in the Motor Carrier Radio Service on a shared basis with other services:

Mc	*Mc*	*Mc*	*Mc*
72.02	72.82	73.62	74.42
72.06	72.86	73.66	74.46
72.10	72.90	73.70	74.50
72.14	72.94	73.74	74.54
72.18	72.98	73.78	74.58
72.22	73.02	73.82	75.42
72.26	73.06	73.86	75.46
72.30	73.10	73.90	75.50
72.34	73.14	73.94	75.54
72.38	73.18	73.98	75.58
72.42	73.22	74.02	75.62
72.46	73.26	74.06	75.66
72.50	73.30	74.10	75.70
72.54	73.34	74.14	75.74
72.58	73.38	74.18	75.78
72.62	73.42	74.22	75.82
72.66	73.46	74.26	75.86
72.70	73.50	74.30	75.90
72.74	73.54	74.34	75.94
72.78	73.58	74.38	75.98

(c) Frequencies in the bands listed below are available for assignment to Operational Fixed Stations in the Motor Carrier Radio Service on a shared basis with other services and under the terms of a developmental grant only; the exact frequency and the authorized bandwidth will be specified in the authorization:

Mc.	*Mc.*
[1] [2] 890–940	6575–6675
952–960	9800–9900
1850–1990	12200–12700
2110–2200	[1] 16000–18000
[1] 2450–2500	26000–30000
2500–2700	

[1] Use of frequencies in the bands 890–940, 2450–2500 and 17850–18000 Mc is subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequencies 915, 2450 and 18000 Mc.

[2] Subject to the proceedings in Docket No. 10797.

§ 16.254 *Frequencies available for Base, Mobile and Operational Fixed Stations.* The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed Stations in this service on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific and medical devices on the frequency 27.12 Mc.

§ 16.255 *Limitations on installation and use.* Mobile units authorized in this service may be installed only in vehicles used for the carriage of passengers or property for compensation; or in vehicles used to supervise, tow, repair or maintain such vehicles or, in the case of a streetcar system, vehicles used in connection with the maintenance of associated trackage, right-of-way or electric power facilities. Common and contract motor carriers of property are limited to communications directly relating to the routing or rerouting of trucks.

§ 16.256 *Amortization period.* Persons authorized to operate in the Highway Truck Radio Service whose operations have not been transferred into the Special Industrial Radio Service in accordance with the proceedings in Dockets 9703 and 10742 and who are ineligible in the Motor Carrier Radio Service, may continue to operate until March 15, 1960. During this period, such persons will not be authorized, however, to expand their facilities or operations.

§ 16.257 *Modification of licenses to shift frequencies.* The common and contract carriers of property licensed in the Highway Truck Radio Service may apply for modification of their licenses to shift frequencies in order to conform with this subpart at any time after March 15, 1955, but shall do so not later than 60 days prior to the expiration of their current licenses. Pending such modification of licenses, operations on the frequencies assigned under the Highway Truck Radio Service rules shall be subject to the limitations on communications and use contained in § 16.252 (d).

SUBPART G [RESERVED]

SUBPART H—RAILROAD RADIO SERVICE

§ 16.351 *Eligibility.* (a) The following persons are eligible to hold authorizations to operate radio stations in the Railroad Radio Service:

(1) Persons regularly engaged in offering to the public a passenger or freight transportation service by railroad common-carrier.

(2) A non-profit organization or association organized for the purpose of furnishing a radiocommunication service solely to persons who are actually engaged in the activity set forth under subparagraph (1) of this paragraph.

(b) Each application for authority to operate in the Railroad Radio Service shall be accompanied by a statement in detail sufficient to indicate clearly the applicant's eligibility under paragraph (a) of this section.

§ 16.352 *Frequencies available for base and mobile stations.* (a) Base and mobile radio stations used primarily for end to end, fixed point to train, or train to train communications in connection with the operation of railroad trains over a track or tracks extending through yards and between stations upon which trains are operated by timetable, train order, or both, or the use of which is governed by block signals may use the following frequencies:

Mc.	*Mc.*	*Mc.*	*Mc.*
159.51	160.17	160.77	161.37
159.57	160.23	160.83	161.43
159.63	169.29	160.89	161.49
159.69	160.35	160.95	161.55
159.75	160.41	161.01	161.61
159.81	160.47	161.07	161.67
159.87	160.53	161.13	161.73
159.93	169.59	161.19	161.79
159.99	160.65	161.25	[1] 161.85
160.05	160.71	161.31	160.11

[1] Available for assignment in Chicago area only.

These frequencies may also be used on a secondary basis for intercommunication between adjacent base stations, provided interference is not caused to communications involving radio stations aboard railroad rolling stock.

(b) All frequencies in paragraph (a) of this section may also be assigned to base and mobile stations to be operated primarily within railroad yards, terminal areas, or to be used for communications which are of a practical necessity in connection with railroad operation and maintenance, provided, interference is not caused to stations eligible under the provisions of paragraph (a) of this section. However, each application requesting the assignment of 159.57, 159.81, 160.53, 161.01, 161.31 or 161.67 Mc. must outline circumstances which indicate that the proposed operation will not interfere with the use of the frequencies by stations authorized under paragraph (a) of this section.

(c) For the purpose of developmental operations, the following frequencies are available for assignment to Base Stations and Mobile Stations in the Railroad Radio Service, on a shared basis with stations in the Motor Carrier Radio Service:

Base and Mobile (Mc)	*Mobile (Mc)*
452.65	457.65
452.75	457.75
452.85	457.85
452.95	457.95

(d) Frequencies in the bands listed below are available for assignment to base and mobile stations for developmental operations in the Railroad Radio Service, on a shared basis with other services. The exact frequency, and the authorized bandwidth, will be specified in the authorization.

Mc.	*Mc.*
2450–2500	6425– 6575
3500–3700	11700–12200

NOTE: Use of frequencies in the band 2450 to 2500 Mc. is subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 2450 Mc.

§ 16.353 *Frequencies available for fixed stations.* (a) Subject to the condition that no harmful interference will be caused to reception of television channel 4 or 5, the following frequencies are available for assignment to fixed stations in the Railroad Radio Service on a shared basis with other services:

Mc.	*Mc.*	*Mc.*	*Mc.*
72.02	72.82	73.62	74.42
72.06	72.86	73.66	74.46
72.10	72.90	73.70	74.50
72.14	72.94	73.74	74.54
72.18	72.98	73.78	74.58
72.22	73.02	73.82	75.42
72.26	73.06	73.86	75.46
72.30	73.10	73.90	75.50
72.34	73.14	73.94	75.54
72.38	73.18	73.98	75.58
72.42	73.22	74.02	75.62
72.46	73.26	74.06	75.66
72.50	73.30	74.10	75.70
72.54	73.34	74.14	75.74
72.58	73.38	74.18	75.78
72.62	73.42	74.22	75.82
72.66	73.46	74.26	75.86
72.70	73.50	74.30	75.90
72.74	73.54	74.34	75.94
72.78	73.58	74.38	75.98

(b) Frequencies in the bands listed below are available for assignment to fixed stations for developmental operations in the Railroad Radio Service on a shared basis with other services. The exact frequency, or the authorized channel, will be specified in the authorization.

Mc.	*Mc.*
890– 940	6575– 6875
952– 960	9800– 9900
1850–1990	12200–12700
2110–2200	16000–18000
2450–2500	26000–30000
2500–2700	

NOTE: Use of frequencies in the bands 890–940, 2450–2500 and 17850–18000 Mc. is subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequencies 915, 2450 and 18000 Mc.

(c) Pursuant to the provisions of § 16.8, and for the specific purpose of transmitting hydrological or meteorological data, the frequencies listed in this paragraph are available for assignment to Operational Fixed stations in this Service: *Provided, however,* That harmful interference shall not be caused to Federal Government stations: *And provided further,* That the hydrological or meteorological data is made available to interested government agencies. Notwithstanding the provisions of § 16.151, Operational Fixed stations authorized to operate on frequencies listed in this paragraph shall not communicate with or accept communications from any Mobile station or Base station unless written authorization to do so has been obtained from the Commission. Persons who desire to operate stations in accordance with the provisions of this paragraph should communicate with the Commission prior to filing formal application and request instructions concerning the procedure to be followed. The following frequencies are available for assignment:

Mc	*Mc*	*Mc*
[2] 40.68	171.025	[1] 406.050
169.425	171.075	[1] 406.150
169.475	171.125	[1] 406.250
169.525	171.175	[1] 406.350
169.575	171.825	[1] 412.450
170.225	171.875	[1] 412.550
170.275	171.925	[1] 412.650
170.325	171.975	[1] 412.750
170.375		

[1] Primarily for use by Fixed Relay Stations.

[2] Use of the frequency 40.68 Mc is limited to stations located in the States of Pennsylvania and West Virginia, and is subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the same frequency.

§ 16.354 *Operator requirements, fixed and base stations.* (a) Notwithstanding the provisions of § 16.154 (e), the employees of Class I, II and III railroads of the United States may, without holding any class of commercial radio operator license issued by the Commission, operate fixed stations and base stations in the Railroad Radio Service when specifically authorized to do so by the station licensee: *Provided, however,* That:

(1) The terms of this section shall apply only to the employees of those railroads which shall have adopted and published Railroad Radio General and Operating Rules in a form which has been approved by the Commission, and

(2) The terms of this section shall apply only to those railroad employees who shall have successfully passed an examination given by railroad examiners on the applicable Railroad Radio General and Operating Rules. The first such examination shall be given prior to the operation of any radio transmitting apparatus by the employee and re-examinations shall thereafter be given at intervals not in excess of two years.

(3) The terms of this section shall apply only to the employees of those railroads who maintain suitable records showing the name and position of each employee who has been examined with respect to the applicable Railroad Radio General and Operating Rules, the date of the employee's last successfully completed examination and the name of the railroad examiner. Such records shall be made available to duly accredited representatives of the Federal Communications Commission upon request.

(b) The provisions of this section authorizing certain unlicensed persons to operate fixed and base stations in the Railroad Radio Service shall not be construed to change or diminish in any respect the responsibility of station licensees to have and maintain control over the stations licensed to them (including all transmitter units thereof), or for the proper functioning and operation of those stations (including all transmitter units thereof) in accordance with the terms of the licenses of those stations.

§ 16.355 *Relay stations*—(a) *General.* Relay stations are used to extend the range of communication between another radio station and the point with which it is desired to communicate. For the purposes of the rules in this part, there are two types of relay stations: Mobile relay stations and fixed relay stations. For definitions, see § 16.6.

(b) *Mobile relay stations.* The policies governing authorization and operation of this type of relay station are as follows:

(1) Each application for a new mobile relay station authorization shall be accompanied by a satisfactory showing that the applicant has a substantial requirement for prompt mobile-to-mobile communication over ranges greater than can be realized consistently by direct communication on the frequency presently assigned, or in the case of a proposed new radio system, on any available frequency. (Except for radio systems in railroad yard or terminal areas, range measurements obtained by use of

low-power transmitters of the hand-carried or pack-carried type will not be accepted in satisfaction of the requirements of this subparagraph.)

(2) A mobile relay station may be authorized to operate on any mobile service frequency available for assignment to base stations.

(3) Each mobile relay station shall be so designed and installed that it normally will be activated only by means of a coded signal or signals or such other means as will effectively prevent its activation by undesired signals: *Provided, however,* That this requirement may be waived when both of the following conditions are met:

(i) The radio system is shown to be so designed that the mobile relay station normally is capable of activation only by signals received on frequencies above 50 Mc; and

(ii) The applicant for a mobile relay station authorization either verifies that no person having equal rights to the frequency in question is operating on the mobile relay station frequency within a radius of seventy-five miles of the proposed mobile relay station location or, alternatively, obtains and submits with the application the written consent of each such person to installation of the proposed mobile relay station and its operation on a regular basis for a trial period of one year from the date a station license is granted by the Commission.

In any event, a waiver granted under the provisions of this subparagraph may be cancelled after ninety days notice by the Commission if it develops that the mobile relay station is, in fact, consistently activated by undesired signals and thereby causes harmful interference to other licensees.

(4) Each mobile relay station shall be so designed and installed that it will be deactivated automatically when its associated receiver or receivers are not receiving a signal on the frequency or frequencies which normally activate it.

(5) Each mobile relay station required by the terms of subparagraph (3) of this paragraph to be activated by a coded signal shall be so designed and installed that it will be deactivated upon receipt or cessation of a coded signal or signals, and, in addition, shall be provided with an automatic time-delay or clock device which will deactivate the station not more than three minutes after its activation.

(6) A mobile station associated with one or more mobile relay stations may be authorized to operate on any available mobile service frequency.

(7) An operational fixed (control) station associated with one or more mobile relay stations may be assigned any frequency available for assignment to operational fixed stations or, at the option of the applicant, the mobile service frequency assigned to the associated mobile station. Use of the mobile service frequency by such operational fixed (control) stations is subject to the condition that harmful interference shall not be caused to stations of other licensees operating in the mobile service in accordance with the table of frequency allocations as set forth in Part 2 of this chapter.

(8) In any radio system which employs more than one mobile relay station, where there is a requirement that stations in the vicinity of one mobile relay station be able to communicate automatically with stations in the vicinity of other mobile relay stations, any necessary circuits for interconnection of the mobile relay stations shall be provided by means of wire lines or radio stations operating on fixed service frequencies.

(9) A base station which is used intermittently as an operational fixed (control) station for one or more associated mobile relay stations of the same licensee will be authorized to operate only on the mobile service frequencies assigned to the associated mobile relay station and/or mobile station. Special authority for such dual station classification and use must be shown in the instrument of station authorization.

(c) *Fixed relay stations.* Fixed relay stations will be authorized to operate only on frequencies available for use by operational fixed stations.

§ 16.356 *Frequencies available for Base, Mobile and Operational Fixed Stations.* The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed stations in this service on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 27.12 Mc.

SUBPART I—TAXICAB RADIO SERVICE

§ 16.401 *Eligibility.* (a) The following persons are eligible to hold authorizations to operate radio stations in the Taxicab Radio Service:

(1) Persons regularly engaged in furnishing to the public for hire a non-scheduled passenger land transportation service not operated over a regular route or between established terminals.

(2) A non-profit corporation or association organized for the purpose of furnishing a radiocommunication service solely to persons who are actually engaged in the activity set forth under subparagraph (1) of this paragraph.

(b) Each application for authority to operate in the Taxicab Radio Service shall be accompanied by a statement in detail sufficient to indicate clearly the applicant's eligibility under paragraph (a) of this section.

§ 16.402 *Frequencies available for Base Stations and Mobile Stations.* (a) Not more than one Base Station frequency and one Mobile Station frequency will be assigned to a licensee, unless it clearly appears from a supplemental showing attached to the license application that the grant of an additional frequency or frequencies would be in the public interest by reason of a cooperative arrangement of local taxicab interest or other special circumstances.

(b) The following frequencies are available for assignment to Base Stations and Mobile Stations in the Taxicab Radio Service only:

Base and Mobile (*Mc*)	*Mobile* (*Mc*)
152.27	157.53
152.33	157.59
152.39	157.65
152.45	157.71

(c) The following frequencies are available for assignment to Base Stations and Mobile Stations for developmental operations in the Taxicab Radio Service only:

Base and Mobile (*Mc*)	*Mobile* (*Mc*)
452.05	457.05
452.15	457.15
452.25	457.25
452.35	457.35
452.45	457.45

(d) Frequencies in the bands listed below are available for assignment to base and mobile stations for developmental operations in the Taxicab Radio Service, on a shared basis with other services. The exact frequency, and the authorized bandwidth, will be specified in the authorization.

(*Mc*)	(*Mc*)
2450–2500	6425–6575
3500–3700	11700–12200

NOTE: Use of frequencies in the band 2450–2500 Mc is subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 2450 Mc.

§ 16.403 *Special limitations.* (a) All mobile units authorized in the Taxicab Radio Service shall be permanently installed in motor vehicles, and such installation shall be made only in vehicles used (1) for the carriage of passengers for hire, (2) by supervisory personnel in the discharge of their official duties, or (3) for the towing or repair of disabled motor vehicles of the licensee.

(b) Use of Mobile Station facilities by supervisory personnel shall be limited as follows:

(1) Communications addressed to other mobile units shall relate directly to safety of life or property, routing or rerouting of taxicabs to avoid hazards or abnormal traffic conditions, or enforcement of public laws and company instructions; and

(2) Communications addressed to the licensee's Base Station shall relate directly to safety of life or property or supervisory control of motor vehicles of the licensee.

(c) Each radio-equipped vehicle which is used by supervisory personnel in the discharge of their official duties shall be conspicuously and permanently marked with the name under which the licensee conducts his taxicab business.

(d) Mobile units installed in vehicles used by supervisory personnel in the discharge of their official duties may be authorized, upon application, to operate on Base Station frequencies.

§ 16.404 *Frequencies available for Base, Mobile and Operational Fixed Stations.* The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed stations in this service on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 27.12 Mc.

SUBPART J [RESERVED]

SUBPART K—AUTOMOBILE EMERGENCY RADIO SERVICE

§ 16.501 *Eligibility.* (a) The following persons are eligible to hold authorizations to operate radio stations in the Automobile Emergency Radio Service:

(1) Associations of owners of private automobiles which provide private emergency road service.

(2) Public garages operating emergency road service vehicles.

(3) A non-profit corporation or association organized for the purpose of furnishing a radiocommunication service solely to persons who are actually engaged in either of the activities set forth under subparagraphs (1) and (2) of this paragraph.

(b) Each application for authority to operate in the Automobile Emergency Radio Service shall be accompanied by a statement in detail sufficient to indicate clearly the applicant's eligibility under paragraph (a) of this section.

§ 16.502 *Permissible communications.* Stations licensed under this subpart may transmit only the following types of communications:

(a) Any communication related to the safety of life or the protection of important property.

(b) Communications required for dispatching repair trucks to disabled vehicles.

§ 16.503 *Frequencies available for base and mobile stations.* (a) The frequencies 35.70 and 35.98 Mc are primarily available for assignment to Base and Mobile stations operated by public garages. In addition, these frequencies may, at the discretion of the Commission, be assigned to Base and Mobile stations operated by or on behalf of associations of owners of private automobiles, upon a showing that: (1) The same applicant has previously held an authorization for the operation of a station or stations in the same area on that frequency, or (2) one or both of the frequencies specified in paragraph (b) of this section are currently assigned to stations operated in the same area by or on behalf of another such association with which the applicant is not directly affiliated.

(b) For the purpose of developmental operations, the following frequencies are available for assignment to base and mobile stations in the Automobile Emergency Radio Service which are to be operated only by or on behalf of associations of owners of private automobiles:

Base and Mobile (*Mc*)	*Mobile* (*Mc*)
452.55	457.55

§ 16.504 *Frequencies available for Base, Mobile and Operational Fixed Stations.* The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed stations in this service on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 27.12 Mc.

[F. R. Doc. 55-8294; Filed, Oct. 12, 1955; 8:47 a. m.]

PART 20—DISASTER COMMUNICATIONS SERVICE

RECAPITULATION OF REGULATIONS

Because of the number of outstanding amendments to Part 20 since it was last recapitulated in the FEDERAL REGISTER (March 6, 1951, at page 2079), Part 20 is recapitulated as of September 1, 1955, to read as set forth below.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

Subpart A—General Information

Sec.
20.1 Basis and purpose.
20.2 Disaster defined.
20.3 Disaster communications service and station defined.
20.4 Associated station defined.
20.5 Portable station defined.
20.6 Disaster communications defined.
20.7 Competent local authority defined.
20.8 Antenna structure defined.
20.9 Aircraft landing area defined.

Subpart B—Station License or Authorization

20.11 Eligibility.
20.12 Organization of networks.
20.13 Applications.
20.14 Limitation on antenna structures.
20.15 License term.

Subpart C—Use of Stations

20.21 Activation of stations.
20.22 Points of communications.
20.23 Limitations on use.
20.24 Permissible communications.
20.25 Station identification.
20.26 Radio station log.

Subpart D—Operating Requirements

20.29 Limitations on use of frequencies.
20.30 Liaison with licenses in the Industrial Radiolocation Service.
20.31 Assigned frequencies and authorized emissions.
20.32 Transmitting power.
20.33 Equipment requirements.
20.34 Operator requirements.
20.35 Availability of station and operator licenses.

AUTHORITY: §§ 20.1 to 20.35 issued under sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply sec. 301, 48 Stat. 1081; 47 U. S. C. 301.

SUBPART A—GENERAL INFORMATION

§ 20.1 *Basis and purpose.* (a) The basis of this part is the Communications Act of 1934, as amended, and applicable treaties and agreements to which the United States is a party. This part is issued pursuant to authority contained in Title III of the Communications Act of 1934, as amended, which vests authority in the Federal Communications Commission to regulate radio transmissions and to issue licenses for radio stations.

(b) The purpose of this part is to provide for the licensing or authorizing of radio stations to provide essential communications incident to or in connection with disasters or other incidents which involve loss of communication facilities normally available or which require the temporary establishment of communication facilities beyond those normally available.

§ 20.2 *Disaster defined.* As used in this part, the terms "disaster" or "disaster or other incident" are defined as meaning an occurrence of such nature as to involve the health or safety of a community or large area, or the health or safety of any group of individuals in an isolated area to whom no normal means of communications are available, and include, but are not limited to, floods, earthquakes, hurricanes, explosions, aircraft or train wrecks, and consequences of armed attack.

§ 20.3 *Disaster communications service and station defined.* (a) The disaster communications service is defined as a service of fixed, land, and mobile stations licensed, or authorized, to provide essential communications incident to or in connection with disasters or other incidents which involve loss of communications facilities normally available or which require the temporary establishment of communications facilities beyond those normally available.

(b) A disaster station is defined as any government or non-government radio station able to function as a fixed, land, or mobile station and authorized, if government, by its controlling federal government agency or licensed, if non-government, by the Federal Communications Commission to operate in the Disaster Communications Service. A single disaster station may consist of more than one unit, each capable of being operated independently as a fixed, land, or mobile station.

§ 20.4 *Associated station defined.* For the purposes of this part, a disaster station is considered to be associated with a licensed station in some other service when both stations are licensed to the same licensee at the same location and both stations are included in at least one coordinated disaster communications plan of the area concerned. A portable station or a mobile station in the Disaster Communications Service will be considered to be associated with the station in the other service which is located at its base of operations.

§ 20.5 *Portable station defined.* For the purposes of this part, a portable station is defined as a land station in the Disaster Communications Service which is capable of being moved from place to place and is in fact, from time to time, moved to and operated at unspecified fixed locations for the purpose of communicating with other fixed, land, or mobile stations.

§ 20.6 *Disaster communications defined.* Disaster communications are defined as:

(a) Communications essential to the establishment and maintenance of communication channels to be used in connection with disasters or other incidents involving loss of communications facilities normally available or which demand the temporary establishment of communications facilities beyond those normally available, including communications

necessary or incidental to drills and simulated disaster relief activity on the part of persons or organizations participating in the use of such communication channels; or

(b) Communications or signals essential to the public welfare, or that of any segment of the public, including communications directly concerning safety of life, preservation of property, maintenance of law and order, and alleviation of human suffering and need, in the case of any actual or imminent disaster or other such incident.

§ 20.7 *Competent local authority defined.*[1] For the purposes of this part, competent local authority is defined as meaning that authority within a community or larger area which is so designated in the coordinated disaster communications plan for the area concerned, including any alternate authority who may be so designated in such plan. In the absence of the specifically designated authority, the individual in charge of the net control station, or his representative, for the organized disaster station network established in accordance with the coordinated disaster communications plan, shall be considered as competent authority for the activation of the stations of that network.

§ 20.8 *Antenna structure defined.* The term "antenna structure" includes the radiating system and its supporting structures.

§ 20.9 *Aircraft landing area defined.* An aircraft landing area means any locality, either on land or water, including airports and intermediate landing fields, which is used, or approved for use, for landing and take-off of aircraft whether or not facilities are provided for the shelter, servicing, or repair of aircraft, or for receiving or discharging passengers or cargo.

SUBPART B—STATION LICENSE OR AUTHORIZATION

§ 20.11 *Eligibility.* (a) A license for a station to be operated in the Disaster Communications Service may be granted to any person eligible to hold a station license under the provisions of the Communications Act of 1934, as amended: *Provided*, That the station or proposed station is shown to constitute an element of a bona fide disaster communications network organized or to be organized and operated in accordance with a locally or regionally coordinated disaster communications plan under responsible leadership and direction.[1]

(b) Authorization for a United States Government station to operate in the Disaster Communications Service will be granted by the appropriate United States Government agency controlling that station.

§ 20.12 *Organization of networks.* (a) Local disaster communications networks may be organized by any responsible local group or groups that may be in a position to provide such service. In any particular area there may be several such networks and each network may be independent of the others. Whenever there is more than one network in the same area, however, they must all share the available frequencies in an efficient and orderly manner, under a single coordinated disaster communications plan. Any particular network shall be organized and set up along such lines and in accordance with such disaster communications plan that an inspection of the written records of the network will show that there is in fact a local disaster network of definitely identified stations with appropriate and responsible leadership and rules for self government that provide for an orderly and efficient service. The various networks in adjacent areas shall establish proper liaison arrangements, which will become a part of their respective disaster communications plans, to provide for efficient use of the available frequencies and that, in case of need, communications may be handled on an inter-area basis.

(b) Each disaster communications network shall establish a basic operating procedure for the type or types of transmission to be employed; which operating procedure shall be based on a generally understood procedure in common use in other services for the types of communications and the types of transmissions to be employed.

§ 20.13 *Applications.* (a) Application for construction permit and new license for a station to be operated in the Disaster Communications Service shall be submitted on FCC Form No. 525, signed by the applicant and countersigned by the competent local authority in charge of the disaster communications network in which the station is, primarily, intended to be operated. To facilitate a determination of eligibility, such application shall be accompanied by a statement describing in detail the purpose of the proposed station which shall include a copy of the locally coordinated disaster communications plan under which the station is intended to be operated unless such information has already been submitted to the Commission, in which case the application shall clearly identify that plan and the competent local authority under whose direction the station is proposed to be operated. In cases where a description of the station's antenna is required to be submitted on FCC Form No. 401–A, in accordance with the provisions of § 20.14, such form shall be submitted concurrently with the application for construction permit and license.

(b) A single application for construction permit and station license may be filed to cover all transmitter units normally located or based at one specified fixed location. Separate applications must, however, be filed to cover each separate disaster station, as defined in § 20.3.

(c) Unless otherwise directed by the Commission, application for modification of station license in the Disaster Communications Service shall be submitted on FCC Form No. 525 in the same manner as application for construction permit and new license, whenever the license or the basic location of a licensed station is proposed to be changed.

(d) Application for renewal of station license shall be submitted on FCC Form No. 405–A. Unless otherwise directed by the Commission, each application for renewal of license shall be filed during the last 60 days of the license term. In any case in which the licensee has, in accordance with the Commission's rules made timely and sufficient application for renewal of license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.

§ 20.14 *Limitation on antenna structures.* (a) No new antenna structure shall be erected for use by any station licensed or proposed to be licensed in the Disaster Communications Service, and no changes shall be made in any existing antenna structure for use or intended to be used by any station licensed or proposed to be licensed in the Disaster Communications Service so as to increase its over-all height above ground level, without prior approval by the Commission, in any case when either (1) the antenna structure proposed to be erected will exceed an over-all height of 170 feet above ground level, except in the case where the antenna is mounted on top of an existing man-made structure and does not increase the over-all height of such man-made structure by more than 20 feet, or (2) the antenna structure proposed to be erected will exceed an over-all height of one foot above the established elevation of any landing area for each 200 feet of distance, or fraction thereof, from the nearest boundary of such landing area, except in the case where the antenna structure does not exceed 20 feet in over-all height above the ground or is mounted on top of an existing man-made structure or natural formation and does not increase the over-all height of such man-made structure or natural formation more than 20 feet as a result of such mounting. Application for Commission approval, when such approval is required, shall be submitted, in triplicate, on FCC Form 401–A.

(b) In cases where FCC Form 401–A is required to be filed, further details as to whether an aeronautical study and/or obstruction marking may be required, and specifications for obstruction marking when required, may be obtained from Part 17 of this subchapter, "Construction, Marking and Lighting of Antenna Towers and Supporting Structures". Information regarding requirements as to inspection of obstruction marking, recording of information regarding such inspection, and maintenance of antenna structures is also contained in Part 17 of this subchapter.

§ 20.15 *License term.* A license to operate a radio station in the Disaster Communications Service will be issued for a term of from one to five years from the effective date of grant as the Commission may determine in each case to permit the orderly scheduling of renewals, and for a renewal term of four years from the effective date of renewal.

[1] Duly designated civil defense officials will be considered competent local authority in the organization or operation of disaster communications radio networks and stations, and in the coordination of disaster communications plans.

SUBPART C—USE OF STATIONS

§ 20.21 *Activation of stations.* (a) All stations in the Disaster Communications Service are authorized to be operated on the frequencies and with the types of emission specified by this part only when competent local authority either (1) determines that an impending or actual disaster or other such incident warrants their activation, or (2) schedules training operations, practice drills or tests to keep the networks and associated stations alert and efficient.

(b) Except during scheduled training operations, practice drills or tests, the scene of disaster frequency shall be used only (1) by the station or stations actually located in the disaster area and those stations with which the station or stations actually in such disaster area are in direct communication, or (2) as a notification frequency, for the transmission of any authorized emission including automatic alarm signals, when a disaster is imminent or has occurred, or (3) in an impending disaster situation, as a calling frequency for preliminary contacts in establishing or alerting nets, or (4) as a calling frequency for non-net stations seeking contact with the control station of a net for disaster-related communications.

(c) Nothing in this section shall be deemed to prevent any radio station from operating on the scene of disaster frequency, using such equipment and such power as may be available or necessary, and communicating in accordance with the provisions of paragraph (b) of this section at any time the safety of life or property within the area of responsibility of that station is in danger as a result of an impending or actual disaster or other such incident.

§ 20.22 *Points of communications.* All stations in the Disaster Communications Service, when activated in accordance with the provisions of § 20.21 are authorized to communicate with each other, with stations in the Amateur Radio Service, and with stations of the United States Government which are authorized by their controlling federal government agencies to communicate with stations in the Disaster Communications Service; and are further authorized to communicate with any station in any service licensed by the Federal Communications Commission whenever such station is authorized to communicate with stations in the Disaster Communications Service by the provisions of the Commission's rules governing the class of station concerned or in accordance with the provisions of § 2.405 of this chapter.

§ 20.23 *Limitations on use.* (a) Stations operating in the Disaster Communications Service are authorized to transmit and to receive only those types of communications set forth in § 20.24 for:

(1) Liaison purposes for the coordination of the activities of various local or larger mutual aid organizations, between established individual or network stations authorized to operate in other services and engaged in disaster communications on their own regularly assigned service frequencies; or

(2) Direct operation as a part of a disaster communications network established for the purpose of providing disaster communications for an organization or organizations having no other frequencies available or none satisfactory for the distances or locations to be covered.

(b) Stations operating in the Disaster Communications Service are authorized to retransmit, by automatic means, authorized disaster communications being transmitted by other stations of the same disaster communications network, and to originate and transmit, by automatic means, distinctive signals, on the scene of disaster frequency only, for the alerting of the disaster communications network and/or for the actuation of selective signaling, calling or alerting devices: *Provided*, That when such automatic transmission or retransmission is employed, such stations shall not emit radio-frequency energy except when actually transmitting authorized disaster communications.

(c) Nothing in this section shall be construed to prevent the operation of a station in the Disaster Communications Service for the purpose of brief tests or adjustments during or coincident with the installation, servicing or maintenance of such station: *Provided*, That the transmissions of that station during such tests or adjustments shall not cause harmful interference to the conduct of communications by any other station.

(d) A station in the Disaster Communications Service shall not be used to transmit or to receive messages for hire, nor for communications for material compensation, direct or indirect, paid or promised.

§ 20.24 *Permissible communications.* Stations in the Disaster Communications Service are authorized to transmit and to receive only the following types of disaster communications:

(a) Communications when there is no impending or actual disaster:

(1) Necessary drills and tests to insure the establishment and maintenance of efficient networks of stations in the Disaster Communications Service and other authorized services. These drills and tests may include the prearranged exchange of communications by stations of established networks with stations outside any established network where the purpose of such exchange is to provide training and practice in the establishment and maintenance of liaison and coordination between such networks and non-network stations. Such drills and tests shall not be permitted, in any way, to interfere with communications in connection with any actual or impending disaster or other such incident.

(b) Communications when there is an impending or actual disaster:

(1) Communications directly concerning:

(i) The activation of a disaster network, or

(ii) The establishment and maintenance of liaison and coordination between:

(*a*) The stations of one network and the stations of any other network, or

(*b*) Any network station and any non-network station of any agency possessed of its own system of radiocommunication which is actually engaged in averting or overcoming the effects of the disaster, or

(*c*) Any non-network station of one agency possessed of its own system of radiocommunication which is actually engaged in averting or overcoming the effects of the disaster and any non-network station of any other agency possessed of its own system of radiocommunication which is actually engaged in averting or overcoming the effects of the disaster.

(2) Communications directly concerning the conduct of service by an activated disaster network.

(3) Communications directly concerning safety of life, preservation of property, maintenance of law and order, and alleviation of human suffering and need by authorized government and relief agencies.

(4) Communications directly concerning the accumulation and dissemination of public information regarding safety of life, preservation of property, maintenance of law and order, or alleviation of human suffering and need by authorized government or relief agencies.

(5) Communications directly concerning the transaction of business essential to the public welfare.

(6) Communications concerning personal matters of individuals directly affected by the disaster.

(c) The order of priority of communications when there is an impending or actual disaster shall be as determined by the competent local authority activating the station or network, or his authorized representative.

§ 20.25 *Station identification*—(a) *Call signs.* Disaster stations licensed by the Commission will be assigned distinctive call signs, consisting of four letters and one digit, in accordance with the table of geographical assignment of call signs contained in § 2.303 of this chapter. Stations of the United States Government authorized to operate in the Disaster Communications Service will be assigned appropriate call signs by their cognizant United States Government agencies from the call signs available to such agencies.

(b) *Use of call signs*—(1) *Radiotelegraph.* When transmitting by radiotelegraphy, each disaster station shall transmit the call sign of the station being called followed by its own call sign at the beginning of each series of communications with the called station, at least once each fifteen minutes of such operation, and when terminating communications with the called station. One-way transmissions intended for several stations shall be identified in the same manner except that a general call may be used in place of the call signs of the several stations intended to receive the transmissions. Test transmissions of a station making adjustments shall be identified by the transmission of the station call sign at the beginning and end of the test period and at least each 30 seconds during such period.

(2) *Radiotelephone.* When transmitting by radiotelephony, each disaster station shall identify itself and the sta-

tion or stations being called in the same manner prescribed in this section for identification during radiotelegraph transmissions, except that, if there is no possibility of confusion, the name, location, or other designation of the station may be used in lieu of the call sign when that name, location, or other designation is the same as that of an associated station in some other service and is authorized to be used by such associated station when identifying itself on its regularly assigned frequencies.

(3) *Multiple units.* When two or more separate units of a station are operated at different locations, each unit shall separately identify itself by the addition of a unit name, number or other designation at the end of its call sign or other authorized means of identification. When transmitting by radiotelegraphy, such additional identification shall be separated from the call sign by use of the "slant" or fraction bar.

(4) *Additional identifications.* A list of all general or collective call signs, unit designators, and other authorized substitutes for or additions to assigned call signs used in each disaster station network shall be maintained at the control station of such network, and shall be made available for inspection upon reasonable request from any authorized representative of the federal government.

(c) *Automatic operation.* Stations which are entirely automatic in their operation, including automatic modulation of the carrier, shall be exempt from the requirements of paragraph (b) of this section.

§ 20.26 *Radio station log.* (a) The licensee of each radio station licensed in the Disaster Communications Service shall keep an accurate log of all operations in the 1750–1800 kc. band, which shall include the following:

(1) Name and address of the disaster station licensee, station call sign used in the disaster communications service, date of expiration of the disaster station license, and d. c. plate power input to the vacuum tube or tubes supplying energy to the transmitting antenna system. This information need be entered only once in the log unless there is a change in any of the above items. Each change shall be entered with the date the change is made.

(2) Date and time of beginning and end of each period during which the disaster station is operated.

(3) Signature of each licensed operator who manipulates the key of a manually operated radiotelegraph transmitter or the signature of each licensed operator who operates a transmitter using any other type of emission, and the name (or signature) of any person not holding an operator license who transmits by voice over the facilities of that station other than by automatic relay of the signal of another station or stations. The signature of the operator shall be entered with the date and time at both the beginning and the end of each period during which he is manning the controls of the disaster station and at least once on each page additional to the first page covering the period for which he is the responsible operator. The signature of any additional operator who operates the station during the regular watch of another operator shall be entered in the proper space for that additional operator's transmissions.

(4) Upon the completion of each period of operation for drill, training, liaison or test purposes and each period of operation in connection with an impending or actual disaster, there shall be entered in the log a summary of such operation describing its nature and giving pertinent details.

(5) There shall be no erasures, obliterations or destruction of any part of the disaster station log. Corrections shall be made by striking out erroneous portions and initialing and dating the correction.

(b) The current portion of the log of a licensed disaster station shall be kept at the location of the control position of such station. Other portions of the log shall be retained by the licensee for a period of at least one year, at such place as he may deem appropriate and advisable: *Provided,* That the log of a disaster station shall be made available for inspection upon reasonable request by any authorized representative of the federal government: *And provided further,* That those portions of any disaster station log covering operation of such station in connection with any actual disaster shall not be destroyed unless prior approval for such destruction shall have been received from the Commission.

(c) Stations which are entirely automatic in their operation, including automatic modulation of the carrier, shall be exempt from the requirements of paragraph (a) (2), (3) and (4) of this section, with respect to all operation of such stations which is adequately recorded in the log of any other station of the same disaster network.

SUBPART D—OPERATING REQUIREMENTS

§ 20.29 *Limitations on use of frequencies.* (a) The assigned frequencies in the band 1750–1800 kc are available to stations in this Service upon a shared basis with stations in the Industrial Radiolocation Service also assigned frequencies within that band: *Provided however,* That, except when transmitting in connection with an actual or imminent disaster in any area, stations in the Disaster Communications Service shall not cause harmful interference to stations in the Industrial Radiolocation Service between the times at New Orleans, Louisiana, of sunrise and sunset.[1] *And provided further,* That stations in the Industrial Radiolocation Service shall not cause harmful interference to stations in the Disaster Communications Service between the times at New Orleans, Louisiana, of sunset and sunrise,[1] or at any time during an actual or imminent disaster in any area.

(b) During the periods specified in paragraph (a) of this section when stations in the Disaster Communications Service shall not cause harmful interference to stations in the Industrial Radiolocation Service, the operation of a disaster station for the purpose of drills or tests shall not be permitted if the licensee of such station has reason to believe or has been informed that such operation might reasonably be expected to cause harmful interference to stations in the Industrial Radiolocation Service,[2] except by mutual agreement between the licensees in both Services through the channels of liaison prescribed in § 20.30.

§ 20.30 *Liaison with licensees in the Industrial Radiolocation Service.* To carry into effect the requirements of § 20.29, and of § 11.611 of this chapter, "Rules Governing Industrial Radio Services", including a positive means whereby operation in the Industrial Radiolocation Service can be suspended to protect stations in this Service against harmful interference during operation in connection with an actual or imminent disaster or during other hours when stations in this Service have priority on the use of frequencies in the 1750–1800 kc band, there shall be established an adequate and reliable system of notification and liaison between licensees in this Service and licensees in the Industrial Radiolocation Service. The extent and division of responsibility for various phases of the notification and liaison system shall be as follows:

(a) Organization and establishment of a system of liaison within the Industrial Radiolocation Service; the devising of a system for the receipt and distribution of notification information; and the installation, operation and maintenance of such a system shall be the responsibility of licensees in the Industrial Radiolocation Service authorized to operate in the band 1750–1800 kc.

(b) Organization and establishment of a system of liaison within the Disaster Communications Service; and the devising of a method for the dispatch of notification information to the person or persons designated by licensees in the Industrial Radiolocation Service shall be the responsibility of licensees in the Disaster Communications Service authorized to operate in the band 1750–1800 kc.

(c) The responsibility for the initiation of liaison between licensees in the Industrial Radiolocation Service and the licensees in the Disaster Communications Service shall be the responsibility of the former.

[1] The average times of sunrise (SR) and Sunset (SS) at New Orleans, Louisiana, based on Central Standard Time, are as follows:

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
SR	7:00	6:45	6:15	5:30	5:15	5:00	5:15	5:30	5:45	6:00	6:30	6:45
SS	5:15	5:45	6:15	6:30	6:45	7:00	7:00	6:45	6:00	5:30	5:00	5:00

[2] Stations in the Industrial Radiolocation Service are authorized to use frequencies in the 1750–1800 kc band under the condition, among others, that such use shall be limited to locations within 150 miles of the shoreline of the Gulf of Mexico.

(d) Once initiated, the maintenance, review and improvement of liaison between licensees in the two Services shall be the joint responsibility of both groups.

(e) Issuance of notification to suspend operation in the Industrial Radiolocation Service due to an impending or actual disaster shall be the responsibility of licensees in the Disaster Communications Service. Such notification shall be by those means which have been mutually agreed upon as sufficiently adequate, prompt and reliable to effectuate the purpose of this section. Any desired communication method or combination of methods may be utilized, and may be supplemented as necessary in case of failure of the agreed-upon method of notification.

(f) When stations in the Industrial Radiolocation Service have discontinued transmitting to protect disaster communications in connection with an imminent or actual disaster, and when the point has been reached where there is no reasonable possibility that radiolocation transmissions will cause harmful interference to the disaster communications, it shall be the responsibility of licensees in the Disaster Communications Service to communicate this information promptly to the licensees in the Industrial Radiolocation Service so that they may resume operation at will.

(g) The notification and liaison procedure hereby required to be established shall be limited to that geographical area within which there is a reasonable anticipation, determined by actual tests whenever practicable, that harmful interference may be caused by a licensee in the Industrial Radiolocation Service to licensees in the Disaster Communications Service.

§ 20.31 *Assigned frequencies and authorized emissions.* (a) The following frequencies in the frequency band 1750–1800 kc are assigned, on a nonexclusive basis, to all stations in the Disaster Communications Service. The selection and use of these frequencies shall be in accordance with a coordinated local area and adjacent area disaster communications plan [1] the specific types of emission herein indicated and the other applicable provisions of this part:

Channel No.	*Channel width*	*Assigned frequency*	*Authorized emission*
(1) Radiotelegraph channels			
1	1 kc.	1750.5 kc.	0.5 A1
2	1 kc.	1751.5 kc.	0.5 A1
3	1 kc.	1752.5 kc.	0.5 A1
4	1 kc.	1753.5 kc.	0.5 A1
5	1 kc.	1754.5 kc.	0.5 A1
6	1 kc.	1755.5 kc.	0.5 A1
7	1 kc.	1756.5 kc.	0.5 A1
8	1 kc.	1757.5 kc.	0.5 A1
(2) Scene of Disaster channel			
9	7 kc.	1761.5 kc.	0.5 A1, 2.5 A2, or 6 A3
(3) Radiotelephone channels			
10	7 kc.	1768.5 kc.	6 A3
11	7 kc.	1775.5 kc.	6 A3
12	7 kc.	1782.5 kc.	6 A3
13	7 kc.	1789.5 kc.	6 A3
14	7 kc.	1796.5 kc.	6 A3

(b) In the foregoing table, a figure specifying the maximum authorized bandwidth in kilocycles to be occupied by the emission is shown as a prefix to the authorized emission classification. The specified bandwidth shall contain those frequencies upon which a total of 99 percent of the radiated power appears, and shall include any discrete frequency upon which the power is at least 0.25 percent of the total radiated power. Any radiation in excess of the limits specified is considered to be an unauthorized emission.

(c) When an unauthorized emission results in harmful interference, the Commission may, in its discretion, require appropriate technical changes in equipment to alleviate the interference.

§ 20.32 *Transmitting power.* The transmitting equipment of a radio station in the Disaster Communications Service shall be adjusted in such a manner as to produce the minimum radiation necessary to carry out the communications desired when such station is operating in the frequency band 1750–1800 kilocycles. No station in the Disaster Communications Service shall be operated on these frequencies using a direct current plate power input to the vacuum tube or tubes supplying energy to the antenna in excess of 500 watts, except when operating on the scene of disaster frequency in accordance with the provisions of § 20.21 (c).

§ 20.33 *Equipment requirements.* (a) All stations in the Disaster Communications Service, except those intended only for the transmission of an automatic alarm or alerting signal, shall be capable of both transmitting and receiving on the scene of disaster frequency.

(b) The carrier frequency of each licensed station in the Disaster Communications Service shall be maintained within 0.015 percent of the assigned frequency.

(c) When the radio frequency carrier of a station in the Disaster Communications Service is amplitude modulated, such modulation shall not exceed 100 percent on negative peaks.

(d) The licensee of each station in the Disaster Communications Service which is utilized for the transmission of Type A–1 or Type A–3 emission shall use adequately filtered direct-current plate power supply for the transmitter to minimize modulation from that source.

§ 20.34 *Operator requirements.* (a) Except under the conditions specified in paragraph (d) of this section, one or more licensed radio operators of the class or grade specified in paragraph (b) of this section shall be on duty at the place where the transmitting apparatus of each licensed disaster station is located, or at the control position of such station if the control position is located at a place other than the location of the transmitting apparatus, and in actual charge thereof whenever it is being operated for the purpose of transmitting disaster communications, as defined in § 20.6, or is otherwise placed in a condition so as to produce radiation of radio frequency energy. No person shall manipulate the radiotelegraph key of a licensed disaster station for the purpose of manually transmitting radiotelegraph signals except under and in accordance with the authority of an operator license granting appropriate radiotelegraph operating privileges in accordance with the provisions of paragraph (b) of this section.

(b) Disaster stations licensed by the Federal Communications Commission may be operated, when properly transmitting in accordance with the provisions of this part, by the holders of:

(1) Any amateur radio operator license issued by the Federal Communications Commission which authorizes the holder thereof to operate an amateur radio station in the amateur segments of the 1800–2000 kc. frequency band; or

(2) Any commercial radio operator license issued by the Federal Communications Commission: *Provided,* That the holder of such commercial radio operator license shall perform or be responsible for only those operating duties and responsibilities at a disaster station which he is authorized, under the authority of such license, to perform or be responsible for at some other class of station licensed by the Commission when using the same type of emission and method of operation on a frequency or frequencies below 25 mc.

(c) When a station of the United States Government is authorized by the appropriate United States Government agency concerned to be operated in the Disaster Communications Service, the operator requirements for that station will be determined by the authorizing agency.

(d) Stations which are entirely automatic in their operation, including automatic modulation of the carrier, shall be exempt from the provisions of paragraph (a) of this section during the course of the normal rendition of the service of such stations: *Provided,* That all adjustments or tests during or coincident with the installation, servicing or maintenance of such stations shall be performed only by or under the immediate supervision and responsibility of a duly licensed operator whose license authorizes him to operate the station under those conditions in accordance with the provisions of paragraph (b) of this section: *And provided further,* That the station shall be so designed and installed as to be inaccessible to unauthorized personnel and incapable of any unauthorized transmission.

§ 20.35 *Availability of station and operator licenses.* (a) The original station license for a station in the Disaster Communications Service, or a photocopy thereof, shall be permanently attached to each transmitter of such station if the transmitter is readily accessible, or permanently posted at the control position of such station if the control position is located at a place other than the location of the transmitter.

[1] Duly designated civil defense officials will be considered competent local authority in the organization or operation of disaster communications radio networks and stations, and in the coordination of disaster communications plans.

(b) The original radio operator license or verification card (FCC Form No. 758–F) of the operator controlling the emissions of a licensed station in the Disaster Communications Service shall be carried on his person or kept immediately available at the place where he is operating the station.

(c) Whenever the original station license is not posted in accordance with the provisions of paragraph (a) of this section, or whenever the original operator license is not readily available at the place where the operator is on duty, such original license shall be made available for inspection upon reasonable request from any authorized representative of the federal government.

[F. R. Doc. 55–8295; Filed, Oct. 12, 1955; 8:48 a. m.]

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53921]

PART 1—CUSTOMS DISTRICTS AND PORTS

APPRAISER'S HEADQUARTERS TRANSFERRED

Effective November 1, 1955, the appraiser's headquarters in Customs Collection District No. 7 (St. Lawrence) shall be transferred from Ogdensburg, New York, to Rouses Point, New York.

Accordingly, § 1.6 of the Customs Regulations is amended by substituting "Rouses Point, N. Y." for "Ogdensburg, N. Y." in the column headed "Location of Headquarters" and substituting "Route 9–B" for "127 North Water St." in the column headed "Address of Appraiser of Merchandise" both opposite "St. Lawrence."

(R. S. 161, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 1624)

[SEAL] RALPH KELLY,
Commissioner of Customs.

Approved: October 5, 1955.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

[F. R. Doc. 55–8301; Filed, Oct. 12, 1955; 8:49 a. m.]

TITLE 6—AGRICULTURAL CREDIT

Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

Subchapter B—Loans, Purchases, and Other Operations

[1955 CCC Peanut Bulletin 721 (Peanuts–55)–1, Amdt. 2]

PART 446—PEANUTS

SUBPART—1955 CROP PEANUT PRICE SUPPORT PROGRAM

MINIMUM MOISTURE CONTENT

The regulations issued by Commodity Credit Corporation with respect to the 1955 crop peanut price support program (20 F. R. 5615) are amended by the addition of a provision establishing a minimum moisture content for peanuts eligible for price support.

The regulations in §§ 446.701 to 446.719, inclusive, are hereby amended by the addition of the following sentence at the end of § 446.707 (a): "Peanuts which have been mechanically dried must contain at least 5 percent moisture when received in the warehouse to be pledged as collateral for a loan to the cooperative or when placed under a farm storage loan, and must not show evidence of damage from the drying process, including (but not limited to) slippage of the skin."

(Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 101, 401, 63 Stat. 1051, 1054; sec. 201, 68 Stat. 899; 15 U. S. C. 714c, 7 U. S. C. 1441, 1421)

Issued this 7th day of October 1955.

[SEAL] EARL M. HUGHES,
Executive Vice President.
Commodity Credit Corporation.

TITLE 20—EMPLOYEES' BENEFITS

Chapter III—Bureau of Old-Age and Survivors Insurance, Social Security Administration, Department of Health, Education, and Welfare

[Regs. No. 4, further amended]

PART 404—FEDERAL OLD-AGE AND SURVIVORS INSURANCE (1950– ——)

LUMP-SUM DEATH PAYMENT; PERSONS EQUITABLY ENTITLED

Regulations No. 4, as amended (20 CFR, Cum. Supp., 404.1 et seq.), are further amended as follows:

1. Subparagraph (2) of § 404.340 (a) is amended by substituting a semicolon for the period at the end thereof.

2. Section 404.340 (a) is amended by adding at the end thereof a new subparagraph, designated as (3), to read as follows:

§ 404.340 *Lump-sum death payment; to persons equitably entitled.* (a) When payment is made to persons equitably entitled. • • •

(3) A home for the aged or sick exempt from the payment of taxes under section 501 (c) of the Internal Revenue Code of 1954, paying the expenses of, or furnishing goods and services in connection with, the burial of an inmate or guest, but only if the home was not under an express contractual obligation to pay, or provide, for such burial (see paragraph (b) (2) of this section).

3. The foregoing amendments shall be effective on the date filed with the FEDERAL REGISTER.

(Sec. 205, 49 Stat. 624, as amended, sec. 1102, 49 Stat. 647, sec. 218, 64 Stat. 514; 42 U. S. C. 405, 418, 1302. Interprets or applies sec. 202, 49 Stat. 623, as amended; 42 U. S. C. 402)

[SEAL] W. L. MITCHELL,
Acting Commissioner of Social Security.

Approved: October 7, 1955.

HEROLD C. HUNT,
Acting Secretary of Health, Education, and Welfare.

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR (1954) Parts 220, 221, 225]

PRODUCTION OF DISTILLED SPIRITS AND BRANDY; WAREHOUSING OF DISTILLED SPIRITS

NOTICE OF PROPOSED RULEMAKING

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth below in tentative form are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing, in duplicate, to the Director, Alcohol and Tobacco Tax Division, Internal Revenue Service, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U. S. C. 7805).

[SEAL] T. COLEMAN ANDREWS,
Commissioner of Internal Revenue.

In order to effect administrative decisions (a) by eliminating requirements for the weighing, prior to shipment, of packages transferred in sealed conveyances between internal revenue bonded warehouses and by transferring to proprietors the responsibility for weighing and recording the weights thereof of all packages transferred whether in sealed or unsealed conveyances, (b) by eliminating the requirement that packages be weighed prior to the dumping of spirits into tanks for gauging for either taxpayment or bottling in bond, (c) by providing for recoopering and repairing of packages under general supervision of an internal revenue officer, (d) by permitting taking of samples of spirits under general supervision of an internal revenue officer, (e) by transferring to warehousemen the responsibility for performing and recording certain original gauges of containers filled from storage tanks, (f) by modifying the requirements for the preparation of Form 52C, (g) by authorizing the storekeeper-gaugers to approve applications to change the kind of cooperage, (h) by providing that warehousemen shall furnish storekeeper-gaugers in charge with advance schedules of planned operations, (i) by authorizing the transfer of spirits by pipeline to the bottling-in-bond department for regauge therein, (j) by providing for affixing brand labels or State stamps to bottled spirits (bearing all mandatory information) after removal from the premises where the spirits were bottled, (k) by removing restrictions as to bottle sizes for bottled-in-bond spirits to be exported, (l) by requiring the warehouseman to prepare Form 1620 when spirits

are returned to the storage portion of the warehouse from the bottling-in-bond department, (m) by correcting discrepancies in Part 225 with respect to the preparation of Form 1520, the use of facsimile signature stamps on wholesale liquor dealer's stamps, and an incomplete cross reference, and (n) by modifying the degree of supervision to be exercised by internal revenue officers over various warehouse activities such as the transfer of spirits from one storage tank to another, transfer of spirits between warehouse buildings on the same premises, pipeline removals, filling of tank cars and tank trucks, and the transfer of rum for denaturation, 26 CFR (1954) Parts 220, 221, and 225 are amended as follows:

PARAGRAPH 1. 26 CFR (1954) Part 220, Production of Distilled Spirits, is amended as follows:

(A) Section 220.595 is amended by placing a period after the phrase "transferred in sealed conveyances" in the third sentence, which begins "If the applicant", and striking the remainder of the sentence.

(B) Section 220.611 is amended as follows:

(1) By changing the headnote to read: *"Certificate of removal."*.

(2) By inserting in the first sentence, immediately after the phrase "removal of the spirits", the phrase "in containers other than packages".

(3) By inserting immediately after the second sentence the following new sentence: "If the spirits are transferred in packages the distiller shall certify on all copies of Form 236 as to the accuracy of the description of the packages and the removal thereof, and if the spirits are contained in a conveyance sealed with Government cap seals the storekeeper-gauger will note on Form 236 the serial numbers of the cap seals used."

(4) By striking from the third sentence, which begins "He will retain", the word "He" and inserting in lieu thereof the words "The storekeeper-gauger".

(C) Section 220.612 is amended by placing a period after the phrase "transferred in sealed conveyances" in the third sentence, which begins "If the applicant", and striking the remainder of the sentence.

(D) Section 220.619 is amended as follows:

(1) By changing the headnote to read: *"Certificate of removal."*.

(2) By inserting in the first sentence, immediately after the phrase "removal of the spirits", the phrase "in containers other than packages".

(3) By inserting immediately after the second sentence the following new sentence: "If the spirits are transferred in packages the distiller shall certify on all copies of Form 236 as to the accuracy of the description of the packages and the removal thereof, and if the spirits are contained in a conveyance sealed with Government cap seals the storekeeper-gauger will note on Form 236 the serial numbers of the cap seals used."

(4) By striking from the third sentence, which begins "He will retain", the word "He" and inserting in lieu thereof the words "The storekeeper-gauger".

PAR. 2. 26 CFR (1954) Part 221, Production of Brandy, is amended as follows:

(A) Section 221.595 is amended by placing a period after the phrase "transferred in sealed conveyances" in the third sentence, which begins "If the applicant", and striking the remainder of the sentence.

(B) Section 221.611 is amended as follows:

(1) By changing the headnote to read: *"Certificate of removal."*.

(2) By inserting in the first sentence, immediately after the phrase "removal of the brandy", the phrase "in containers other than packages".

(3) By inserting immediately after the second sentence the following new sentence: "If the brandy is transferred in packages the distiller shall certify on all copies of Form 236 as to the accuracy of the description of the packages and the removal thereof, and if the brandy is contained in a conveyance sealed with Government cap seals the storekeeper-gauger will note on Form 236 the serial numbers of the cap seals used."

(4) By striking from the third sentence, which begins "He will retain", the word "He" and inserting in lieu thereof the words "The storekeeper-gauger".

(C) Section 221.612 is amended by placing a period after the phrase "transferred in sealed conveyances" in the third sentence, which begins "If the applicant", and striking the remainder of the sentence.

(D) Section 221.619 is amended as follows:

(1) By changing the headnote to read: *"Certificate of removal."*.

(2) By inserting in the first sentence, immediately after the phrase "removal of the brandy", the phrase "in containers other than packages".

(3) By inserting immediately after the second sentence the following new sentence: "If the brandy is transferred in packages the distiller shall certify on all copies of Form 236 as to the accuracy of the description of the packages and the removal thereof, and if the brandy is contained in a conveyance sealed with Government cap seals the storekeeper-gauger will note on Form 236 the serial numbers of the cap seals used."

(4) By striking from the third sentence, which begins "He will retain", the word "He" and inserting in lieu thereof the words "The storekeeper-gauger".

PAR. 2. 26 CFR (1954) Part 225, Warehousing of Distilled Spirits, is amended as follows:

(A) Section 225.244 is amended as follows:

(1) By changing the headnote to read: *"Reports."*.

(2) By striking from the first sentence the phrase "complete Form 52C and".

(3) By striking from the first sentence the phrase "on such form" and inserting in lieu thereof "on Form 52C prepared".

(B) By inserting a new section, reading as follows, immediately after § 225.351:

§ 225.351a *Proprietor's schedule of operations.* The proprietor shall furnish daily to the storekeeper-gauger in charge a schedule of operations for the next succeeding work day. This schedule shall show activities which would require the immediate supervision or attention of a storekeeper-gauger, such as, the approximate number of containers of spirits to be received and withdrawn (identify kinds of withdrawals), the quantity of spirits to be bottled in bond, bulk regauge and taxpayment operations, the time and approximate number of packages to be recoopered, number and quantity of samples to be taken, number of containers to be filled from storage tanks or consolidation tanks, and repairs which will involve the breaking or replacing of seals or the manipulation of Government locks.

(C) Section 225.353 is amended by inserting in the first sentence, immediately after the phrase "equipped for locking", the parenthetical phrase "(if required by this part)".

(D) Section 225.358 is amended to read as follows:

§ 225.358 *Supervision of operations.* In all instances where immediate supervision by the storekeeper-gauger of any operation is not required by this part the storekeeper-gauger shall, from time to time, make spot checks of the operations being conducted by the warehouseman to satisfy himself of the propriety of the operation. Where the storekeeper-gauger finds significant discrepancies in entries or records made by the warehouseman, the marks or brands required to be placed on any container, or finds any operation being conducted contrary to the provisions of this part, the warehouseman shall take such corrective action as may be required by the storekeeper-gauger.

(68A Stat. 644; 26 U. S. C. 5241)

(E) By inserting a new section, reading as follows, immediately after § 225.358:

§ 225.358a *Inspection of packages in storage.* The assistant regional commissioner will, from time to time, assign internal revenue officers for the purpose of inspecting packages of distilled spirits to determine the extent of tampering or losses through theft.

(F) Section 225.378 is amended by striking from the last sentence the word "immediate".

(G) Section 225.380 is amended as follows:

(1) By striking the word "storekeeper-gauger" in the two places it appears in the first sentence and inserting in lieu thereof in each instance the word "warehouseman".

(2) By striking in the first sentence the phrase "immediate vicinity so the transfer" and inserting in lieu thereof the phrase "immediate vicinity and so located that the transfer".

(3) By inserting immediately after the first sentence the following new sentences: "If weighing is not required the warehouseman may elect to weigh the packages and enter the receiving gross weights on Form 1520 or 1619. When conveyances are received upon which the Government cap seals are not intact, or if packages bear evidence of damage in transit, the warehouseman

will weigh each package under the supervision of the storekeeper-gauger. The warehouseman shall report the receipt of packages in unsealed conveyances to the storekeeper-gauger who shall inspect such packages and supervise the weighing thereof."

(H) Section 225.381 is amended to read as follows:

§ 225.381 *Examination of packages.* Where packages of spirits are received bearing evidence of having sustained unusual losses in transit, or where material discrepancies are found by the comparison of the shipping weight with the receiving weight, the storekeeper-gauger will (a) examine the condition of the cooperage of each such package and (b) gauge each such package and enter the details thereof in the appropriate columns on Form 1520 or 1619, as the case may be, and in the loss column enter the difference in weight between the amount shipped and the amount received. The storekeeper-gauger will note on the reverse of the Form 1520 or 1619 the condition of the cooperage and whether in his opinion the loss was occasioned by theft, accident, or other determinable cause. In the event the loss sustained from any package appears to have been the result of theft, such package will be detained and a report made to the assistant regional commissioner in accordance with § 225.486.

(68A Stat. 604; 26 U. S. C. 5011)

(I) Section 225.406 is amended to read as follows:

§ 225.406 *Facilities for recoopering.* The proprietor shall provide a suitable enclosed area, in which the repair or recoopering of all packages, involving exposure of spirits, shall be conducted. The proprietor shall lock the enclosure when spirits are exposed therein unless the employee responsible for recoopering activities is present: *Provided,* That locking of the enclosure is not required if the spirits have been deposited in locked containers. The facilities to be used must be so arranged and the work so performed that supervision by storekeeper-gaugers can be performed readily and expeditiously and unnecessary loss or wastage of spirits or unauthorized commingling will be prevented.

(68A Stat. 633, 634, 643; 26 U. S. C. 5193, 5194, 5231)

(J) Section 225.407 is amended to read as follows:

§ 225.407 *Gauging.* Distilled spirits may be drawn into packages from storage tanks in accordance with this part. If the distilled spirits in the tank are found to be other than a whole degree of proof, adjustment to a whole degree shall be made by the proprietor before withdrawal into packages: *Provided,* That such adjustment will not be required when the packages are to be regauged prior to taxpayment. Where the proof is not adjusted to a whole degree, it shall be determined to the nearest tenth and rounded to a whole degree in accordance with Part 186 of this title and so recorded. Each package will be carefully gauged by the warehouseman, under the general supervision of the storekeeper-gauger, and the details thereof will be entered by the warehouseman on Form 1520: *Provided,* That where the warehouseman has indicated that packages are to be taxpaid on the original gauge the storekeeper-gauger shall make such gauge and report the details thereof on Form 1520, noting thereon, "Taxpay on original gauge". Any cask or package which contains or has on its interior or exterior any substance that will prevent the correct ascertainment of tare shall not be used. The tare of the empty package will be determined and will be marked on the package and recorded on Form 1520. Weights shall be determined in pounds and one-half pounds.

(68A Stat. 633, 634; 26 U. S. C. 5193, 5194)

(K) Section 225.408 is amended by striking from the second sentence the word "immediate."

(L) Section 225.409 is amended by striking from the fifth sentence, which begins "All marking", the word "immediate".

(M) Section 225.410 is amended by changing the first sentence to read: "The date of original entry for deposit and the proof of distillation of the spirits shall be noted on each copy of Form 1520."

(N) Section 225.413 is amended by changing the third sentence, which begins "The storekeeper-gauger", to read: "The tare of the new package will be determined and will be marked on the package before transfer of the spirits."

(O) Section 225.414 is amended by striking the word "immediate".

(P) Section 225.415 is amended as follows:

(1) By striking the words "assistant regional commissioner" and inserting in lieu thereof the word "storekeeper-gauger".

(2) By placing a period after the phrase "spirits are stored" and striking the remainder of the sentence.

(Q) Section 225.416 is amended to read as follows:

§ 225.416 *Request to storekeeper-gauger.* The request for permission to change the kind of cooperage must give the serial number of the package or packages, kind of original cooperage, kind of cooperage desired to be used, name of the distiller, registered number and location (city or town, and State) of the distillery at which the spirits were produced and the reason why the change is desired. Storekeeper-gaugers in charge may approve the request when internal revenue officers are available for necessary supervision.

(R) Section 225.417 is amended to read as follows:

§ 225.417 *Marking new packages.* Each new package will be given the same serial number, marks, and brands (except the tare and kind of cooperage) as the original package, and will contain only spirits from one package. The tare of the new package will be determined and will be marked on the new package before the transfer, and upon completion of the transfer the proprietor will prepare and sign a label to be affixed to the head of each new package in the manner prescribed in this part for the affixing of wholesale liquor dealer's stamps. The label shall be in the following form:

The spirits contained in this package, serial No. ——, were transferred to new ———— barrel under date of
(Kind of cooperage)
———— by authority of letter dated ———— The package from which the spirits herein were transferred was a ———— barrel.
(Kind of cooperage)
————
(Proprietor)

When such a change of package is made, the storekeeper-gauger will note the tare of the new package on Form 1520 or Form 1619 covering deposit of the spirits. If the new package should be transferred in bond the proprietor will make a notation on the transfer Form 1619 showing the date of the change of package and the tare of the new package.

(S) Section 225.433 is amended by striking from the first sentence the phrase "and the spirits shall be transferred under the supervision of the storekeeper-gauger" and inserting in lieu thereof the phrase "and may then effect the transfer".

(T) Section 225.485 is amended by striking the fifth sentence, which begins "A similar application".

(U) By inserting a new section, reading as follows, immediately after § 225.485:

§ 225.485a *Losses determined at time of recoopering.* Where the warehouseman determines at the time of recoopering that a package has sustained an unusual loss, and a report and determination of the loss is not required by the provisions of § 225.485, he shall make a report of gauge on Form 1698. A copy of the form will be securely attached to the package and two copies will be delivered to the storekeeper-gauger. When Form 1698 is prepared by the warehouseman for any package the new gross weight, date, and the serial number of the Form 1698 will be noted by the storekeeper-gauger on the deposit form.

(68A Stat. 604; 26 U. S. C. 5011)

(V) Section 225.536 is amended as follows:

(1) By inserting immediately after the word "removed" in item (d) the following phrase: "and specific information as to the location of the package or packages in the warehouse".

(2) By striking immediately before item (k) the word "and".

(3) By changing the period at the end of the last sentence to a comma and adding the following: "and (l) the approximate time the samples will be taken.".

(W) Section 225.537 is amended by striking from the last sentence the phrase "(j) and (k)" and inserting in lieu thereof the phrase "and (j) through (l)".

(X) Section 225.540 is amended to read as follows:

§ 225.540 *Removal under supervision.* The removal of samples will be subject to the supervision of the storekeeper-gauger.

(68A Stat. 667; 26 U. S. C. 5373)

(Y) Section 225.541 is amended as follows:

(1) By changing the period at the end of the third sentence, which begins "The proprietor" to a semicolon and adding the following: "(i) the words "Subject to taxpayment" where the label is to be placed upon a sample taken subject to payment of tax."

(2) By changing the fourth and fifth sentences, which begin "Upon completion," and "Where the label", respectively, to read: "Such label and copy shall be signed and dated by the employee responsible for taking the sample and immediately above the signature there will appear the following statement: 'I certify that this sample was taken in the quantity and from the package described above and from no other package.' The employee shall affix the label to the sample container and give the copy to the storekeeper-gauger."

(Z) Section 225.542 is amended by striking from the last sentence the phrase "At the time of preparing Form 1520 or Form 1619 covering the" and inserting in lieu thereof the word "Upon".

(AA) Section 225.562 is amended as follows:

(1) By striking from the first sentence the words "to be".

(2) By striking the last sentence.

(BB) Section 225.563 is amended to read as follows:

§ 225.563 *Preparation of withdrawal reports by storekeeper-gauger.* When spirits are withdrawn from a storage tank in an internal revenue bonded warehouse into packages which are to be taxpaid on the original gauge, or when spirits are removed by pipeline or in tank cars or tank trucks, the storekeeper-gauger will prepare and complete the Form 1520 in accordence with the instructions in this part.

(68A Stat. 639, 649; 26 U. S. C. 5215, 5250)

(CC) Section 225.565 is amended to read as follows:

§ 225.565 *Withdrawal on original gauge.* Distilled spirits in packages, tank cars, or tank trucks may be withdrawn from an internal revenue bonded warehouse on the original gauge if such gauge was made by a storekeeper-gauger. Where the gauge was made pursuant to notification from the distiller or warehouseman, as the case may be, that the spirits would be taxpaid on the original gauge, and the deposit forms for such spirits bear the notification "Taxpay on the original gauge"; the spirits must be taxpaid on the original gauge unless permission for a regauge is first obtained from the assistant regional commissioner.

(68A Stat. 647; 26 U. S. C. 5245)

(DD) Section 225.571 is amended to read as follows:

§ 225.571 *Weighing packages.* During the process of weighing, care will be taken to note the correct reading of the scale to the half pound and in case of doubt as to which graduation shall apply, the graduation denoting the lesser weight will prevail.

(68A Stat. 639; 26 U. S. C. 5212)

(EE) Section 225.572 is amended by striking the first and second sentences and inserting in lieu thereof the following new sentences: "The proof of spirits shall be determined in accordance with the instructions set forth in the Gauging Manual (Part 186 of this title). The storekeeper-gauger shall determine, or verify, as the case may be, the proof of all spirits gauged."

(FF) Section 225.573 is revoked.

(GG) Section 225.576 is amended by striking the second sentence, which begins "The spirits", and inserting in lieu thereof the following new sentence: "The spirits will be carefully gauged and the details entered on the report of gauge as provided in this part."

(HH) Section 225.580 is amended to read as follows:

§ 225.580 *Pipeline removals.* Pipelines used for the transfer of spirits to qualified establishments on the same or contiguous premises, or to tank cars or tank trucks for shipment, must conform to the requirements of § 225.124, except that the spirits may be transferred into or from a tank car or tank truck by means of a hose connection where the operation can be under the observation of an internal revenue officer. The valves on such pipelines shall be kept closed and locked, except during the transfer of spirits, which transfer shall be under the supervision of an internal revenue officer.

(68A Stat. 599, 634, 636; 26 U. S. C. 5006, 5194, 5195)

(II) Section 225.586 is amended to read as follows:

§ 225.586 *Proprietor's monthly report, Form 52C.* The proprietor of every internal revenue bonded warehouse shall render a monthly report of spirits removed from the warehouse on Form 52C, as provided in Subpart VV of this part.

(68A Stat. 637; 26 U. S. C. 5197)

(JJ) Section 225.590 is amended as follows:

(1) By inserting in the first sentence, immediately after the words "will be determined", the phrase ", under the supervision of the storekeeper-gauger,".

(2) By striking the second sentence, which begins "The storekeeper-gauger".

(KK) Section 225.601 is amended by striking from the third sentence, which begins "If the", the words "entered in columns 11 and 12" and inserting in lieu thereof the words "shown on Form 1520".

(LL) Section 225.630 is amended as follows:

(1) By changing the comma following the phrase "stated on Form 179" in the second sentence, which begins "Where the spirits", to a period and striking the remainder of the sentence.

(2) By striking from the fourth sentence, which begins "Where the capacity", the phrase "a separate Form 1520 must be prepared for each such gauging tank listing the packages to be gauged therein, and".

(3) By striking from the last sentence the phrase "in accordance with §§ 225.632 to 225.636".

(MM) Section 225.632 is amended as follows:

(1) By changing the first sentence to read as follows: "If the spirits to be withdrawn are in packages, the storekeeper-gauger, upon receipt of the Form 179, will carefully examine each package and will verify the identity of the spirits."

(2) By inserting immediately after the second sentence, which begins "Where it is", the following new sentence: "The storekeeper-gauger will satisfy himself that each package which does not bear such evidence has been dumped into the gauging tank."

(3) By changing the tenth sentence, which begins "The spirits in", to read as follows: "The spirits in the gauging tank will be gauged with an official hydrometer and the details of the gauge and the number of the gauging tank shall be entered by the storekeeper-gauger on Form 1520, in quintuplicate."

(4) By inserting immediately after the tenth sentence the following new sentence: "A separate Form 1520 must be prepared by the storekeeper-gauger for each gauging tank."

(NN) Section 225.637 is amended by striking from the second sentence, which begins "The removal of", the word "immediate".

(OO) Section 225.675 is amended by placing a period after the phrase "provisions of §§ 225.642 and 225.643" in the first sentence and striking the remainder of the sentence.

(PP) Section 225.732 is amended as follows:

(1) By inserting in the first sentence immediately after the words "weighing of spirits" the words "prior to transfer or".

(2) By inserting in the third sentence, which begins "If the conveyance", immediately after the words "packages at the" the words "consignor and".

(QQ) Section 225.733 is amended by placing a period after the phrase "transferred in sealed conveyances" in the third sentence, which begins "If the applicant", and striking the remainder of the sentence.

(RR) Section 225.735 is amended to read as follows:

§ 225.735 *Transfers in packages.* When the proprietor of the shipping warehouse desires to make shipment of spirits in packages, he will prepare an original and five copies of Form 1619 filling in the heading and giving details as to serial numbers, date of original entry for deposit, original gauge and last gauge (if other than the original) and will identify any packages designated to be taxpaid on the original gauge by the notation "Taxpay on original gauge". In the case of blended brandies the proprietor shall also show on Form 1619 the date and serial number of the Form 1685 covering the blending of the brandies, the date of the original entry of the oldest brandy in the blend and the date of the original entry of the youngest brandy in the blend. The proprietor shall execute on the six copies of Form 236 a description of the packages to be transferred. If the proprietor elects to ship the packages in a Government-

sealed conveyance when the consignee-warehouseman has not previously requested a sealed conveyance as provided by § 225.733, he should indicate on Form 236 that the packages are to be transferred in sealed conveyances; otherwise the proprietor should indicate that the packages are to be shipped in unsealed conveyances. The weighing of packages is not required where the spirits are transferred in conveyances sealed with Government cap seals, or where the spirits are to be transferred to an internal revenue bonded warehouse operated by the consignor or an affiliate or subsidiary of the consignor in the immediate vicinity and so located that the transfer can be under observation by internal revenue officers; however, if the warehouseman elects to weigh such packages he will enter the shipping gross weights on Form 1619. Where packages are to be shipped in conveyances not sealed with Government cap seals the warehouseman will examine and weigh each package under the supervision of the storekeeper-gauger and enter the shipping gross weight on Form 1619. Where it is determined by the warehouseman or the storekeeper-gauger that any package bears evidence of unusual loss that cannot be satisfactorily explained, or of tampering, such package will be detained pending further investigation in accordance with the applicable provisions of §§ 225.480 to 225.495. Where a damaged package which has sustained an unusual loss from obvious cause other than theft or unauthorized voluntary destruction is found upon preparation for transfer, the package will be weighed and proofed and the apparent cause noted on Form 1619 in accordance with the applicable provisions of § 225.485. The quantity to be transferred shall not exceed the maximum stated in the application. Upon withdrawal for transfer to noncontiguous premises, the word "Transferred" followed by the date of transfer, the number of the receiving warehouse, and the State in which such warehouse is located, will be plainly and durably stenciled on the Government head of the package in letters and figures not less than one-half inch in height. These marks may be abbreviated as follows:

TRANS. 8–1–54.
I. R. B. W. 4–N. Y.

Upon completion of the lading of the packages and the preparation of Forms 236 and 1619 the proprietor will deliver all copies of each form to the storekeeper-gauger. Forms 236 and 1619 will be disposed of in accordance with the provisions of § 225.750.

(68A Stat. 606, 647; 26 U. S. C. 5023, 5246)

(SS) Section 225.738 is amended as follows:

(1) By changing the first sentence to read as follows: "When the proprietor desires to transfer spirits in packages, tank cars, or tank trucks, to be filled from warehouse storage tanks, he will deliver a copy of Form 236 with a complete description of the spirits to the storekeeper-gauger in charge of the warehouse."

(2) By changing the third sentence, which begins "The storekeeper-gauger", to read: "The proof at which the spirits were distilled shall be noted on the original and five copies of Form 1520 covering the report of gauge."

(3) By inserting in the fourth sentence, which begins "The quantity", immediately after the words "six copies of Form 1520", the parenthetical phrase "(except when Form 1520 was prepared by the proprietor as provided in § 225.407)".

(TT) Section 225.747 is amended as follows:

(1) By striking the first and second sentences and inserting in lieu thereof the following new sentence: "Tank cars or tank trucks will be filled under the supervision of the storekeeper-gauger."

(2) By striking the fourth sentence, which begins "The officer" and inserting in lieu thereof the following new sentence: "The officer will enter, for each compartment of the conveyance, on Form 1520 (covering the gauge of the spirits) the level of the spirits above or below the full mark, and the temperature of the spirits at filling, for example: 'Filled two inches above full mark at 80° F.'"

(UU) Section 225.750 is amended as follows:

(1) By changing the headnote to read: *"Certificate of removal."*

(2) By inserting in the first sentence immediately after the words "of the spirits" the phrase "in containers other than packages".

(3) By inserting immediately after the first sentence the following new sentence: "If spirits are transferred in packages the warehouseman shall certify on all copies of Form 236 as to the accuracy of the description of the packages and the removal thereof, and if the spirits are contained in a conveyance sealed with Government cap seals the storekeeper-gauger will note on Form 236 the serial numbers of the cap seals used."

(VV) Section 225.751 is amended as follows:

(1) By changing the headnote to read: *"Receipt of spirits at warehouse."*.

(2) By striking the first three sentences and inserting in lieu thereof the following new sentences: "Upon receipt of the spirits at the receiving warehouse, losses or discrepancies will be ascertained and noted on Form 1520, 1619, or 1620, as the case may be, as provided in §§ 225.381, 225.382, and 225.384. The warehouseman will examine and weigh packages of spirits as provided in § 225.380 and will execute the certificate of receipt and deposit on Form 236. If the spirits are contained in a conveyance sealed with Government cap seals the storekeeper-gauger will indicate on all copies of Form 236 whether the conveyance was received with the seals intact and if the spirits are received in containers other than packages will execute the certificate of receipt and deposit."

(WW) Section 225.752 is amended by placing a period after the phrase "transferred in sealed conveyances" in the third sentence, which begins "If the applicant", and striking the remainder of the sentence.

(XX) Section 225.755 is amended as follows:

(1) By changing the headnote to read: *"Certificate of removal."*.

(2) By inserting in the first sentence immediately after the words "of the spirits" the phrase "in containers other than packages".

(3) By inserting immediately after the first sentence the following new sentence: "If spirits are transferred in packages the warehouseman shall certify on all copies of Form 236 as to the accuracy of the description of the packages and the removal thereof, and if the spirits are contained in a conveyance sealed with Government cap seals the storekeeper-gauger will note on Form 236 the serial numbers of the cap seals used."

(YY) Section 225.756 is amended as follows:

(1) By changing the headnote to read: *"Receipt of spirits at warehouse."*.

(2) By striking the first three sentences and inserting in lieu thereof the following new sentences: "Upon receipt of the spirits at the receiving warehouse, losses or discrepancies will be ascertained and noted on Form 1520, 1619, or 1620, as the case may be, as provided in §§ 225.381, 225.382, and 225.384. The warehouseman will examine and weigh packages of spirits as provided in § 225.380 and will execute the certificate of receipt and deposit on Form 236. If the spirits are contained in a conveyance sealed with Government cap seals the storekeeper-gauger will indicate on all copies of Form 236 whether the conveyance was received with the seals intact and if the spirits are received in containers other than packages will execute the certificate of receipt and deposit."

(ZZ) Section 225.935 is amended by striking from the first sentence the word "immediate".

(AAA) Section 225.951 is amended as follows:

(1) By changing the comma following the word "quadruplicate" in the first sentence to a period and striking the remainder of the sentence.

(2) By changing the second sentence, which begins "Upon receipt", to read: "Upon receipt of the application the storekeeper-gauger will satisfy himself that the spirits are eligible for bottling in bond and will inspect the packages."

(3) By striking from the fifth sentence, which begins "The packages", the words "and weighed".

(4) By striking the last sentence.

(BBB) Section 225.952 is amended to read as follows:

§ 225.952 *Gauge.* Packages of distilled spirits to be bottled in bond may be (a) dumped and gauged in the storage portion of the warehouse, (b) dumped in the storage portion of the warehouse and transferred to the bottling-in-bond department for gauging, or (c) removed to the bottling-in-bond department, dumped, and gauged. If the spirits are to be gauged and transferred to the bottling-in-bond department by pipeline, the packages will be dumped in the bulk gauge tank in the warehouse. The storekeeper-gauger will make his gauge of the spirits, report the details thereof on Form 1520, in triplicate, and complete his report on Form 1515. The storekeeper-gauger will also enter on Form 1520 the number of the gauging tank. If the spirits are to be removed in packages to the bottling-in-bond department or are to be gauged after receipt by pipeline in the bottling-in-bond department, the storekeeper-gauger in the warehouse will complete his certificate of removal for bottling on Form 1515. When the spirits have been released for transfer to a bottling-in-bond department, all copies of the application and the Form 1520, if gauged in a warehouse gauging tank, will be furnished to the storekeeper-gauger assigned to the bottling-in-bond department in order that such officer may inspect the spirits prior to the bottling thereof. If the spirits are received in the bottling-in-bond department in packages, they will be dumped for bulk gauging in dumping and reducing or in bottling tanks. Where the spirits are transferred to the bottling-in-bond department by pipeline prior to gauging they will be deposited in dumping and reducing or in bottling tanks. The storekeeper-gauger will make his gauge, either by weight or by volume, and will report the gauge on Forms 1520 and 1515 in the same manner as if the spirits had been gauged in the warehouse. He will at that time return the original of the Form 1520 to the storekeeper-gauger in charge of the warehouse. When the bottling is completed, the storekeeper-gauger will enter the details of the cases on Form 1515, forward one copy, with the Form 1520 attached, to the assistant regional commissioner, deliver one copy of each form to the proprietor, return one copy of Form 1515 to the storekeeper-gauger in charge of the warehouse, and file the remaining copy of Form 1515 in the bottling-in-bond department. Spirits taxpaid from the bottling department shall be considered as constructively returned to the storage portion of the warehouse. The storekeeper-gauger shall account for, as deposited, on Forms 1621 and 1513, all spirits bottled. Prior to the removal of cases of distilled spirits from the bottling-in-bond department, the proprietor will prepare Form 1620, in triplicate, and submit it to the storekeeper-gauger for signature. One copy of the form will be forwarded to the assistant regional commissioner, one copy will be given to the warehouseman, and the remaining copy will be filed as a permanent record as provided in § 225.1102.

(68A Stat. 645; 26 U. S. C. 5243)

(CCC) Section 225.953 is amended by striking the period at the end of the second sentence and all of the third sentence, which begins "The proprietor", and inserting in lieu thereof the following: "and deliver all copies to the storekeeper-gauger in charge of the warehouse.".

(DDD) Section 225.954 is amended as follows:

(1) By changing the first sentence to read: "Upon receipt of Form 1515 the storekeeper-gauger will examine the application and request for gauge."

(2) By striking from the last sentence the words "no discrepancies are found in the Form 1520 and".

(EEE) Section 225.955 is amended by changing the fifth sentence, which begins "Prior to", to read: "Prior to the removal of cases of spirits from the bottling-in-bond department, the proprietor will prepare Form 1620, in triplicate, and submit it to the storekeeper-gauger for signature."

(FFF) Section 225.960 is amended by inserting in the first sentence immediately after the words "tank for bottling in bond" the phrase "or which have been dumped in the warehouse but are to be gauged in the bottling-in-bond department".

(GGG) Section 225.966 is amended by striking from the first sentence the word "immediate".

(HHH) Section 225.972 is amended by striking from the last sentence the word "immediate".

(III) Section 225.974 is amended as follows:

(1) By inserting in the proviso of the first sentence, immediately after the phrase "brand labels or State stamps", the phrase "or the transfer in bond to another internal revenue bonded warehouse where brand labels or State stamps will be affixed".

(2) By inserting in the proviso of the third sentence, immediately after the phrase "provided in this section", the phrase "unless the cases are to be transferred to another internal revenue bonded warehouse prior to the affixing of the brand labels or State stamps,".

(3) By striking the last sentence and inserting in lieu thereof the following new sentences: "When spirits in cases temporarily sealed are returned to the bottling-in-bond department or are transferred in bond to another internal revenue bonded warehouse they must be kept apart from other spirits in the bottling-in-bond department until the work of attaching the brand label, or State stamp, or both, and permanent sealing of the cases has been completed; where the consignee warehouse does not have a bottling-in-bond department the assistant regional commissioner may authorize the labeling where space and facilities for such activities are available. The brand label to be affixed by the consignee warehouseman must be covered by an appropriate certificate of label approval or a certificate of exemption from label approval issued under the Federal Alcohol Administration Act."

(JJJ) Section 225.985 is amended by striking the first and second sentences and inserting in lieu thereof the following new sentence: "Distilled spirits shall be bottled in bond for export in bottles containing less than 5 wine gallons."

(KKK) Section 225.997 is amended by striking the word "quintuplicate" and inserting in lieu thereof the word "quadruplicate".

(LLL) Section 225.1016 is revoked.

(MMM) Section 225.1046 is amended as follows:

(1) By striking from the first sentence the words "and in no other".

(2) By inserting immediately after the first sentence the following new sentence: "When bottles containing spirits are of sizes for which stamps in the exact denominations are not provided, the warehouseman will use stamps of the denomination nearest the actual quantity of spirits contained in the bottles, and will strike out the original denomination and print or write on the stamps the exact quantity of spirits contained in the bottles."

(NNN) Section 225.1103 is amended by changing the first sentence to read as follows: "When spirits are to be withdrawn, the storekeeper-gauger shall, upon presentation of the proper withdrawal form by the proprietor, secure from his file the Form 1520, 1619, or 1620, covering the deposit of the spirits, including blended brandy returned to the storage portion of the warehouse from the brandy-blending department, or spirits contained in consolidated packages, and except for packages transferred in bond shall verify the details of the entry gauge transcribed to the withdrawal form."

(OOO) Section 225.1120 is amended to read as follows:

§ 225.1120 *Record and report of removals from warehouse.* Every proprietor of an internal revenue bonded warehouse shall file with the assistant regional commissioner a monthly report, on Form 52C, of the total quantities of bulk and bottled-in-bond distilled spirits removed from the internal revenue bonded warehouse during the month, not later than the 10th day of the month succeeding that for which rendered. Every proprietor shall prepare a commercial record covering the physical removal of each lot of taxpaid distilled spirits which shall show (a) name and address of consignee, (b) date of removal, (c) kind of spirits, (d) name and registry number of the distiller, (e) number of packages and cases, (f) quantity of spirits (tax gallons), and (g) serial numbers of the cases or packages, unless serial numbers are shown on commercial papers attached thereto. Taxpaid removals of spirits shall be entered in commercial records before the close of the business day next succeeding the day on which the transactions occur. Form 52C will be provided by the proprietor at his own expense and shall, together with the commercial records, if any, be preserved on the premises of the warehouse for 2 years, and during such period shall be available, during business hours, for inspection and the taking of abstracts therefrom by internal revenue officers.

(68A Stat. 619, 637; 26 U. S. C. 5114, 5197)

[F. R. Doc. 55–8300; Filed, Oct. 12, 1955; 8:49 a. m.]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 908]

[Docket No. AO–243]

HANDLING OF MILK IN CENTRAL ARKANSAS MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of

1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Little Rock, Arkansas, on January 4–12, 1955, pursuant to notice thereof which was issued December 15, 1954 (19 F. R. 8709), upon a proposed marketing agreement and order regulating the handling of milk in the Central Arkansas marketing area.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Agricultural Marketing Service, on July 15, 1955, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision. Said decision containing notice of opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on July 20, 1955 (20 F. R. 5166).

Within the period reserved therefor, interested parties filed exceptions to certain of the findings, conclusions and actions recommended by the Deputy Administrator. In arriving at the findings, conclusions, and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that findings, conclusions and actions decided upon herein are at variance with any of the exceptions, such exceptions are overruled.

To the extent that suggested findings and conclusions proposed by interested persons are inconsistent with the findings and conclusions contained herein, the specific or implied requests to make such findings and reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions herein set forth.

The material issues of record related to:

1. Whether the handling of milk produced for sale in the proposed marketing area is in the current of interstate commerce or directly burdens, obstructs or affects interstate commerce in milk or its products;

2. Whether marketing conditions justify the issuance of a milk marketing agreement or order;

3. If an order is issued what its provisions should be with respect to:

(a) The scope of regulation;

(b) The classification and allocation of milk;

(c) The determination and level of class prices;

(d) Distribution of proceeds to producers; and

(e) Administrative provisions.

The hearing notice included proposals to include as part of the marketing area the counties of Howard, Sevier, Hempstead, Miller, Lafayette, Columbia, and Ouachita in Arkansas and Bowie in Texas. The record evidence indicates that marketing conditions in the aforementioned counties are not similar to the extent that it would be advisable to include them under an order with the Central Arkansas area. Decision on the material issues as they pertain to the enumerated counties is reserved for later determination.

Findings and conclusions. The findings and conclusions with respect to the material issues for the area being considered, all of which are based on the evidence introduced at the hearing and the record thereof, are as follows:

1. *Character of commerce.* The handling of milk in the proposed Central Arkansas marketing area is in the current of interstate commerce, and directly burdens, obstructs or affects interstate commerce in milk and its products.

The marketing area specified in the proposed order, hereinafter known as the Central Arkansas marketing area, includes all of the territory within the boundaries of the counties of Pulaski, Jefferson, Faulkner, White, Clark and Garland. All of the counties are in the State of Arkansas. Approximately 1000 producers located in the State of Arkansas supply about 9 million pounds of milk per month to about 12 milk plants which distribute fluid milk to consumers in the proposed area. Milk from two major distributors in this group is distributed regularly in Tennessee. Nearly half of the Class I sales from one plant are to outlets in the Memphis, Tennessee marketing area. One of the plants also distributes milk in Oklahoma.

Local supplies of milk have been inadequate to meet Class I needs plus adequate reserves each month of the year for several years. Handlers who supplied fluid milk to the proposed marketing area have been required to make frequent imports of bulk Grade A milk from sources in Oklahoma, Illinois, Missouri, Tennessee, and Wisconsin. The record indicates that between 6 and 7 million pounds of supplemental milk was received by these handlers from sources other than producers during the year prior to the hearing. This milk was commingled with milk received from local producers and marketed to fluid outlets both in the State of Arkansas and elsewhere.

2. *Marketing conditions.* The issuance of a marketing agreement or order will tend to effectuate the declared policy of the act.

The Central Arkansas market is characterized by unstable marketing conditions. The conditions which have resulted in unrest and instability in this area are typical of those encountered in the fluid milk industry in the absence of a well-defined marketwide classified pricing plan.

The record discloses that a large proportion of the producers in the proposed marketing area are members of the Central Arkansas Milk Producers Association. The association has had contracts for the sale of its producers' milk for the past two or three years with all but one of the major handlers. These contracts covered most of the producer milk received by Little Rock handlers, and part of that received by handlers doing business in the surrounding areas which would be included under this proposed order.

Such contracts provided a base rating plan as a method for paying producers. Under this plan producers received a price equal to the average of Class I prices in eight Federally regulated markets for all milk delivered during a six-month base forming period. Throughout the remainder of the year, they received such base price for all or a portion of their base milk. All excess milk, and at times some base milk, has been paid for at surplus prices. The proportion of base milk paid for at surplus prices has been the same for all handlers.

Under the foregoing arrangement, the handlers' costs of milk have not been dependent upon the utilization made of milk, and have varied from one handler to the next. Such variations in the average cost of milk are accounted for largely by differences in seasonal pattern of purchases from producers, and in part by differences in the proportion of milk purchased from outside sources at different prices. Under conditions such as these, any handler could obtain lower than overage cost for producer milk used in Class I, even though prices were the same to all handlers, through regulating the amount of milk he accepted from producers at different seasons of the year.

Thus, each handler has the incentive to receive milk in such a way as to obtain as much of his milk as possible at surplus prices. To the extent a handler can use his excess milk for Class I sales, he stands to gain an advantage of 2 to 4 cents per quart of milk relative to his competition. It is possible to increase the use of excess milk for Class I sales by expanding Class I sales in the months of flush production, or by establishing a low wintertime base in relation to his bottled or Class I sales. The latter can be accomplished by receiving less milk from producers and by placing increased reliance during the fall and winter on milk from other sources. The net result of such competitive conditions is to interfere with the maximum production of milk at prevailing prices, and to weaken the incentive for handlers to maintain the dependable supplies of quality milk needed by the market. It has resulted also in competition for milk sales at price levels insufficient to assure orderly marketing of quality milk in the Central Arkansas area.

Producer representatives testified that efforts to get handlers to purchase milk on a utilization basis have failed. The uncertainty among handlers as to product cost of competitors, and the incentives to buy milk on a basis so as to avoid the Class I costs incident to the producer contract, have brought about substantial market instability. Two large handlers have given notice to the association of intention to cancel the contract, such cancellation to become effective 9 months after notice. The association was unable to obtain reinstatement of the contract.

Another unstabilizing element in the Central Arkansas market is the fact that one of the major handlers has been regulated at times under Order No. 76 regulating the handling of milk in the Fort Smith, Arkansas, area, while another has been subject to Order No. 18 regulating the handling of milk in the Memphis, Tennessee, area. The pricing, payment, and base rating provisions of these orders are somewhat different, and producers claim that such variations have led to disturbances in the purchasing and marketing of producer milk in the area.

The hearing record indicates rather general agreement among various interests in the market that the instability and market chaos are such that an overall system of classification and pricing of milk should be adopted, and that for such a system to be effective it must be carried out under governmental authority.

The record indicates also that there is a lack of market statistics for this area. Such information is essential in achieving a level of Grade A milk production commensurate with consumer demand for Grade A fluid products at different seasons of the year. Some data are available from health authorities. The producers' association has partial figures on local milk supplies. This information, however, is not fully satisfactory to the needs of the market, since current monthly data are required by both handlers and producers to evaluate changes in supply and demand conditions for the purpose of arriving at appropriate prices.

It is concluded that the issuance of a marketing agreement and order for the Central Arkansas marketing area would contribute substantially to the improvement of many of the conditions complained of, and tend to effectuate the declared policy of the act; namely, to establish and maintain, by means of the regulatory provisions expressly provided for in the act for such purposes, such orderly marketing conditions in the area as will tend to establish prices to the producers of milk for the marketing area at a level as will reflect the factors set forth in Section 8 (c) (18) of the act, insure a sufficient quantity of pure and wholesome milk for the marketing area, and be in the public interest.

3. *Order provisions*—(a) *Scope of regulation—Marketing area.* The Central Arkansas marketing area should include all of the territory within the boundaries of the counties of Clark, Faulkner, Garland, Jefferson, Pulaski and White, all in the State of Arkansas. The largest urban centers in these counties are Little Rock, Hot Springs, Conway, Searcy, Pine Bluff and Arkadelphia.

The proposed area is served primarily by a group of about twelve handlers. These handlers distribute by far the largest share of their fluid milk sales either in the proposed area, or in marketing areas regulated under other Federal orders. A comparatively small percentage of their fluid milk sales outside the proposed area are in competition with unregulated handlers.

Because of the small proportion of the total milk sales by Central Arkansas handlers in competition with handlers who would be unregulated, it is considered unnecessary to include within the marketing area all of the counties proposed for regulation. It would be impossible to define a marketing area where no overlapping of sales would be involved. Extension of the marketing area to include the entire area in which regulated handlers distribute milk would bring handlers and areas dominated by somewhat different marketing conditions under uniform regulations with handlers doing business primarily in the central part of the State. The evidence does not indicate that failure to bring under regulation areas not herein recommended will result in instability to market conditions in the proposed area, or that regulation on such a scale would solve more problems than it would create.

There is a large degree of competition of milk sales in the proposed area among handlers who would be regulated. Most of the handlers serving Pulaski County compete with each other throughout the metropolitan area of Little Rock. One or more of these handlers has substantial sales in each of the counties outside Pulaski, recommended for inclusion in the marketing area. Four distribute milk in Faulkner, two in Garland, three in Jefferson, three in White, and one in Clark.

State health regulations with respect to quality standards and labeling of Grade A milk apply uniformly throughout the proposed marketing area. No milk may be sold in the area for fluid consumption unless it meets the minimum Grade A standards of the state.

Several of the cities within the proposed area have health ordinances of their own, which have standards at least equal to those imposed by the state. State officials recognize the inspection services of these individual cities, but make periodic checks to verify the enforcement of such local ordinances.

The record indicates that milk sold throughout the area is of approximately equal minimum quality. Milk from the Little Rock market is accepted throughout the area. There is no evidence that milk from any of the local health jurisdictions has been refused under present ordinances or would not now be acceptable in all other such jurisdictions in the area as well as to the state authorities.

Designation of plants and milk to be subject to regulation. Provision should be made in the order to designate clearly what milk will be subject to pricing provisions of the order. For this reason, definitions of handlers, milk plants, producers, producer milk, and other source milk should be provided. Such definitions will permit unequivocal reference to these persons or items throughout the order.

The term "handler" should be used to designate the operator of a milk plant which supplies or distributes milk for fluid consumption in the marketing area. Handlers are the persons who should be required to report the sources and utilization of milk, the handling of which is to be regulated, and should be held responsible for paying for milk received from producers in accordance with the terms of the order. In case a person operates more than one plant which is subject to the order, he should be a handler with respect to the combined operations of such plants, unless the plants are operated on a completely independent basis, so far as Class I sales and procurement of producer milk are concerned. If the handler operates other plants in no way associated with the regulated market, he would not be a handler with respect to such plants. Producer-handlers (who produce their own milk supply) and operators of approved plants which do not qualify as pool plants should be included as handlers in order to require such persons to report to the market administrator as necessary to verify their status.

A cooperative association which markets the milk of its producer members may, during periods of flush production, need to divert producers' milk from pool plants to nonpool plants for disposal as Class II milk. If such an association is defined as a handler for such milk, the producers whose milk is so diverted may continue to share in the overall utilization of milk under the order. The provisions of the order should be such that milk of such producers will be available for fluid use when needed in the regulated market in the fall months, or at other times.

The minimum class prices of the order should apply to that milk eligible for distribution as Grade A milk in the marketing area, which is received from dairy farmers at plants primarily engaged in distributing fluid milk on retail and wholesale routes in the marketing area, or in supplying bulk milk to such distributing plants. These plants should be defined as "pool plants." Each plant from which a substantial share of the milk is supplied to the marketing area should be fully subject to the pricing and pooling provisions of the order. This is necessary to assure the effectiveness of the order in achieving the objectives of the Agricultural Marketing Agreement Act. A plant not supplying such portions of its milk to the market should not be subject to pricing and pooling under the order.

As pointed out elsewhere herein, the order should provide for a marketwide pool. Such a pool is considered essential to the stable and orderly functioning of the market. Since the marketwide pool results in payment to all producers on an average utilization for the market, individual handlers are relieved of any responsibility for maintaining a high Class I utilization in order to support their pay rates to producers. Whatever utilization of milk a handler may have, his rate of pay to producers will be the same as that of all other handlers in the market. Thus, it is possible that status with respect to the pool may become a determining factor in guiding a handler's operation.

The scope of pooling, or the rules for distributing the returns from Class I sales under the order must be such that the differentials over manufacturing milk values paid by users of Class I milk will serve the purpose for which they are intended.

The premium, or differential, over the manufactured milk price paid for Class I milk is essential as an incentive to producers for producing milk of the quality required, and at the time needed by consumers. Extra costs are involved in providing sanitary surroundings for the dairy herd, and in maintaining milk production during the fall and winter months when feeding and housing costs increase. Extra costs are involved also in handling of milk for fluid use, since

it must be refrigerated, handled through sanitary utensils and facilities, and marketed promptly.

The extra costs thus involved for Grade A or fluid milk producers must be borne by that share of the milk which is marketed as Class I milk. Excess or reserve milk, although an essential part of a fluid milk business, cannot be expected to return more to producers than a manufactured milk value. The only outlet for reserve milk not needed for fluid use is in the form of manufactured products. Such products must be marketed in competition with similar products made from ungraded milk throughout the country.

Since the production of high quality milk involves extra expenses, it is important that the amount of milk produced under Grade A inspection be no more than the minimum necessary to provide the market with an adequate and dependable supply of quality milk. To encourage more than enough production of such milk would represent an economic waste, since the expenditures involved in producing Grade A milk not an essential part of the market supply would not result in extra value to consumers equal to the cost involved.

One of the primary problems, then, in defining pool plants is to establish rules which will provide for the sharing of Class I sales (Class I differentials) among the sources which are primarily associated with the Central Arkansas market and which are a regular part of the milk supply.

The Class I prices proposed herein are set as nearly as possible at the minimum levels considered necessary to encourage the required amount of milk production. The resulting returns should be distributed in such a way as to assure the market of the maximum dependable supply of quality milk which can be obtained at these prices. In order to do this, provision is made that equalization of market sales should be only to plants meeting reasonable performance standards with respect to supplying their producer milk to the market.

Plants only casually, or incidentally associated with the market should not be subject to complete regulation, nor should they be permitted or required to equalize their sales with all handlers in the market. If a milk plant were permitted to share, on a pro rata basis, the Class I utilization of the entire market, without being genuinely associated with the market, then the premiums or differentials paid by users of Class I milk would be subject to dissipation without accomplishing their intended purpose. If a plant were to be qualified and fully regulated merely by making a token shipment of milk or cream into the market for sale as Class I milk, then any milk plant which found itself in a position where it was selling a smaller share of its milk in Class I than the average for all regulated handlers might make such shipment and receive equalization payments from the pool. The only qualification such a plant would be required to meet would be in compliance with the necessary health department standards.

The mere circumstance of having obtained health department approval, plus the token shipment of milk, is not sufficient justification for equalizing the sales of such plant with the market. There are several different health authorities having jurisdiction in various parts of the marketing area. In the absence of pool plant performance standards, approval by any one of these authorities, or reciprocal acceptance of permits by them, might entitle a plant to participate in the equalization pool. There is no reason to assume that each of these health departments would refuse an application for approval because they had determined that the milk from an applicant plant was not entitled to pool with the market, or that the basis for such refusal would be uniform for each health authority, or that such standards as might be applied for this purpose would be appropriate to effectuate the declared policy of the act.

Since reserve milk is an essential part of any fluid milk business, there will always be some excess milk in the plants of handlers supplying other markets. This will be particularly true in the months of flush production. Plants selling primarily to other markets, or plants shipping milk on an opportunity basis to any market where supplies happen to be short, do not represent sources of milk on which the market may depend. If such plants were allowed to sell a token quantity of milk in the marketing area, and pool their surplus whenever Class I outlets were not available to them, the result would be that such handler could gain an advantage in paying producers through receipt of equalization payments from the pool.

The market, however, would gain no advantage from the payment of equalization to such handler. Such distribution of equalization payments would, in fact, reduce the blend price to producers regularly supplying the market, thereby having an adverse effect on the milk supplies upon which the market depends. This could result in the need for higher Class I prices than would otherwise be required to supply the market adequately.

Performance standards are necessary also to avoid unnecessary or undesirable extension of regulation. Full regulation of all supply plants might handicap the market in the business of securing supplemental milk supplies during the months of low production, since unregulated plants would be unlikely to sell one or two tankloads of milk, if such sales resulted in regulation under the proposed order. The record discloses that Central Arkansas handlers normally require supplemental supplies of milk to meet their Class I sales in the months of lowest production. Under the proposed order, an unregulated plant may supply some of this milk without incurring full regulation.

Performance standards should be flexible enough to allow a plant which is primarily associated with the market to maintain its association with the pool under the changing conditions which occur from year to year, and yet not permit the distribution of equalization payments to plants not part of the essential supply. The performance standards herein provided are such that these objectives should be accomplished.

Milk plants primarily associated with other Federally regulated markets, and subject to full regulation under another order, should be exempt from regulation under the Central Arkansas order.

All facilities, premises, and buildings of a milk plant should be considered as part of the same pool plant, regardless of health authority restrictions on the use of any portion thereof. This will enable the market administrator to enforce the order more fully, and assure the assignment of producer milk to all Class I milk disposition from the plant.

If a handler operating a dual plant is disposing of nothing but Class II products from the ungraded portion of his plant, this may have no effect on his milk cost, since the skim milk and butterfat he uses in the nonfluid portion of the plant will be assigned to the Class II dispositions involved. If any Class I disposition is made from any portion of a plant, it should be assigned first to producer milk to the extent producer milk is available. It is not feasible, or necessary, for a market administrator to attempt to follow milk or milk products through a plant to determine which product is used for which purpose. If Class I milk is to be disposed of from any portion of the plant, it is logical to assume that the plant operator would use his best quality product for such purposes to the extent it is available.

Because of the difference in marketing practices, and in demands for supplies of milk from plants which are primarily in the business of distributing Class I milk, as contrasted to supply plants which furnish bulk milk to distributing plants, two sets of performance standards have been provided. These standards, and reasons therefor, are as follows:

In order to qualify as a pool plant, a "distributing plant" should be required to distribute at least 10 percent of its milk from producers and other pool plants during the month as Class I milk on retail or wholesale routes to outlets in the marketing area. Distribution of milk through vendors or plant stores should be included to the extent that sales through such outlets are in the marketing area.

A distributing plant having more than 90 percent of its business outside the marketing area, or in other outlets, should not be considered as essentially associated with the market. It is not considered advisable to bring such a plant under full regulation, in order to control the minor share of its business which is in the marketing area. Full regulation, in such case, would not be necessary to accomplish the purposes of the order, and might well place such plant at a disadvantage in relation to its competitors in supplying the unregulated market.

Such a minimum is necessary, also, to avoid the possibility that a plant otherwise not associated with the market might qualify itself for equalization payments to its own advantage, and to the disadvantage of the market, by means of minor sales in the marketing area.

It is contemplated that only plants primarily engaged in route distribution of fluid milk, and Class I products should be qualified as pool plants under this definition. In order to preserve this distinction, a further condition is placed on distributing plants that their total distribution of Class I milk on routes to wholesale or retail outlets, both inside and outside the marketing area, must amount to at least 50 percent of their receipts during the month of milk from producers and from other pool plants. Any plant which does not qualify on this basis should be deemed to be primarily a bulk supply plant, and its status under the pool should be judged by the standards applicable to such plants.

Evidence in the record indicates that most plants doing business in the marketing area dispose of their milk in such a way as to exceed, by a considerable margin, the minimum performance standards necessary to qualify as pool plants under this order.

There are, at the present time, no "supply plants" primarily associated with the Central Arkansas market. However, in case a handler should desire to supply the market through use of a supply plant, and bring such plant under the pool, provision should be made in the order whereby this would be possible. The performance standards for supply plants to qualify for pool status should reflect the fact that Central Arkansas is typically a short market. Distributors need all of the milk available from producers in order to keep their Class I outlets fully supplied on an annual basis. In order to assure that all the producer milk which is pooled with the market will be available for Class I sale, percentage standards should be set at levels which require that the milk will be available. If conditions in the market should change so that Class I outlets are adequately supplied with producer milk, and the percentage standards proposed herein are not necessary to assure the availability of such producer milk for Class I sales, the standards should be subject to review.

Under present circumstances, it is concluded that a plant should dispose of at least 50 percent of its receipts of milk from producers in any month in the form of supplemental supplies of milk, skim milk or cream shipped to distributing plants, in order to qualify for pool status. Unless more than half of the milk from such plant is disposed of in this manner, a supply plant should not, under the present conditions in the area, be considered as primarily associated with the market.

It is recognized, however, that the demand for milk from supply plants is rather seasonal. The primary function of most supply plants, particularly those on the fringes of any milkshed, will be to furnish milk to distributing plants during the season of low production. In the months of flush production, supplies of milk received at plants located in or near the marketing area may be sufficient to supply the Class I outlets. During this part of the year, it would be more economical to leave the most distant milk in the country for manufacture, and use local supplies for Class I use. The performance provisions should not force milk to be transported to distributing plants in the spring and summer to be manufactured, in order to maintain the eligibility of supply plants to pool.

In order to provide for handling the milk in the manner described, a supply plant should be allowed to remain in the pool throughout the year, if it qualifies under the foregoing standards during each of the months of August through January.

The order should provide a definition of "producer" in order to designate the dairy farmers whose milk is to be subject to the pricing provisions of the order. This definition should include any person who produces milk in compliance with Grade A standards, and ships such milk to a plant fully regulated under the order. Because of the widespread use of reciprocal inspections by health authorities, the Grade A inspection of any duly constituted health authority should be considered appropriate to qualify a person as a producer. Any Grade A milk which enters a plant may be distributed for fluid use, and as a result, be subject to the same pricing provisions of the order.

The record discloses that some milk, not needed for Class I use in the area, has been diverted from producer farms directly to manufacturing plants for disposal. This has obviated duplication in handling at fluid plants which are not equipped to manufacture such reserve supplies of milk. Provision should be made in the order, therefore, to allow a handler to maintain milk of regular producers under the pooling and pricing provisions of the order, even though it may be diverted from manufacture during periods of excess supply. Diversion privileges should not be extended during periods of market shortages, since handlers might thereby be enabled to keep milk pooled with the market, even though such milk were not available for Class I use when needed. Excess supplies during the months of lowest production normally occur only on weekends or holidays. Provision for diversion of a producer's milk on no more than 10 days during any of these months should provide adequate opportunity for disposal of excess milk in this period.

Cooperative associations of producers, which qualify as bona fide representatives of producers, and which are authorized to market the milk of member producers, should be allowed the same diversion privileges as fully regulated handlers.

"Producer milk" should be defined in the order to identify the milk received from producers at pool plants. This milk would include milk diverted in accordance with order provisions, and represents the milk which is to be priced. "Other source" milk should be defined as fluid milk (Class I) products received from sources other than producers or pool plants, and should include nonfluid products, if they are reprocessed or reconverted in a pool plant. The latter products should be included, since they may enter into the Class I market if they are utilized by the plant in the production of other items. Other source milk, therefore, represents the skim milk and butterfat at the plant which enters into the operation in such form that it may be utilized in Class I milk, but which originates from sources not priced as Class I milk under the order.

(b) *Classification of milk.* Milk received by regulated handlers should be classified on the basis of the form in, or the purpose for which it is used, as either Class I milk or Class II milk.

The products which should be classified Class I milk are those distributed to the consumer in fluid form. This includes milk, skim milk, cream, and various mixtures thereof, including those flavored or cultured. These are the perishable products which require expedited handling and careful quality control. These are the products which are normally made from milk inspected and supervised from point of production by local health authorities. The extra cost of getting approved milk produced and delivered to the market, in the quantities required, makes it necessary to provide a price for milk used in Class I products somewhat above the manufacturing milk price. Through classification, milk utilized for these purposes may be priced in accordance with the needs of the market for maintaining production of quality milk.

Excess milk not needed seasonally or at other times for Class I use, must be disposed of for use in manufactured products. These products are not required to be made from inspected milk and must be sold in competition with products made throughout the country from unapproved milk. Milk so used should be classified as Class II milk, and priced in accordance with its value in such outlets.

In accordance with these standards, Class I milk should comprise all skim milk (including concentrated or reconstituted nonfat milk solids) and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, flavored milk, flavored milk drinks, yogurt, cream and any mixture of cream and milk or skim milk (except sterilized products in hermetically sealed containers, eggnog, ice cream mix and aerated cream); and (2) not accounted for as Class II milk.

Fluid milk products such as skim milk drinks and buttermilk, to which extra nonfat solids have been added, should be included under the Class I milk definition, and all of the solids therein should be priced at the same rate. Products, such as evaporated or condensed milk in hermetically sealed cans, should not be considered Class I milk, since they may be made from ungraded milk, and need not be handled as the more perishable fresh fluid items.

Skim milk and butterfat are not used in most products in the same proportions as contained in the milk received from producers, and therefore should be classified separately according to their separate uses. The skim milk solids and butterfat content of milk products received and disposed of by a handler, can be determined through testing procedures. Some manufactured products, such as ice cream and condensed products, present a more difficult problem of

testing in that some of the water contained in the milk has been removed. It is desirable, in the case of such products, to provide an acceptable means of ascertaining the amount of skim milk and butterfat contained in, or used to produce, these products. This may be accomplished through the use of adequate plant records made available to the market administrator, or by means of standard conversion factors of skim milk and butterfat used to produce such products. The accounting procedure to be used in the case of any condensed milk product should be based on the pounds of milk or skim milk required to produce such product.

Butterfat and skim milk disposed of from the plant in the form of the aforementioned fluid milk items should be classified Class I milk when they leave the plant, subject to reclassification only in case they are transferred to other milk plants for manufacture, under conditions hereinafter described.

All skim milk and butterfat used to produce products other than those classified in Class I milk should be Class II milk. Included as Class II milk are products such as ice cream mix, butter, cheese, cottage cheese; evaporated and condensed milk (plain and sweetened) and nonfat dry milk solids.

Butterfat and skim milk used to produce Class II products should be considered to be disposed of when so utilized, and will not enter into the classification picture again unless reused or reconverted. Handlers will need to maintain stock records on such products, however, to permit audit of their records by the market administrator to verify utilization in Class II milk. Class II products from any source, including those produced in the plant, which are utilized for further processing or manufacture, should be considered as a receipt of other source milk.

Handlers must be held responsible for a full accounting of all their receipts of skim milk or butterfat in any form. A handler who first receives milk from producers should be responsible to the market administrator to establish the classification of, and make payment to producers for, such milk. Except for a normal amount of shrinkage which may be classified in Class II, all skim milk and butterfat which is received, and for which the handler cannot establish utilization, should be classified Class I milk. This provision is necessary to remove any advantage to handlers who fail to keep complete and accurate records, and to assure that producers receive full value for their milk on the basis of its use. It is necessary to place the burden of proof on the handler, in order to establish the utilization of any butterfat or skim milk as other than Class I milk, since the market administrator cannot assume primary responsibility for tracing the utilization a handler makes of his milk.

Pool plants normally will have inventories of fluid milk products on hand at the beginning and end of each month, which must be considered in accounting for current sources and utilization of butterfat and skim milk. Accounting procedure will be facilitated by providing that month-end inventories of all products designated as Class I milk, regardless of whether such products are held in bulk or in packages, should be classified Class II milk. Inventories of products so classified will then be assigned to Class II use the following month. If any fluid milk products, derived from producer milk, are classified Class II milk because they are held in month-end inventories, and then later used in Class I milk, the higher use value should be reflected to producers.

Inventories of fluid milk products on hand at a pool plant at the beginning of any month during which such plant becomes a pool plant for the first time should likewise be subtracted from the Class II utilization of the plant during the month. This will preserve the priority of assignment of current producer receipts to current Class I use.

Although handlers should be expected to keep complete account of their utilization of skim milk and butterfat, there is normally a certain amount of shrinkage for which no disposition can be shown. The record shows that 2 percent is a reasonable maximum shrinkage allowance based on operating experience.

Shrinkage should be determined by subtracting, from the total pounds of skim milk and butterfat received by the handler, his total established utilization thereof, respectively, in various products. Shrinkage not in excess of 2 percent of the handler's producer milk and other source milk should be prorated on the basis of the pounds from each of these sources. None of the shrinkage should be assigned to milk received from other pool plants, because shrinkage on such milk will be allowed to the transferring handler.

It is concluded that shrinkage of butterfat or skim milk, which is not more than 2 percent of total amount thereof in producer milk and other source milk should be classified as Class II milk, and any shrinkage in excess of this quantity should be classified Class I milk.

Transfers. As pointed out previously, some fluid milk products may be disposed of to other plants for Class II disposition. Classification of any product transferred or diverted to another plant should, under certain circumstances, be determined according to its utilization in the plant to which transferred.

Fluid milk products transferred from one pool plant to a pool plant of another handler, except that of a producer-handler, should be classified Class I milk, unless both handlers indicate, in their reports to the market administrator, that they desire such milk to be classified Class II milk. However, sufficient Class II utilization must be available at the receiving plant for such assignment, after prior allocation of shrinkage and other source milk as hereinafter described. On the other hand, if the transferring handler had other source milk during the month, the assignment of products transferred to another pool plant to the Class I utilization of such plant should be limited so that other source milk in the transferring handler's plant will not be allocated to Class I milk while producer milk is allocated to Class II milk in the receiving handler's plant.

Milk, skim milk and cream disposed of in bulk form to a nonpool plant, including milk which is diverted (sent directly to the nonpool plant from the producer's farm) should be classified Class I milk, unless certain conditions are met. One of these conditions is that the operator of the nonpool plant, if requested, must make his books and records available to the market administrator for the purpose of verifying the source and utilization of milk in such nonpool plant. Provision for verification by the market administrator is reasonable and necessary to assure that producer milk will be paid for in accordance with its utilization. Classification as Class II milk should be limited to the amounts of such actual use in the nonpool plant.

Class I milk items transferred to a producer-handler should not be subject to reclassification, since such handlers normally purchase these items strictly for Class I use. Milk received from producer-handlers should be treated as other source milk, since such milk is unpriced.

The class prices of the order apply only to producer milk. It is necessary, therefore, if a plant has butterfat or skim milk other than that received in milk from producers, to determine the quantities of milk in each class to be assigned to producers. The milk of producers (as defined under the order), who are primarily engaged in supplying the Central Arkansas market, should be assigned to Class I utilization first. This is necessary to insure the stability of the classified pricing program. If the order permitted handlers to obtain other source milk for Class I use, whenever it was advantageous to do so, while producer milk in the plant was utilized in Class II milk, the order would not be effective in carrying out the purposes of the act. Also, the market might be deprived of a dependable supply of quality milk. Class II items utilized in reprocessing or manufacturing at the plant during the month will also be assigned as other source milk. This will mean that such products also will be allocated first to Class II use, thus maintaining priority of assignment for current receipts of producer milk to Class I sales. The system of assigning utilization of milk to receipts from different sources which will carry out this objective is set forth in § 908.45 of the attached order.

Since uniform prices paid producers by each handler are to be calculated monthly, the assignment of utilization described above should be carried out with respect to all milk received during each month. Some variations in utilization and importation of other source milk may occur from day to day throughout the month, but all handlers will be on an equal basis in this respect.

(c) *Class prices.* Class I prices should be established at a level which, in conjunction with the Class II prices hereinafter concluded to be appropriate, will result in returns to producers high enough to maintain an adequate, but not excessive, supply of quality milk to meet the fluid requirements of the marketing area.

The maintenance of stable conditions in the market requires that Class I prices

be adjusted whenever the supply of milk is out of line in relation to sales of milk for fluid use. If prices remain too low, insufficient quantities of milk will be produced to assure that the Class I market will be fully supplied. Conversely, if prices are too high, production will be overstimulated and consumption curtailed. This would cause more milk to be produced than is needed to satisfy the demand for Class I milk, resulting in the development of unnecessary and uneconomic surpluses.

When milk produced locally is insufficient to meet the Class I needs of the market, supplemental supplies of Grade A milk are purchased by handlers in the Central Arkansas area from plants located over a wide geographic area. Prices of this milk fluctuate to a considerable extent on the basis of changes in the value of milk produced for manufacture. Other items which determine the prices at which such milk will be available to Central Arkansas handlers include the cost of transporting such milk to the marketing area, and other Class I outlets for it, such as sale to surrounding markets.

Proper recognition must be given the prices at which alternative sources of supply are available, especially since any milk plant wherever located may, by meeting the prescribed qualifications, become a pool plant under the order. It is necessary, therefore, that the Class I price under the proposed order should not be set at levels which will bring the cost of such milk above the cost of obtaining Grade A milk supplies regularly from other sources.

It is concluded that the Class I price for the Central Arkansas area should be fixed in relation to the general level of the value of milk used to produce manufactured dairy products. To achieve this end, a basic price formula should be adopted which will reflect such general level, and to which differentials should be added to reach the appropriate Class I price. Such basic price should be the higher of (a) the average of the prices paid by the 13 "Midwestern Condenseries," (b) a price computed on the basis of the daily quotations for 92-score butter at Chicago and prices paid for nonfat dry milk solids f. o. b. manufacturing plants in the Chicago area or (c) a price based primarily on the value of milk used for cheese manufacture.

The purpose of such basic price is to give consideration to the national economic factors underlying the price for milk for manufacturing uses, which prices, it has been determined, influence the local market prices. Prices for milk used for fluid purposes in competitive markets are related to the prices paid for milk used for manufacturing purposes. Production and marketing of milk for each type of manufacturing outlet are subject to many of the same economic factors. Since the market for most manufactured products is countrywide, prices of manufactured dairy products reflect, to a large extent, changes in general economic conditions affecting the supply and demand for milk. Fluid markets are affected to a large extent by these conditions in that producers may and do shift between ungraded and graded milk production. It is for these reasons, most of the fluid milk markets from which Central Arkansas handlers may purchase alternative, or supplemental milk, or to which they sell milk have Class I pricing formulas based on butter, nonfat dry milk solids, and cheese prices, or the prices paid by condenseries subject, in each case, to differentials over these basic or manufacturing prices. Such differentials are those considered appropriate in each case to cover the cost of meeting quality requirements in the production of adequate supplies of market milk, and transportation costs to the particular fluid market.

The alternative prices in the basic formula proposed herein are the same as those used under the Memphis, Tennessee, order and are similar to those used in many other Federally regulated markets. The price computed under this basic formula averaged $3.57 for 1954.

Memphis is the market with which Central Arkansas handlers are in primary competition. As pointed out heretofore, one major handler serving the proposed area sells nearly half of his milk on routes to the Memphis market. One other large handler in Little Rock has sold substantial volumes of milk to contract outlets as well as on retail or wholesale outlets in the Memphis area. The evidence does not indicate, however, that any Memphis handler distributes milk in the Central Arkansas area.

The price received by Central Arkansas producers for 4.0 percent base milk under the association's contract with handlers averaged $5.12 for the year 1954. The record indicates that this is not a true cost for Class I milk however, since all producer milk utilized by handlers as Class I milk was not paid for at the base price. Excess prices were somewhat below $3.00 most of the time.

The hearing record does not contain complete data which accurately reflect the receipts and sales of fluid milk in the Central Arkansas area. It appears clear, however, that prices which have prevailed in the area have not resulted in milk production sufficient to meet Class I requirements at all times during the year. It is questionable, on the other hand, whether the system of milk purchasing which has existed in the market has been fully effective in encouraging maximum milk production at the prices actually paid. In the absence of adequate data, and because the previous price and supply history of the market cannot be fully relied upon, it is not possible to arrive at an appropriate Class I price for Central Arkansas on the basis of local experience alone. However, because of the large degree of sales competition between the Memphis and Central Arkansas markets, and because of the general location of both markets in relation to other supply and sales areas, it is concluded that for the present at least, the same stated Class I differentials over basic formula price should be provided for Central Arkansas as are provided for the Memphis market. Handlers in the two markets compete not only for Class I sales in the Memphis area, but both markets often require substantial volumes of supplemental milk. Handlers from both areas may be expected to purchase such milk on the same general competitive market. The distance of the two markets from alternative supplies is in general approximately the same.

The pricing formula proposed herein will result in the same price for the two markets, except that the Memphis order contains a supply-demand provision which adjusts the price under that order in accordance with local shortages or surpluses. While the hearing record discloses some need for a similar provision in the Central Arkansas area, data presently available do not provide an adequate basis for drafting one which could be expected to adjust Central Arkansas prices in line with local market needs. It is concluded, therefore, that for the period through August 1956 a Class I differential of $1.28 for the 6 months of highest production and $1.68 for the months of lowest production should be provided. Data which became available during this period should then be reviewed to ascertain whether a supply-demand adjustment or some other provision would be appropriate for fixing a Class I price in line with the needs of the market.

Class I prices should be announced by the market administrator by the fifth day of the month. In order to do this, it is necessary to use price quotations for the preceding month in calculating the basic formula price.

Class II price. The Class II price should be at such a level that handlers will accept and market such quantities of milk in excess of Class I needs as may arise from time to time. The price, however, should not be so low that handlers will be encouraged to procure milk supplies solely for the purpose of converting them into Class II products.

In order to have an adequate supply of producer milk in the fall and winter months, handlers normally accept surplus milk from producers during the months of flush production. Outlets for Class II milk disposed of during the flush production season generally are not as favorable as those available in the fall of the year, when the supply of producer milk available for Class II is lower. With a limited supply of milk for Class II, the market for those products which will command the best return are served first. Such outlets may include cottage cheese and eggnog for which fresh quality milk is particularly desirable. During those months of high production, when the supply is excessive, large quantities of milk are disposed of for use in those products which are least profitable or may actually result in a loss to those handlers receiving milk from producers. Frequently there are additional hauling costs because of inadequacy of local processing facilities.

The record indicates that only minor quantities of excess Grade A milk are produced in the Central Arkansas area during most months of the year. During those months when some excess milk is available, the milk is disposed of locally or to nearby outlets. Such milk is disposed of primarily to the same general market or in competition with excess milk from the Fort Smith market.

The record shows that much of the excess milk which is produced in Cen-

tral Arkansas is diverted directly into local manufacturing plants for disposal, without involving extra haul. It appears, therefore, that prices paid by such local manufacturing plants represent a reasonable minimum price for such milk. It is concluded that during the months of February through July, when most of the excess is produced, the Class II milk price should be the average of the prices paid producers for milk testing 4.0 percent butterfat by the Sugar Creek Creamery at Russellville, the Ozark Creamery Co. at Ozark, and the Pet Milk Co. at Siloam Springs, all in Arkansas. This is the same price as fixed for Class II milk during these months under the Fort Smith order.

During the remaining months of the year, when there is very little excess milk available, such milk should be priced on the basis of the foregoing price plus 25 cents, provided that such price shall not exceed the basic formula price.

Butterfat differentials. As pointed out previously herein, it is concluded that butterfat and skim milk should be accounted for separately for classification purposes. It is necessary, therefore, to adjust Class I and Class II prices of milk in accordance with the average butterfat test of milk in each class by a differential which will reflect differences in value due to variations in the butterfat content of each product.

It is concluded that the values resulting from multiplying the average price of 92-score butter at Chicago each month by 0.120 will provide an appropriate basis for adjusting the price for Class I milk in this market. The butterfat differential to be used in adjusting the Class II price should be calculated during the months of lowest production by multiplying the Chicago 92-score butter price by 0.115 and during other months by 0.110.

The foregoing butterfat differentials are generally in line with those prevailing in other surrounding markets and will place Central Arkansas handlers on an approximately equal basis in this respect with their competitors. The proposed seasonal variation in Class II differentials will serve to properly pro rate the Class II price heretofore found appropriate for the different seasons between the butterfat and skim milk components of the excess milk. The basing point from which butterfat adjustments are made should be 4.0 percent butterfat. This is the basic test now used by all handlers serving the proposed marketing area. The use of butterfat differentials in this manner follows standard practices in most fluid milk markets for adjusting for butterfat variations.

In order that the Class I butterfat differential may be announced early each month, it is provided that the Class I differential be based on the average price of butter in the preceding month. This will permit the announcement of the Class I differential at the same time that the Class I price is announced. Class II prices and butterfat differentials will not be announced until after the end of the month. Although handlers will not know the price of Class II milk as it is utilized, they will know that their cost will follow that of their principal competitors for manufactured milk outlets.

Location differentials. To the extent that producer milk is received at plants located some distance from the market, the handlers purchasing such milk should be allowed a lower Class I price. The reduction in price should be based on the distance from the central market to the plant where the producers deliver the milk. Milk located at a distance from the market has less value to the market. If handlers did not assume the costs of moving milk to the market they must otherwise be borne by the producer, since the producer would be compelled to meet such costs, if he were to sell this milk in the market. The value of a producer's milk is therefore deemed to be less than the central market price by the amount it costs to transport such milk to market.

It is concluded that the price of milk used for Class I disposition should be reduced for plants receiving such milk more than 60 miles from the central market. The transportation allowance for such plants should be 10 cents per hundredweight of milk plus 1.5 cents for each additional 10 miles, or fraction thereof, that such plants are from the primary center of consumption in the proposed area. Benton, Arkansas, is centrally located to the primary sales areas of the proposed marketing area, and is therefore proposed as the basing point for location differentials. The rate of location differential adjustment herein provided, is based on the approximate cost of hauling milk in bulk tank lots, which is the most efficient method generally available in the area for transporting milk. Handlers should be expected to make any necessary movements of milk to market by the most efficient means available. The transportation differential rates herein provided are representative of those prescribed in other Federal milk marketing orders, and are based on actual cost of hauling milk as shown in the hearing record.

The class prices for milk proposed in the attached order are designed only to price milk at its value in relation to the marketing area to be regulated pursuant to the proposed order. Milk may have greater or lesser value than reflected by these prices if marketed in one of the many markets throughout the South Central states which would not be subject to this order. It would not be administratively feasible, however, to provide a different price for each lot of milk according to its ultimate destination. To attempt to do this would be unsound also, in that it would make producers bear the cost of hauling beyond the central market, and thereby remove from handlers the incentive to market milk at the location where it will yield its greatest net return.

No adjustment should be made in the Class II price because of differences in location of the plant to which the milk is delivered. There is little difference in the value of milk for manufactured uses associated with the location of the plant receiving the milk. This is true because of the low cost per hundredweight of milk involved in transporting manufactured products. The prices shown in the record, paid for ungraded milk received at various sections of the milkshed, do not indicate any difference in value associated with location. Class II milk should not be hauled to the central market for manufacture if there are more convenient facilities available.

After a handler receives milk for Class II use, he should be expected to handle and dispose of the milk to the best advantage. Prices paid producers for such milk should not be made dependent upon the method employed by the handler in disposing of such milk, otherwise part of the incentive for keeping handling cost at a minimum is removed. To insure that milk will not be moved unnecessarily at producers' expense, the order should contain a provision to determine whether milk transferred between plants may receive the location differential credit. This should provide that any milk transferred be assigned to any Class II use remaining in the transferee plant after prior assignment of other source milk.

Compensatory payments on unpriced milk. The class prices heretofore described apply only to that milk received at pool plants from producers. As previously mentioned in connection with the findings and conclusions concerning pool plant standards, milk may be disposed of for Class I use in the marketing area by or from plants which are not fully regulated. Any plant which is not fully subject to classification and pricing is not required to pay producers for milk in accordance with the utilization made of the milk.

Milk from unregulated plants may be sold as Class I in the regulated area through distribution directly to consumers on routes operated by such plants, or it may be received in bulk form from such plants by pool plants which use it in supplying their own Class I outlets. The proposed order does not prohibit any plant, whether it has pool status or not, from selling milk in the marketing area, nor does it specify where any plant must purchase its milk.

The primary purpose of the order is to provide a classified pricing system, whereby the producers primarily engaged in furnishing milk for sale in the marketing area will be paid for such milk according to its utilization. It has been pointed out previously herein, that payment of a premium or differential for milk used in Class I is necessary to encourage adequate production of quality milk needed for fluid use. Such higher prices cannot be maintained, however, unless the Class I market is protected from the competition of reserve, or excess milk. Due to irregular variations in production and consumption each fluid milk market needs to have some reserve milk production available to insure that supplies will be adequate at all times for Class I use. The volume of this reserve milk normally is largest in the spring months of flush milk production. That quantity of milk which is in excess of the Class I sales each day must be marketed in manufactured outlets. Such milk is of

the same quality and is available, except under a classified pricing program, for disposition as Class I milk.

Since milk returns somewhat less if manufactured than if sold for fluid use, a natural pressure develops for handlers to attempt to obtain Class I outlets for all their excess milk even though this may mean a return of somewhat less than a reasonable Class I price on a portion of the milk. Since all milk cannot be marketed in Class I, the tendency is for fluid milk prices to be forced down toward the level of the manufactured milk price. The purpose of compulsory classification and pricing is to provide that price competition from such excess milk may not break the market for Class I milk, and destroy the premium prices necessary to encourage Grade A production.

A classified pricing system as proposed herein can be effective, however, only in controlling the milk of those producers and the plants which by virtue of their primary association with the market, are fully subject to the order. Such regulation is not applicable to and therefore not effective in protecting the Class I market from sales by plants not primarily associated with the market. Since unregulated plants may under some circumstances sell up to half of their milk in the market without incurring regulation, it would be possible for such plants to dispose of considerable volumes of surplus or reserve milk to Class I outlets in competition with the handlers who must abide by the classified pricing program. Such a situation obviously would be characterized by instability. It is necessary, therefore, to provide some protection for the Class I market in addition to that afforded by the classified pricing program as applied to fully regulated plants.

In the absence of any direct control over the pricing of milk from unregulated plants, it is necessary to provide an alternative method of bringing such milk under the classified pricing system without subjecting the originating plant to full regulation. The method provided in the attached order consists of a compensatory payment with respect to unpriced milk utilized for Class I sales. This payment should have the effect, so far as the market is concerned, of classifying the milk as Class I, in that it will remove the cost advantage, which an unregulated plant would have in disposing of unpriced milk, to the regulated Class I market. At the same time, such a payment will involve no extension of regulation.

It is important that the rate of compensatory payment used to bring the unpriced milk into line with the Class I market be appropriate to market conditions. It must not be so low that it will permit a handler to have temporary or permanent advantage through sale of unpriced milk as Class I in the marketing area. It should not be so high that it will penalize suppliers of unpriced milk who offer supplies needed by the market and who are not in a position of gaining an unfair advantage through the sale of such milk. The payment must be provided for in a manner which is administratively feasible and which does not bring about unjustified administrative inconvenience or expense.

Several methods were described on the hearing record for determining what rate of payment would be appropriate for bringing the unpriced milk under the classification program. One of these is to ascertain the actual cost to the regulated handler of milk which he purchases from unregulated plants and charge as a compensatory payment any amount by which the Class I price exceeds the cost of the unregulated milk used in Class I. Such a scheme is not sound from the standpoint of administrative feasibility and it would not necessarily remove the advantage in using unregulated milk even though it were feasible. Rates at which milk sales are billed may not represent actual cost to the purchaser. In the case of a firm which owns or controls a pool plant under the Central Arkansas order as well as unregulated plants, the price charged for milk transferred from unregulated plants would have little or no significance. The billing rate, if any, between such plants might be deliberately set without regard to the value of the milk at the level necessary to avoid any payments. Thus, the intended effect of such an order provision might be circumvented by merely adjusting the bookkeeping procedure.

A handler having no unregulated plants may find it possible to arrange a billing price on purchased milk which would avoid any compensatory payments. A kick-back arrangement or offsetting purchase and sale might readily be arranged, perhaps through a third party. Since the billing price for milk would be a self-serving figure for both parties to the transaction, it would be virtually impossible to ascertain that it represented the true cost to the purchaser. In any case, if a handler had the choice of paying money to the market-wide pool or to a person from whom he was buying milk, he would probably choose the latter.

If the stated purchase price were a true cost, it would still not fulfill the purpose of removing the advantage to unregulated milk to base compensatory payments on the difference between such price and the Class I price. The record discloses that sales of priced milk between regulated handlers ordinarily take place at the class price plus a handling charge. This handling charge varies according to circumstances, but represents a payment to the receiver of the milk to offset his purchasing and receiving costs, such as dumping, weighing, testing and cooling the milk, and paying producers. The cost of receiving the milk in bulk form is somewhat less than receiving it from producers. Thus, in order to remove the advantage to unregulated milk, it would be necessary to provide that the cost of bulk unregulated milk be somewhat more than the Class I price. It would be exceedingly difficult to determine what this excess rate should be, particularly in the case of products such as condensed skim milk and cream, where the allocation of additional processing costs among more than one end product is involved. Furthermore, it would be unsound economics to charge handlers on the basis of costs. This would remove the incentive for a plant to be efficient, or to purchase milk from the most economical sources, and would place the administration of the order program in the position of determining rate of profits for individual concerns. The position of distributors in relation to their competition should be determined by their efficiency, and not through recognition of individual costs.

Suggested methods of fixing compensatory payments on the basis of the cost of unpriced milk as reflected by prices paid producers are also considered unacceptable. In the absence of price enforcement, it is impossible to determine actual rates of payment by unregulated plants to producers or to know what portion of such payments should be attributed to any particular lot of milk. Producers are normally paid blend prices, which may be influenced if the occasion arises by various unrealistic charges or credits for services or supplies. In any event such prices are probably only averages reflecting usages in fluid and surplus outlets with widely different values.

The only practicable method suggested for dealing with the problem of calculating an appropriate compensatory payment is one based on a recognition of the market values which affect the purchase and sale of unpriced milk. Fully regulated handlers under the order seeking to purchase unregulated milk may be expected to seek out the lowest cost source from which suitable milk is available. In fixing the rate of compensatory payment, it is necessary, therefore, to determine what the lowest cost source may be and to base the payment on the difference between the cost of such milk and the cost of milk priced under the order for similar use.

The record shows that milk supplies are invariably larger in surrounding markets in spring and summer than in fall and winter, and that because of relatively constant sales of fluid milk, the excess or increased production must be marketed largely as manufactured products. Sale for manufacture, therefore, represents the opportunity cost of this surplus milk during the months of flush production since it is the highest price at which the milk can otherwise be sold. The opportunity cost or value will normally be effective in determining the price at which the unregulated plant would sell such milk. Under the foregoing circumstances, the minimum asking price of the unregulated supplier of such milk probably would be the return which he would realize if the milk were disposed of for surplus use. Since considerable volumes of Grade A milk must be disposed of as surplus by various unregulated plants from which Central Arkansas handlers may obtain milk, it is evident that milk could be obtained at prices reflecting its value as surplus.

For the months of January through August, during which period surplus milk may be available in substantial volumes from nonpool sources, it is concluded that the compensatory payment on other source milk or milk products used for Class I sales should be based on the difference between the minimum price of

Class II producer milk and the applicable Class I price under the order. The Class II price established by the order appears to be a fair and economic measure of the value of milk for surplus uses in the Central Arkansas area.

During the months of September through December, when milk supplies tend to be shorter, it is concluded that other source milk will not be available to handlers in the Central Arkansas market at surplus prices. It is concluded that during these months the compensatory payment should be based on the difference between the Class I and the blend prices under the order. Generally speaking, during these months the relationship between the supply of milk in the general area and the demand for such milk will tend to fluctuate considerably from year to year, according to production and demand conditions. It is concluded that these fluctuations will generally tend to be similar in Central Arkansas and surrounding milksheds. Thus, the rate of compensatory payment based on the difference between Class I and blend prices will adjust itself automatically in these months, according to the changes in demand for and prices of outside supplies. If supplies of producer milk are relatively plentiful, unpriced milk can be expected to be cheaper, and therefore, the rate of payment should be somewhat higher. On the other hand, as milk supplies in the area tend to be short, it is to be expected that the cost of unregulated milk will increase. Under these circumstances, the rate of payment will be correspondingly less.

By choosing a rate of compensatory payment which reflects the most economical cost of other source milk which may be expected to be available to regulated handlers, any advantage to one handler relative to the others, in obtaining such milk and substituting it for producer milk in Class I, is removed insofar as administratively possible and no handler is given the clear opportunity to gain an unfair advantage which otherwise would exist.

In calculating the payments on other source milk, the Class I price must relate to and be fixed as of the point where the milk is received from farmers, so as to be properly comparable with minimum class prices which apply to producer milk at that level of marketing. No allowance should be made for subsequent handling costs and profits in this farm level comparison between producer and other source milk because such costs and profits are involved at subsequent stages of marketing of the producer milk as well as other source milk. Prices at subsequent stages of marketing are not regulated by the order either with respect to producer milk or other source milk. No adjustment for location is necessary with respect to the Class II price, or for manufactured milk items for the same reasons described heretofore in connection with the findings concerning the need for location differentials with respect to the producer milk used in Class II outlets.

Testimony in the hearing record concerning availability of milk supplies to Central Arkansas handlers indicates that the rate of payment proposed herein will tend to equalize the competitive position of priced and unpriced milk, and will avoid displacement of producer milk for reasons of cost. However, if experience proves that milk is available to handlers for Class I use in the future at prices different than those now indicated, or that the proposed compensatory payments otherwise interfere with the purposes of the order, then it will be necessary to reconsider the rate of such payment on the basis of that experience.

The rate of payment provided for nonpool plants making distribution directly in the marketing area should be the same as that for pool plants which obtain and use unpriced milk in Class I. The administrative feasibility of any other method of levying compensatory payments and the economics involved are substantially the same as that in the case of unpriced milk used for Class I purposes by pool plants.

The Class I milk price proposed herein is deemed to be in appropriate alignment with other regulated markets. Because of the degree of sales competition between the Memphis and Central Arkansas markets, and because of the proximity of both markets to each other, it was concluded in a previous section discussed herein that the same differentials over the basic formula price should be provided for the Central Arkansas market as for the Memphis market. The pricing formula proposed herein results in the same f. o. b. market price for the two markets when these factors are computed.

It was also indicated in a previous section that the Memphis order contains a supply-demand provision, which adjusts the Class I milk price. It was concluded herein that a supply-demand provision for the Central Arkansas market would not be appropriate at this time because of insufficient marketing data upon which to construct such a provision. In this respect, the Memphis and Central Arkansas prices are not precisely the same. The Memphis supply-demand adjustment has added certain amounts to the Class I price computed pursuant to the basic formula and the Class I differential.

Another factor which determines the price relationship between the two markets is the location differential in each. Evidence in the record justifies a location differential for the Central Arkansas marketing area. This was discussed in a previous section. Location adjustments are not identical for all milk markets operating under Federal regulation. The reason for this, of course, is that the economic factors involved in computing location adjustments are not identical in all markets. The location adjustment deemed appropriate for the Central Arkansas market is not the same as that which is included in the Memphis order.

The record discloses that there is a plant operating in Conway, Arkansas, located approximately 30 miles from the city of Little Rock. This plant is also located in the 60-mile zone within which no location adjustments apply under this proposed order. Conway, Arkansas, is also approximately 150 miles from Memphis. This plant is presently regulated under the Memphis order because a greater portion of this plant's Class I sales is in the Memphis marketing area than is in the proposed Central Arkansas marketing area. The percentage distribution, however, is quite close, being approximately 51 percent in the Memphis marketing area, and 49 percent in the proposed Central Arkansas marketing area.

The action of the Memphis supply-demand adjustment during the first eight months of 1955 increased the Memphis Class I price an average of approximately six cents per hundredweight. The location of the Conway, Arkansas plant with reference to Memphis allows it an adjustment of approximately 28 cents per hundredweight. This location adjustment coupled with the Memphis Class I price adjusted for supply-demand, has resulted during this period in a Class I price approximately twenty-two cents per hundredweight less at Conway, Arkansas, for the handler regulated under the Memphis order than if he were regulated by the order proposed for Central Arkansas.

Normally, reliance is placed upon gaining an appropriate alignment of prices among Federal order markets so that milk may be transferred freely among them. In this particular case, however, an appropriate alignment of prices at the marketing areas necessarily results in a misalignment for the plant at Conway and at other locations in the proposed marketing area.

Consequently, provision must be made so that this plant may not purchase milk for sale as Class I milk on routes in the Central Arkansas area at less than the price paid by other handlers in that area. It is necessary, therefore, to provide that such a handler be required to pay into the producer-settlement fund any amount by which the Central Arkansas Class I price exceeds that charged him under another order for all Class I milk disposed of within the Central Arkansas marketing area. Such handler should also be required to report to the market administrator regularly so that the amount of milk disposed of within the area may be ascertained.

The compensatory payment on milk from another Federal order proposed herein applies specifically to the conditions described above. In addition, there may be plants regulated under Federal orders other than Order 18 selling milk to handlers regulated under the proposed order for Central Arkansas. To the extent that such plants have Class I sales in excess of producer milk, the proposed compensatory payment on unpriced milk should be applicable to such milk to the extent it is marketed for Class I in the Central Arkansas area. The effect of such milk on the market price structure in Central Arkansas would be no different than if the milk were received directly from an unregulated plant by a regulated handler.

(d) *Distribution of proceeds to producers.* Returns from the sale of milk in various classes should be distributed to producers on the basis of a market-wide equalization pool. Such a pool will provide that each producer supplying the market will receive a return based on his pro rata share of the Class I sales of the entire market.

The primary problem of the Central Arkansas market, with respect to pooling, is one of providing a means under the order for facilitating the establishment and maintenance of adequate and regular sources of milk to supply the needs of the market. Under a marketwide pool, the prices set by the order should be effective in determining the level of milk supplies, since the price incentive to producers to supply milk will be allowed to operate freely. Those producers producing milk most efficiently would serve as the source of supply. Additional producers may readily be added if they care to produce milk at the prices prevailing under the order. This will avoid an undesirable situation where producers might be selectively dropped from the market, or others would be denied a market, even though they might be willing to produce and ship milk at the prices being paid.

The record indicates also that some of the excess milk of the market has been marketed by a cooperative association of producers. The producers whose milk was so marketed were needed in the market during most months of the year. The marketwide pool will permit equal sharing of such excess milk among all producers. Class II pricing and pool plant standard provisions proposed herein should assure that all available milk will be offered for Class I sale as needed even though any handler's producer pay price in relation to that of other handlers will not be affected by the use he makes of milk.

The uniform price including base and excess prices which are required to be paid producers under the order should be computed for milk containing 4.0 percent butterfat.

In distributing proceeds to producers, a differential should be applied to recognize differences in value of milk because of variations in butterfat content. The butterfat differential used in making such payments to producers should be calculated at the average of the return from the sale of butterfat in producer milk as reflected by its utilization at class prices. The rate to be used for this purpose would be the average of the Class I and Class II differentials weighted by the proportion of butterfat in producer milk classified in each class. Calculation of the producer butterfat differential in this way does not affect the handlers' cost of milk, but merely prorates returns among producers whose milk differs in butterfat test.

The record indicates that the average butterfat test of producer milk in Central Arkansas exceeds that of Class I sales. The butterfat differentials proposed herein for Class I and Class II milk should tend to encourage the production of milk with butterfat content more in line with the requirements of the market.

Location differentials heretofore discussed should be applied in making payments to producers who deliver their milk to plants located at a distance from the central market. The reduction in price reflects the cost of hauling the milk to market by the most efficient means available. The rates to be applied should be the same as those found necessary for Class I milk.

Payments to producers. The order should provide that each handler make final payment to each producer for milk received at the appropriate uniform price(s) on or before the 15th day after the end of each month. Since it has been the practice in this area for handlers to pay producers semi-monthly, provision has been made for partial payments to producers on or before the last day of each month for milk delivered during the first 15 days of such month at not less than the Class II price per hundredweight, for the preceding month. No adjustment for butterfat content or location is required on such advance payment.

Provision should also be made for the handler, if authorized in writing by the producer, to make proper deductions for goods or services furnished, or for payments made on behalf of the producer.

The order should provide that handlers shall, if so requested, make payment directly to qualified cooperative associations for milk received from producer members of such association. This provision is necessary to enable producer cooperative associations to carry out their essential functions as authorized by the act.

The successful operation of any classified pricing program and of a milk marketing order is dependent in large measure upon the cooperative marketing activity of producers supplying the market.

The collective marketing activities of cooperative associations are of benefit not only to member producers, but also to producers not members of the association who are able to market their milk in a stable and orderly market at prices comparable to those received by association members. Under such marketing conditions, all producers are assured that they will be paid for their fair share of the fluid milk sales. They are assured, also, that their milk will not be displaced with milk purchased from other producers at lower prices than they receive. The stable and orderly marketing conditions which may be achieved and maintained by cooperative action of producers likewise are of benefit to consumers and distributors in that they foster a dependable supply of pure and wholesome milk.

In order for a cooperative association to be able to carry out these functions, it is important that such association have full authority and not be impeded in collective bargaining and in selling milk. In order for a cooperative association to be able to market milk effectively and distribute returns therefrom to producer members, it may be necessary for them to receive payment for such milk. Thus, payments to all members of the association may be made in accordance with the association's pooling program authorized by the act. Under the authority of the Marketing Agreement Act, payments may be received by a cooperative association on behalf of its members for milk caused to be marketed by the association.

The record indicates that a cooperative association representing a majority of the producers supplying Central Arkansas handlers is active in marketing producer milk as Class II during the months of flush production. The milk of these producers is needed to supply the Class I requirements of the market during the fall months. Not all of the milk so marketed may be moved at the Class II price. On other occasions, the cooperative may market milk for Class I use. The activities of the cooperative association in disposing of producer milk may result in financial losses or gains to the association. These activities benefit the entire market through increased stability and maintenance of class prices under the order. However, unless the association is in a position to share any such losses or gains over the entire membership, it will impair the association's ability to continue marketing milk in this way. It would not be practical for the association to maintain an orderly marketing program and keep all members on an equal footing in this respect unless it collects for the milk which it sells for all its members and distributes payments to such members. The association also has members not in the Central Arkansas milkshed. The milk of such members is sold to plants which will not be regulated under the proposed order. Returns on this milk may vary from time to time and may be different than that reflected by the blend price. It may be necessary for the association to be in a position to equalize returns between members who are producers under the order as well as members not selling under the order. This would not be possible unless the association received payment for milk of its members marketed to regulated handlers.

At the time handlers make payment to producers or to cooperative associations for milk they should be required to furnish each such producer or cooperative association with a statement. This statement should show the pounds and butterfat tests of milk received, together with the rate or rates of payment for such milk and a description of any deductions claimed by the handler.

Base and excess plan. A "base and excess" plan of distributing the returns for milk among producers should be employed in connection with the market-wide pool.

Base and excess plans in one form or another are now used generally throughout the milkshed area, although these programs vary somewhat. They have been used as a means to overcome the widespread tendency of milk production to vary widely from one season to the next. Because the rate of fluid milk consumption is comparatively uniform throughout the year it is desirable that an even flow of milk production be achieved which will avoid alternating excesses and shortages of milk.

The base and excess method of distributing milk returns during the months of flush production has been in effect for considerable time in the Central Arkansas area. In spite of this fact production of milk in the area still shows

considerable seasonal variation. Consequently, there is a need for continued incentive to maintain production in the fall and winter months relative to spring and summer levels. Abandonment of the base-excess plan at this time might result in increased seasonality of production to the detriment of the market.

By providing returns related directly to a producer's ability to deliver additional milk in the fall and winter, as compared with deliveries during the season of flush production, a production pattern more closely fitted to the sales pattern of fluid milk products is encouraged.

The base-excess plan proposed herein would establish for each producer in the market a base equal to his average daily deliveries of milk during the months of September through December (total deliveries of milk by such producer to all handlers divided by the number of days in the period). Although the order will not be effective during the month of September, 1955, it is desirable that the base program operate as fully as possible this coming fall and winter. For this reason, it is designated that the base forming period extend from October 1955 through January 1956, and the months of September through December thereafter.

For each of the months of February through July, separate uniform prices for "base milk" and "excess milk" would be computed so that Class I sales would first be allocated to "base milk." A producer's base milk for any of these months would be that quantity of milk he delivered during the month which is not in excess of his average daily base multiplied by the number of days in the month. The base price would reflect the sale value of such milk at class prices with Class I sales assigned first to the base milk and then to excess milk. The "excess milk" price would be the minimum order Class II price unless Class I sales exceed base milk in which case such excess sale of Class I milk would be reflected in an excess blend price.

It was proposed at the hearing that the base operating period, during which payment for milk would be pooled separately for base and excess milk, be extended to eight months. It is concluded that a base operating period which covers the months of February through July is sufficient to accommodate the needs of the market. Surplus milk is not available in sufficient quantities during the additional two months to justify extension of the base plan to such months. Also, under the proposed plan needed flexibility will be provided. Omission of August from the base operating period will allow time for producers to adjust their production programs in advance of the fall shortage months, without being influenced by the base plan operating during this month. Also, limitation of the base forming period to fewer months gives added incentive to increase production during the more critical months of short supply. The proposed months for establishing bases (September through December) are normally those of relatively low production in relation to fluid sales.

A producer should be permitted to transfer his entire base to any other dairy farmer so long as the transfer is made as of the first of the month and with advance notice. This will alleviate hardship and will not defeat the purpose of the base-excess plan, which is to encourage level production. Under the base plan the producer has an incentive to increase fall and winter production so he may enjoy a larger share of the Class I market during the following season of high production. Transfer of bases, as proposed herein, will give added assurance to a producer that he will have the full benefit of any base he is able to build, whether or not he is able to continue milk production for his own account through the following spring. This additional certainty should increase the effectiveness of the base-excess plan in encouraging production of milk during the base forming period.

Free transfer of bases was proposed to alleviate possible hardship cases which may arise when a dairyman needs to discontinue milk production before the end of the base operating period. Permission for transfer of entire bases will accomplish this purpose. The hearing record discloses no need for transfer of partial bases in the Central Arkansas area. Permission for transfer of partial bases would result in considerable administrative difficulty, and would tend to defeat one purpose of the base-excess plan, namely, the encouragement to each producer to adjust his own production pattern to the Class I milk sales pattern of the market. Also, partial transfers would facilitate arrangements whereby producers might attempt to gain regular financial advantage by disposing of any portion of their base which they could not use themselves. Splitting of jointly held bases should not be permitted since such splitting in conjunction with the free transfer provision could readily be used to effectuate transfer of partial bases. Either partner should be allowed to take over an entire base jointly held.

Bases should be transferred by the market administrator only as of the first of the month, and only upon advance receipt of a statement, on approved forms, indicating the holder of such base and the person to whom the base is to be transferred, and signed by both parties.

It was proposed that a cooperative association be assigned the collective base of its members so that such base might be pooled. Under this arrangement any under-base deliveries by one member could be used to benefit other members who delivered over-base milk.

This proposal does not conform with the primary purpose of the base rating plan, namely to encourage even production. There is little reason to believe that any individual producer member of an association would make a serious effort to increase fall production solely for the benefit of the other members. Nor does the fact that other members would receive base prices for over-base deliveries appear to give them added incentive to level production. It might in fact have the opposite effect.

The order should provide that the market administrator will notify each producer, and the handler to whom he is currently selling milk, of the amount of his daily base on or before January 25 of each year. The daily base established by each producer will be calculated by the market administrator from handlers' payroll records.

(e) *Other administrative provisions.* Certain other provisions should be included in the order to carry out administratively the purposes of the regulation.

In addition to the definitions discussed earlier in this decision which define the scope of the regulation, certain other terms and definitions are desirable in the interest of brevity and to assure that each usage of the term implies the same meaning. Definitions for base and excess milk are included. Such other terms as are defined in the attached order are common to many other Federal milk orders.

Market administrator. Provision should be made for the appointment by the Secretary of an agency known as the market administrator to administer the order, and setting forth the powers and duties for such agency.

Records and reports. Provisions should be included in the order for the purpose of requiring handlers to maintain adequate records of their operations and to make certain reports as necessary to carry out the classification and pricing of milk. Time limits must be prescribed for filing such reports and for making payments to producers. Dates must also be established for the announcement of prices by the market administrator. The following schedule will afford interested parties adequate time to perform the indicated function:

Day of Month and Function

5th—Announcement by market administrator of the Class I price and Class I butterfat differential for the current month.

5th—Announcement by the market administrator of Class II price and Class II butterfat differential for preceding month.

7th—Monthly report to the market administrator, by handlers, of sources and utilization of skim milk and butterfat for the preceding month.

7th—Handlers report to cooperatives to which payments are to be made, the pounds of milk and butterfat content thereof received daily, from member producers, and total for the month and the amount and nature of deductions made.

11th—Announcement by market administrator of uniform price and the producer butterfat differential for the preceding month.

12th—Report by the market administrator to cooperative association the percentage of producer milk delivered by members which was used in each class by the handler receiving such milk.

15th—Final payments by handlers to producers for milk received during preceding month and payments for marketing services.

20th—Submission of producer payroll report by handlers for preceding month.

25th—Report by handlers of the amount of milk received from producers during the first 15 days of the month.

Last—Partial payments to producers for milk received during first 15 days of the month.

Handlers should maintain and make available to the market administrator all records and accounts of their operations, together with facilities which are necessary to determine the accuracy of information reported to the market administrator, or any other information upon which the classification of producer milk depends. The market administrator must likewise be permitted to check the accuracy of weights and tests of milk and milk products received and handled, and to verify all payments required under the order.

In addition to the regular reports required of handlers, provision is made for handlers to notify the market administrator of their intention to import other source milk, and to divert producer milk. Such information, on a marketwise basis, may assist handlers in locating local sources of producer milk, and expedite the transfer of such milk among handlers. Advance information concerning diversions will facilitate check testing and weighing of producer milk at the location where received.

It is necessary that handlers retain records which prove the utilization of milk and to establish that proper payments were made producers. Since the books and records of all handlers cannot be completed or audited immediately after the milk has been delivered to a plant, it therefore becomes necessary to keep such records for a reasonable period of time.

The order should provide limitations on the period of time handlers shall be required to retain such books and records and on the period of time in which obligations under the order shall terminate. Provision made in this regard is identical in principle with the general amendment made to all milk orders in operation on July 30, 1947, following the Secretary's decision of January 26, 1949 (14 F. R. 444). That decision covering the retention of records and limitation of claims is equally applicable in this situation and is adopted as a part of this decision.

Producer-settlement fund. Provision should be made in the order for the establishment of a producer-settlement fund. Such fund is necessary for clearing payments between handlers in connection with marketwide equalization of utilization. Money received from handlers with higher than average Class I utilization and paid to those with utilization below average should move through the fund en route to producers.

A small balance should be retained in the fund to permit clearing of accounts with handlers in connection with audit adjustments discovered during the month.

Expense of administration. Each handler should be required to pay the market administrator, as his pro rata share of the cost of administering the order, not more than 4 cents per hundredweight, or such lesser amount as the Secretary may, from time to time, prescribe, on (a) producer milk (including such handler's own production), (b) other source milk in a pool plant which is classified Class I milk, and (c) Class I milk disposed of in the marketing area from a nonpool plant.

The market administrator must have sufficient funds to enable him to administer properly the terms of the order. The act provides that such cost of administration shall be financed through an assessment on handlers. One of the duties of the market administrator is to verify the receipts and disposition of milk from all sources. The record indicates that other source milk is received by most handlers to supplement local producer supplies of milk. Equity in sharing the cost of administration of the order among handlers will be achieved, therefore, by applying the administrative assessment to all producer milk (including handlers' own production) and other source milk allocated to Class I milk.

Plants not subject to the classification and pricing provisions of the order may distribute Class I milk in the marketing area. These plants must be checked periodically to verify their status under the order and to check the accuracy of compensatory payments required. Assessment of administrative expense with respect to such milk sold in the marketing area will help to defray the costs of such periodic checks.

In view of the anticipated volume of milk and the costs of administering orders in markets of comparable circumstances, it is concluded that an initial rate of 4 cents per hundredweight is necessary to meet the expenses of administration. Provision should be made to enable the Secretary to reduce the rate of assessment below the initial rate of 4 cents per hundredweight without necessitating an amendment to the order. This should be done at any time experience in the market reveals that a lesser rate will produce sufficient revenue to administer the order properly.

Marketing services. A provision should be included in the order for furnishing marketing services to producers, such as verifying tests and weights and furnishing market information. These should be provided by the market administrator and the cost should be borne by the producer receiving the service. If a cooperative association is performing such services for any member producers and is approved for such activities by the Secretary, the market administrator may accept this in lieu of his own service.

There is need for a marketing service program in connection with the administration of an order in this area. Orderly marketing will be promoted by assuring individual producers that payments received for their milk are based on the pricing provisions of the order, and reflect accurate weights and tests of such milk. To accomplish this fully, it is necessary that the butterfat tests and weights of individual producer deliveries of milk as reported by the handler be verified for accuracy.

An important phase of the marketing service program is to furnish producers with current market information. As previously discussed, detailed information regarding market conditions is not now regularly available either to producers or to cooperative associations. Efficiency in the production, utilization and marketing of milk will be promoted by the dissemination of current information on a marketwide basis to all producers.

To enable the market administrator to furnish such service, provision should be made for a maximum deduction of 5 cents per hundredweight with respect to receipts of milk from producers for whom he renders marketing service. Comparison of the number and distribution of the plants involved, and the volume of milk at such plants with similar conditions in several other markets in the area now under Federal regulation, leads to the conclusion that this will reflect the maximum cost of such service. If later experience indicates that marketing service can be performed at a lesser rate, provision is made for the Secretary to adjust the rate downward without the necessity of a hearing.

General findings. (a) The proposed marketing agreement and the order, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Order of the Secretary directing that a referendum be conducted among the producers supplying milk to the Central Arkansas Marketing Area; determination of representative period and designation of an agent to conduct such referendum. Pursuant to section 8 (c) (19) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608 (c) (19)), it is hereby directed that a referendum be conducted among producers (as defined in the proposed order regulating the handling of milk in the Central Arkansas marketing area) who, during the month of August 1955, were engaged in the production of milk for sale in the marketing area specified in the aforesaid proposed order to determine whether such producers favor the issuance of the order which is a part of the decision of the Secretary of Agriculture filed herewith.

The month of August 1955, is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order regulating the handling of milk in the Central Arkansas marketing area in the manner set forth in the attached order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such marketing order.

Hobart E. Crone is hereby designated agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 577), such referendum to be com-

pleted on or before the 20th day from the date this referendum order is issued.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled respectively, "Marketing Agreement Regulating the Handling of Milk in the Central Arkansas Marketing Area," and "Order Regulating the Handling of Milk in the Central Arkansas Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order which will be published with this decision.

This decision filed at Washington, D. C., this 7th day of October 1955.

[SEAL] EARL L. BUTZ,
Assistant Secretary.

Order[1] Regulating the Handling of Milk in the Central Arkansas Marketing Area

Sec.
908.0 Findings and determinations.

DEFINITIONS

908.1 Act.
908.2 Secretary.
908.3 Department of Agriculture.
908.4 Central Arkansas Marketing Area.
908.5 Person.
908.6 Producer.
908.7 Approved plant.
908.8 Distributing plant.
908.9 Supply plant.
908.10 Pool plant.
908.11 Nonpool plant.
908.12 Handler.
908.13 Cooperative association.
908.14 Producer-handler.
908.15 Producer milk.
908.16 Fluid milk product.
908.17 Other source milk.
908.18 Base milk.
908.19 Excess milk.
908.20 Chicago butter price.

MARKET ADMINISTRATOR

908.25 Designation.
908.26 Powers.
908.27 Duties.

REPORTS, RECORDS AND FACILITIES

908.30 Reports of sources and utilization.
908.31 Other reports.
908.32 Records and facilities.
908.33 Retention of records.

CLASSIFICATION OF MILK

908.40 Skim milk and butterfat to be classified.
908.41 Classes of utilization.
908.42 Responsibility of handlers.
908.43 Transfers.
908.44 Computation of skim milk and butterfat in each class.
908.45 Allocation of skim milk and butterfat classified.

MINIMUM PRICES

908.50 Basic formula price.
908.51 Class prices.
908.52 Butterfat differentials to handlers.
908.53 Location differential to handlers.
908.54 Rate of compensatory payments on unpriced milk.

APPLICATION OF PROVISIONS

908.60 Producer-handlers.
908.61 Plants subject to other Federal orders.
908.62 Handlers operating nonpool plants.

DETERMINATION OF PRICES TO PRODUCERS

908.70 Computation of the value of producer milk for each handler.
908.71 Computation of the uniform price.
908.72 Computation of uniform prices for base milk and excess milk.
908.73 Butterfat differential to producers.
908.74 Location differential to producers.
908.75 Notification of handlers.

PAYMENTS

908.80 Time and method of payment for producer milk.
908.81 Producer-settlement fund.
908.82 Payments to the producer-settlement fund.
908.83 Payments out of the producer-settlement fund.
908.84 Adjustment of accounts.
908.85 Marketing services.

DETERMINATION OF BASE

908.90 Computation of daily average base for each producer.
908.91 Base rules.
908.92 Announcement of established bases.

EFFECTIVE TIME, SUSPENSION, OR TERMINATION

908.100 Effective time.
908.101 Suspension or termination.
908.102 Continuing obligations.
908.103 Liquidation.

MISCELLANEOUS PROVISIONS

908.110 Agents.
908.111 Separability of provisions.

AUTHORITY: §§ 908.0 to 908.111 issued under sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c.

§ 908.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and order, regulating the handling of milk in the Central Arkansas marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order and all of the terms and conditions thereof will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

(4) All milk and milk products handled by handlers, as defined in this order, are in the current of interstate commerce or directly burden, obstruct or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expenses of the market administrator for the maintenance and functioning of such agency will require the payment by each handler as his pro rata share of such expenses, 4 cents per hundredweight, or such amount not exceeding 4 cents per hundredweight, as the Secretary may prescribe with respect to all butterfat and skim milk contained in (i) producer milk, (ii) other source milk allocated to Class I milk pursuant to § 908.41 (a), or (iii) Class I milk disposed of in the marketing area (except to a pool plant) from a nonpool plant as determined pursuant to § 908.62.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Central Arkansas marketing area shall be in conformity to and in compliance with the following terms and conditions:

DEFINITIONS

§ 908.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as re-enacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 908.2 *Secretary.* "Secretary" means the Secretary of Agriculture or any officer or employee of the United States who is authorized to exercise the powers or to perform the duties of the Secretary of Agriculture.

§ 908.3 *Department of Agriculture.* "Department of Agriculture" means the United States Department of Agriculture, or such other Federal agency as may be authorized to perform the price reporting functions specified in this part.

§ 908.4 *Central Arkansas Marketing Area.* "Central Arkansas Marketing Area" hereinafter called the "Marketing Area" means all territory included within the boundaries of the counties of Pulaski, Jefferson, Faulkner, White, Clark and Garland, all in the State of Arkansas.

§ 908.5 *Person.* "Person" means any individual, partnership, corporation, association or other business unit.

§ 908.6 *Producer.* "Producer" means any person other than a producer-handler, who produces milk in compliance with Grade A inspection requirements of a duly constituted health authority which milk is received during the month at a pool plant: *Provided,* That if such milk is diverted from a pool plant by a handler to a nonpool plant for his account any day during the months of February through August, or on not more than 10 days during any other month, the milk so diverted shall be deemed to have been received at a pool plant at the location of the plant from which diverted.

§ 908.7 *Approved plant.* "Approved plant" means all of the buildings, premises and facilities of a plant (a) in which milk or skim milk is processed or packaged and from which any fluid milk product is disposed of during the month on routes (including routes operated by vendors and sales through plant stores) to wholesale or retail outlets (except pool plants) located in the marketing area, or (b) from which milk or skim milk eligible for distribution in the marketing area under a Grade A label is shipped during the month to a distributing plant.

§ 908.8 *Distributing plant.* "Distributing plant" means an approved plant from which Class I milk equal to not less than 50 percent of its receipts of producer milk and fluid milk products from other pool plants is disposed of during the month, on routes or through plant stores, to wholesale or retail outlets (except pool plants) and from which Class I milk equal to not less than 10 percent of such receipts is disposed of during the month on routes or through plant stores, to wholesale or retail outlets (except pool plants) located in the marketing area.

§ 908.9 *Supply plant.* "Supply plant" means an approved plant from which fluid milk products equal to not less than 50 percent of its receipts of producer milk during the month are shipped during such month to distributing plants: *Provided,* That any plant which qualifies as a supply plant for each of the months during the period August through January shall, upon written application to the market administrator, on or before the end of such period, be designated as a supply plant for the following months of February through July.

§ 908.10 *Pool plant.* "Pool plant" means a distributing plant, or a supply plant, except a plant of a producer-handler.

§ 908.11 *Nonpool plant.* "Nonpool plant" means any milk, manufacturing or processing plant other than a pool plant.

§ 908.12 *Handler.* "Handler" means: (a) A cooperative association with respect to milk of producers diverted for the account of such association from a pool plant to a nonpool plant in accordance with the provisions of § 908.6; or

(b) Any person in his capacity as the operator of one or more approved plants: *Provided,* That if a person operates more than one pool plant he may, upon written application to the market administrator, be considered as a separate handler for the month with respect to one or more of his pool plants if no fluid milk products or producers are transferred during the month between such plant(s) and other pool plant(s) of such handler.

§ 908.13 *Cooperative association.* "Cooperative association" means any cooperative association of producers which the Secretary determines:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have and to be exercising full authority in the sale of milk of its members.

§ 908.14 *Producer-handler.* "Producer-handler" means any person who operates a dairy farm and a distributing plant which during the month has no other source milk or producer milk.

§ 908.15 *Producer milk.* "Producer milk" means only that skim milk or butterfat contained in milk (a) received at the plant directly from producers, or (b) diverted from a pool plant to a nonpool plant (except a nonpool plant which is fully subject to the pricing provisions of another order issued pursuant to the act), in accordance with the provisions of § 908.6.

§ 908.16 *Fluid milk product.* "Fluid milk product" means milk, skim milk, buttermilk, flavored milk, flavored milk drinks, yogurt, cream, or any mixture in fluid form of milk, skim milk and cream (except sterilized products packaged in hermetically sealed containers, eggnog, ice cream mix and aerated cream).

§ 908.17 *Other source milk.* "Other source milk" means all skim milk and butterfat contained in: (a) Receipts during the month of fluid milk products except (1) fluid milk products received from pool plants, or (2) producer milk; and (b) products, other than fluid milk products, from any source (including those produced at the plant) which are reprocessed or converted to another product in the plant during the month.

§ 908.18 *Base milk.* "Base milk" means milk received at pool plants from a producer during any of the months of February through July which is not in excess of such producer's daily average base computed pursuant to § 908.90 multiplied by the number of days in such month.

§ 908.19 *Excess milk.* "Excess milk" means milk received at pool plants from a producer during any of the months of February through July which is in excess of the base milk of such producer for such month, and shall include all milk received during such months from a producer for whom no daily average base can be computed pursuant to § 908.90.

§ 908.20 *Chicago butter price.* "Chicago butter price" means the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any range as one price) per pound of 92-score bulk creamery butter at Chicago as reported during the month by the Department of Agriculture.

MARKET ADMINISTRATOR

§ 908.25 *Designation.* The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 908.26 *Powers.* The market administrator shall have the following powers with respect to this part:

(a) To Administer its terms and provisions;

(b) To make rules and regulations to effectuate its terms and provisions;

(c) To receive, investigate, and report to the Secretary complaints of violations; and

(d) To recommend amendments to the Secretary.

§ 908.27 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including, but not limited to the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon his duties, and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds received pursuant to § 908.86: (1) The cost of his bond and of the bonds of his employees, (2) his own compensation, and (3) all other expenses (except those incurred under § 908.85) necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this section, and, upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Publicly disclose to handlers and producers, at his discretion, unless otherwise directed by the Secretary, the name of any handler who, after the date on which he is required to perform such acts, has not made reports pursuant to §§ 908.30 and 908.31 or payments pursuant to §§ 908.80 through 908.86.

(g) Submit his books and records to examination by the Secretary and fur-

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

nish such information and reports as may be requested by the Secretary;

(h) On or before the 12th day after the end of each month, report to each cooperative association which so requests, the percentage of producer milk delivered by members of such association which was used in each class by each handler receiving such milk. For the purpose of this report the milk so received shall be prorated to each class in accordance with the total utilization of producer milk by such handler;

(i) Verify all reports and payments of each handler by audit of the records of such handler or any other handler or person to whom skim milk and butterfat are transferred, or by such other means as are necessary.

(j) Prepare and make available for the benefit of producers, consumers, and handlers, general statistics and information concerning the operation of this order which do not reveal confidential information; and

(k) On or before the date specified publicly announce, and mail to each handler at his last known address a notice of the following:

(1) The 5th day of each month, the Class I milk price and the Class I butterfat differential, both for the current month; and the Class II milk price, and the Class II butterfat differential; both for the preceding month;

(2) The 11th day of each month, the uniform price, and the producer butterfat differential, both for the preceding month.

REPORTS, RECORDS AND FACILITIES

§ 908.30 *Reports of sources and utilization.* On or before the 7th day after the end of each month each handler, except a producer-handler, shall report for each of his approved plants for such month to the market administrator in the detail and on forms prescribed by the market administrator as follows:

(a) The quantities of skim milk and butterfat contained in:

(1) Producer milk;

(2) Fluid milk products received from other pool plants;

(3) Other source milk;

(4) Inventories of fluid milk products on hand at the beginning of the month; and

(b) The utilization of all skim milk and butterfat required to be reported pursuant to paragraph (a) of this section, including separate statements as to the disposition of Class I milk outside the marketing area, and inventories of fluid milk products on hand at the end of the month.

§ 908.31 *Other reports.* (a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe.

(b) Each handler, except a producer-handler, shall report to the market administrator in the detail and on forms prescribed by the market administrator:

(1) On or before the 7th day of each of the months of March through August the aggregate quantity of base milk received at his pool plant(s) for the preceding month;

(2) On or before the 20th day after the end of the month, for each of his pool plants, his producer payroll for such month which shall show for each producer: (i) His name and address, (ii) the total pounds of milk received from such producer, including, for the months of February through July, the pounds of base milk, (iii) the days for which milk was received from such producer, if less than the entire month, (iv) the average butterfat content of such milk, and (v) the net amount of such handler's payment to the producer, together with the price paid and the amount and nature of any deductions;

(3) On or before the first day other source milk is received in the form of a fluid milk product at his pool plant(s), his intention to receive such product, and on or before the last day such product is received, his intention to discontinue receipt of such product;

(4) On or before the day prior to diverting producer milk pursuant to § 908.6 his intention to divert such milk, the date or dates of such diversion and the nonpool plant to which such milk is to be diverted; and

(5) Such other information with respect to his sources and utilization of butterfat and skim milk as the market administrator may prescribe.

§ 908.32 *Records and facilities.* Each handler shall maintain and make available to the market administrator during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data for each month with respect to:

(a) The receipt and utilization of all skim milk and butterfat handled in any form;

(b) The weights and tests for butterfat and other content of all products handled;

(c) The pounds of skim milk and butterfat contained in or represented by all items of products on hand at the beginning and end of each month; and

(d) Payments to producers, including any deductions authorized by producers, and disbursement of money so deducted.

§ 908.33 *Retention of records.* All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION OF MILK

§ 908.40 *Skim milk and butterfat to be classified.* The skim milk and butterfat to be reported for pool plants pursuant to § 908.30 (a) shall be classified each month by the market administrator, pursuant to the provisions of §§ 908.41 through 908.45.

§ 908.41 *Classes of utilization.* Subject to the conditions set forth in §§ 908.42 through 908.45, the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat; (1) disposed of from the plant in the form of fluid milk products, except those classified pursuant to paragraph (b) (3) of this section, and (2) not specifically accounted for as Class II milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat: (1) Used to produce any product other than a fluid milk product; (2) contained in inventories of fluid milk products on hand at the end of the month; (3) disposed of as skim milk and used for livestock feed; and (4) in shrinkage not to exceed 2 percent respectively of the skim milk and butterfat contained in producer milk (except that diverted pursuant to § 908.6) and other source milk: *Provided*, That if shrinkage of skim milk or butterfat is less than such 2 percent, it shall be assigned pro rata to the skim milk or butterfat contained in producer milk (except that diverted pursuant to § 908.6) and other source milk respectively.

§ 908.42 *Responsibility of handlers.* All skim milk and butterfat to be classified pursuant to this part shall be classified Class I milk, unless the handler who first receives such skim milk and butterfat establishes to the satisfaction of the market administrator that it should be classified Class II milk.

§ 908.43 *Transfers.* (a) Skim milk and butterfat transferred to a pool plant of another handler (except a producer-handler) in the form of fluid milk products shall, to the extent required, be classified so as to result in the maximum assignment of the producer milk of both handlers to Class I milk. Any additional amounts of skim milk and butterfat shall be classified Class I milk, unless the operators of both plants claim utilization thereof in Class II milk in their reports submitted pursuant to § 908.30: *Provided*, That the skim milk or butterfat so assigned to Class II milk for any month shall be limited to the respective amounts thereof remaining in Class II milk for such month at the pool plant(s) of the receiving handler after the subtraction of other source milk pursuant to § 908.45.

(b) Skim milk and butterfat transferred to the plant of a producer-handler in the form of fluid milk products, shall be classified Class I milk.

(c) Skim milk and butterfat transferred or diverted in bulk form as milk or skim milk to a nonpool plant from which no fluid milk products are distributed on routes and which is located less than 250 miles by the shortest hard surfaced highway distance, as determined by the market administrator, from

the plant from which transferred or diverted shall be classified Class I milk unless, (1) the transferring or diverting handler claims classification in Class II milk in his report submitted to the market administrator pursuant to § 908.30 for the month within which such transaction occurred, (2) the operator of the nonpool plant maintains books and records showing the utilization of all skim milk and butterfat at such plant which are made available if requested by the market administrator for the purpose of verification, and (3) not less than an equivalent amount of skim milk and butterfat was actually utilized in the nonpool plant in the use indicated in such report: *Provided*, That if it is found that an equivalent amount of skim milk and butterfat was not actually used in such plant during the month in such indicated use, the pounds transferred in excess of such actual use shall be classified Class I milk.

(d) Skim milk and butterfat transferred in bulk form as cream to a nonpool plant shall be classified Class I milk unless, (1) the transferring handler claims classification in Class II milk in his report submitted to the market administrator pursuant to § 908.30, (2) the handler attaches tags or labels to each container of such cream bearing the words "for manufacturing uses only," (3) the handler gives the market administrator sufficient notice to allow him to verify such Class II disposition in advance, (4) the operator of the nonpool plant maintains books and records showing the utilization of all skim milk and butterfat at such plant which are made available if requested by the market administrator for the purpose of verification, and (5) such cream is not disposed of by the transferee under Grade A label.

§ 908.44 *Computation of skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and other obvious errors, the reports submitted by each handler pursuant to § 908.30 and compute the total pounds of skim milk and butterfat respectively, in Class I milk and Class II milk at all of the pool plants of such handler: *Provided*, That the skim milk contained in any product utilized, produced or disposed of by the handler during the month shall be considered to be an amount equivalent to the nonfat milk solids contained in such product, plus all of the water originally associated with such solids.

§ 908.45 *Allocation of skim milk and butterfat classified.* (a) The pounds of skim milk remaining in each class after making the following computations each month with respect to the pool plant(s) of each handler, shall be the pounds of skim milk in such class allocated to the producer milk of such handler for such month.

(1) Subtract from the total pounds of skim milk in Class II milk the shrinkage of skim milk in producer milk classified as Class II milk pursuant to § 908.41 (b);

(2) Subtract from the pounds of skim milk remaining in Class II milk the pounds of skim milk in other source milk except that to be subtracted pursuant to subparagraph (3) of this paragraph: *Provided*, That if the pounds of skim milk to be subtracted exceed the remaining pounds of skim milk in Class II milk, the balance shall be subtracted from the pounds of skim milk in Class I milk;

(3) Subtract from the pounds of skim milk remaining in Class II milk the pounds of skim milk in fluid milk products received in bulk from plants regulated pursuant to other orders issued pursuant to the act, less any equivalent amounts of skim milk in other source milk allocated to Class I milk at each of such plants respectively: *Provided*, That, if the pounds of skim milk to be subtracted exceed the remaining pounds of skim milk in Class II milk, the balance shall be subtracted from the pounds of skim milk in Class I milk.

(4) Subtract from the pounds of skim milk remaining in Class II milk the pounds of skim milk contained in inventory of fluid milk products on hand at the beginning of the month: *Provided*, That if the pounds of skim milk in such inventory exceed the remaining pounds of skim milk in Class II milk, the balance shall be subtracted from the pounds of skim milk remaining in Class I milk;

(5) Subtract the pounds of skim milk in fluid milk products received from pool plants of other handlers from the pounds of skim milk remaining in the class to which assigned, pursuant to § 908.43 (a);

(6) Add to the pounds of skim milk remaining in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph;

(7) If the pounds of skim milk remaining in all classes exceed the pounds of skim milk in milk received from producers, subtract such excess from the pounds of skim milk remaining in the various classes in series beginning with Class II milk.

(b) Determine the pounds of butterfat in each class to be allocated to producer milk in the manner prescribed in paragraph (a) of this section for determining the allocation of skim milk to producer milk.

(c) Add the pounds of skim milk and the pounds of butterfat in each class calculated pursuant to paragraphs (a) and (b) of this section and determine the percentage of butterfat in the producer milk allocated to each class.

MINIMUM PRICES

§ 908.50 *Basic formula price.* The highest of the prices computed pursuant to paragraphs (a), (b) and (c) of this section, rounded to the nearest whole cent, shall be known as the basic formula price.

(a) To the average of the basic (or field) prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture:

Present Operator and Location

Borden Company, Mount Pleasant, Mich.
Borden Company, New London, Wis.
Borden Company, Orfordville, Wis.
Carnation Company, Oconomowoc, Wis.
Carnation Company, Richland Center, Wis.
Carnation Company, Sparta, Mich.
Pet Milk Company, Belleville, Wis.
Pet Milk Company, Coopersville, Mich.
Pet Milk Company, Hudson, Mich.
Pet Milk Company, New Glarus, Wis.
Pet Milk Company, Wayland, Mich.
White House Milk Company, Manitowoc, Wis.
White House Milk Company, West Bend, Wis.

Add an amount computed by multiplying the Chicago butter price for the month by 0.6.

(b) The price computed by adding together any plus values computed pursuant to subparagraphs (1) and (2) of this paragraph:

(1) Multiply the Chicago butter price by 4.8;

(2) Deduct five cents from the simple average as computed by the market administrator of the weighted averages of carlot prices per pound of nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the preceding month through the 25th day of the current month by the Department of Agriculture, and multiply by 7.5.

(c) The price resulting from the following calculations:

(1) Multiply by 8.53 the average of the daily prices per pound of cheese at Wisconsin primary markets ("cheddars," f. o. b. Wisconsin assembly points, cars or truckloads) as reported by the Department of Agriculture during the month;

(2) Add 0.902 times the Chicago butter price for the month;

(3) Subtract 34.3 cents; and

(4) Add an amount computed by multiplying the Chicago butter price for the month by 0.6.

§ 908.51 *Class prices.* Subject to the provisions of §§ 908.52 and 908.53, the class prices per hundredweight of milk containing 4.0 percent butterfat shall be determined for each month as follows:

(a) *Class I milk price.* The Class I milk price shall be the basic formula price for the preceding month, plus $1.28 from the effective date hereof through August 1955, and for the months of March through August 1956; and plus $1.68 for the months of September 1955 through February 1956.

(b) *Class II milk price.* For the months of February through July the Class II milk price shall be the price determined pursuant to subparagraph (1) of this paragraph rounded to the nearest cent. For all other months it shall be the basic formula price, or the price determined pursuant to subparagraph (1) of this paragraph, plus 25 cents, whichever is less.

(1) The average of the basic (or field) prices reported to have been paid or to be paid per hundredweight for milk of 4.0 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture on or before the 5th day after the end of the month.

Present Operator and Location

Sugar Creek Creamery, Russellville, Ark.
Ozark Creamery Co., Ozark, Ark.
Pet Milk Co., Siloam Springs, Ark.

§ 908.52 *Butterfat differential to handlers.* For milk containing more or less than 4.0 percent butterfat, the class prices calculated pursuant to §908.51 shall be increased or decreased, respectively, for each one-tenth percent butterfat at the appropriate rate determined as follows:

(a) *Class I price.* Multiply the Chicago butter price for the previous month by 0.12;

(b) *Class II price.* Multiply the Chicago butter price for the month by 0.11 for the months of February through July, and by 0.115 for all other months.

§ 908.53 *Location differentials to handlers.* For that milk which is received from producers at a pool plant located 60 miles or more from the city limits of Benton, Arkansas, by shortest highway distance, as determined by the market administrator, and which is transferred to another pool plant in the form of fluid milk products and assigned to Class I milk pursuant to the proviso of this section, or otherwise classified as Class I milk, the price specified in § 908.51 (a) shall be reduced at the rate of 1.5 cents for each 10 miles or residual fraction thereof that such plant is from such city limits where such milk is received from producers: *Provided,* That for the purpose of calculating such location differential, fluid milk products which are transferred betwen pool plants shall be assigned to any remainder of Class II milk in the plant to which transferred after making the calculation prescribed in § 908.45 (a) (1) through (4), and the comparable steps in paragraph (b) thereof for such plant, such assignment to the transferring plants to be made in sequence according to the location differential applicable at each plant, beginning with the plant having the largest differential.

§ 908.54 *Rate of compensatory payments on unpriced milk.* The rate of compensatory payment per hundredweight shall be calculated as follows:

(a) For the months of February through July, subtract the Class II milk price, adjusted by the Class II butterfat differential, from the Class I milk price, adjusted by the Class I butterfat differential and in the case of fluid milk products by the Class I location differential.

(b) For the months of August through January, subtract the uniform or the weighted average of the base and excess prices to producers from the Class I milk price.

APPLICATION OF PROVISIONS

§ 908.60 *Producer-handlers.* Sections 908.40 through 908.45; 908.50 through 908.53; 908.61, 908.62 and 908.70 through 908.75; and 908.80 through 908.87 shall not apply to a producer-handler.

§ 908.61 *Plants subject to other Federal orders.* A plant specified in paragraphs (a) or (b) of this section shall be a nonpool plant for purposes of this order except that the operator of such plant shall, with respect to the total receipts and utilization or disposition of skim milk and butterfat at the plant, make reports to the market administrator at such time and in such manner as the market administrator may require (in lieu of the reports required pursuant to § 908.30), and allow verification of such reports by the market administrator.

(a) Any distributing plant which would otherwise be subject to the classification and pricing provisions of another order issued pursuant to the act, unless a greater volume of Class I milk was disposed of from such plant during the six months period immediately preceding to retail or wholesale outlets (except pool plants or nonpool plants) in the Central Arkansas marketing area than in the marketing area regulated pursuant to such other order.

(b) Any supply plant which would otherwise be subject to the classification and pricing provisions of another order issued pursuant to the act, unless such plant qualified as a pool plant for each of the preceding months of August through January.

(c) In case skim milk or butterfat, which is priced under Federal Order No. 18 for the Memphis, Tennessee, marketing area, is disposed of as Class I milk in the marketing area on a route operated by or for a person subject to regulation as a handler defined in such order, and the price which such handler is required to pay under Federal Order No. 18 for milk which would be classified as Class I milk under this part, is less than the Class I price provided by this part, such handler shall pay to the market administrator for deposit into the producer-settlement fund (with respect to all milk disposed of as Class I milk on routes in the marketing area) an amount equal to the difference between the value as determined pursuant to this part and its value as determined pursuant to Federal Order No. 18.

§ 908.62 *Handlers operating nonpool plants.* Each handler who is the operator of a nonpool plant which is not subject to the classification and pricing provisions of another order issued pursuant to the act, shall, on or before the 15th day after the end of each month, pay to the market administrator for deposit into the producer-settlement fund an amount calculated by multiplying the total hundredweight of butterfat and skim milk disposed of in the form of fluid milk products from such nonpool plant to retail or wholesale outlets (including deliveries by vendors and sales through plant stores) in the marketing area during the month, by the rate of compensatory payment calculated pursuant to § 908.54.

DETERMINATION OF PRICES TO PRODUCERS

§ 908.70 *Computation of the value of producer milk for each handler.* For each month, the market administrator shall compute the value of producer milk for each handler as follows:

(a) Multiply the quantity of producer milk in each class computed pursuant to § 908.45 by the applicable class price, and total the resulting amounts (and add any amount necessary to reflect adjustments in location differential allowance required pursuant to the proviso of § 908.53);

(b) Add an amount computed by multiplying the hundredweight of skim milk and butterfat subtracted from Class I milk pursuant to § 908.45 (a) (2) and (b) by the rate of compensatory payment as determined pursuant to § 908.54 for the nearest plant(s) from which an equivalent amount of other source milk was received in the form of fluid milk products;

(c) Add the amounts computed by multiplying the pounds of overage deducted from each class pursuant to § 908.45 (a) (7) and (b) by the applicable class price;

(d) Add the amount computed by multiplying the difference between the appropriate Class II price for the preceding month and the appropriate Class I milk price for the current month by the hundredweight of skim milk and butterfat remaining in Class II milk after the calculations pursuant to § 908.45 (a) (5) and (b) for the preceding months or the hundredweight of skim milk and butterfat subtracted from Class I milk pursuant to § 908.45 (a) (4) and (b) for the current month, whichever is less, respectively.

§ 908.71 *Computation of the uniform price.* For each of the months of August through January, the market administrator shall compute the uniform price per hundredweight of producer milk of 4.0 percent butterfat content, f. o. b. market, as follows:

(a) Combine into one total the values computed pursuant to § 908.70 for the producer milk of all handlers who submit reports prescribed in § 908.30 and who have made payments for the previous month pursuant to § 908.80 or § 908.82;

(b) Subtract, if the average butterfat content of the producer milk included under paragraph (a) of this section is greater than 4.0 percent, or add, if such average butterfat content is less than 4.0 percent, an amount computed as follows: Multiply the variation in the average butterfat content of such milk from 4.0 percent by the butterfat differential computed pursuant to § 908.73 and multiply the result by the total hundredweight of such milk;

(c) Add an amount equal to the sum of the deductions to be made from producer payments for location differentials pursuant to § 908.80 (a) (2);

(d) Add an amount equal to one-half of the unobligated balance on hand in the producer-settlement fund;

(e) Divide the resulting amount by the total hundredweight of producer milk included under paragraph (a) of this section; and

(f) Subtract not less than 4 cents nor more than 5 cents.

§ 908.72 *Computation of uniform prices for base milk and excess milk.* For each of the months of February through July, the market administrator shall compute the uniform prices per hundredweight for base milk and for excess milk, each of 4.0 percent butterfat content, f. o. b. market, as follows:

(a) Compute the aggregate value of excess milk for all handlers who submit reports pursuant to § 908.30, and who have made payments for the previous month pursuant to §§ 908.80 or 908.82 as follows: (1) Multiply the hundredweight of such milk not in excess of the total quantity of producer milk assigned to Class II milk in the pool plants of such handlers by the Class II milk price; (2) multiply any additional hundredweight of such milk by the Class I milk price, and (3) add together the resulting amounts;

(b) Divide the aggregate value of excess milk obtained in paragraph (a) of this section by the total hundredweight of such milk, adjust to the nearest cent and subtract 4 cents. The resulting figure shall be the uniform price for excess milk of 4.0 percent butterfat content received from producers;

(c) Subtract an amount determined by multiplying the uniform price obtained in paragraph (b) of this section, plus 4 cents, times the hundredweight of excess milk from the total value of producer milk for the month as determined according to the calculations set forth in § 908.71 (a) through (d).

(d) Divide the result obtained pursuant to paragraph (c) of this section by the total hundredweight of base milk of handlers included in these computations.

(e) Subtract not less than 4 cents nor more than 5 cents from the price computed pursuant to paragraph (d) of this section. The resulting figure shall be the uniform price for base milk of 4.0 percent butterfat content f. o. b. market.

§ 908.73 *Butterfat differential to producers.* The applicable uniform prices to be paid each producer shall be increased or decreased for each one-tenth of one percent which the average butterfat content of his milk is above or below 4.0 percent, respectively, at the rate determined by multiplying the pounds of butterfat in producer milk allocated to each class by the appropriate butterfat differential for such class as determined pursuant to § 908.52, dividing by the total butterfat in producer milk and rounding to the nearest even tenth of a cent.

§ 908.74 *Location differential to producers.* The applicable uniform prices to be paid for producer milk received at a pool plant located 60 miles or more from the city limits of Benton, Arkansas, by the shortest highway distance, as determined by the market administrator, shall be reduced according to the distance of the plant from such city limits at the rate of 1.5 cents for each 10 miles or residual fraction thereof.

§ 908.75 *Notification of handlers.* On or before the 11th day after the end of each month, the market administrator shall mail to each handler, who submitted the report(s) prescribed in § 908.30, at his last known address, a statement showing:

(a) The amount and value of his producer milk in each class and the totals thereof;

(b) For the months of February through July the amounts and value of his base and excess milk respectively;

(c) The uniform price(s) computed pursuant to §§ 908.71 and 908.72 and the butterfat differential computed pursuant to § 908.73; and

(d) The amounts to be paid by such handler pursuant to §§ 908.82, 908.85, 908.86, or 908.62; and the amount due such handler pursuant to § 908.83.

PAYMENTS

§ 908.80 *Time and method of payment for producer milk.* (a) Except as provided in paragraph (b) in this section, each handler shall make payment to each producer from whom milk is received during the month as follows:

(1) On or before the last day of each month to each producer who did not discontinue shipping milk to such handler before the 25th day of the month, an amount equal to not less than the Class II price for the preceding month multiplied by the hundredweight of milk received from such producer during the first 15 days of the month, less proper deductions authorized by such producer to be made from payments due pursuant to this paragraph;

(2) On or before the 15th day of the following month, an amount equal to not less than the appropriate uniform price(s) adjusted by the butterfat and location differentials to producers multiplied by the hundredweight of milk or base milk and excess milk received from such producer during the month, subject to the following adjustments: (i) Less payments made to such producer pursuant to subparagraph (1) of this paragraph, (ii) less marketing service deductions made pursuant to § 908.85, (iii) plus or minus adjustments for errors made in previous payments made to such producer, and (iv) less proper deductions authorized in writing by such producer: *Provided,* That if by such date such handler has not received full payment from the market administrator pursuant to § 908.83 for such month, he may reduce pro rata his payments to producers by not more than the amount of such underpayment. Payments to producers shall be completed thereafter not later than the date for making payments pursuant to this paragraph next following after the receipt of the balance due from the market administrator.

(b) In the case of a cooperative association which the market administrator determines is authorized by its members to collect payment for their milk and which has so requested any handler in writing, such handler shall on or before the 2d day prior to the date on which payments are due individual producers pay the cooperative association for milk received during the month from the producer members of such association as determined by the market administrator an amount equal to not less than the amount due such producer members as determined pursuant to paragraph (a) of this section.

(c) Each handler shall furnish the person to whom payment is to be made pursuant to this section with the following information;

(1) On or before the 25th day of the month, the pounds of milk received from the producer or from each member of the cooperative association during the first 15 days of such month;

(2) On or before the 7th day of the following month to a cooperative association for its individual members, or on or before the 15th day of the following month to producers (i) the pounds of milk received each day and the total for the month, together with the butterfat content of such milk, (ii) for the months of February through July the pounds of base milk received, (iii) the amount or rate and nature of deductions made from payments and (iv) the amount and nature of payments due pursuant to § 908.84.

§ 908.81 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 908.62, 908.82 and 908 84, and out of which he shall make all payments pursuant to §§ 908.83 and 908.84: *Provided,* That any payments due to any handler shall be offset by any payments due from such handler.

§ 908.82 *Payments to the producer-settlement fund.* On or before the 12th day after the end of each month, each handler shall pay to the market administrator any amount by which the value of his producer milk as computed pursuant to § 908.70 for such month, is greater than the amount owed by him for such milk at the appropriate uniform price(s) adjusted by the producer butterfat and location differentials.

§ 908.83 *Payments out of the producer-settlement fund.* On or before the 13th day after the end of each month, the market administrator shall pay to each handler any amount by which the total value of his producer milk, computed pursuant to § 908.70, for such month is less than the amount owed by him for such milk at the appropriate uniform price(s) adjusted by the producer butterfat and location differentials. If at such time the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the appropriate funds are available.

§ 908.84 *Adjustment of accounts.* Whenever audit by the market administrator of any reports, books, records, or accounts or other verification discloses errors resulting in moneys due (a) the market administrator from a handler, (b) a handler from the market administrator, or (c) any producer or cooperative association from a handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred.

§ 908.85 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers for milk (other than milk of his own production) pursuant to § 908.80, shall deduct 5 cents per hundredweight, or such amount not ex-

ceeding 5 cents per hundredweight, as may be prescribed by the Secretary, and shall pay such deductions to the market administrator on or before the 15th day after the end of the month. Such money shall be used by the market administrator to provide market information and to check the accuracy of the testing and weighing of their milk for producers who are not receiving such service from a cooperative association;

(b) In the case of producers who are members of a cooperative association which the Secretary has determined is actually performing the services set forth in paragraph (a) of this section, each handler shall (in lieu of the deduction specified in paragraph (a) of this section), make such deductions from the payments to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such producers, and on or before the 13th day after the end of each month, pay such deductions to the cooperative association of which such producers are members, furnishing a statement showing the amount of any such deductions and the amount of milk for which such deduction was computed for each producer.

§ 908.86 *Expense of administration.* On or before the 15th day after the end of each month, each handler shall pay to the market administrator, for each of his approved plants, 4 cents or such lesser amount as the Secretary may prescribe, for each hundredweight of butterfat and skim milk contained in (a) producer milk, (b) other source milk allocated to Class I milk pursuant to § 908.45 (a) (2) and (b), or (c) Class I milk disposed of in the marketing area (except to a pool plant) from a nonpool plant not subject to the classification and pricing provisions of another order issued pursuant to the act.

§ 908.87 *Termination of obligations.* The provisions of this section shall apply to any obligations under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate 2 years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such 2-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representative.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the payment (including deduction or setoff by the market administrator) was made by the handler, if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to Section 8c (15) (A) of the act, a petition claiming such money.

DETERMINATION OF BASE

§ 908.90 *Computation of daily average base for each producer.* Subject to the rules set forth in § 908.91, the daily average base for each producer shall be an amount calculated by dividing the total pounds of milk received from such producer at all pool plants during the months of October 1955 through January 1956 by the number of days from the first day of delivery by such producer during such months to the last day of January 1956, inclusive, or by 90, whichever is more. The daily average base for each producer thereafter shall be an amount calculated by dividing the total pounds of milk received from such producer at all pool plants during the months of September through December immediately preceding, by the number of days from the first day of delivery by such producer during such months to the last day of December inclusive or by 90, whichever is more.

§ 908.91 *Base rules.* The following rules shall apply in connection with the establishment and assignment of bases:

(a) Subject to the provisions of paragraph (b) of this section, the market administrator shall assign a base as calculated pursuant to § 908.90 to each person for whose account producer milk was delivered to pool plants during the months of October 1955 through January 1956, and during the months of September through December thereafter.

(b) An entire base shall be transferred from a person holding such base to any other person effective as of the end of any month during which an application for such transfer is received by the market administrator, such application to be on forms approved by the market administrator and signed by the baseholder, or his heirs, and by the person to whom such base is to be transferred: *Provided,* That if a base is held jointly, the entire base shall be transferrable only upon the receipt of such application signed by all joint holders or their heirs, and by the person to whom such base is to be transferred.

§ 908.92 *Announcement of established bases.* On or before February 25, 1956 and January 25 of each year thereafter, the market administrator shall notify each producer, and the handler receiving milk from such producer, of the daily average base established by such producer.

EFFECTIVE TIME, SUSPENSION, OR TERMINATION

§ 908.100 *Effective time.* The provisions of the part, or any amendment thereto, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 908.101 *Suspension or termination.* The Secretary shall, whenever he finds that any or all provisions of this part, or any amendment thereto, obstruct or do not tend to effectuate the declared policy of the act, terminate or suspend the operation of any or all provisions of this part or any amendment thereto.

§ 908.102 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this part, or any amendment thereto, there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 908.103 *Liquidation.* Upon the suspension or termination of the provisions of this part, except §§ 908.34, 908.89, and 908.91 through 908.93, the market administrator, or such other liquidating agent as the Secretary may designate, shall, if so directed by the Secretary liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books, and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidating and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 908.110 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent and representative in connection with any of the provisions of this part.

§ 908.111 *Separability of provisions.* If any provisions of this part, or its application to any person or circumstances, is held invalid, the application of such provision, and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

[F. R. Doc. 55-8292; Filed, Oct. 12, 1955; 8:47 a. m.]

[7 CFR Part 1004]

[Docket No. AO-271]

HANDLING OF MILK IN CENTRAL ARIZONA MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.) and the applicable rules of practice and procedure, as amended, governing the proceedings to formulate marketing agreements and orders (7 CFR Part 900), a public hearing was conducted at Phoenix, Arizona, on April 19-23, 1955, pursuant to a notice thereof issued March 29, 1955 (20 F. R. 2084).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Agricultural Marketing Service, on August 25, 1955, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision. This decision and notice of opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on August 30, 1955 (20 F. R. 6340). A notice of extension of time for filing exceptions was filed by the Acting Deputy Administrator, Agricultural Marketing Service, on September 9, 1955, and published in the FEDERAL REGISTER of September 14, 1955 (20 F. R. 6751).

Within the period reserved therefor, interested parties filed exceptions to certain of the findings, conclusions and actions recommended by the Deputy Administrator. In arriving at the findings, conclusions and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings, conclusions and actions decided upon herein are at variance with any of the exceptions, such exceptions are overruled.

To the extent that suggested findings and conclusions proposed by interested persons are inconsistent with the findings and conclusions contained herein, the specific or implied requests to make such findings and reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions herein set forth.

The material issues of record related to:

1. Whether the handling of milk in the market is in the current of interstate commerce or directly burdens, obstructs or affects interstate commerce in milk or its products;

2. Whether marketing conditions justify the issuance of a marketing agreement or order; and

3. If an order is issued, what its provisions should be with respect to:

(a) The scope of regulation,

(b) The classification of milk,

(c) The level and method of determining class prices,

(d) The method to be used in distributing proceeds to producers, and

(e) Administrative provisions.

Findings and conclusions. Upon the evidence adduced at the hearing and the record thereof, it is hereby found and concluded that:

(1) *Character of commerce.* All milk which will be regulated under the proposed marketing agreement and order is in the current of interstate commerce or directly burdens, obstructs or affects interstate commerce in milk or its products.

Milk produced in California is purchased on both regular and supplemental bases to meet the demand for fluid milk products of consumers in the Central Arizona marketing area as defined in the proposed order. On a regular basis, four milk producers (of the twelve supplying Yuma) whose farms are located in Bard, California, regularly supply milk to handlers located in Yuma, Arizona. A distributor in Yuma disposes of bottled milk in the Bard-Winterhaven area in California. Also, a distributor operating a milk depot in the marketing area processes milk that is sold on vendor routes in New Mexico.

On a supplemental basis, substantial quantities of milk produced in California and Utah are imported each year to supply part of the raw milk requirements of nearly all handlers in the Central Arizona marketing area. Such imports have been necessary each year during July through October (the months of seasonally-short production of milk in the area); in some years milk is imported for periods as long as 7 months (1951) to 10 months (1952). In 1952 importations of Grade A milk into Phoenix and Tucson totaled nearly 69 million pounds; in 1954 they totaled about 29 million pounds. Milk so imported was commingled with locally-produced milk and distributed to consumers throughout Arizona. The record shows that handlers operating in this manner compete actively throughout the entire marketing area with handlers buying all, or most, of their milk supplies from local producers.

In addition to the importations of whole milk just described, substantial quantities of such concentrated Grade A milk products as nonfat dry milk solids are imported from out-of-state sources and regularly used in the fortification of such fluid milk products as buttermilk and skim milk drinks. Imported nonfat dry milk solids are also used in making reconstituted fluid milk products for sale in the Central Arizona marketing area during several months of the year.

Substantial quantities of such manufactured dairy products as cottage cheese and ice cream distributed in the marketing area originate from locations outside the State of Arizona. For example, a handler located in the marketing area distributes ice cream that is processed and manufactured in company-affiliated plants located in Texas. Seasonal surpluses of locally-produced Grade A milk are used in the manufacture of cottage cheese and ice cream, and must, in turn, be sold in competition with similar products manufactured in areas outside Arizona from milk produced outside of the State.

(2) *The need for regulation.* The marketing and pricing conditions in the Central Arizona marketing area require the issuance of a Federal milk marketing agreement and order to establish and maintain orderly marketing conditions and effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended.

The problems encountered by producers in the Central Arizona marketing area are typical of those occurring in unregulated fluid milk markets where producers are unorganized or where producer cooperative associations have been unsuccessful in establishing effective bargaining relationships with handlers. The Federal milk marketing order proposed herein for Central Arizona will implement the declared congressional policy of establishing and maintaining orderly marketing conditions by:

(a) Providing a regular and dependable method for determining minimum prices to producers at levels comparable to those contemplated under the act;

(b) Establishing uniform prices to handlers for milk received from producers according to a classification plan based on the use made of such milk by the handler;

(c) Providing an impartial audit of handler's records of receipts and utilization to further insure uniform prices for milk purchased;

(d) Providing all producers with a means whereby the weighing and testing of their milk can be checked to insure accuracy;

(e) Establishing uniform returns to producers supplying the area and insuring that the lower returns from the sale of reserve milk are shared equitably among all producers;

(f) Establishing uniform rules for the operation of a market-wide base and excess plan that will (i) acquaint producers with the rules for establishing bases and determining base and excess prices; and (ii) encourage producers to balance seasonal fluctuations in the production of milk with a relatively steady consumer demand for such production; and

(g) Providing market-wide information on the receipts, sales and other data relating to milk market problems in the area.

The hearing record contains considerable testimony on the chaotic marketing conditions in Central Arizona created by the wide variety of classification and

pricing planes used by different distributors serving the area, the resultant lack of uniformity in prices paid producers for milk, and the ineffectiveness of the producers in protecting themselves against sharp cuts in producer prices during periods of milk price wars among distributors.

The effects of a milk price war became widespread in the latter part of 1954 when distributors lowered paying prices on successive occasions until producers were receiving approximately $1.00 a hundredweight less for milk in December than in June. The depressed and erratic producer prices have persisted. Record testimony indicates these actions have lowered prices to producers to the point where a continuous and adequate supply of pure and wholesome milk for the area is threatened. Producers need a regular and dependable method for determining minimum prices for their milk that will provide price levels that reflect general economic conditions, local supply and demand, and be in harmony with those contemplated under the enabling act.

Under present marketing conditions no two handlers pay producers on exactly the same basis. Prices paid producers vary greatly between handlers. This lack of uniformity, and uncertainty, of prices to producers fosters market instability and permits inequities to occur among and between handlers in the prices paid for producer milk. As an example, the record indicates that one handler was paying $6.36 a hundredweight for 4.0 percent milk during the same period that another handler was paying as low as $5.08. The classification and pricing plan of the attached order is the only available means of establishing uniform prices among handlers for milk received from producers according to the use made of such milk by each handler. This use-classification plan is equitable and will apply similarly to all handlers. To insure equity among handlers and full accountability to producers, the use-classification plan must be supplemented by an impartial audit of handlers' records of receipts and utilization. The market-wide pooling provisions of the order proposed herein will provide a means of insuring uniform returns to producers and equitable sharing of the burden of the inevitable seasonal excesses of producer milk.

Many producers supplying handlers in the Central Arizona area have no effective means of insuring the accuracy of the weights and tests of their regular deliveries of milk. In addition, only part of the handlers permit an audit of their records by the producer associations for the purpose of establishing the accuracy of the proportions of milk paid for as base and as excess under the handler-operated base-excess plans now in use. These plans are individual to each plant, there is no uniformity in methods of figuring the proportion of excess milk, and there are indications that some handlers have manipulated the plan to benefit favored producers. There is need for a Federal order to correct these inequities.

The record also indicates that producers have no regular and dependable method for participating in the price-determining decisions that govern the sale of their milk. Handlers and their representatives have used various means to discourage producers from joining the proponent producers' cooperative association. They further hamper the growth of the association by refusing to make deductions for association dues even though the producer-members authorized such deductions. Such actions have kept producers from having an effective role in determining the prices they receive for milk, or the proportion of their milk to be paid for as base milk and excess milk. An order will give producers a voice in the deliberations as to what price they should receive for their milk, and will provide a means whereby the producers associations can carry out a full scale marketing service program applicable to all handlers with which the members have business. The classified use plan of the attached order, together with the pricing formula herein established, should insure a sufficient quantity of pure and wholesome milk for the marketing area, will protect the interests of producers, handlers, and consumers and be in the public interest.

(3) *Order provisions*—(a) *Scope of regulation.* Federal milk orders achieve marketing and pricing stability by using techniques authorized by the Agricultural Marketing Agreement Act of 1937, as amended. Important among these techniques are the requirements that (1) regulated distributors (handlers) pay at least specified minimum prices to producers in accordance with a classified use plan established in an order, and (2) these payments be distributed to each producer on a uniform basis through either an individual-handler pool or a marketwide pool. Under the circumstances it is important to establish clearly which plants and which milk will be subject to all or part of the pricing provisions of an order and, in turn which producers will participate in the distribution of returns through the specified pool. To identify such persons and to facilitate reference to them throughout this decision and in the proposed order, such terms as "marketing area", "producer", "pool plant", "handler", "producer milk", and "other source milk" are defined and are used herein.

Marketing area. The Central Arizona marketing area should be defined to include all of the territory within the counties of Maricopa, Pima, Pinal, and Graham, and all the territory south of 33° latitude (North from the Equator) in Yuma County, all in the State of Arizona.

Fluid milk products sold for consumption in this area must be approved by health authorities who are governed by health ordinances, practices and procedures generally patterned after the United States Public Health Service Milk Ordinance and Code. The record testimony indicates that within this defined area the health standards are substantially equal and are under the jurisdiction of operating health authorities. These conditions support the adoption of milk marketing regulations that are applied equally within the defined area.

Marketing areas, as defined in Federal milk orders, are designed to cover as nearly as is practicable, areas in which milk is sold to consumers rather than the areas where the milk may be produced. The proposed order would regulate distributing plants that are in substantial sales competition with one another within and outside the defined marketing area. Record data show that four handlers, all with plants located in Maricopa County (the central part of the marketing area), compete with each other in all of the five counties included in the marketing area. Handlers with plants located in the southern part of Yuma County also compete with a handler located in Pinal County. Handlers selling only in Graham County compete with two handlers located in Tucson in addition to the four handlers selling in all five counties. The marketing area thus includes the most densely populated places in Central Arizona and comprises the most important sales territory served by handlers located within the area.

It will be noted that the marketing area defined herein includes less territory than that requested by both the producers' associations and by various handlers. Although all territory originally requested by handlers was not included in the notice of hearing, the notice did state that if the evidence adduced at the hearing indicated it would not be feasible to promulgate an order for all or part of the area set forth in the notice, or that additional territory should properly be included under any proposed order, the hearing would be reopened for the purpose of giving further consideration to appropriate extensions of the marketing area. A careful review of the record testimony indicates that it is clearly feasible to issue an order for the marketing area proposed herein without reopening the hearing to consider extending the defined marketing area.

The vast majority of the milk produced in Arizona is produced and processed within the Central Arizona marketing area. This milk will be subject to regulation by the attached order regardless of where it might be sold. The record shows that regulated handlers sell a substantial proportion of the milk consumed in most counties located outside the defined marketing area. Individual handlers will not be disadvantaged significantly in making sales in these out-of-area counties because (1) their principal competitors also will be regulated by the same order, (2) the economies of scale inherent in the large-scale processing and distribution of milk in paper containers will tend to offset any short-run advantage in producer prices that might accrue to an occasional unregulated handler, (3) 90 percent of the milk produced in Arizona will be subject to the minimum pricing provisions of the order, (4) in some of the outlying counties the only competition encountered by regulated handlers is a local producer-handler (who would be exempt from the pricing provisions of the attached order), (5) for the most part the remainder of the State of Arizona is a deficit milk production area, and (6) in some counties producers selling to local dairies have an alternative of shipping to regulated handlers in the Central Arizona marketing area should they become dissatisfied with pricing and marketing conditions under which they have to sell milk to local unregulated plants (which should have the effect of stabilizing producer prices in out-of-area counties at levels close to those to be paid producers whose milk is priced by the order). It is neither administratively feasible nor necessary to include within the marketing area all the territory in which handlers may be distributing any portion of their sales of fluid milk products. In fact, it would be impracticable, if not impossible, to extend the marketing area to include all the territory in which there would be some competition with unregulated distributors. However, should handlers regulated herein be forced into a disadvantageous competitive condition in any of the unregulated portions of the State after the order has become effective (because of the failure to extend the marketing area), the consideration of an appropriately enlarged marketing area can be handled expeditiously at a public hearing called for that purpose. Market-wide data on sales in and out of the marketing area obtained under the order will assist in evaluating any developments affecting the future appropriateness of the size of the defined marketing area.

The marketing area should not include the territory in Yuma County lying North of the 33° latitude. No handler in the Central Arizona area sells milk in that portion of the county. This excluded territory is located 85 to 165 miles from Phoenix and is rural in nature (having only one town with a population of more than 1000 persons in 1950). Nearly all the milk sold there originates in Los Angeles, California, is paid for as Class I milk under the California Milk Control Act, and is sold by one person on a wholesale route in conjunction with other food items. Furthermore, milk sold in this area has no effect on the competitive relationships with and between regulated handlers in the Central Arizona marketing area.

Accordingly, it appears that the marketing area defined herein includes the territory which will minimize the problems of competition with unregulated distributors and at the same time regulate enough sales area to restore and maintain orderly marketing conditions for producer milk.

Definition of plants and milk to be subject to regulation. Record testimony indicates that milk plants supplying the Central Arizona marketing area are distributing plants located within the area that dispose of the major portion of their milk receipts as fluid milk products. These "fluid milk products" are required to be made from milk produced in compliance with the Grade A requirements of the duly constituted health authorities having jurisdiction in the area and include such products as milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream and mixtures in fluid form of milk, skim milk and cream (except sterilized products packaged in hermetically sealed containers, eggnog, yogurt, ice cream mix and aerated cream). Plants disposing of their producer receipts in such form in the marketing area by delivery to retail or wholesale outlets, including delivery by a vendor or a sale from a plant or a plant store, should be fully regulated under the order. They are herein defined as "pool plants".

The order shall also provide standards for plants from which pool plants making route sales draw supplemental supplies of milk. Plants shipping supplemental supplies to a market generally fall into two broad categories. One category includes plants that supply milk to the market in such a manner as to be considered closely associated with the market. Although the record discloses that no such plants from any area, including out-of-state areas, are serving the Central Arizona marketing area with regularity, some provision should be made to regulate plants of this type that might become closely associated with the market. Such plants are a normal part of milk procurement facilities in many markets and nothing in this order will preclude any plant wherever located from serving the market in the future should a need for their services arise. This objective can best be accomplished by defining also as a "pool plant" any plant that ships to pool plants making route sales in the areas as Class I milk a majority (at least 50 percent) of its receipts of producer milk in the current month during the period of July through October, and 20 percent in the current month during the period November through June: *Provided*, That, if a plant meets these standards during the months of July through October, such plant should be permitted, upon written application to the market administrator on or before October 31 following such compliance, to be designated as a "pool plant" until the end of the following June. Plants not qualified under these standards cannot be considered as closely associated with the Central Arizona market, and receipts from them should be considered as other source milk. The standards recommended herein will provide the framework for appropriate regulation of plants shipping supplemental supplies if such plants should become regularly associated with the market.

A "pool plant" is defined to include any plant subject to full regulation under the proposed order.

A "handler" is defined to be the operator of any pool plant. Such handler is the person to whom the provisions of the order are applicable. The handler receives the milk and thus must be held responsible for reporting the receipt and utilization of it. If the milk is priced, he is responsible for paying producers the specified minimum prices. A "handler" should include a cooperative association with respect to milk of producers diverted for the account of such association from a pool plant to a nonpool plant for its account. If a handler also operates an unregulated plant(s), this definition is not intended to include such person in his capacity as an operator of such plant(s). This definition should include producer-handlers in order that they may be required to report to the market administrator whenever necessary to determine their status.

"Producer" should be defined as any person other than a "producer-handler" who produces milk in compliance with the Grade A requirements of a duly constituted health authority having jurisdiction within the marketing area, which milk is received at a pool plant. Provision should be made so that the milk of producers regularly received at a pool plant may be diverted for the account of a handler to a nonpool plant without such producers losing their status under the order. This will permit milk regularly associated with the market to be diverted to manufacturers during periods of flush production and over weekends and holidays when supply and demand relationships may require some reserve and surplus milk to be manufactured in plants not regulated by the order. Producers whose milk is so diverted will continue to receive the uniform price under the order and their milk will be available for fluid use when needed. Diverted milk should be deemed to have been received at the plant from which it was diverted. Producer milk should include all skim milk and butterfat contained in milk produced by producers and received at pool plants directly from producers or diverted by a handler from such plant.

"Producer-handler" should be defined as a person who operates a pool plant in which he handles only milk of his own production and such milk from other handlers as is priced under the order at such other handler's plant. A producer-handler should be subject to the order only to the extent that he must submit reports to the market administrator as required and maintain and make available to the market administrator, accounts, records and facilities so that the market administrator may verify that such person is a producer-handler. It seems unnecessary to require under the order that a producer-handler pay any particular price for milk produced on his own farm.

Classification provisions of the proposed order should provide that any milk, skim milk, or cream transferred by a handler to a producer-handler should be Class I milk. Any supplemental supplies of milk which may be obtained from other handlers may, by virtue of the type of operation involved, be presumed to be needed by the producer-handler for fluid use and should be classified in the supplying handler's plant as Class I milk. A producer-handler may receive milk from other handlers and still maintain his status as a producer-handler. Pursuant to the proposed order any milk which a handler receives from a producer-handler would be other source milk and would, therefore, be allocated to the lowest class utilization at the pool plant(s) of a handler after the allocation of shrinkage on producer milk. This method of allocating producer-handler milk will preserve producers' priority on the Class I sales in the marketing area. Thus, the producer-handler who, by being exempt, enjoys the full advantage of his fluid milk sales, will not also share in the Class I market of other producers.

"Other source milk" should be defined as all skim milk and butterfat utilized by the handler in his operations except fluid milk products received from pool plants, inventory, and current receipts of producer milk. This includes any nonfluid milk products from any source, including those produced at the handler's plant during the same or an earlier month which are reprocessed or converted to other products during the month in the plant. Thus, other source milk would represent butterfat and skim milk from sources not subject to the Class I pricing provisions of the attached order. Defining other source milk in this manner will insure uniformity among all handlers under the allocation and pricing provisions of the order.

(b) *Classification of milk.* Milk received by regulated handlers should be classified on the basis of skim milk and butterfat according to the form in which, or the purpose for which, it is used, as either Class I milk or Class II milk.

A classified-use plan of this type will insure that minimum prices for milk will be uniform among handlers according to use, that a price may be fixed for the milk disposed of as Class I at a level that will bring forth an adequate supply of pure and wholesome milk, and that a necessary reserve of quality milk may be maintained at all times (and used at prices in line with its value when processed into manufactured dairy products) without disrupting marketing and pricing conditions within and outside the established marketing area.

The products which should be included in Class I milk are those distributed to the consumer in fluid form and required by health authorities in the proposed marketing area to be obtained from milk or milk products from approved "Grade A" sources. The extra cost of getting quality milk produced and delivered to the market in the condition and quantities required makes it necessary to provide a price for milk used in Class I products somewhat above the ungraded, or manufacturing, milk price. This higher price should be at such a level that it will yield a blend price to producers that will encourage the production of enough milk to meet market needs.

Reserve milk not needed seasonally or at other times for Class I use must be disposed of for use in manufactured products. These products are less perishable, are not required to be made from inspected milk, and must be sold in competition with products made from unapproved milk produced throughout the United States. Milk so used should be classified as Class II milk and priced in accordance with its value in such outlets.

In accordance with these standards, Class I milk should comprise all skim milk (including reconstituted and concentrated nonfat milk solids) and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream or any mixture in fluid form of milk, skim milk and cream (except eggnog, ice cream, ice cream mixes, yogurt, aerated cream, and sterilized products contained in hermetically sealed containers); and (2) not accounted for as Class II milk.

Fluid milk products which contain concentrated skim milk solids, such as skim milk drinks and buttermilk to which extra solids have been added, or concentrated whole milk disposed of for fluid use, should be included under the Class I milk definition and all the solids therein should be priced at the same rate. Products such as evaporated or condensed milk packaged in bulk or in hermetically sealed cans would not be considered as Class I milk; they need not be handled as fluid milk products nor need they be made from Grade A milk exclusively.

Skim milk and butterfat are not used in many products in the same proportions as contained in the milk received from producers, and therefore should be classified separately according to their separate uses. The skim milk serum and butterfat content of milk products, received and disposed of by a handler, can be determined through certain recognized testing procedures. Some of these products, such as ice cream and condensed products, present a difficult problem of testing (and accounting) in that some of the water contained in the milk has been removed. It is necessary, in the case of such products, to provide an acceptable means of ascertaining the amount of skim milk and butterfat contained in, or used to produce, these products. This may be accomplished through the use of adequate plant records made available to the market administrator in the case of products manufactured by a handler, or by means of standard conversion factors of skim milk and butterfat used to produce such products in the case of products purchased by a handler or where plant production records are inadequate.

The accounting procedure to be used in the case of any condensed milk product should be based on the pounds of milk or skim milk required to produce such product. The record discloses that (1) concentrated skim milk solids are used to fortify Class I milk products, (2) that such solids are required to come from Grade A milk, and (3) that they would be paid for on the basis of the Class II price, if derived from milk covered by the order or at the price for manufacturing milk, closely in line with the Class II price, if derived from milk processed at a non-regulated plant. Under the circumstances, the value of each pound of nonfat milk solids utilized by addition to, or as, a Class I product has a value to the handler the same as every other pound contained therein. Neither the form in which, nor the source from which, such solids are obtained alter their value to the handler for this purpose. Solids contained in producer skim milk are in fluid form and are paid for on the basis of all the water originally associated with the solids. In order to account for skim milk solids in powdered or concentrated form on a basis comparable to that used in accounting for liquid skim milk in producer milk it is necessary to account for such solids on the basis of the amount of skim milk necessarily used in producing such solids. Therefore, the accounting procedure to be used in the case of this and any condensed milk product should be based on the pounds of milk or skim milk required to produce such product.

Each handler must be held responsible for a full accounting of all his receipts of skim milk or butterfat in any form. A handler who first receives milk from producers should be responsible for establishing the classification of, and making payment to producers for, such milk. Fixing responsibility in this manner is a practice which is followed consistently in both regulated and unregulated markets. It is necessary to administer effectively the provisions of the order in order to achieve equality of cost among handlers. The operator of the plant at which milk is first received from producers is the person with whom contractual relations have been made by producers or their representatives. Except for the limited quantities of shrinkage which may be classified in Class II under certain conditions set forth elsewhere in this decision, all skim milk and butterfat which is received and for which the handler cannot establish utilization should be classified as Class I milk. This provision is necessary to remove any advantage to handlers who fail to keep complete and accurate records and to assure that producers receive full value for their milk on the basis of its use.

All skim milk and butterfat used to produce products other than those classified in Class I milk should be Class II milk. Included as Class II milk are products such as ice cream, ice cream mix, and other frozen desserts and mixes; eggnog; yogurt; aerated cream; butter; cheese, including cottage cheese; evaporated and condensed milk (plain and sweetened); nonfat dry milk solids, dry whole milk; condensed or dry buttermilk; and any other products not specified as Class I milk. Skim milk and butterfat disposed of to commercial food product manufacturing plants, other than dairy plants, which do not dispose of fluid milk products for fluid consumption, should be Class II milk. The health ordinances applicable in the marketing area do not require that these products be made from locally approved milk.

Cream placed in storage and frozen should be classified as Class II milk. Such cream is intended primarily for use in ice cream and ice cream mixes. Skim milk disposed of as animal feed also should be classified as Class II. Any frozen cream or other Class II products which are used later in a pool plant would be considered as other source milk at the time of such use and assigned to the lowest priced utilization in the plant.

Butterfat and skim milk used to produce Class II products should be considered to be disposed of when so used, and will not enter into the classification problem again unless reused or reconverted. Handlers will need to maintain stock records on such products, however, to permit audit of their utilization records by the market administrator. Class II products from any source, including

those produced in the plant from producer milk, which are used for further processing or manufacture, should be considered to be a receipt of other source milk. This will maintain priority of assignment of current receipts of producer milk to Class I utilization.

Handlers have inventories of fluid milk products at the beginning and end of each month which enter into the problem of accounting for current receipts and utilization. Inventory is intended to include stocks on hand of bulk milk, skim milk, and cream and bottled milk and other fluid milk products designated as Class I milk. Manufactured products (Class II) on hand are not included in the inventory account because the milk used to produce such products will already have been accounted for as Class II milk. As previously indicated, handlers will need to keep stock records of such products but they will not be included in inventory for the purpose of accounting for current receipts.

It is concluded that inventory should be accounted for as Class II milk. If fluid milk products in inventory are accounted for as Class II milk at the end of the month, it will be necessary to provide a method to deal with the producer milk inventory which is used in the current month for Class I purposes but which the handler accounted for to producers as Class II milk at the end of the previous month. Handlers, at times, also use other source milk in their operations. Producer milk from inventory should have prior claim on Class I sales over current receipts of other source milk. This can be accomplished by considering the ending inventory in one month as a receipt in the following month and subtracting such receipt (under the allocation procedure) in series starting with Class II milk following the subtraction of other source milk. To the extent that opening inventory is allocated to Class I milk and there was an equivalent amount of producer milk classified in Class II milk in the previous month (after the allocation of other source milk) a reclassification charge should be made at the difference between the Class I price in the current month and the Class II price in the preceding month. This will promote equality in the cost of milk among handlers and returns to producers, irrespective of whether or not such producer milk is from the previous month's ending inventory or is a current receipt.

Shrinkage should be determined by subtracting from the total pounds of skim milk and butterfat received by the handler his total established utilization of skim milk and butterfat, respectively, in various products. Shrinkage not in excess of 2 percent of the handler's receipts of skim milk and butterfat from producers and other source milk should be prorated between producer and other source milk on the basis of the pounds received from each source. None of the shrinkage should be assigned to milk received from other pool plants because shrinkage on such milk will be allowed to the transferring handler. The evidence indicates that a plant operated in a reasonably efficient manner, and for which complete and accurate records of receipts and utilization are maintained, should be able to keep total shrinkage at less than 2 percent of total receipts. It is concluded, therefore, that shrinkage not in excess of 2 percent of total receipts of producer milk and other source milk should be classified as Class II milk; any in excess of this quantity should be classified as Class I milk.

Transfers. Classification of butterfat and skim milk used in the production of Class II milk items should be considered to have been established when the product is made. Classification of Class I milk should be established when the butterfat or skim milk is disposed of by the handler. However, since some Class I items may be disposed of to other plants for processing, specific classification procedures should be prescribed for transfers to other plants.

Milk, skim milk, cream or other products designated as Class I milk transferred by a handler to the plant of another handler, except that of a producer-handler, should be classified as Class I milk unless both handlers indicate in their reports to the market administrator that they desire such milk to be classified as Class II milk. However, sufficient Class II utilization must be available at the transferee plant for such assignment after prior allocation of shrinkage and other source milk. Furthermore, the assigning to classes must be such as will result in the maximum amount of producer milk of both handlers being assigned to Class I milk. These actions will carry out the recognized principle that the highest-valued uses should be assigned first to those producers regularly supplying the market.

In order to reduce the administrative expense of verifying the use of milk or skim milk transferred great distances, transfers of milk or skim milk to plants 250 miles or more from the nearer (by the shortest hard-surfaced highway distance) of the respective City Halls of Phoenix or Tucson, Arizona, should be Class I in all cases. The costs involved in transporting milk or skim milk in fluid form such a distance appear such that it would not be economically feasible to move the milk farther for Class II disposition.

Cream presents a somewhat different problem because its value is so much greater in relation to its bulk that it may be transported long distances for manufacture. In order to provide for such transfer and at the same time provide reasonable assurance that the butterfat is being classified according to use, it should be provided that cream may be Class II if the following conditions are met: (1) The transferring handler requests such a classification, (2) it is clearly labeled as manufacturing grade cream and the shipment is so invoiced, (3) if the operator of the nonpool plant maintains books and records of utilization at the plant which are made available on request of the market administrator for verification of usage, (4) if prior notice of the intended shipment is furnished to the market administrator, and (5) the nonpool plant used an equivalent amount of skim milk and butterfat in the use indicated.

The more common form of transfer to a nonpool plant is the movement of excess milk to nearby manufacturing plants. It is provided that transfers of milk, skim milk, or cream from a pool plant to a nonpool plant located within a radius of 250 miles be Class I unless Class II use is affirmatively established. Evidence of Class II use consists of a certification by the pool plant operator that the transfer was intended for Class II use, and verification by the market administrator of the records made available by the nonpool plant operator to establish that the milk was not utilized for other than manufacturing purposes.

Allocation. Because the order class prices apply only to the producer milk, it is necessary, if a pool plant has butterfat or skim milk other than that received in producer milk, to determine the quantities of milk in each class to be assigned to current receipts from producers. The milk of producers who are regularly engaged in supplying the market should be assigned the Class I utilization first. This is necessary to insure the effectiveness of the classified pricing program of the order. The system of assigning utilization of milk to receipts from different sources which will carry out this objective is set forth in detail in the order.

In general this procedure requires that skim milk and butterfat, respectively, remaining in each class be assigned to producer milk by making the following deductions from the gross utilization of each handler starting with Class II milk, except as otherwise noted:

(1) Class II shrinkage of producer milk;
(2) Other source milk;
(3) Beginning inventory;
(4) Receipts from other handlers (according to classification); and
(5) Overage.

Since uniform prices paid producers by each handler are to be calculated monthly, the assignment of utilization described above should be carried out with respect to all milk received during each month. To apply a shorter accounting period would place an accounting and reporting burden upon handlers and increase the cost of administering the order.

(c) *Class prices.* In order to restore and maintain orderly marketing conditions in the Central Arizona area, minimum Class I and Class II prices for producer milk must be established at levels that will reflect economic conditions affecting the market supply and demand for milk or its products and assure the maintenance of a supply of quality milk adequate for the needs of the market. The enabling act requires that minimum prices established by Federal milk orders meet this standard. An important point in this requirement is that the prices shall be at a level that over a reasonable period of time, due consideration being given the need for a reserve of milk and the seasonal variation in production, the supply of milk meeting the quality standards of a market will be about equal to the needs of the market for milk of that quality. This means, in turn, that the minimum prices provided for in the order can be related to general economic conditions, but cannot be maintained out of

line with such conditions. If producer prices are too low, not enough milk of acceptable quality will be produced to supply fully the Class I needs of the market. If such prices are too high, on the other hand, milk production will be over stimulated and fluid consumption will tend to be curtailed. These actions would cause more milk to be produced than is needed to supply the demand for Class I milk, including the necessary reserves, and would eventually result in the shifting of agricultural resources toward the production of unnecessary and uneconomic surpluses and this would depress the blend price to producers.

The concept of adjusting minimum class prices in response to changes in supply and demand conditions, and thereby influencing production of milk through consequent changes in producers' blend prices, has wider geographical implications today than in the past. In earlier days producers were limited to supplying milk to local markets because of inadequate transportation facilities and the local nature of health regulations and milk distribution systems. Today the technological advances in milk production, including the widespread use of milk cooling equipment on farms; the rapid motor transportation from farms to a number of cities instead of one or two, especially through the advent of bulk farm tank milk pickup; the increased efficiency of milk processing equipment and plants; the increasing importance of paper containers for packaging milk; the use of refrigerated delivery trucks; the sale of milk through vendors and stores in distant cities; and the corollary trend among health authorities of approving sources of milk derived from a wider supply area under agreements for reciprocal inspection—all these factors enable milk to be transported and sold long distances from the point of production and processing. The hearing record was replete with testimony showing that these developments have and are influencing the marketing organization and price structure for producer milk and for fluid milk products in Arizona. That these developments affect the level of prices paid for milk produced in Arizona is borne out by the many references in the record to the need of keeping Arizona prices in reasonable alignment with those in other areas, particularly California.

Class I prices. Producers proposed that the Class I price for 4 percent milk be established for each month by adding a differential of $3.05 to a "basic formula price" that reflects the values on a nation-wide basis of manufacturing milk used for butter and powder (through a butter-nonfat dry milk solids formula) and condensing (through the Mid-west condensery price series). They requested a further provision that for producer milk received at plants in Pima County (Tucson) the price be 36 cents a hundredweight higher. Handlers requested a 3.5 percent basis for pricing and a Class I differential of $1.90 over the basic formula price.

The evidence demonstrates that pricing should be based on milk of 3.8 percent butterfat test and that the appropriate price level for Class I milk of such test in Central Arizona would be the basic formula price plus $2.80 for plants in the Tucson zone, $2.50 a hundredweight for plants in the Phoenix-Safford zone and $2.40 for those plants in the Yuma zone.

The general price level for Grade A milk in Phoenix from May 1953 through June 1954 (the most recent period when the market was not involved in pricing or marketing disturbances) was $6.12 a hundredweight for 3.8 percent milk (purchased on a butterfat basis at the rate of $1.61 a pound butterfat). In July 1954, this price was reduced 2 cents a pound butterfat by at least two handlers. By August 1954, this level of prices decreased further, with the result that producers supplying plants in Phoenix received between $1.515 and $1.60 a pound butterfat for their milk (equal to $5.76 to $6.08 for 3.8 percent milk). This decrease was approximately commensurate to the reduction in the price support levels for dairy products. A price level of $1.50 to $1.59 a pound butterfat ($5.70 to $6.04 a hundredweight of 3.8 percent milk) remained in effect in the Phoenix area until upset by the marketing conditions reviewed earlier in this decision. Except for periods of unsettled conditions, the price for milk in Tucson has been higher by at least the amount of extra transportation charges involved. On this basis, the Tucson price normally has been about 34 cents a hundredweight higher for 3.8 percent milk. However, producers in the Salt River Valley, when shipping to plants in the Tucson area (as an alternative to shipping to plants in the Phoenix area) incur extra transportation costs of about 30 cents a hundredweight. On this basis the Class I price level in Tucson should remain 30 cents a hundredweight higher than the Class I price level in the Phoenix-Safford area.

The level of prices existing in the area before the market became unstabilized in late 1954 maintained enough local production to meet the fluid needs of the area during months of flush production, but had not induced enough local production to meet year-round demands in the market. The market was not oversupplied on a year-round basis. This indicates that a price of $1.50 to $1.55 a pound butterfat under present nation-wide marketing conditions is not and has not been too high. At the present time, however, the economic conditions affecting the cost of producing milk in Arizona and the relative profitability of dairying compared with other agricultural enterprises are slightly more favorable to dairying than heretofore. This situation is reflected in the current slightly upward trend in local milk production. These conditions and trends indicate that a Class I price of $5.80 for 3.8 percent milk at Phoenix area plants, with appropriate differentials for other locations, will induce an adequate supply for the Central Arizona marketing area. Furthermore, if producers need any added incentive pricewise, it should be supplied through the market-wide blend price by the effects of those order provisions that require classification, check weighing and testing, and full and accurate accountability to producers for milk sold to handlers. These conclusions can be carried out in Central Arizona by adding a Class I differential of $2.80 each month of the year to a basic formula price which reflects the value of manufacturing milk at a national level. This Class I differential would apply to plants located in or within 60 miles of Tucson, Arizona, and would be adjusted downward through appropriate location differentials (discussed elsewhere in this decision). This further action has the effect of setting a Class I differential of $2.50 for producers shipping to plants in the Phoenix-Safford zone and $2.40 for those shipping to plants in the Yuma zone.

Record evidence indicates that, under present conditions, this level of prices appears to be in appropriate alignment with prices established for Grade A milk in the Los Angeles, California market under regulations promulgated by the State of California, Department of Agriculture, Bureau of Milk Control.

The basic formula price recommended herein is comparable with that proposed at the hearing and with those presently used in the Federal order markets in the State of Texas. The purpose of this basic formula price is to reflect the general economic factors underlying the price for milk used in manufactured dairy products. Because the market for most manufactured products is nation-wide, prices of such products reflect, to a large extent, changes in general economic conditions affecting the supply and demand for milk. These prices, in turn, influence the local market prices for the same uses of milk. Prices for milk used for fluid purposes are related to prices paid for milk used for manufacturing purposes since the production and marketing of inspected milk for fluid purposes is influenced by many of the same economic conditions. Also, manufacturing milk plants serve as alternative outlets for milk which farmers produce for fluid markets. For these reasons, most fluid milk markets have used the prices for butter and nonfat dry milk solids, or the prices paid by condenseries (with differentials over these basic manufacturing prices), to establish fluid milk prices. The differential that is added to the basic formula price should, in general, reflect the additional costs of getting Grade A milk produced and delivered to consumers in the quantities required to meet the needs for fluid consumption in the Central Arizona marketing area.

The basic formula price to be used in establishing the current price for Class I milk of 3.8 percent butterfat test should be the higher of the following for the preceding month: (1) The prices paid to farmers at Mid-west condenseries for milk of 3.5 percent butterfat content adjusted to a 3.8 percent basis, and (2) a formula price based on the market prices of butter and nonfat dry milk solids on the Chicago, Illinois, wholesale market. Chicago, Illinois, is a large central market for butter and nonfat dry milk solids and changes in prices at that point reflect the changing conditions affecting the supply and demand for milk and its products throughout the country. The use of these alternative components in the basic formula price will reflect the value of manufactured milk; the use of the higher price resulting therefrom is appropriate because alternative supplies of milk must be obtained at any given time in competition with the most favorably priced manufacturing outlet. Subtracting 3 cents from the Chicago butter price, adding 20 percent and multiplying by 3.8 makes appropriate allowances, respectively, for the costs of manufacturing butter, for the overrun involved, and for the pounds of butterfat contained in the milk. The deduction of 5.5 cents from the average price for spray and roller nonfat dry milk solids in Chicago is a manufacturing allowance; multiplying the result by 8.5 adjusts for the pounds of solids obtained from a hundredweight of skim milk; and multiplying the result by 0.962 adjusts for the pounds of skim milk in a hundredweight of milk containing 3.8 percent butterfat.

Handlers recommended that the order provide for a basic test of 3.5 percent butterfat rather than the 4 percent basis proposed by the Arizona Dairymen's League. Handlers based their recommendation on the facts that the market-wide average test of milk received from producers and the average test of products sold to consumers are both somewhat less than 4 percent. Moreover, Los Angeles, California, is the nearest market from which Central Arizona handlers can purchase raw milk when local production is insufficient to meet sales requirements and the only market to which any substantial quantity of milk, surplus to the needs of the Central Arizona marketing area, can be sold for processing. The Bureau of Milk Control of the State of California announces its Class I prices for Los Angeles in terms of 3.8 percent milk. Because of marketing interrelationships, it would seem appropriate to announce Central Arizona prices on a basis comparable with those in California. For these reasons, a reasonable butterfat test on which to calculate and announce prices in the Central Arizona marketing area, especially during the period immediately after the attached order would go into effect, is 3.8 percent. Setting the basic test at this level rather than at 4 percent will not, in itself, alter the level of returns to producers because the price structure established herein has been adjusted to that basis.

If experience indicates that the proposed level, or the basis or method of pricing, fails to bring forth a satisfactory level of producer milk receipts in the marketing area, it will be appropriate to re-examine these provisions in conjunction with the complete marketing information that will become available after the order has been in effect. Although the basic formula is designed to respond to general supply and demand conditions affecting the production of milk, it also is important to have the Class I price responsive to local conditions. An important local condition is the relationship between the supply of milk immediately available to the market and the proportion of this milk disposed of for Class I purposes. However, because of limitations on accurate market-wide data, no automatic adjustment of Class I prices based on changing supply-demand relationships is proposed herein. It is concluded, however, that after the accumulation of at least one-year's data the basis or method of pricing should be reexamined at a public hearing called for that purpose. For this reason the Class I price differential adopted will be effective for a period of only 18 months.

The market administrator should announce the Class I price near the beginning of each month. In order to do this, it will be necessary to use price quotations for the previous month in determining the basic formula price. These quotations will be available in time for the market administrator to announce the Class I prices on or before the 6th day of the month to which the price applies.

Class II prices. Every fluid milk market needs a "reserve" supply of Grade A milk to meet day to day fluctuations in receipts from producers and in Class I sales. In the Central Arizona marketing area, sales of milk vary considerably on a daily basis, but do not change greatly from season to season. Milk supplies, on the other hand, because of the seasonal variations in production, are greater during the winter and spring months than during the summer and fall months. The result is that handlers must process on a year-round basis the daily and seasonal surpluses into various manufactured products. Since milk going into these products must be paid for at the Class II price, this price should be fixed at a level which will induce handlers to accept and market whatever quantities of such milk may be offered from time to time by the producers who provide the market's regular fluid supply. It is of equal importance to establish a price that will return to producers full value for their milk.

All products included in Class II may be made from unapproved milk. Approved milk which may be used in some of these products by regulated handlers and, therefore, must be priced at a level that is competitive with the cost of alternative supplies of milk or in line with the cost of milk products that would otherwise be used in the Class II products processed by handlers in this area. The record shows that ice cream, cottage cheese, and condensed milk are the most important outlets for reserve and surplus milk in this area.

There is no group of plants in Central Arizona carrying on extensive manufacturing operations whose prices can be used as a basis for fixing the Class II price under the order. The two plants that represent the most important outlets for surplus milk in the area are owned and operated by persons who would be handlers under the order. Obviously, the pay prices at these plants for ungraded milk may not be used to determine the level of Class II prices under the order.

The record shows that because of a lack of local ungraded milk, and, at times, reserve and surplus milk, handlers in Central Arizona must rely on imports of cream and nonfat solids in processing Class II products and even Class I products. The record also indicates that these ingredients cannot be purchased locally at less than the level of prices for such manufactured products. It seems clear, then, that the most appropriate formula for a Class II price is one based on wholesale prices of butter and nonfat dry milk solids.

Handlers suggested a butter-nonfat dry milk solids formula that averaged about 25 cents per hundredweight lower in price in 1954 than the butter-nonfat dry milk solids formula used herein in connection with the basic formula price (section 50 (b)). The price level proposed by handlers coincided almost exactly with the level of prices reported paid for ungraded manufacturing milk by the two plants located in the marketing area. The Class II formula should reflect a price that will insure that surplus milk will move into manufacturing uses during flush production months, yet will be high enough in the months of short production to insure its use in meeting the Class I requirements of the market. To effectuate this the Class II price should be established by using the butter-nonfat dry milk solids formula in the basic formula price (section 50 (b)) during the short production months of July through December and the price resulting from the same formula less 25 cents per hundredweight during the months of January through June.

In order that the Class II price may be kept in line with current changes in manufacturing values, the central market prices for butter and nonfat milk solids during the current month should be used for determining Class II prices under the order.

Location differentials. Class I milk products because of their bulky, perishable nature incur a relatively high transportation cost if such products or the milk used to produce them are moved a considerable distance. Milk delivered directly by farmers to plants in or near the urban centers in the defined marketing area is therefore worth more to a handler than milk which is received from farmers at a plant located many miles from the market. This is so because in the latter instance the handler must incur the additional costs of moving that milk into the central market. The producer, in turn, receives less for milk delivered to points distant from the central market in lieu of incurring the additional costs of hauling his milk into the central market. Under these conditions the value of producer milk delivered to plants located some distance from the central market is reduced in proportion to the distance (and cost of transporting such milk) from the point of receipt to the central market.

In order to allow for the cost of moving Class I milk from distant plants that are, or might become, regular sources of supply for Central Arizona, it is necessary to establish the Class I price for milk delivered to plants at a point in the marketing area and then provide a schedule of deductions from the Class I milk price as location differentials or adjustments. The city of Tucson is one of two principal consuming areas in Arizona and, at the same time, represents the point at which producer prices

have been, and will continue to be, the highest. It also represents the part of the marketing area most expensive to supply (because of its location with respect to the main segment of the Central Arizona milkshed). Accordingly, the distances used in determining the location differentals should be measured from the City Hall of Tucson, Arizona, and should apply at plants located more than 60 miles by shortest hard-surfaced highway distance as determined by the market administrator.

The rates should begin with 30 cents at plants located in the 60–160 mile zone (notably Phoenix and Safford), 40 cents at plants located in the 160–260 mile zone (notably Yuma), and 1 cent for each additional 10 miles or fraction thereof as measured from the City Hall in Tucson. Handlers can be expected to move milk into the market in the most efficient and feasible manner. In the Central Arizona marketing area this means hauling in bulk by tank truck. The location differentials proposed herein are based on the record data relating to the actual cost of hauling milk by this method both within the area (as discussed earlier in this decision in connection with the Class I price) and between points in Arizona and California. They also are comparable with those contained in other Federal milk marketing orders. The rates should apply to all milk assigned to or otherwise classified as Class I.

A method is provided for determining, if necessary, the priority of milk from various plants in allocating milk to Class I for purposes of computing the aggregate of location adjustments to be allowed. Such adjustments would be made in sequence beginning with those plants nearest Tucson.

The value of milk used in manufactured dairy products is affected little, if any, by the location of the plant receiving and processing such milk (in contrast to the situation with respect to Class I fluid milk products). This phenomenon occurs because of a very significant difference in the costs of transporting the two types of dairy products—fluid milk products are bulky, easily contaminated, and almost non-storeable, whereas such manufactured products as butter and cheese, for example, are easily stored for use over long periods of time, easily transported for use in any areas of the country or world, may be made from ungraded milk, and have a high value relative to the cost of transporting them. For these reasons the prices for Class II products vary little as distance from the consuming market becomes greater. These phenomena are borne out in the record by noting the tendency for comparable prices to be paid for ungraded milk into similar uses in different parts of Arizona and California. Accordingly, no adjustment should be made in the Class II price for reason of location of the plant to which the producer milk is delivered.

In line with the economic considerations which affect the value of milk for fluid market uses when it is delivered by farmers to plants located some distance from the consuming market, it is necessary and appropriate that the uniform prices paid producers delivering milk to plants to which location differentials apply also should be reduced by the same rates applicable to handlers to reflect the lower value of such milk f. o. b. the point of actual delivery (in contrast to its value when delivered to Tucson plants where the cost of obtaining milk supplies is greatest).

Butterfat differentials. In an earlier section of this decision it was concluded that butterfat and skim milk should be accounted for separately for classification purposes. It will be necessary, therefore, to adjust Class I and Class II milk prices in accordance with the average test of milk in each class by a butterfat differential that will reflect differences of value due to variations in the butterfat content in each product. As pointed out earlier in this decision, the basing point from which such adjustments are to be made should be 3.8 percent butterfat.

The butterfat differentials for Class I milk and Class II milk should be appropriate to the level of class prices provided for herein for Class I and Class II milk. Also, the differential for Class I milk must reflect the continuing necessity for appropriate price alignment of Class I prices with California markets. This is necessary and desirable since the Class I prices proposed in this decision are in alignment with those prices. To effectuate this the Class I price should be increased or decreased for each one-tenth of one percent of butterfat above or below 3.8 percent, respectively, by the value obtained by multiplying the Chicago butter price for the preceding month by 0.175. The Class II butterfat differential would be determined by multiplying the Chicago butter price for the current month by 0.115.

The use of butterfat differentials in this manner follows standard practice in most fluid milk markets for adjusting for butterfat variations. At these levels they reflect the recommendations of the market interests at the public hearing and are such as will ease the transition of the market from a direct ratio butterfat basis of payment to a butterfat-skim milk basis of payment. In order that the Class I butterfat differential may be announced early each month, it is provided that the Class I differential be based on the average price of butter in the preceding month. This will permit the announcement of the Class I differential at the same time that the Class I price is announced.

Class II prices and butterfat differentials will not be announced until after the end of the month. Although handlers will not know the cost of such milk as it is utilized, they do know that in any sales competition with other processors located throughout the nation their competitors also will be paying for milk on the basis of current market values.

The butterfat differential used in making payments to producers should be calculated at the average of the returns actually received from the sale of butterfat in producer milk. The rate to be used for this purpose would be the average of the Class I and Class II differentials weighted by the proportion of butterfat in producer milk classified in each class. Thus, producer returns for butterfat will reflect the actual sale value of their butterfat at the class prices provided in the order. In the Central Arizona area this should mean, for most months, a producer butterfat differential at or near the value of the Class I butterfat differential. The producer butterfat differential in no way affects the differentials used in calculating a handler's obligation at class prices; it merely prorates returns among producers whose milk differs in butterfat test.

Compensatory payments on unpriced milk. Compensatory payments on unpriced milk disposed of as Class I milk in the Central Arizona marketing area are unnecessary under prevailing marketing conditions and the terms of the order proposed herein.

Over 90 percent of the production of the Central Arizona marketing area, as defined herein, is concentrated in the Salt River Valley. Inter-market competition from unregulated areas for route sales in the area is nonexistent. Except for producer-handlers, no plants, other than pool plants, distribute Class I milk on routes in the area. All such distributors will be handlers and will be treated equally under the complete classification and pricing provisions of this order. As pointed out previously in this decision, the Central Arizona marketing area has no year-round surplus. Any supply plant that becomes closely associated with the market by meeting the specified requirements will be a fully regulated pool plant. Milk from supply plants not meeting those standards will be considered as other source milk. The allocation provisions pertaining to other source milk should provide adequate protection for the equitable operation of the market-wide pool and still permit the importation of milk.

The Class I pricing formula adopted herein is an appropriate alignment with the price for Class I milk in Los Angeles, California. Under those circumstances, and as long as any milk coming into the Central Arizona marketing area is paid for in accordance with the classification and pricing provisions promulgated by the State of California Bureau of Milk Control, the need for compensatory payments on milk emanating in California seems unnecessary. Although the above conclusions with respect to the need for compensatory payments are clear under present marketing conditions, it is conceivable that competitive conditions or operating practices of regulated and unregulated handlers, both in and outside the marketing area, can change enough to create a need for remedial action with appropriate compensatory payment provisions. If such developments occur, appropriate modifications in the attached order can be proposed by the industry and reconsidered on relatively short notice at a public hearing called for that purpose.

Considerable testimony was adduced at the hearing relative to the need for, and the amount of, a compensatory payment to meet the peculiar marketing problem in the northern portion of Yuma County occasioned by a vendor operating out of Blythe, California. This problem is automatically obviated by the finding that regulation of that area as part of the Central Arizona Marketing area is unnecessary.

(d) *Payments to producers*—(a) *Type of pool.* The order should provide that the proceeds from the sale of milk in both classes by all handlers be combined and distributed to producers through a "market-wide" type of equalization pool. Under this type of pool each producers will receive minimum prices that are uniform with those received by all producers delivering milk to the Central Arizona area, subject, of course, to butterfat and location differentials. The "blend" price, and the "base" and "excess" prices during the months of January through June, will be a weighting of the proportions of all producers' milk paid for at Class I and Class II prices, and will, in effect, return to each producer his share of the Class I sales of the market.

Under the marketing conditions and the organizational structure of the industry in Central Arizona, as set forth in the record, it is clear that the market-wide type of equalization pool is a necessary part of any effective program to establish and maintain orderly marketing and pricing conditions.

Only two handlers in Central Arizona are equipped to process reserve and surplus milk in their own plants. For this reason, and those already pointed out in the discussion of the necessity for an appropriate Class II price, it is imperative that a pool be established that will provide for an equitable sharing, particularly during the flush production season, of the lower returns that are inevitable with an adequate and necessary reserve of milk. Because many plants do not have facilities for processing reserve and surplus milk, the adoption of an individual-handler pool, wherein plants operating on a Class I basis can pay a higher blend price than those who would carry the reserve needs of the market, would automaticaly deter handlers from handling such milk or from equipping their plants for that purpose. The burden of carrying the necessary reserve supplies of milk would continue to be shouldered by only a part of the producers who share in the year around Class I sales in the area.

A market-wide pool will permit any handler to bid on such business as that offered by military installations and other public institutions and to obtain the supplies for such sales without upsetting the market whenever the business might shift from one handler to another.

The producer cooperative associations in Central Arizona assume the responsibility for marketing the reserve and surplus milk of their member-producers. A market-wide pool will facilitate the movement of milk supplies by these associations between handlers to meet their individual needs or to those non-pool processing plants that can make the most efficient use of such milk. A market-wide pool will aid the market in retaining qualified, experienced and willing producers during periods of seasonal surpluses (by permitting them to receive the market-wide uniform price), hence their milk will be available to fill the Class I requirements of the market at other seasons of the year. These factors, taken in conjunction with the variations in amount of reserve supplies among plants, all support the adoption of a market-wide pool.

Base-excess plan. A base and excess plan of distributing returns for milk among producers should be employed in connection with the market-wide pool established herein. Record evidence indicates that receipts vary between the spring and fall months to a greater extent than Class I sales. In addition, same handlers have difficulty in utilizing efficiently all milk delivered to them during periods of seasonally high production. Consequently, there is a need for an incentive to maintain production in the late summer and fall months relative to that of the winter and spring months.

Handlers and producers serving the Central Arizona market are now relying and have relied on various forms of base-excess plans to provide the incentive needed to induce local dairymen to strive for a more nearly even level of milk production throughout the year. Producers and handlers alike feel that the presently-operated base-excess plans perform a much-needed function, even though their actual operation in many cases leaves much to be desired from the standpoint of equity between handlers and fairness to producers. These latter conditions can arise because distributors themselves establish the rules of the base-excess plan and control the adjustment and transfer of bases.

Base and excess plans are effective means of improving the seasonal pattern of milk deliveries because they relate producer returns directly to delivery of additional milk in the late summer and fall as compared with usual deliveries in the winter and spring. Such a plan will help to achieve a production pattern more nearly fitted to the sales pattern for fluid milk products in the area. Were some version of this plan not included in the attached order, the most likely result would be an increased seasonality of production with its attendant problems of surplus disposal in the flush production months and the need for additional imports in the short production months. Any movement in this direction will work against market stability in this area. It is concluded, therefore, that a base-excess plan, uniformly applied to all producers by being made a part of the attached order, will play an essential role in stabilizing marketing and pricing conditions in the Central Arizona area.

The base-excess plan proposed herein would establish for each producer a base equal to his average daily deliveries during the four months of August through November. If a producer did not deliver milk to the market during the entire period, the days of actual delivery from the first day of delivery but not less than 90 would be used.

In their exceptions producers and handlers urged that the base-excess plan be kept operative in the market by adopting some method for establishing bases of individual producers during the period from the effective date of the order through June 30, 1956. Several parties suggested that the problem be resolved by using producer deliveries during the months of October and November, 1955, for base-forming purposes.

In view of the fact that the order cannot be made effective before October, 1955, the most equitable period for base-forming purposes during 1955 is October–November. In order to carry out this plan, it is necessary to require handlers to report to the market administrator such information on receipts of milk from each producer during the months of October and November, 1955, as is necessary to establish bases for the base-paying period of January–June, 1956.

During the months January through June separate uniform prices would be computed for base milk and excess milk for the purpose of allocating Class I sales first to base milk. Base milk would be that quantity of milk delivered by each producer up to his average daily base multiplied by the number of days in the month during which he delivers milk to any handler. The excess milk price would be the Class II price except in those months when the total Class I sales exceed the total quantity of base milk. During such months the excess milk price would be a blend of a Class I and Class II usage of excess milk. Provision is made for producers who may enter the market after the start of the base-forming period to establish a full base by delivering a minimum of 90 days during the specified period. Producers delivering milk for less than 90 days will have their bases calculated by dividing their total deliveries during the base-forming period by 90. The base-operating period (when payments are made for base milk and excess milk) should be limited to the 6-month period, January–June. These are the months in which the production of milk and the inadequacy of surplus processing facilities combine to create difficult marketing conditions.

Any producer should be permitted to transfer his entire base provided the market administrator is given advance notice and the transfer is made as of the first of a month. Permitting bases to be so transferred will alleviate situations wherein a producer discontinues the production of milk before the end of the base-paying period of January–June. Such a provision will give a producer added incentive to increase production during the August–November period because he can benefit from all the base he can establish even though he discontinues milk production in the spring. This action will encourage a more level pattern of seasonal production, and is, therefore, compatible with the need for and the purposes of a base-excess plan.

(b) *Payments to individual producers and to members of cooperative associations.* Handlers should make payments to each producer for milk delivered by such producer at the appropriate uniform price. Payments due any producer for milk should be paid by the handler to a cooperative association that makes a written request for such payments if the producer has given the cooperative association written authorization, in the form of a contract or in any other form, to collect such payments. The association's request should also agree to in-

demnify the handler for any loss incurred because of an improper claim. In making such payments for producer milk to a cooperative association the handler should at the same time furnish the cooperative association with a statement showing the name of each producer for whom payment is being made to the cooperative association, the volume and average butterfat content of milk delivered by each such producer, and the amount of and reasons for any deductions which the handler withheld from the amount payable to each producer. This statement is necessary so the cooperative association can make proper distribution of the money it collects to the producer-members for whom it makes collections.

Qualified cooperative associations of dairymen, if they so request, should be permitted to receive payment from handlers for their producer-members as a group. A provision authorizing handlers to make payment directly to such qualified cooperative associations for milk received from producer-members is necessary to enable an association to carry out its essential functions authorized by the enabling act. A cooperative association, if it is to carry out these essential functions, must have full authority in the collective bargaining and selling of members' milk.

The record shows that the proponent cooperative association operating in the Central Arizona area has responsibility for marketing surplus producer milk during months of flush production. This milk may be sold within or outside the marketing area. Such sales may result in financial losses or gains to the association, hence the association must be in a position to spread such losses or gains over the entire membership if it is to handle such milk effectively and efficiently. The Agricultural Marketing Agreement Act authorizes a qualified producer cooperative association to collect payments on behalf of all its members for milk caused to be marketed to all types of outlets by such association and to reblend the proceeds from its entire sales. The order should provide that payment to such a cooperative association is a proper satisfaction of the payments required by the order to be made to individual producer-members.

(c) *Producer-settlement fund.* Since the amount which the order requires a particular handler to pay for his milk may be more or less than the amount he is required to pay to producers or cooperative associations, it is necessary to provide for some method of balancing these amounts. A producer-settlement fund should be established for this purpose. All handlers who are required to pay more for their milk on the basis of their utilization than they are required to pay to producers or cooperative associations should pay the difference into the producer-settlement fund; all handlers who are required to pay more to producers or cooperative associations than they are required to pay for their milk on the basis of utilization should receive the difference from the producer-settlement fund. Amounts paid into and out of the producer-settlement fund for this purpose will be equal, except for minor differences that may result from rounding of uniform prices. In order to permit this rounding of prices, to allow for unavoidable delays in receiving payments from handlers, and to permit payments to be made to any handler which audit by the market administrator reveals is due such handler from the producer-settlement fund, a reserve should be held in the producer-settlement fund at all times. The amount of the reserve contemplated in the proposed order should be sufficient for these purposes. This reserve would be adjusted each month.

If at any time the balance in the producer-settlement fund is insufficient to cover payments due to all handlers from the producer-settlement fund, payments to such handlers should be reduced uniformly per hundredweight of milk. The handlers may then reduce payments to producers by an equivalent amount per hundredweight. Amounts remaining due such handlers from the producer-settlement fund should be paid as soon as the balance in the fund is sufficient, and handlers should then complete payments to producers. In order to reduce the possibility of this occurring, milk received by any handler who has not made payments required of him into the producer-settlement fund should not be considered in the computation of the uniform price in subsequent months until such handler has completed all delinquent payments.

(e) *Other administrative provisions.* Certain other provisions are needed in the order to carry out the administrative steps necessary to accomplish the purposes of the proposed regulation.

Terms and definitions. In addition to the definitions discussed earlier in this decision which define the scope of the regulation, certain other terms and definitions are desirable in the interest of brevity and to insure that each usage of the term implies the same meaning. Definitions for base and excess milk are included. Other terms defined in the proposed order are common to many other Federal milk orders.

Marketing administrator. Provisions should be made for the appointment by the Secretary of a market administrator to administer the order and to set forth the powers and duties for such agency essential to the proper functioning of his office.

Records and reports. Provisions should be included in the order to advise handlers that they are required to maintain adequate records of their operations and to make the reports necessary to establish the proper classification and pricing of producer milk and payments due producers for such milk. Time limits must be prescribed for filing such reports and for making payments to producers. Dates must also be established for the announcement of prices by the market administrator.

It should be provided that the market administrator report to the cooperative association, which so requests, the amount and class utilization of milk received by each handler from producers who are members of such cooperative association. For the purpose of this report, the utilization of members' milk in each handler's plant will be prorated to each class in the proportion that total receipts of producer milk were used in each class by such handler. In addition to the regular reports of handlers, provision is made for the handler, prior to the diversion of the milk of a producer, to notify the market administrator and the cooperative association, if such producer is a member of an association, of his intention to divert such milk. These reports are necessary if a cooperative association is to market to best advantage the milk of its member producers.

Handlers should maintain and make available to the market administrator all records and accounts of their operations, and such facilities as are necessary to determine the accuracy of the information reported to the market administrator as he may deem necessary or any other information upon which the classification of producer milk depends. The market administrator must likewise be permitted to check the accuracy of weights and tests of milk and milk products received and handled and to verify all payments required under the order.

It is necessary that handlers retain records to prove the utilization of the milk received from producers and that proper payments were made therefor. Since the books of all handlers associated with the market cannot be audited immediately after the milk has been delivered to a plant, it necessary that such records be kept for a reasonable period of time.

The order should provide for specific limitations of the time that handlers should be required to retain their books and records and of the period of time in which obligations under the order should terminate. Provision made in this regard is identical in principle with the general amendment made to all milk orders in operation July 30, 1947, following the Secretary's decision of January 26, 1949 (14 F. R. 444). That decision covering the retention of records and limitations of claims is equally applicable in this situation and is adopted as a part of this decision. Without a provision for termination of obligations after a reasonable period of time has elapsed, handlers may file claims which, because the period involved might extend back over many years, could be in substantial amounts. This creates uncertainties which would endanger, the stability of the market and lead to serious inequities. The order should provide that any obligation to pay a handler shall terminate two years after the month in which the milk was received if an underpayment is claimed, or within two years after payment was made if a refund is claimed, unless within such period of time the handler files a petition pursuant to section 8c (15) (A) of the act, claiming such money. Handlers also need the protection of provisions terminating their obligations to make payments. Since handlers cannot be forewarned always as to contingent liabilities, it is extremely difficult and burdensome for them to make adequate provisions therefor by setting up reserves or by taking other precautionary measures. The obligation of any handler to pay money should, except under

certain extraordinary conditions, such as litigation, terminate two years after the last day of the month during which the market administrator receives the handler's report of utilization of the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. It is concluded that in general, a period of two years is a reasonable time within which a market administrator should complete his auditing and inspection work and render any billings for money due under the order. Provisions are necessary, also, as contained in the order included herewith, to meet such contingencies as failure of the handler to submit required books and records and to deal with situations where fraud or willful concealment of information may be involved.

It was proposed that if a handler fails to make the required reports or payments, his name shall be publicly announced at the discretion of the market administrator. Such announcement is provided for by the act, and it is concluded that its adoption will facilitate the enforcement of the terms of the order.

Expenses of administration. Each handler should be required to pay the market administrator as his pro rata share of the cost of administering the order not more than 4 cents per hundredweight or such lesser amounts as the Secretary may, from time to time, prescribe on (a) producer milk (including such handler's own production), and (b) other source milk in pool plants which is allocated to Class I milk.

The market administrator must have sufficient funds to enable him to administer properly the terms of the order. The act provides that such cost of administration shall be financed through an assessment on handlers.

One of the duties of the market administrator is to verify the receipts and disposition of milk from all sources. The record indicates that other source milk is received by handlers to supplement local producer supplies of milk. Equity in sharing the cost of administration of the order among handlers will be achieved, therefore, by applying the administrative assessment to all producer milk (including handlers' own production) and to other source milk allocated to Class I milk.

Proponents of the order suggested a rate of 5 cents per hundredweight to provide the funds needed to administer properly the attached regulation. In view of the anticipated volume of milk and the costs of administering orders in markets of comparable circumstances, it is concluded that an initial rate of 4 cents per hundredweight is necessary to meet the expenses of administration. Provision should be made to enable the Secretary to reduce the rate of assessment below the 4 cents per hundredweight maximum without necessitating an amendment to the order. This should be done at any time experience in the market reveals that a lesser rate will produce sufficient revenue to administer the order properly.

Marketing services. A provision should be included in the order for furnishing market services to producers, such as verifying the tests and weights of producer milk and furnishing market information. These should be provided by the market administrator and the cost should be borne by the producer receiving the service. If a cooperative association is performing such services for any member-producers and is approved for such activities by the Secretary, the market administrator may accept this in lieu of his own service.

There is need for a marketing service program in connection with the administration of an order in this area. Orderly marketing will be promoted by assuring individual producers that payments received for their milk are in accordance with the Classification, pricing and pooling provisions of the order, and reflect accurate weights and tests of such milk. To accomplish this fully, it is necessary that the butterfat tests and weights of individual producer deliveries of milk as reported by the handler be verified for accuracy.

In the case of producers who are members of cooperatives having plants, the matter of milk-testing and milk-weighing is under the complete control of such producers and is assessed against such producers either through an association check-off or as a plant operating cost. Bargaining associations in the area are performing check-weighing and check-testing services for their members under their association check-off. In order to place such services on a market-wide basis, the market administrator should also provide them for producers not otherwise receiving services through a cooperative association. The additional service of providing market information to producers is carried on to some extent at present by the cooperatives although detailed information regarding market prices, supplies, and the utilization of milk is not available to either the cooperative associations and their members or the independent producers.

An important phase of the marketing service program of the order is to furnish producers with correct market information. Efficiency in the production, utilization and marketing of milk will be promoted by the dissemination of current information on a market-wide basis to all producers.

To enable the market administrator to furnish these marketing services, provision should be made for a maximum deduction of 5 cents per hundredweight with respect to receipts of milk from producers for whom he renders marketing services. If later experience indicates that marketing services can be performed at a lesser rate, provision is made for the Secretary to adjust the rate downward without the necessity of a hearing. In the event any qualified cooperative association of producers is determined by the market administrator to be performing such services for its members, handlers would be required to pay to the cooperative association such association dues as are authorized by its members.

General findings. (a) The proposed marketing agreement and the order, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing area, and the minimum prices specified in the proposed marketing agreement and the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in the marketing agreement upon which a hearing has been held.

Order of the Secretary directing that a referendum be conducted among the producers supplying milk to the Central Arizona Marketing Area; determination of representative period and designation of an agent to conduct such referendum. Pursuant to Section 8c (19) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608c (19)), it is hereby directed that a referendum be conducted among the producers (as defined in the proposed order regulating the handling of milk in the Central Arizona marketing area) who, during the month of August 1955, were engaged in the production of milk for sale in the marketing area specified in the aforesaid proposed order to determine whether such producers favor the issuance of the order which is a part of the decision of the Secretary of Agriculture filed simultaneously herewith.

The month of August 1955, is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order regulating the handling of milk in the Central Arizona marketing area in the manner set forth in the attached order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such marketing order.

Andrew T. Radigan is hereby designated agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 5177), such referendum to be completed on or before the 20th day from the date this referendum order is issued.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled respectively "Marketing Agreement Regulating the Handling of Milk in the Central Arizona Marketing Area" and "Order Regulating the Handling of Milk in the Central Arizona Marketing Area," which have been

decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the attached order, which will be published with this decision.

This decision filed at Washington, D. C., this 7th day of October 1955.

[SEAL] EARL L. BUTZ,
Assistant Secretary.

Order[1] Regulating the Handling of Milk in the Central Arizona Marketing Area

Sec.
1004.0 Findings and determinations.

DEFINITIONS

1004.1 Act.
1004.2 Secretary.
1004.3 Department.
1004.4 Person.
1004.5 Cooperative association.
1004.6 Central Arizona marketing area.
1004.7 Producer.
1004.8 Pool plant.
1004.9 Nonpool plant.
1004.10 Handler.
1004.11 Producer-handler.
1004.12 Market administrator.
1004.13 Producer milk.
1004.14 Other source milk.
1004.15 Fluid milk product.
1004.16 Route.
1004.17 Base milk.
1004.18 Excess milk.
1004.19 Chicago butter price.

MARKET ADMINISTRATOR

1004.20 Designation.
1004.21 Powers.
1004.22 Duties.

REPORTS, RECORDS, AND FACILITIES

1004.30 Reports of sources and utilization.
1004.31 Other reports.
1004.32 Records and facilities.
1004.33 Retention of records.

CLASSIFICATION OF MILK

1004.40 Skim milk and butterfat to be classified.
1004.41 Classes of utilization.
1004.42 Responsibility of handlers.
1004.43 Transfers.
1004.44 Computation of skim milk and butterfat in each class.
1004.45 Allocation of skim milk and butterfat classified.

MINIMUM PRICES

1004.50 Basic formula price.
1004.51 Class prices.
1004.52 Butterfat differentials to handlers.
1004.53 Location differentials to handlers.
1004.54 Use of equivalent prices.

APPLICATION OF PROVISIONS

1004.60 Producer-handler.
1004.61 Plants subject to other Federal orders.

DETERMINATION OF UNIFORM PRICES TO PRODUCERS

1004.70 Computation of the value of producer milk for each handler.
1004.71 Computation of the uniform price.
1004.72 Computation of uniform prices for base milk and excess milk.
1004.73 Butterfat differential to producers.
1004.74 Location differential to producers.
1004.75 Notification of handlers.

PAYMENTS

1004.80 Time and method of payment for producer milk.
1004.81 Producer-settlement fund.
1004.82 Payments to the producer-settlement fund.
1004.83 Payments out of the producer-settlement fund.
1004.84 Adjustment of accounts.
1004.85 Marketing services.
1004.86 Expense of administration.
1004.87 Termination of obligations.

BASE RATING

1004.90 Computation of daily average base for each producer.
1004.91 Base rules.
1004.92 Announcement of established bases.

EFFECTIVE TIME, SUSPENSION, OR TERMINATION

1004.100 Effective time.
1004.101 Suspension or termination.
1004.102 Continuing obligations.
1004.103 Liquidation.

MISCELLANEOUS PROVISIONS

1004.110 Agents.
1004.111 Separability of provisions.

§ 1004.0 *Findings and determinations—(a) Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.) and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and a proposed order regulating the handling of milk in the Central Arizona marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of and demand for such milk, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest;

(3) The said order regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in this order, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expenses of the market administrator for the maintenance and functioning of such agency will require the payment by each handler as his pro rata share of such expenses, 4 cents per hundredweight, or such amount not exceeding 4 cents per hundredweight, as the Secretary may prescribe with respect to all butterfat and skim milk contained in (i) producer milk (including such handler's own production), and (ii) other source milk in pool plants which is allocated to Class I milk.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Central Arizona marketing area shall be in conformity to and in compliance with the terms and conditions of this order as set forth below:

DEFINITIONS

§ 1004.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as re-enacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended.

§ 1004.2 *Secretary.* "Secretary" means the Secretary of Agriculture or any officer or employee of the United States who is authorized to exercise the powers and to perform the duties of the Secretary of Agriculture.

§ 1004.3 *Department.* "Department" means the United States Department of Agriculture or such other Federal agency as is authorized to perform the price reporting functions specified in this part.

§ 1004.4 *Person.* "Person" means any individual, partnership, corporation, association or any other business unit.

§ 1004.5 *Cooperative association.* "Cooperative association" means any cooperative association of producers which the Secretary determines:

(a) To be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have and to be exercising full authority in the sale of milk for its members.

§ 1004.6 *Central Arizona marketing area.* "Central Arizona marketing area" hereinafter called the "marketing area" means all territory included within the counties of Maricopa, Pima, Pinal, Graham, and the territory south of 33 degrees latitude (North from the Equator) in Yuma County, all in the State of Arizona.

§ 1004.7 *Producer.* "Producer" means any person other than a producer-handler, who produces milk in compliance with Grade A inspection requirements of a duly constituted health authority having jurisdiction within the marketing area and whose milk is received at a pool plant or is diverted from a pool plant by the handler who operates such pool plant, or by a cooperative association, to a plant which is not a pool plant for the account of such handler or cooperative association. "Producer" does not mean any dairy farmer with respect to milk received by a handler who is partially exempted from the provisions of this part pursuant to § 1004.61.

§ 1004.8 *Pool plant.* "Pool plant" means any milk plant:

(a) Approved or recognized by any health authority having jurisdiction within the marketing area for the receipt or processing of Grade A milk and from which Class I milk is disposed of on a route(s) in the marketing area;

(b) Supplying to any agency of the United States Government located within the marketing area Class I milk products; or

(c) Any plant which ships fluid milk products approved by any health authority having jurisdiction in the marketing area as eligible for distribution under a Grade A label in a volume equal to not less than 50 percent of its receipts of milk (from dairy farmers who would be producers if this plant qualifies as a pool plant) in the current month during the period of July through October or 20 percent in the current month during the period November through June to a plant specified in paragraph (a) of this section: *Provided*, That if a plant qualifies in each of the months of July through October in the manner prescribed in this section such plant shall upon written application to the market administrator on or before October 31 following such compliance, be designated as a pool plant until the end of the following June.

(d) For the purpose of this definition, milk diverted from a pool plant to a nonpool plant as described in § 1004.7 shall be deemed to have been received at the pool plant from which such milk was diverted.

§ 1004.9 *Nonpool plant.* "Nonpool plant" means any milk manufacturing, processing or bottling plant other than a pool plant.

§ 1004.10 *Handler.* "Handler" means (a) any person in his capacity as the operator of a pool plant; or (b) a cooperative association with respect to milk of producers diverted for the account of such association from a pool plant to a nonpool plant in accordance with the provisions of § 1004.7.

§ 1004.11 *Producer-handler.* "Producer-handler" means any person who is both a dairy farmer and the operator of a pool plant in accordance with § 1004.8 (a) or (b), but who receives no milk from producers or other dairy farmers: *Provided*, That, such person provides proof satisfactory to the market administrator that (a) the maintenance, care and management of all the dairy animals and other resources necessary to produce the entire amount of milk handled (other than that received from pool plants) is the personal enterprise of and at the personal risk of such person in his capacity as a producer, and (b) the operation of such pool plant is the personal enterprise of and at the personal risk of such person in his capacity as a handler.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

§ 1004.12 *Market administrator.* "Market administrator" means the person designated pursuant to § 1004.20 as the agency for the administration of this part.

§ 1004.13 *Producer milk.* "Producer milk" means all skim milk and butterfat produced by a producer, which is received at a pool plant directly from such producer.

§ 1004.14 *Other source milk.* "Other source milk" means all skim milk and butterfat contained in:

(a) Receipts during the month of fluid milk products except (1) fluid milk products received from pool plants, or (2) producer milk; and

(b) Products, other than fluid milk products, from any source (including those produced at the pool plant) which are reprocessed or converted to another product in the pool plant during the month.

§ 1004.15 *Fluid milk product.* "Fluid milk product" means milk (including frozen or concentrated milk), skim milk, buttermilk, flavored milk, flavored milk drinks and cream in fluid form or any mixture in fluid form of milk, skim milk and cream (except sterilized products packaged in hermetically sealed containers, eggnog, yogurt, ice cream mix and aerated cream).

§ 1004.16 *Route.* "Route" means any delivery to retail or wholesale outlets (including delivery by a vendor or a sale from a plant or a plant store) of milk or any milk product classified as Class I milk pursuant to § 1004.41 (a) other than a delivery to a plant described in § 1004.8 (a).

§ 1004.17 *Base milk.* "Base milk" means producer milk received by handlers from a producer during the months of January through June which is not in excess of such producer's daily base determined pursuant to § 1004.90, multiplied by the number of days during the month for which milk was received from such producer.

§ 1004.18 *Excess milk.* "Excess milk" means producer milk received by handlers from a producer which is in excess of base milk received from such producer during the months of January through June of each year.

§ 1004.19 *Chicago butter price.* "Chicago butter price" means the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of 92-score bulk creamery butter at Chicago as reported during the month by the Department.

MARKET ADMINISTRATOR

§ 1004.20 *Designation.* The agency for the administration of this order shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 1004.21 *Powers.* The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To make rules and regulations to effectuate its terms and provisions;

(c) To receive, investigate, and report to the Secretary complaints of violations; and

(d) To recommend amendments to the Secretary.

§ 1004.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including, but not limited to, the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon his duties and conditions upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds received pursuant to § 1004.86: (1) The cost of his bond and of the bonds of his employees, (2) his own compensation, and (3) all other expenses, except those incurred under § 1004.85, necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part, and, upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Publicly disclose to handlers and producers, at his discretion, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, after the date upon which he is required to perform such acts, has not made reports pursuant to §§ 1004.30 through 1004.32 or payments pursuant to §§ 1004.80 through 1004.86;

(g) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(h) On or before the 12th day after the end of each month, report to each cooperative association which so requests the percentage of producer milk delivered by members of such association which was used in each class by each handler receiving such milk. For the purpose of this report the milk so received shall be prorated to each class in accordance with the total utilization of producer milk by such handler;

(i) Verify all reports and payments of each handler by audit necessary, of such handler's records and the records of any other handler or person upon whose utilization the classification of skim milk and butterfat for such han-

dler depends; and by such other means as are necessary;

(j) Prepare and make available for the benefit of producers, consumers, and handlers, general statistics and information concerning the operation of this order which do not reveal confidential information; and

(k) On or before the date specified, publicly announce by posting in a conspicuous place in his office and by such other means as he deems appropriate, and mail to each handler at his last known address a notice of, the following:

(1) The 6th day of each month, the Class I milk price and the Class I butterfat differential, both for the current month; and the Class II milk price, and the Class II butterfat differential, both for the preceding month, and

(2) The 11th day of each month, the uniform price, and the producer butterfat differential, both for the preceding month.

REPORTS, RECORDS, AND FACILITIES

§ 1004.30 *Reports of sources and utilization.* On or before the 7th day after the end of each month each handler, except a producer-handler, shall report for each of his pool plants for such month to the market administrator in the detail and on forms prescribed by the market administrator as follows:

(a) The quantities of skim milk and butterfat contained in:

(1) Producer milk,

(2) Fluid milk products received from other pool plants,

(3) Other source milk,

(4) Inventories of fluid milk products on hand at the beginning of the month; and

(b) The utilization of all skim milk and butterfat required to be reported pursuant to paragraph (a) of this section, including separate statements as to the disposition of Class I milk on routes entirely outside the marketing area, and inventories of fluid milk products on hand at the end of the month.

§ 1004.31 *Other reports.* (a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe;

(b) Each handler, except a producer-handler, shall report to the market administrator in the detail and on forms prescribed by the market administrator:

(1) On or before the 7th day of each of the months of February through July the aggregate quanttiy of base milk received at his pool plant(s) for the preceding month,

(2) On or before the 20th day after the end of the month, for each of his pool plants, his producer payroll for such month which shall show for each producer: (i) His name and address, (ii) the total pounds of milk received from such producer; including, for the months of January through June, the pounds of base milk, (iii) the days for which milk was received from such producer if less than the entire month, (iv) the average butterfat content of such milk, and (v) the net amount of such handler's payment to the producer, together with the price paid and the amount and nature of any authorized deductions,

(3) On or before the first day other source milk is received in the form of a fluid milk product at his pool plant(s), his intention to receive such product, and on or before the last day such product is received, his intention to discontinue receipt of such product;

(4) On or before the day prior to diverting producer milk pursuant to § 1004.7 his intention to divert such milk, the date or dates of such diversion and the nonpool plant to which such milk is to be diverted, and

(5) Such other information with respect to his sources and utilization of butterfat and skim milk as the market administrator may prescribe.

(c) Each handler operating a pool plant shall report the total quantity of milk received from each producer and the number of days of such delivery for each of the months of October 1955 and November 1955, together with such other information relating to the computation of bases to be in effect in the January–June 1956 period as the market administrator may prescribe.

§ 1004.32 *Records and facilities.* Each handler shall maintain and make available to the market administrator during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data for each month with respect to:

(a) The receipt and utilization of all skim milk and butterfat handled in any form;

(b) The weights and tests for butterfat and other content of all products handled;

(c) The pounds of skim milk and butterfat contained in or represented by all items of products on hand at the beginning and end of each month; and

(d) Payments to producers, including any deductions authorized by producers, and disbursement of money so deducted.

§ 1004.33 *Retention of records.* All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided,* That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION OF MILK

§ 1004.40 *Skim milk and butterfat to be classified.* The skim milk and butterfat to be reported for pool plants pursuant to § 1004.30 (a) shall be classified each month by the market administrator, pursuant to the provisions of §§ 1004.41 through 1004.45.

§ 1004.41 *Classes of utilization.* Subject to the conditions set forth in §§ 1004.42 through 1004.45, the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk (including reconstituted and concentrated nonfat milk solids) and butterfat; (1) disposed of from the plant in the form of fluid milk products, except those classified pursuant to subparagraph (b) (3) of this section, and (2) not specifically accounted for as Class II milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat; (1) used to produce any product other than a fluid milk product; (2) contained in inventories of fluid milk products on hand at the end of the month; (3) disposed of as skim milk for livestock feed; and (4) in shrinkage not to exceed 2 percent, respectively, of the skim milk and butterfat contained in producer milk (except that diverted pursuant to § 1004.7) and other source milk: *Provided,* That if shrinkage of skim milk or butterfat is less than such 2 percent it shall be assigned pro rata to the skim milk or butterfat contained in producer milk (except that diverted pursuant to § 1004.7) and other source milk, respectively.

§ 1004.42 *Responsibility of handlers.* All skim milk and butterfat to be classified pursuant to this part shall be classified as Class I milk, unless the handler who first receives such skim milk and butterfat establishes to the satisfaction of the market administrator that it should be classified as Class II milk.

§ 1004.43 *Transfers.* (a) Skim milk and butterfat transferred to a pool plant of another handler (except a producer-handler) in the form of fluid milk products shall, to the extent required, be classified so as to result in the maximum assignment of the producer milk of both handlers to Class I milk. Any additional amounts of skim milk and butterfat shall be classified Class I milk unless the operators of both plants claim utilization thereof in Class II milk in their reports submitted pursuant to § 1004.30: *Provided,* That the skim milk or butterfat so assigned to Class II milk for any month shall be limited to the respective amounts thereof remaining in Class II milk for such month at the pool plant(s) of the receiving handler after the subtraction of other source milk pursuant to § 1004.45;

(b) Skim milk and butterfat transferred to the plant of a producer-handler in the form of fluid milk products, shall be classified as Class I milk;

(c) Skim milk and butterfat transferred or diverted in bulk form as milk or skim milk to a nonpool milk plant shall be classified as Class I unless, (1) the transferee-plant is located less than 250 miles from the City Hall of Phoenix or Tucson, Arizona, whichever is nearer, by the shortest hard-surfaced highway distance, as determined by the market administrator, (2) the transferring or diverting handler claims classification in Class II milk in his report submitted to the market administrator pursuant to § 1004.30 for the month within which such transaction occurred, (3) the operator of the nonpool plant maintains books and records showing the utilization of all skim milk and butterfat at such plant which are made available if requested by the market administrator for the purpose of verification, and (4) not less than an equivalent amount of skim milk and buttterfat was actually utilized in the nonpool plant in the use indicated in such report: *Provided,* That if it is found that an equivalent amount of skim milk and butterfat was not actually used in such plant during the month in such indicated use, the pounds transferred in excess of such actual used shall be classified as Class I milk; and

(d) Skim milk and butterfat transferred in bulk form as cream to a nonpool plant shall be classified Class I milk unless, (1) the transferring handler claims classification in Class II milk in his report submitted to the market administrator pursuant to § 1004.30, (2) the handler attaches tags or labels to each container of such cream bearing the words "Grade C cream for manufacturing uses only" and the shipment is so invoiced, (3) the handler gives the market administrator sufficient notice to allow him to verify the shipment, (4) the operator of the nonpool plant maintains books and records showing the utilization of all skim milk and butterfat at such plant which are made available if requested by the market administrator for the purpose of verification, and (5) not less than an equivalent amount of skim milk and butterfat was actually utilized in the nonpool plant in the use indicated in such report: *Provided,* That, if it is found that an equivalent amount of skim milk and butterfat was not actually used in such plant during the month in such indicated use, the pounds transferred in excess of such actual use shall be classified as Class I milk.

§ 1004.44 *Computation of skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and other obvious errors, the report submitted by each handler pursuant to § 1004.30 and compute the total pounds of skim milk and butterfat respectively, in Class I milk and Class II milk at all of the pool plants of such handler: *Provided,* That, the skim milk contained in any product utilized, produced or disposed of by the handler during the month shall be considered to be an amount equivalent to the nonfat milk solids contained in such product, plus all of the water originally associated with such solids.

§ 1004.45 *Allocation of skim milk and butterfat classified.* (a) The pounds of skim milk remaining in each class after making the following computations each month with respect to the pool plant(s) of each handler, shall be the pounds of skim milk in such class allocated to the producer milk of such handler for such month.

(1) Subtract from the total pounds of skim milk in Class II milk the shrinkage of skim milk in producer milk classified as Class II milk pursuant to § 1004.41 (b),

(2) Subtract from the pounds of skim milk remaining in Class II milk the pounds of skim milk in other source milk: *Provided,* That if the pounds of skim milk to be subtracted are greater than the remaining pounds of skim milk in Class II milk, the balance shall be subtracted from the pounds of skim milk in Class I milk,

(3) Subtract from the pounds of skim milk remaining in Class II milk the pounds of skim milk contained in inventory of fluid milk products on hand at the beginning of the month: *Provided,* That if the pounds of skim milk in such inventory exceed the remaining pounds of skim milk in Class II milk the balance shall be subtracted from the pounds of skim milk remaining in Class I milk,

(4) Subtract the pounds of skim milk in fluid milk products received from pool plants of other handlers from the pounds of skim milk remaining in the class to which assigned, pursuant to § 1004.43 (a),

(5) Add to the pounds of skim milk remaining in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph; and

(6) If the pounds of skim milk remaining in all classes exceed the pounds of skim milk in milk received from producers, subtract such excess from the pounds of skim milk remaining in the various classes in series beginning with Class II milk. Any amount so subtracted shall be called "overage";

(b) Determine the pounds of butterfat in each class to be allocated to producer milk in the manner prescribed in paragraph (a) of this section for determining the allocation of skim milk to producer milk;

(c) Add the pounds of skim milk and the pounds of butterfat in each class calculated pursuant to paragraphs (a) and (b) of this section and determine the percentage of butterfat in the producer milk allocated to each class.

MINIMUM PRICES

§ 1004.50 *Basic formula price.* The higher of the prices computed pursuant to paragraphs (a) and (b) of this section, rounded to the nearest whole cent, shall be known as the basic formula price.

(a) The average of the basic, or field, prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department, divided by 3.5 and multiplied by 3.8:

Present Operator and Location

Borden Co., Mt. Pleasant, Mich.
Borden Co., New London, Wis.
Borden Co., Orfordville, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Sparta, Mich.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed by adding together the plus values of subparagraphs (1) and (2) of this paragraph:

(1) From the Chicago butter price, subtract 3 cents, add 20 percent thereof, and multiply by 3.8.

(2) From the simple average as computed by the market administrator of the weighted averages of the carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department, deduct 5.5 cents, muliply by 8.5, and then multiply by 0.962.

§ 1004.51 *Class prices.* Subject to the provisions of §§ 1004.52 and 1004.53, the minimum prices per hundredweight to be paid by each handler for milk received at his pool plant(s) from producers during the month shall be as follows:

(a) *Class I milk price.* For each month during an eighteen month period following the effective date of this order, the minimum price per hundredweight of Class I milk containing 3.8 percent butterfat shall be the basic formula price for the preceding month plus $2.80.

(b) *Class II milk price.* The Class II milk price shall be the "butter-powder" price computed pursuant to § 1004.50 (b) during the months of July through December, and that price less 25 cents during the months of January through June.

§ 1004.52 *Butterfat differentials to handlers.* For each class of milk containing more or less than 3.8 percent butterfat, the class prices calculated pursuant to § 1004.51 shall be increased or decreased, respectively, for each one-tenth percent butterfat at the appropriate rate, rounded to the nearest one-tenth cent, determined as follows:

(a) *Class I price.* Multiply the Chicago butter price for the preceding month by 0.175; and

(b) *Class II price.* Multiply the Chicago butter price for the current month by 0.115.

§ 1004.53 *Location differentials to handlers.* For that milk which is received from producers at a pool plant located 60 miles or more from the City Hall, Tucson, Arizona, by the shortest hard-surfaced highway distance as determined by the market administrator and which is assigned to Class I milk pursuant to the proviso of this section when moved to another pool plant, or classified as Class I milk without such movement, the price specified in § 1004.51 (a) shall be reduced at the rate set forth in the following schedule according to

the location of the pool plant where such milk is received from producers:

	Rate per hundredweight (cents)
Distance from the City Hall of Tucson, Ariz. (miles):	
60 but not more than 160	30.0
160 but not more than 260	40.0
For each additional 10 miles or fraction thereof an additional	1.0

Provided, That for the purpose of calculating such location differential, fluid milk products which are transferred between pool plants shall be assigned to any remainder of Class II milk in the plant to which transferred after making the calculations prescribed in § 1004.45 (a) (1) through (4), and the comparable steps in (b) for such plant, such assignment to the transferring plants to be made in sequence according to the location differential applicable at each plant, beginning with the plant having the largest differential.

§ 1004.54 *Use of equivalent prices.* If for any reason a price quotation required by this part for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

APPLICATION OF PROVISIONS

§ 1004.60 *Producer-handler.* Sections 1004.40 through 1004.45, 1004.50 through 1004.53, 1004.70 through 1004.75, and 1004.80 through 1004.87 shall not apply to a producer-handler.

§ 1004.61 *Plants subject to other Federal orders.* Upon application to the market administrator and a subsequent determination by the Secretary, any plant specified in paragraph (a) or (b) of this section shall be treated as a nonpool plant except that the operator of such plant shall, with respect to the total receipts and utilization or disposition of skim milk and butterfat at the plant, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator:

(a) Any pool plant which (1) would otherwise be subject to the classification and pricing provisions of another order issued pursuant to the act, and (2) does not dispose of a greater volume of Class I milk to retail or wholesale outlets (except pool plants or nonpool plants) in the Central Arizona marketing area than in the marketing area regulated pursuant to such other order; and

(b) Any plant which (1) would otherwise be subject to the classification and pricing provisions of another order issued pursuant to the act, and (2) qualified as a pool plant for each of the preceding months of July through October in accordance with the provisions of § 1004.8 (c).

DETERMINATION OF UNIFORM PRICES TO PRODUCERS

§ 1004.70 *Computation of the value of producer milk for each handler.* For each month, the market administrator shall compute the value of producer milk for each handler as follows:

(a) Multiply the quantity of producer milk in each class computed pursuant to § 1004.45 by the applicable class price, total the resulting amounts; and add any amount necessary to reflect adjustments in location differential allowance required pursuant to the proviso of § 1004.53;

(b) Add an amount computed by multiplying the pounds of any overage deducted from either class pursuant to § 1004.45 (a) (6) and (b) by the applicable class price; and

(c) Add the amount computed by multiplying the difference between the appropriate Class II price for the preceding month and the appropriate Class I milk price for the current month by the hundredweight of skim milk and butterfat remaining in Class II milk after the calculations pursuant to § 1004.45 (a) (4) and (b) for the preceding month or the hundredweight of skim milk and butterfat subtracted from Class I milk pursuant to § 1004.45 (a) (3) and (b) for the current month, whichever is less.

§ 1004.71 *Computation of the uniform price.* For each of the months of July through December, the market administrator shall compute the uniform price per hundredweight of producer milk of 3.8 percent butterfat content, as follows:

(a) Combine into one total the values computed pursuant to § 1004.70 for the producer milk of all handlers who submit reports prescribed in § 1004.30 and who are not in default of payments pursuant to §§ 1004.80 or 1004.82;

(b) Subtract, if the average butterfat content of the producer milk included under paragraph (a) of this section is greater than 3.8 percent, or add, if such average butterfat content is less than 3.8 percent, an amount computed as follows: Multiply the amount by which the average butterfat content of such milk varies from 3.8 percent by the butterfat differential computed pursuant to § 1004.73, and multiply the result by the total hundredweight of such milk;

(c) Add an amount equal to the sum of the deductions to be made from producer payments for location differentials pursuant to § 1004.74;

(d) Add an amount equal to one-half of the unobligated balance on hand in the producer-settlement fund;

(e) Divide the resulting amount by the total hundredweight of producer milk included under paragraph (a) of this section; and

(f) Subtract not less than 4 cents nor more than 5 cents.

§ 1004.72 *Computation of uniform prices for base milk and excess milk.* For each of the months of January through June, the market administrator shall compute the uniform prices per hundredweight for base milk and for excess milk, each of 3.8 percent butterfat content, as follows:

(a) Compute the aggregate value of excess milk for all handlers who submit reports pursuant to § 1004.30, and who are not in default of payments pursuant to §§ 1004.80 or 1004.82 as follows: (1) Multiply the hundredweight of such milk not in excess of the total quantity of producer milk assigned to Class II milk in the pool plants of such handlers by the Class II milk price, (2) multiply the hundredweight of excess milk not included in subparagraph (1) hereof by the Class I milk price, and (3) add together the resulting amounts;

(b) Divide the total value of excess milk obtained in paragraph (a) of this section by the total hundredweight of such milk, adjust to the nearest cent and subtract 4 cents. The resulting figure shall be the uniform price for excess milk of 3.8 percent butterfat content received from producers;

(c) Subtract the total value of excess milk, determined by multiplying the uniform price obtained in paragraph (b) of this section, plus 4 cents, times the hundredweight of excess milk, from the total value of producer milk for the month as determined according to the calculations set forth in § 1004.71 (a) through (d) (using location differentials applicable to base and excess milk);

(d) Divide the amount calculated pursuant to paragraph (c) of this section by the total hundredweight of base milk included in these computations; and

(e) Subtract not less than 4 cents nor more than 5 cents from the price computed pursuant to paragraph (d) of this section. The resulting figure shall be the uniform price for base milk of 3.8 percent butterfat content.

§ 1004.73 *Butterfat differential to producers.* The applicable uniform prices to be paid each producer shall be increased or decreased for each one-tenth of one percent which the average butterfat content of his milk is above or below 3.8 percent, respectively, at the rate determined by multiplying the pounds of butterfat in producer milk allocated to each class by the appropriate butterfat differential for such class as determined pursuant to § 1004.52, dividing by the total butterfat in producer milk and rounding to the nearest even tenth of a cent.

§ 1004.74 *Location differential to producers.* The applicable uniform prices computed pursuant to §§ 1004.71 and 1004.72 (for base milk) to be paid for producer milk received at a pool plant located 60 miles or more from the City Hall at Tucson, Arizona, by the shortest hard-surfaced highway distance, as determined by the market administrator, shall be reduced according to the location of the pool plant where such milk was received at the rates set forth in §1004.53. The rates applicable to excess milk shall be determined by dividing the quantity of excess milk specified in § 1004.72 (a) (2) by the total quantity of excess milk and multiplying the result by the rates applicable to base milk.

§ 1004.75 *Notification of handlers.* On or before the 12th day after the end of each month, the market administrator shall mail to each handler, at his last known address, a statement showing:

(a) The amount and value of his producer milk in each class and the total thereof;

(b) For the months of January through June the amounts and value of his base and excess milk respectively, and the totals thereof;

(c) The uniform price(s) computed pursuant to §§ 1004.71 and 1004.72 and the butterfat differential computed pursuant to § 1004.73; and

(d) The amounts to be paid by such handler pursuant to §§1004.82, 1004.85, and 1004.86 and the amount due such handler pursuant to § 1004.83.

PAYMENTS

§ 1004.80 *Time and method of payment for producer milk.* (a) Except as provided in paragraph (b) of this section, each handler shall make payment to each producer from whom milk is receiving during the month as follows:

(1) On or before the 27th day of each month to each producer who did not discontinue shipping milk to such handler before the 25th day of the month, an amount equal to not less than the Class II price for the preceding month multiplied by the hundredweight of milk received from such producer during the first 15 days of the month, less proper deductions authorized by such producer to be made from payments due pursuant to this paragraph,

(2) On or before the 15th day of the following month, an amount equal to not less than the appropriate uniform price(s) adjusted by the butterfat and location differentials to producers multiplied by the hundredweight of milk or base milk and excess milk received from such producer during the month, subject to the following adjustments: (i) Less payments made such producer pursuant to subparagraph (1) of this paragraph, (ii) less marketing service deductions made pursuant to § 1004.85, (iii) plus or minus adjustments for errors made in previous payments made to such producer, and (iv) less proper deductions authorized in writing by such producer: *Provided*, That if by such date such handler has not received full payment from the market administrator pursuant to § 1004.83 for such month, he may reduce pro rata his payments to producers by not more than the amount of such underpayment. Payments to producers shall be completed thereafter not later than the date for making payments pursuant to this paragraph next following after the receipt of the balance due from the market administrator;

(b) In the case of a cooperative association which the market administrator determines is authorized by its members to collect payment for their milk and which has so requested any handler in writing, such handler shall on or before the 2d day prior to the date on which payments are due individual producers, pay the cooperative association for milk received during the month from the producer-members of such association as determined by the market administrator an amount equal to not less than the total due such producer-members as determined pursuant to paragraph (a) of this section; and

(c) Each handler who receives milk during the month from producers for which payment is to be made to a cooperative association pursuant to paragraph (b) of this section shall report to such cooperative association or to the market administrator for transmittal to such cooperative association for each such producer as follows:

(1) On or before the 25th day of the month, the total pounds of milk received during the first 15 days of such month, and

(2) On or before the 7th day of the following month (i) the pounds of milk received each day and the total for the month, together with the butterfat content of such milk, (ii) for the months of January through June the total pounds of base and excess milk received, (iii) the amount or rate and nature of any authorized deductions to be made from payments, and (iv) the amount and nature of payments due pursuant to § 1004.84.

§ 1004.81 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1004.82 and out of which he shall make all payments pursuant to §§ 1004.83: *Provided*, That any payments due to any handler shall be offset by any payments due from such handler.

§ 1004.82 *Payments to the producer-settlement fund.* On or before the 13th day after the end of each month, each handler shall pay to the market administrator any amount by which the value of his producer milk as computed pursuant to § 1004.70 for such month, is greater than the amount owed by him for such milk at the appropriate uniform price(s) adjusted by the producer butterfat and location differentials.

§ 1004.83 *Payments out of the producer-settlement fund.* On or before the 14th day after the end of each month, the market administrator shall pay to each handler any amount by which the total value of his producer milk, computed pursuant to § 1004.70, for such month is less than the amount owed by him for such milk at the appropriate uniform price(s) adjusted by the producer butterfat and location differentials. If at such time the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the appropriate funds are available.

§ 1004.84 *Adjustment of accounts.* Whenever audit by the market administrator of any reports, books, records, or accounts or other verification discloses errors resulting in moneys due (a) the market administrator from a handler, (b) a handler from the market administrator, or (c) any producer or cooperative association from a handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred.

§ 1004.85 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers for milk (other than milk of his own production) pursuant to § 1004.80, shall deduct 5 cents per hundredweight, or such amount not exceeding 5 cents per hundredweight as may be prescribed by the Secretary, and shall pay such deductions to the market administrator on or before the 15th day after the end of the month. Such money shall be used by the market administrator to provide market information and to check the accuracy of the testing and weighing of their milk for producers who are not receiving such service from a cooperative association;

(b) In the case of producers who are members of a cooperative association which the Secretary has determined is actually performing the services set forth in paragraph (a) of this section, each handler shall (in lieu of the deduction specified in paragraph (a) of this section), make such deductions from the payments to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such producers, and on or before the 13th day after the end of each month, pay such deductions to the cooperative association of which such producers are members, furnishing a statement showing the amount of such deductions and the amount of milk for which such deduction was computed for each producer.

§ 1004.86 *Expense of administration.* On or before the 15th day after the end of each month, each handler shall pay to the market administrator, for each of his approved plants, 4 cents or such lesser amount as the Secretary may prescribe, for each hundredweight of butterfat and skim milk contained in (a) producer milk, and (b) other source milk allocated to Class I milk pursuant to § 1004.45 (a) (2) and (b).

§ 1004.87 *Termination of obligations.* The provisions of this section shall apply to any obligations under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate 2 years after the last day of the month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such 2-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation,

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the amount for which it is to be paid;

(b) If a handler fails or refuses, with respect to any obligation under this order, to make available to the market

administrator or his representatives all books and records required by this order to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representative;

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this order to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed; and

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this order shall terminate two years after the end of the month during which the payment (including deduction or setoff by the market administrator) was made by the handler, if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

BASE RATING

§ 1004.90 *Computation of daily average base for each producer.* (a) Subject to the rules set forth in § 1004.91, the daily average base for each producer shall be an amount calculated by dividing the total pounds of milk received from such producer at all pool plants during the months of August through November immediately preceding, by the number of days from the first day of delivery by such producer during such months to the last day of November, inclusive, or by 90, whichever is more: *Provided,* That for the period from the effective date of this part through June 30, 1956, the daily average base for each producer shall be an amount calculated by dividing the total pounds of milk received from such producer at all pool plants during the months of October 1955 and November 1955, by the number of days from the first day of delivery by such producer during such months to the last day of November, inclusive, or by 45, whichever is more.

§ 1004.91 *Base rules.* The following rules shall apply in connection with the establishment and assignment of bases.

(a) Subject to the provisions of paragraph (b) of this section, the market administrator shall assign a base as calculated pursuant to § 1004.90 to each person for whose account producer milk was delivered to pool plants during the months of August through November; and

(b) An entire base shall be transferred from a person holding such base to any other person effective as of the end of any month during which an application for such transfer is received by the market administrator, such application to be on forms approved by the market administrator and signed by the baseholder, or his heirs, and by the person to whom such base is to be transferred: *Provided,* That if a base is held jointly, the entire base shall be transferable only upon the receipt of such application signed by all joint holders or their heirs, and by the person to whom such base is to be transferred.

§ 1004.92 *Announcement of established bases.* On or before December 25 of each year, the market administrator shall notify each producer, and the handler receiving milk from such producer, of the daily average base established by such producer.

EFFECTIVE TIME, SUSPENSION, OR TERMINATION

§ 1004.100 *Effective time.* The provisions of the part, or any amendment thereto, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 1004.101 *Suspension or termination.* The Secretary shall, whenever he finds that any or all provisions of this part, or any amendment thereto, obstruct or do not tend to effectuate the declared policy of the act, terminate or suspend the operation of any or all provisions of this part or any amendment thereto.

§ 1004.102 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this part, or any amendment thereto, there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 1004.103 *Liquidation.* Upon the suspension or termination of any or all provisions of this part, the market administrator, or such other liquidating agent as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidating and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 1004.110 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent and representative in connection with any of the provisions of this part.

§ 1004.111 *Separability of provisions.* If any provisions of this part, or its application to any person or circumstances, is held invalid, the application of such provision, and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

[7 CFR Part 811]

SUGAR REQUIREMENTS, QUOTAS, AND QUOTA DEFICITS FOR CALENDAR YEAR 1956

NOTICE OF PROPOSED RULE MAKING

Pursuant to the authority contained in the Sugar Act of 1948 (7 U. S. C. Sup. 1100), the Secretary of Agriculture is preparing to determine the sugar requirements and to establish sugar quotas for the calendar year 1956 (1) for the continental United States pursuant to sections 201 and 202 of the act, and (2) for local consumption in Hawaii and in Puerto Rico pursuant to sections 201 and 203 of the act. The Secretary is also preparing to determine whether any domestic area, the Republic of the Philippines, or Cuba will be unable to market the quota for such area in 1956 and to reallot, pursuant to section 204, any quota deficit so determined.

Section 201 of the act provides that the Secretary of Agriculture shall determine for each calendar year the amount of sugar needed to meet the requirements of consumers in the continental United States. In making such determinations, the Secretary is directed to use as a basis the amount of sugar distributed for consumption during the 12 months ending October 31 of the preceding calendar year and to adjust such amount for any deficiency or surplus in inventories of sugar and for changes in consumption because of the changes in population and demand conditions. The Secretary is also directed to take into consideration certain standards with a view to providing such supply of sugar as will be consumed at prices which will not be excessive to consumers and which will fairly and equitably maintain and protect the welfare of the domestic sugar industry. The standards to be taken into consideration include those enumerated above and also the level and trend of consumer purchasing power and the relationship between the prices at wholesale for refined sugar that would result from such determination and the general cost of living in the United States as compared with the relationship between prices at wholesale for refined sugar and the general cost of living in the United States obtaining during 1947 prior to the termination of price control.

Section 202 of the act provides for fixed quotas for the domestic areas and for the Republic of the Philippines and for the apportionment of the balance of the requirements to foreign countries other than the Republic of the Philippines in accordance with stated percentages.

Section 203 of the act provides that the Secretary also shall determine in accordance with such provisions of section 201 as he deems applicable, the amount of sugar needed to meet the requirements of consumers in Hawaii and in Puerto Rico and shall establish quotas for local consumption in such areas equal to the amounts so determined.

Section 204 of the act provides that the Secretary shall from time to time determine whether in view of various factors specified in the act, any area will be unable to market the quota for such area. Section 204 further provides that upon a finding that any such area will be unable to market its quota, the deficit so determined shall be reallocated, in accordance with a stated formula.

A public hearing will be held in Washington, D. C., in the Auditorium, South Building, United States Department of Agriculture, on November 2, 1955, at 10:00 a. m., e. s. t., for the purpose of affording interested persons an opportunity to present orally any data, views, or arguments with respect to the determination of sugar requirements and the establishment of sugar quotas for the continental United States for the calendar year 1956. The principal matters for consideration at the hearing relate to (1) the manner of determining deficiencies or surpluses in inventories of sugar, (2) the effect upon requirements of various changes in demand conditions, (3) the effect of the prospective 1956 level and trend of consumer purchasing power, (4) the manner in which the relationship between the wholesale price of refined sugar and the general cost of living in the United States should be employed or considered, and (5) the relative importance of the foregoing factors in determining the sugar requirements for 1956.

Prior to the issuance of regulations setting forth the sugar requirements for the continental United States for the calendar year 1956 and the sugar quotas for 1956 for domestic and foreign areas, consideration will be given to any data, views, or arguments pertaining thereto which are presented at the hearing or which are submitted in writing to the Director, Sugar Division, Commodity Stabilization Service, United States Department of Agriculture, Washington 25, D. C. Prior to the issuance of regulations setting forth (1) the sugar requirements for Hawaii and for Puerto Rico for the calendar year 1956 and the sugar quotas for 1956 for local consumption in such areas, and (2) the amount by which any area will be unable to market the quota for such area in 1956 and the reallotment of such deficit, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Sugar Division, Commodity Stabilization Service. Written data, views, or arguments must be submitted in duplicate and must be received not later than November 21, 1955. Such data, views, or arguments submitted at the hearing will be accepted as a part of the record, but will not be copied into the transcript of the oral testimony given at the hearing. All such data, views or arguments will be available for examination at the office of the Hearing Clerk.

Issued at Washington, D. C., this 7th day of October 1955.

[SEAL] EARL M. HUGHES, *Administrator.*

NOTICES

DEPARTMENT OF COMMERCE

Maritime Administration

ESSENTIALITY AND U. S. FLAG SERVICE REQUIREMENTS OF ROUND-THE-WORLD EASTBOUND SERVICE

NOTICE OF FINAL CONCLUSIONS AND DETERMINATIONS

Notice is hereby given that the Acting Maritime Administrator has considered the comments and views submitted by interested persons, firms or corporations with respect to the tentative conclusions and determinations regarding the essentiality and United States flag service requirements of Round-the-World Eastbound Service as published in the FEDERAL REGISTER issue of June 22, 1955 (20 F. R. 4374) and has ordered that Paragraph No. 2 thereof be modified to read as follows:

2. United States flag sailing requirements are approximately three to four sailings monthly, including one sailing monthly with combination ships, all serving the U. S. and foreign areas specified in paragraph No. 1 hereof; such sailings to complement U. S. flag liner sailings on Trade Routes Nos. 4, 10, 12, 17, 18, 28 and 29.

The Acting Maritime Administrator, acting pursuant to Section 211 of the Merchant Marine Act, 1936, as amended, has affirmed the previously published conclusions and determinations regarding Round-the-World Eastbound Service as so modified, and has directed that notice of his action with respect to such modification and affirmance be published in the FEDERAL REGISTER.

Dated: October 7, 1955.

By order of the Acting Maritime Administrator.

[SEAL] A. J. WILLIAMS, *Secretary.*

ESSENTIALITY AND U. S. FLAG SERVICE REQUIREMENTS OF ROUND-THE-WORLD WESTBOUND SERVICE

NOTICE OF CHANGES IN CONCLUSIONS AND DETERMINATIONS

Notice is hereby given that the Acting Maritime Administrator has considered the comments and views submitted by interested persons, firms or corporations with respect to the conclusions and determinations regarding the essentiality and United States flag service requirements of Round-the-World Westbound Service as published in the FEDERAL REGISTER issue of June 22, 1955 (20 F. R. 4373) and has ordered that the following modification thereof be published in the FEDERAL REGISTER:

Paragraph No. 2 shall be revised to read:

2. United States flag sailing requirements are approximately four sailings monthly, including one sailing monthly with combination ships, all serving the U. S. and foreign areas specified in Paragraph No. 1 hereof; such sailings to complement U. S. flag liner sailings on Trades Route Nos. 4, 10, 12, 17, 18, 28 and 29.

All other conclusions and determinations with respect to Round-the-World Westbound Service as published in the above-mentioned issue of the FEDERAL REGISTER shall stand unchanged.

Dated: October 7, 1955.

By order of the Acting Maritime Administrator.

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 54-164, 59-14]

INTERNATIONAL HYDRO-ELECTRIC SYSTEM

NOTICE OF FILING OF APPLICATIONS FOR ALLOWANCES IN CONNECTION WITH CERTAIN PLANS AND NOTICE OF AND ORDER FOR HEARING ON CERTAIN OF SUCH APPLICATIONS

OCTOBER 7, 1955.

I. The above-entitled proceedings involve plans filed pursuant to section 11 (d) of the Public Utility Holding Company Act of 1935 ("Act") to enable Bartholomew A. Brickley, Trustee of International Hydro-Electric System ("IHES"), a registered holding company now in process of reorganization before the Commission and the United States District Court for the District of Massachusetts ("Court"), to effectuate compliance with section 11 (b) of the Act. In connection with its approval of such plans, orders have been entered by the Commission reserving jurisdiction with respect to the fees and expenses paid or to be paid by the Trustee for services rendered in the proceedings.

Pursuant to Rule U-63 of the Commission's General Rules and Regulations promulgated under the Act, the Commission has heretofore disposed of various applications for allowances filed by the Trustee and his counsel and by representatives of the debenture-holders of IHES. The Commission subsequently notified the other participants that it would receive applications for allowances with respect to services rendered to the estate up to September 30, 1954, and various applications were filed.

As a first step in fixing the procedure to be followed by the Commission in determining the maximum allowances which it should approve, the Commission entered an order dated January 13, 1955 (Holding Company Act Release No. 12780), under the authority conferred by section 11 (f) of the Act, directing the Trustee to file with the Commission a report or reports setting forth:

(1) The amounts of fees and expenses claimed by the various applicants for services rendered in connection with these proceedings:

(2) The amounts of fees and expenses which the Trustee has already paid or is prepared to pay to such applicants without modification;

(3) The amounts of fees and expenses, if any, which the Trustee is willing to pay to such applicants and which, after negotiation with the Trustee, they have indicated a willingness to accept; and

(4) In cases where such negotiations have been unsuccessful, the amounts of fees and expenses which the Trustee considers to be reasonable and which he is prepared to recommend for payment to such applicants; such part of the Trustee's report to be submitted directly to the Chairman of the Commission and to be kept confidential until a further order of the Commission shall require otherwise.

In accordance with the Commission's aforesaid order of January 13, 1955, the Trustee has filed his report indicating the amounts of fees and expenses which he is willing to pay to certain claimants hereinafter named in Table I, who, in all cases, after negotiation with the Trustee, have indicated a willingness to accept the amounts which the Trustee is willing to pay as settlement in full of their claims for compensation and reimbursement of expenses for services rendered in these proceedings; and where such amounts are less than the amounts requested in their original applications, such claimants have amended their applications accordingly.

TABLE I

Claimant and capacity	Fee	Expenses
Erwin N. Griswold, tax consultant employed by Trustee	$75,000.00	----------
LeBoeuf, Lamb & Leiby, special counsel employed by Trustee for work before New York Public Service Commission	42,500.00	$1,639.05
Hutchinson, Pierce, Atwood & Scribner, special counsel employed by Trustee in connection with conveyance of ENYP properties	350.00	20.29
Ropes, Gray, Best, Coolidge & Rugg, special counsel to old Board of Directors	3,000.00	----------
Buchman & Buchman, counsel for preferred stockholders in Paper Company litigation	2,000.00	493.00
"Carter" Preferred Stockholders Committee:		
C. Shelby Carter and Ralph H. Haas, committeemen	7,000.00	1,318.94
Harold P. Seligson and Edmund Burke, Jr., counsel	180,000.00	8,566.02
J. Samuel Hartt, engineering adviser	37,000.00	6,984.58
Preferred Stockholders Group:		
William Stuberfield and Joseph D. Allen, committeemen	2,750.00	(1)
Percival E. Jackson, counsel	[2] 75,000.00	4,642.18
Equity Holding Corporation	----------	3,926.69
Estate of Frank Bailey	----------	3,926.69
William M. Greve	----------	3,926.69
Paul H. Todd, Class A stockholder, in behalf of Class A stockholders	----------	[3] 69,712.50
Root, Ballentine, Bushby & Palmer and Purcell & Nelson, counsel	[4] 180,133.33	(5)

Total	802,183.33	114,369.96

[1] $500 advanced to Reis & Chandler was reimbursed by Equitable Holding Corporation, Estate of Frank Bailey, and William M. Greve, and the amount is included in their claims.

[2] In addition, Jackson received a fee of $10,000 from Equitable Holding Corporation, Estate of Frank Bailey, and William M. Greve, and the amount is included in their claims.

[3] This amount includes $44,866.67 advanced to counsel.

[4] This amount is exclusive of $44,866.67 advanced by Todd.

[5] Expenses of $15,397.77 were reimbursed by Todd and are included in his claim.

[6] Including $7,500, to be paid by Nemerov & Shapiro to Leo B. Mittelman, associate counsel.

[7] This amount is exclusive of $1,050 advanced by Nemerov & Shapiro and included in their claim for expenses.

Notice is hereby given that any interested person may, not later than October 31, 1955 at 5:30 p. m., request the Commission in writing that a hearing be held with respect to the above-listed claims or any of them, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said claims or any of them which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the aforesaid claims may be approved as maximum amounts to be paid by the Trustee for fees and expenses, pursuant to Rule U-63 and the applicable provisions of the Act, or the Commission may take such other action with respect thereto as it may deem appropriate.

II. The Trustee of IHES having advised the Commission, pursuant to the aforesaid order dated January 13, 1955, that no agreements have been reached with respect to certain claimants who have requested allowances of fees and expenses for services alleged to have been rendered in connection with the above-entitled proceedings:

Notice is hereby given that applications for the allowance of fees and reimbursement of expenses have been filed by the following persons and in the indicated amounts:

TABLE II

Total	256,165.00	82,214.44

[1] Net fee claim after crediting $500 advanced by client.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors that a hearing be held with respect to the applications set forth in Table II:

It is ordered, That a hearing be held on the applications listed in Table II, which hearing shall commence on November 15, 1955, at 10 a. m. at the office of the Commission, 425 Second Street NW., Washington, D. C. On such date the hearing-room clerk in Room 193 will advise as to the room in which the hearing will be held. Any person who is not already a party, or who has not been granted leave to participate in the above-entitled proceedings, and who desires to be heard or otherwise wishes to participate in such hearing shall file with the Secretary of this Commission on or before November 10, 1955, a request relative thereto as provided in Rule XVII of the Commission's Rules of Practice.

It is further ordered, That James G. Ewell or any other officer or officers of the Commission designated by it for that purpose shall preside at such hearing. The officer or officers so designated is and are hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a hearing officer under the Commission's Rules of Practice.

The Division of Corporate Regulation of the Commission having advised the Commission that it has made a preliminary examination of said applications set forth in Table II, and that on the basis thereof the following matters and questions are presented, without prejudice however, to the presentation of additional matters and questions for examination:

1. Whether the services and disbursements for which remuneration is sought are compensable out of the estate of IHES, and whether it is lawful or appropriate to grant any allowances for fees and expenses to the persons making such claims;

2. Whether the requested amounts for fees and expenses were incurred in rendering services which were necessary in connection with the reorganization plans involved, and whether the requested amounts are reasonable; and if not, what amounts should be fixed by the Commission;

3. Whether there are any other factors apart from the nature and value of the services rendered and the capacity in which rendered which would make any of the requests for compensation or reimbursement improper.

It is further ordered, That particular attention be directed at said hearing to the foregoing matters and questions.

It is further ordered, That the Secretary of the Commission shall serve a copy of this order by registered mail on Bartholomew A. Brickley, Trustee, and on each of the claimants named herein; and that notice of the entry of this order shall be given to all other persons by general release of the Commission which shall be distributed to the press and mailed to the mailing list for releases issued under the Public Utility Holding Company Act of 1935, and by publication in the FEDERAL REGISTER.

By the Commission.

[File No. 70-3413]

WORCESTER COUNTY ELECTRIC CO.

ORDER AUTHORIZING ISSUANCE AND SALE AT COMPETITIVE BIDDING OF PRINCIPAL AMOUNT OF FIRST MORTGAGE BONDS

OCTOBER 7, 1955.

Worcester County Electric Company ("Worcester"), an electric utility subsidiary of New England Electric System, a registered holding company, has filed an application and amendments thereto pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935 ("Act") and Rule U-50 thereunder, regarding the following proposed transaction:

Worcester proposes to issue and sell, pursuant to competitive bidding requirements of Rule U-50, $8,500,000 principal amount of Series D Bonds, to be dated as of October 1, 1955 and to mature October 1, 1985. The interest rate (which shall be a multiple of ⅛ of 1 percent and not in excess of 3¾ percent) and the price, exclusive of accrued interest, to be paid to Worcester therefor (which shall be not less than 100 percent nor more than 102¾ percent of the principal amount) will be determined by competitive bidding.

The bonds will be issued under a First Mortgage Indenture and Deed of Trust dated as of July 1, 1949, as amended and supplemented, and will be secured equally and ratably with the presently outstanding Series A, B and C bonds of Worcester.

The proceeds from the sale of said bonds will be applied to the payment of Worcester's short-term note indebtedness (which aggregated $7,700,000 at September 19, 1955), and the balance to pay for capitalizable expenditures or to reimburse the treasury therefor.

The issuance and sale of the bonds have been approved by the Massachusetts Department of Public Utilities, which is the State commission of the State in which Worcester is organized and doing business.

Worcester's expenses herein other than underwriting discounts and commissions are estimated at $49,000, including attorneys' fees of $9,000, engineering fees of $4,600, trustee's fees of $5,500, and accounting fees of $1,000. The legal fee and expenses of independent counsel to the underwriters are estimated at $5,000 and $300, respectively.

Due notice having been given of the filing of said application, and a hearing not having been requested of or ordered by the Commission; and the Commission finding with respect to the proposed transaction that the applicable provisions of the Act and the Rules promulgated thereunder are satisfied and that no adverse findings are necessary; and deeming it appropriate in the public interest and in the interest of investors and consumers that the amended application be granted, effective forthwith, subject to the conditions below set out:

It is ordered, pursuant to Rule U-23 and the applicable provisions of the Act, that said application as amended be, and it hereby is, granted, effective forthwith, subject to the conditions prescribed in Rule U-50 and Rule U-24.

By the Commission.

[File No. 70-3418]

PHILADELPHIA CO. AND STANDARD GAS AND ELECTRIC CO.

NOTICE OF PROPOSED RENEWAL OF PROMISSORY NOTE

OCTOBER 7, 1955.

Notice is hereby given that Philadelphia Company ("Philadelphia"), a registered holding company and a subsidiary of Standard Gas and Electric Company ("Standard Gas") and Standard Power and Light Corporation, also registered holding companies, and its parent Standard Gas have filed with this Commission a joint application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6 (a), 7, 9 and 10 thereof as applicable to the proposed

transaction which is summarized as follows:

The companies propose that Philadelphia will issue and deliver to Standard Gas a renewal promissory note in replacement of a promissory note in the principal amount of $2,500,000 which matured September 10, 1955, and which bore interest at the rate of 3 percent per annum, payable monthly. The renewal note, in the same principal amount, will bear interest, payable monthly, at the rate of 3¼ percent per annum, which is stated to be the prime interest rate prevailing for short-term commercial bank loans, and will mature September 10, 1956, with the right of the issuer to anticipate at any time the payment of all or any part of the principal thereof.

The filing states that the expenses, if any, in connection with the proposed transaction will be nominal in amount.

Notice is further given that any interested person may, not later than October 21, 1955, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date said application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the Rules and Regulations promulgated under the Act, or the Commission may grant exemption from its rules as provided in Rules U-20 (a) and U-100 or take such other action as it may deem appropriate.

By the Commission.

FEDERAL POWER COMMISSION

[Docket No. G-9443]

ATLANTIC REFINING CO.

ORDER SUSPENDING PROPOSED CHANGES IN RATES

The Atlantic Refining Company (Applicant) on September 8, 1955, tendered for filing proposed changes in presently effective rate schedules for sales subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filings which are proposed to become effective on the dates shown:

Description	Purchaser	Rate schedule designation	Effective date [1]
Notice of change, dated Aug. 25, 1955.	United Fuel Gas Co.	Supplement No. 1 to FPC Gas Rate Schedule No. 63.	Nov. 1, 1955
Do	do	Supplement No. 1 to Applicant's FPC Gas Rate Schedule No. 115.	Do.

[1] The stated effective date is the first day after expiration of the required 30 days' notice, or the effective date proposed by Applicant if later.

The increased rates and charges proposed in the aforesaid filings have not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated supplements be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority contained in sections 4 and 15 of the Natural Gas Act and the Commission's General Rules and Regulations (18 CFR, Chapter I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of said proposed changes in rates and charges; and, pending such hearing and decision thereon, the above-designated supplements be and the same hereby are suspended and the use thereof deferred until April 1, 1956, and until such further time as they are made effective in the manner prescribed by the Natural Gas Act.

(B) Interested State commissions may participate as provided by sections 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's Rules of Practice and Procedure.

Adopted: October 5, 1955.

Issued: October 7, 1955.

By the Commission.[1]

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 55-8285; Filed, Oct. 12, 1955; 8:46 a. m.]

[Docket No. G-1479]

BANGOR GAS CO.

NOTICE OF APPLICATION

OCTOBER 7, 1955.

Bangor Gas Company (Applicant), a Pennsylvania corporation and a public utility under the laws of that Commonwealth, filed on August 12, 1955, an application for an amendment of the order issued October 3, 1952, In the Matters of Warwick Gas Corporation, et al., Docket Nos. G-1476, et al., insofar as it relates to this proceeding. The order of October 3, 1952, modified and affirmed as modified the initial decision of the Presiding Examiner issued August 4, 1952. By such order the Commission affirmed the issuance of a certificate of public convenience and necessity to Applicant to construct and operate natural-gas transmission pipe-line facilities for the transportation of natural gas in interstate commerce and required The Manufacturers Light and Heat Company (Manufacturers), pursuant to section 7 (a) of the Natural Gas Act, to supply Applicant up to 541 Mcf per day—425 Mcf per day for Applicant and 116 Mcf for Pen Argyl Gas Company (Pen Argyl).

It appears from the application that the merger of the Applicant and Pen Argyl became effective on January 26, 1954, and Applicant has been receiving natural gas from Manufacturers in volumes not in excess of 541 Mcf per day.

Applicant requests that the Commission remove the limitation of 541 Mcf per day applicable to the volumes of natural gas which Manufacturers is obligated to sell and deliver to Applicant. In support of such request, Applicant avers that its peak day requirements already exceed 541 Mcf per day and that the requirements of its customers of a peak day for the next five years will increase from 800 Mcf to 1500 Mcf per day.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before October 27, 1955.

[SEAL] LEON M. FUQUAY, *Secretary.*

[1] Commissioner Digby dissenting.

[Docket Nos. G-9223, G-9224]

OTHA H. GRIMES AND SKELLY OIL CO.

NOTICE OF APPLICATIONS AND DATE OF HEARING

OCTOBER 7, 1955.

In the matters of Otha H. Grimes, Docket No. G-9223; Skelly Oil Company, Docket No. G-9224.

Take notice that Otha H. Grimes (Grimes), Applicant, an individual whose address is Tulsa, Oklahoma, filed on August 12, 1955, an application for permission to abandon service pursuant to section 7 (b) of the Natural Gas Act, authorizing Applicant to sell certain facilities and to terminate service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection; and that concurrently therewith, Skelly Oil Company (Skelly), Applicant, a Delaware corporation whose address is Tulsa, Oklahoma, filed on August 12, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, authorizing Applicant to acquire and operate the aforesaid facilities heretofore owned and operated by Grimes and to take over, commence and continue to render the aforesaid service heretofore rendered by Grimes, as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant Grimes, pursuant to contract dated August 8, 1955, and effective September 1, 1955, between Otha H. Grimes and Mildred B. Grimes, his wife (Sellers), and Skelly Oil Company (Buyer), proposes to sell, transfer, set over and assign to Buyer among other things: (1) A gasoline plant located in Lea County, New Mexico, known as Lovington Plant which is owned and operated by Sellers, (2) all gathering and residue lines owned, maintained and operated by Sellers in connection with the operation of said plant, (3) all of Seller's casinghead gas contracts under which they purchase or acquire casinghead gas for processing in said plant, and (4) the gas sales contract dated October 2, 1954, between Otha H. Grimes (Seller) and Permian Basin Pipeline Company covering sale by Sellers of available surplus residue gas from said plant to said pipeline company.

Applicant Skelly proposes: (1) To take over, carry out, perform and continue making the sales of residue gas to Permian Basin Pipeline Company under and pursuant to aforesaid Gas Purchase Contract dated October 2, 1954, between Otha H. Grimes (Seller) and Permian Basin Pipeline Company (Buyer) and to assume all obligations and be entitled to all benefits under said contract; and (2) to purchase and operate aforesaid Lovington Gasoline Plant and attendant facilities.

Applicant Skelly incorporates by reference and makes a part of its own application for all purposes the application for a section 7 (c) certificate by Otha H. Grimes in Docket No. G-6868 filed with the Commission on January 10, 1955, as supplemented on February 28 and March 14, 1955, wherein Grimes sought and was granted authorization for the sale of residue gas from the aforesaid Lovington Gasoline Plant to Permian. The natural gas involved in all of these dockets, viz., G-6868, G-9223 and G-9224, is the same and is purchased and gathered by Applicant Grimes from certain sellers and is produced from the Southeast Lovington Field, Lea County, New Mexico.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on Wednesday, November 16, 1955, at 9:30 a. m., e. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (2) of the Commission's Rules of Practice and Procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before October 24, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 55-8288; Filed, Oct. 12, 1955; 8:46 a. m.]

[Docket No. G-9100]

TEXAS EASTERN TRANSMISSION CORP.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 7, 1955.

Take notice that Texas Eastern Transmission Corporation (Applicant), a Delaware Corporation whose address is Shreveport, Louisiana, filed on July 5, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, and its supplement thereto filed on August 25, 1955, authorizing Applicant to make temporary sales of additional quantities of natural gas for transportation and sale for resale in interstate commerce for the period of November 16, 1955, through April 15, 1956, under its WPS Rate Schedule to the existing customers as hereinafter listed, subject to the jurisdiction of the Commission all as more fully represented in the application which is on file with the Commission and open for public inspection.

WINTER PEAKING SERVICE

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

CALIFORNIA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

OCTOBER 5, 1955.

The United States Atomic Energy Commission has filed an application, Serial No. Los Angeles 0124077, for withdrawal of the lands described below from all forms of appropriation except under the mineral leasing laws, and subject to valid existing rights.

The applicant desires the land for use in connection with classified programs of the Atomic Energy Commission.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, at Room 801 California Fruit Building, 4th and J Streets, Sacramento 14, California.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will

be sent to each interested party of record.

The lands involved in the application are:

SAN BERNARDINO MERIDIAN

T. 10 S., R. 9 E.
Sec. 24, SE¼SW¼.

The area described contains 40 acres of public land.

R. R. BEST,
State Supervisor.

TITLE 3—THE PRESIDENT

PROCLAMATION 3115

COLUMBUS DAY, 1955

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS Christopher Columbus, with a fleet of three vessels, daringly set sail upon an unknown sea and persevered until he landed upon a strange shore, thus discovering a new continent and a new world; and

WHEREAS appropriate recognition should be given to the memory of this great navigator, whose exploits have inspired other brave men throughout the centuries to seek those opportunities which lie beyond the horizon; and

WHEREAS October 12, 1492, the date of the sighting of land by Columbus' intrepid crew, marks the beginning of a new epoch in mankind's ever-widening search for a freer and a richer life; and

WHEREAS a grateful Congress, in appreciation of the debt we owe to Christopher Columbus, by a joint resolution approved April 30, 1934 (48 Stat. 657), requested the President to issue a proclamation designating October 12 of each year as Columbus Day:

NOW, THEREFORE, I, DWIGHT D. EISENHOWER, President of the United States of America, do hereby designate Wednesday, the twelfth day of October, 1955, as Columbus Day, and I direct that the flag of the United States be displayed on all Government buildings on that day. I also invite our citizens to observe this anniversary with ceremonies designed to honor the discoverer of America.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this tenth day of October in the year of our Lord nineteen hundred and fifty-five, and of the Independence of the United States of America the one hundred and eightieth.

[SEAL]

DWIGHT D. EISENHOWER

By the President:

JOHN FOSTER DULLES,
Secretary of State.

[F. R. Doc. 55-8397; Filed, Oct. 12, 1955; 1:39 p. m.]

EXECUTIVE ORDER 10639

AMENDMENT OF THE TARIFF OF UNITED STATES FOREIGN SERVICE FEES

By virtue of and pursuant to the authority vested in me by section 1745 of the Revised Statutes of the United States, as amended (22 U. S. C. 1201), it is hereby ordered as follows:

The Tariff of United States Foreign Service Fees, prescribed by section V–15 of the Foreign Service Regulations of the United States (Executive Order No. 7968, as amended; 22 CFR 103.1), is amended by deleting therefrom Items No. 1, 2, 3, 4, and 5.

All prior Executive orders inconsistent herewith are amended accordingly.

This order shall become effective ten days after the date of its publication in the FEDERAL REGISTER.

DWIGHT D. EISENHOWER

THE WHITE HOUSE,
October 10, 1955.

EXECUTIVE ORDER 10640

THE PRESIDENT'S COMMITTEE ON EMPLOYMENT OF THE PHYSICALLY HANDICAPPED

By virtue of the authority vested in me as President of the United States, and in order to provide for the carrying out of the provisions of the Joint Resolution approved July 11, 1949, ch. 302, 63 Stat. 409, as amended, and the provisions of section 8 of the Vocational Rehabilitation Act, as amended by section 2 of the Vocational Rehabilitation Amendments of 1954 (68 Stat. 659; 29 U. S. C. 38), it is ordered as follows:

SECTION 1. *Composition of the Committee.* (a) There is hereby continued, subject to the provisions of this order and under the name of the President's Committee on Employment of the Physically Handicapped, the now existing committee of that name (heretofore sometimes referred to as the President's Committee on National Employ the Physically Handicapped Week).

(b) The President's Committee on Employment of the Physically Handicapped (hereinafter referred to as the Committee or as the President's Com-

at any time terminate the service of any member of the President's Committee, except any member appointed by the President.

(c) The Chairman of the President's Committee, upon the advice of the Executive Committee, may designate as, or invite to be, associate members of the President's Committee any heads of Federal departments and agencies which have responsibility for rehabilitation services or promotional activities touching the field of interest of the Committee or which are leading utilizers of physically handicapped personnel, Governors of States and territories, and representatives of such heads or Governors.

SEC. 2. *Functions of the Committee.* The President's Committee shall facilitate the development of maximum employment opportunities for the physically handicapped. To this end the Committee shall supply information to employers, conduct a program of public education, and enlist the aid and cooperation of Federal officials, State officials, Governor's committees, local committees, professional trade groups, and organized labor. In carrying out the functions vested in it by section 8 of the Vocational Rehabilitation Act, as amended, the Committee shall work closely with the Department of Labor, Department of Health, Education, and Welfare, the Veterans' Administration, State employment-security agencies, and State vocational-rehabilitation agencies. Representatives of industry, labor, and public and private agencies may be invited to attend meetings of the President's Committee.

SEC. 3. *Executive Committee.* (a) There is hereby established the Executive Committee of the President's Committee on Employment of the Physically Handicapped. The Executive Committee shall be composed of the Chairman of the President's Committee, who shall also be the Chairman of the Executive Committee, the Vice Chairmen of the President's Committee, and so many additional members as will provide an Executive Committee of not less than fifteen and not more than forty members. The said additional members shall be appointed annually by the Chairman of the President's Committee, from among the members of the President's Committee or otherwise. The Chairman of the President's Committee may at any time terminate the service of any member of the Executive Committee.

(b) The Executive Committee shall advise and assist the Chairman of the President's Committee in the conduct of the business of the President's Committee and, as authorized by the President's Committee or the Chairman thereof (with due regard for the responsibilities of other Federal agencies), shall study the problems of the physically handicapped in obtaining and retaining suitable employment, invite authorities in the various professional, technical, and other pertinent fields to assist in the exploration of those problems, and review and develop plans and projects for promoting the employment of the physically handicapped.

SEC. 4. *Advisory Council.* There is hereby established the Advisory Council on Employment of the Physically Handicapped, which shall advise the President's Committee with respect to the responsibilities of the Committee. The Council shall be composed of the Chairman of the President's Committee, who shall also be the Chairman of the Council, and of the following-named officers, or their respective alternates: the Secretary of Commerce, Secretary of Labor, the Secretary of Health, Education, and Welfare, the Administrator of Veterans' Affairs, and the Chairman of the United States Civil Service Commission.

SEC. 5. *Administrative and incidental matters.* (a) The President's Committee, the Executive Committee, and the Advisory Council shall each meet on the call of the Chairman of the President's Committee at a time and place designated by him. In the case of the President's Committee and the Executive Committee, the Chairman shall call at least one meeting and two meetings, respectively, to be held during each calendar year.

(b) In the absence of designation by the President, the Chairman of the President's Committee may from time to time designate a Vice Chairman of the President's Committee to be one or more of the following-named in the absence of the Chairman: Acting Chairman of the President's Committee, Acting Chairman of the Executive Committee, and Acting Chairman of the Advisory Council. The Chairman of the President's Committee shall from time to time assign other duties to the Vice Chairmen thereof.

(c) The Chairman of the President's Committee shall on behalf of the President direct the Committee and its functions.

(d) The Chairman may from time to time prescribe such necessary rules, procedures, and policies relating to the President's Committee, the Executive Committee, and the Advisory Council, and their affairs, as are not inconsistent with law or with the provisions of this order.

(e) All members (including the Chairman and Vice Chairmen) of the President's Committee, the Executive Committee, and the Advisory Council shall serve without compensation. The Chairman and the Vice Chairmen of the President's Committee may receive transportation and per-diem allowances as authorized by law for persons serving without compensation.

(f) Employees of the Committee shall be appointed, subject to law, and shall be directed, by the Chairman of the Committee. To such extent as may be mutually arranged by the Chairman of the Committee and the Secretary of Labor, employees of the Committee shall be subject to the administrative rules, regulations, and procedures of the Department of Labor.

(g) The Department of Labor is requested to make available to the President's Committee necessary office space and to furnish the Committee, under such arrangements respecting financing as may be appropriate, necessary equipment, supplies, and services. The estimates of appropriations for the operations of the Committee shall be included within the framework of the appropriation structure of the Department of Labor, in such manner as the Director of the Bureau of the Budget may prescribe. The Chairman of the Committee, in cooperation with the Budget Office of the Department of Labor, shall be responsible for the preparation and justification of the estimates of appropriations for the Committee.

SEC. 6. *Prior orders.* To the extent that this order is inconsistent with any provision of any other order, or with any provision of any regulation or other measure or disposition, issued, made, or taken by the President or by any other officer of the executive branch of the Government, this order shall control.

DWIGHT D. EISENHOWER

ESTABLISHMENT OF ADDITIONAL GRADE REGULATIONS FOR THE 1955-56 CROP YEAR

In accordance with the provisions of Marketing Agreement No. 127 and Order No. 103 (20 F. R. 5056) regulating the handling of domestic dates produced or packed in Los Angeles and Riverside Counties of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended, (7 U. S. C. 601 et seq.), and upon the basis of the recommendation of the Date Administrative Committee established under the aforesaid marketing agreement and order, and other available information, it is hereby found that the additional grade regulation hereinafter provided, applicable to the shipment of Deglet Noor dates during the effective period thereof, will tend to effectuate the declared policy of the act.

It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice and postpone the effective date of this regulation later than October 14, 1955 (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation to comply with the regulation; and good cause exists for making the provisions hereof effective at the indicated time.

The shipment of early varieties of 1955 crop dates has already begun and it is expected that shipments of Deglet Noor dates, the principal variety, will approach significant volume during the next few weeks. All shipments of dates in whole and pitted form since September 1, 1955, have been subject to the minimum standards of quality (Grade C of the effective U. S. Standard for Grades of Dates) provided for in § 1003.39 of the agreement and order. Early inspections of 1955 crop Deglet Noor dates have shown that lots meeting the minimum requirements of Grade C have, in some instances, been below that state of maturity which it is deemed in the public interest should be required for domestic sale in whole or pitted form. The additional grade regulation set forth below will result in an improvement in the average quality of dates sold to consumers during 1955-56.

It is therefore ordered that the shipment of Deglet Noor dates shall be in accordance with the following regulation during the effective period thereof:

§ 1003.202 *Additional grade regulation.* Beginning at 12:01 a. m., P. s. t., October 14, 1955 and ending at 12:01 a. m., P. s. t., August 1, 1956, Deglet Noor whole and pitted dates handled under this part shall meet the requirements of U. S. Grade C of the United States Standards for Grades of Dates, effective August 26, 1955 (20 F. R. 5755): *Provided*, That, such dates shall score not less than 30 points for character, as defined in § 52.1009 of this chapter.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: October 11, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 6296]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

MAX FEUER ET AL.

Subpart—*Advertising falsely or misleadingly:* § 13.15 *Business status, advantages, or connections:* Producer status of dealer or seller: *Manufacturer;* § 13.30 *Composition of goods;* § 13.73 *Formal regulatory and statutory requirements:* Fur Products Labeling Act; § 13.155 *Prices:* Comparative; § 13.235 *Source or origin:* Maker or seller, etc. Subpart—*Misbranding or mislabeling:* § 13.1185 *Composition;* § 13.1212 *Formal regulatory and statutory requirements:* Fur Products Labeling Act; § 13.1260 *Nature;* § 13.1325 *Source or origin:* Maker or seller, etc.: *Fur Products Labeling Act;* Place: *Foreign, in general.* Subpart—*Misrepresenting oneself and goods*—Goods: § 13.1590 *Composition;* § 13.1623 *Formal regulatory and statutory requirements:* Fur Products Labeling Act; § 13.1685 *Nature;* § 13.1745 *Source or origin:* Maker or seller, etc.; Place: *Foreign, in general;* [*Misrepresenting oneself and goods*]—Prices: § 13.1785 *Comparative.* Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 13.1845 *Composition:* Fur Products Labeling Act; § 13.1852 *Formal regulatory and statutory requirements:* Fur Products Labeling Act; § 13.1870 *Nature:* Fur Products Labeling Act; § 13.1900 *Source or origin:* Fur Products Labeling Act: *Maker or seller, etc.; Place.* I. In connection with the introduction, or the manufacture for introduction, or the sale, advertisement, offer for sale, transportation, or distribution of fur products in commerce, or in connection with the manufacture for sale, sale, advertising, offer for sale, transportation, or distribution of fur products made in whole or in part of fur which had been shipped and received in commerce, as "commerce", "fur", and "fur product" are defined in the Fur Products Labeling Act (all other charges in the complaint not specifically covered in the order having been dismissed as to both respondents): (A) Misbranding fur products by: (1) Failing to affix labels to fur products showing: (a) The name or names of the animal or animals producing the fur or furs contained in the fur product as set forth in the Fur Products Name Guide and as prescribed under the rules and regulations; (b) that the fur product contains or is composed of bleached, dyed, or artificially colored fur when such is a fact; (c) that the fur product is composed in whole or in substantial part of paws, tails, bellies, or waste fur when such is a fact; (d) the name, or other identification issued and registered by the Commission of one or more persons who manufactured such fur product for introduction into commerce, introduced it into commerce, sold it in commerce, advertised or offered for sale in commerce, or transported or distributed it in commerce; (e) the name of the country of origin of any imported furs used in the fur product; (2) setting forth on labels attached to fur products, the name or names of any animal or animals other than the name or names provided for in "(A) (1) (a)" above; (3) setting forth on labels attached to fur products, non-required information mingled with required information; (B) falsely or deceptively invoicing fur products by: (1) Failing to furnish invoices to purchasers of fur products showing: (a) The name or names of the animal or animals producing the fur or furs contained in the fur product as set forth in the Fur Products Name Guide and as prescribed under the rules and regulations; (b) that the fur product contains or is composed of bleached, dyed, or artificially colored fur when such is a fact; (c) that the fur product is composed in whole or in substantial part of paws, tails, bellies, or waste fur when such is a fact; (d) the name and address of the person issuing such invoices; (e) the name of the country of origin of any imported furs contained in the fur products; (2) using on invoices the name or names of any animal or animals other than the name or names provided for in "(B) (1) (a)" above; (3) setting forth on invoices pertaining to fur products, required information in abbreviated form; (C) falsely or deceptively advertising fur products through the use of any advertisement, representation, public announcement or notice, which is intended to aid, promote, or assist, directly or indirectly, in the sale or offering for sale of fur products, and which: (1) Fails to disclose the name or names of the animal or animals producing the fur or furs contained in the fur products as set forth in the Fur Products Name Guide and as prescribed under the rules and regulations; (2) fails to disclose that fur products contain or are composed of bleached, dyed, or otherwise artificially colored fur when such is the fact; (3) uses abbreviated words or terms of required information or which, if printed, fails to state in type of equal size all parts of the required information; (4) represents, directly or by implication: (a) That a sale price enables purchasers of fur products to effectuate any savings in excess of the difference between the said price and the price at which comparable products were sold during the time specified or, if no time is specified, in excess of the difference between said price and the current price at which comparable products are sold; (b) that any fur products were manufactured or designed by respondents, when such is contrary to the fact; (5) makes the pricing claims or representations referred to in "(C) (4) (a)" above, unless there is maintained by respondents full and adequate records disclosing the facts upon which such claims and representations are based, as required by Rule 44 (e) of the rules and regulations; and (D) failing to maintain and preserve full and adequate records, in the manner and form required by Rules 40 and 41 of the rules and regulations, showing the information set forth on labels which respondents have removed from fur products and in lieu thereof substituted and affixed respondents' labels thereto; and, II, in connection with the offering for sale, sale, and distribution of fur products in commerce, as "commerce" is defined in the Federal Trade Commission Act, making, directly or by implication, any of the representations prohibited in "(C) (4)" of the instant order; prohibited.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, sec. 8, 65 Stat. 179; 15 U. S. C. 45, 69f) [Cease and desist order, Max Feuer et al. t. a. Feuer Fur Company, Chicago, Ill., Docket 6296, September 16, 1955]

In the Matter of Max Feuer and Sue Feuer, Individually and as Copartners Trading as Feuer Fur Company

This proceeding was heard by Frank Hier, hearing examiner, upon the complaint of the Commission which charged respondents with the use of unfair acts and practices in commerce in violation of the provisions of the Federal Trade Commission Act and the Fur Products Labeling Act and the rules and regulations promulgated under the latter, and upon a stipulation between the parties providing for the entry of a consent order, by the terms of which respondents admitted all the jurisdictional allegations set forth in the complaint, agreed that the record in the matter might be taken as if findings of jurisdictional facts had been made in accordance with such allegations, and expressly waived any further procedural steps before the hearing examiner or the Commission; the making of findings of facts and conclusions of law by either; and all the rights they might have to challenge or contest the validity of the order to cease and desist in accordance with the stipulation.

It was set forth in said stipulation that the record, on which the initial decision and the decision of the Commission should be based, should consist solely of the complaint and the agreement; that the agreement should not become part of the official record unless and until it became a part of the decision of the Commission; that the agreement was for settlement purposes only and did not constitute an admission by respondents that they had violated the law as alleged in the complaint.

Said stipulation further provided that all portions of the complaint which charged that respondents misrepresented that they were "Chicago's Largest Exclusive Furriers" as alleged in Paragraphs Four (e) and Seventeen (d) be dismissed for lack of proof and that the stipulation disposed of the proceeding as to all parties.

Thereafter said hearing examiner concluded that the proceeding was in the public interest; that such stipulation was an appropriate disposition thereof; and, in accordance with the action contemplated and agreed upon, made his order to cease and desist.

Thereafter said initial decision, including said order, as announced and decreed by "Decision of the Commission and Order to File Report of Compliance", dated September 16, 1955, became, on said date, pursuant to § 3.21 of the Commission's rules of practice, the decision of the Commission.

Said order is as follows:

It is ordered, That respondents, Max Feuer and Sue Feuer, individually and as copartners trading as Feuer Fur Company, or under any other trade name, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction, or the manufacture for introduction, or the sale, advertisement, offer for sale, transportation or distribution of fur products in commerce, or in connection with the manufacture

for sale, sale, advertising, offer for sale, transportation or distribution of fur products which have been made in whole or in part of fur which had been shipped and received in commerce, as "commerce," "fur," and "fur product" are defined in the Fur Products Labeling Act, do forthwith cease and desist from:

A. Misbranding fur products by:

1. Failing to affix labels to fur products showing:

(a) The name or names of the animal or animals producing the fur or furs contained in the fur product as set forth in the Fur Products Name Guide and as prescribed under the rules and regulations;

(b) That the fur product contains or is composed of bleached, dyed, or artificially colored fur when such is a fact;

(c) That the fur product is composed in whole or in substantial part of paws, tails, bellies or waste fur when such is a fact;

(d) The name, or other identification issued and registered by the Commission of one or more persons who manufactured such fur product for introduction into commerce, introduced it into commerce, sold it in commerce, advertised or offered for sale in commerce, or transported or distibuted it in commerce.

(e) The name of the country of origin of any imported furs used in the fur product.

2. Setting forth on labels attached to fur products, the name or names of any animal or animals other than the name or names provided for in paragraph A (1) (a) above.

3. Setting forth on labels attached to fur products, non-required information mingled with required information.

B. Falsely or deceptively invoicing fur products by:

1. Failing to furnish invoices to purchasers of fur products showing:

(a) The name or names of the animal or animals producing the fur or furs contained in the fur product as set forth in the Fur Products Name Guide and as prescribed under the rules and regulations;

(b) That the fur product contains or is composed of bleached, dyed, or artificially colored fur when such is a fact;

(c) That the fur product is composed in whole or in substantial part of paws, tails, bellies, or waste fur when such is a fact;

(d) The name and address of the person issuing such invoices;

(e) The name of the country of origin of any imported furs contained in the fur product.

2. Using on invoices the name or names of any animal or animals other than the name or names provided for in paragraph B (1) (a) above.

3. Setting forth on invoices pertaining to fur products, required information in abbreviated form.

C. Falsely or deceptively advertising fur products through the use of any advertisement, representation, public announcement or notice, which is intended to aid, promote or assist, directly or indirectly in the sale or offering for sale of fur products, and which:

1. Fails to disclose the name or names of the animal or animals producing the fur or furs contained in the fur products as set forth in the Fur Products Name Guide and as prescribed under the rules and regulations;

2. Fails to disclose that fur products contain or are composed of bleached, dyed, or otherwise artificially colored fur when such is the fact;

3. Uses abbreviated words or terms of required information or which, if printed, fails to state in type of equal size all parts of the required information;

4. Represents directly or by implication:

(a) That a sale price enables purchasers of fur products to effectuate any savings in excess of the difference between the said price and the price at which comparable products were sold during the time specified or, if no time is specified, in excess of the difference between said price and the current price at which comparable products are sold;

(b) That any fur products were manufactured or designed by respondents, when such is contrary to the fact.

5. Makes the pricing claims or representations referred to in paragraph C (4) (a) above, unless there is maintained by respondents full and adequate records disclosing the facts upon which such claims and representations are based, as required by Rule 44 (e) of the rules and regulations.

D. Failing to maintain and preserve full and adequate records, in the manner and form required by Rules 40 and 41 of the rules and regulations, showing the information set forth on labels which respondents have removed from fur products and in lieu thereof substituted and affixed respondents' labels thereto.

It is further ordered, That respondents Max Feuer and Sue Feuer, individually and as copartners trading as Feuer Fur Company, or under any other trade name, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale, and distribution of fur products in commerce, as "commerce" is defined in the Federal Trade Commission Act, do further cease and desist from making, directly or by implication, any of the representations prohibited by paragraph C (4) of this order.

It is further ordered, That all other charges contained in the complaint not specifically covered in the above order are herewith dismissed as to both respondents.

By said "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: September 16, 1955.

By the Commission.

[SEAL] JOHN R. HEIM,
Acting Secretary.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

PART 1—CERTIFICATION, IDENTIFICATION, AND MARKING OF AIRCRAFT AND RELATED PRODUCTS

REVISION OF PART

Because of the number of outstanding amendments to Part 1 there follows a revision of Part 1 incorporating all amendments thereto which were in effect on October 1, 1955.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

Part 1—Certification, Identification, and Marking of Aircraft and Related Products

APPLICABILITY AND DEFINITIONS

Sec.
1.0 Applicability of this part.
1.1 Definitions.
1.2 Type design.

TYPE CERTIFICATES

1.10 Application.
1.11 Products for which issued.
1.12 Requirements for issuance.
1.13 Location of manufacturing facilities.
1.14 Transferability.
1.15 Inspections and tests.
1.16 Duration.
1.17 Display.
1.18 Privileges.
1.19 Statement of conformity.

CHANGES IN TYPE DESIGN

1.20 General.
1.21 Classification of changes.
1.22 Approval of minor changes.
1.23 Approval of major changes.
1.24 Service experience changes.

SUPPLEMENTAL TYPE CERTIFICATES

1.25 Supplemental type certificates.
1.26 Applicable requirements.
1.27 Requirements for issuance.
1.28 Privileges.

PRODUCTION CERTIFICATES

1.30 Application.
1.31 Products for which issued.
1.32 Requirements for issuance.
1.33 Location of manufacturing facilities.
1.34 Quality control.
1.35 Privileges.
1.36 Quality control data requirements; prime manufacturer.
1.37 Information on subsidiary manufacturers.
1.38 Changes in quality control system.
1.39 Multiple products.
1.40 Production limitation record.
1.41 Modification of the production limitation record.
1.42 Transferability.
1.43 Inspections and tests.
1.44 Duration.
1.45 Display.
1.46 Responsibility of holder.

AIRCRAFT AND PRODUCT IDENTIFICATION

1.50 Identification.

REPLACEMENT AND MODIFICATION PARTS

1.55 Applicable rules.

AIRWORTHINESS CERTIFICATES

1.60 Application.
1.61 Aircraft categories for which airworthiness certificates are issued.
1.62 Amendment or modification.
1.63 Transferability.
1.64 Duration.
1.65 Display.
1.66 Airworthiness certificates for normal, utility, acrobatic, and transport categories.
1.67 Airworthiness certificate; requirements for issuance.
1.68 Airworthiness certificates for restricted category aircraft.
1.69 Airworthiness certificates for restricted category aircraft; requirements for issuance.
1.70 Multiple airworthiness certification.
1.71 Airworthiness certificate for limited category aircraft.
1.72 Airworthiness certificate for limited category aircraft; requirements for reissuance.
1.73 Experimental certificates.
1.74 Experimental certificates; requirements for issuance.
1.75 Special flight permits.
1.76 Special flight permits; requirements for issuance.

AIRCRAFT NATIONALITY AND REGISTRATION MARKS

1.100 General.
1.101 Display of identification marks.
1.102 Location of identification marks.
1.103 Measurements of identification marks.
1.104 Color.
1.105 Affixation.
1.106 Design.
1.107 Maintenance.
1.108 Identification marks for nonconventional aircraft.
1.109 Identification marks for export aircraft.
1.110 Removal of aircraft identification marks.

AUTHORITY: §§ 1.0 to 1.110 issued under sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply secs. 601, 603, 52 Stat. 1007, 1009, 1026, as amended; 49 U. S. C. 551, 553, 672.

APPLICABILITY AND DEFINITIONS

§ 1.0 *Applicability of this part.* This part establishes administrative requirements for the issuance of type, production, and airworthiness certificates, and for the identification and marking of aircraft and related products.

§ 1.1 *Definitions.* As used in this part, terms are defined as follows:

(a) *Administration*—(1) *Administrator.* The Administrator is the Administrator of Civil Aeronautics.

(2) *Applicant.* An applicant is a person or persons applying for approval of an aircraft or any part thereof.

(3) *Approved.* Approved, when used alone or as modifying terms such as means, devices, specifications, etc., shall mean approved by the Administrator.

(4) *Authorized representative of the Administrator.* An authorized representative of the Administrator means any employee of the Civil Aeronautics Administration or any private person, authorized by the Administrator to perform any of the duties delegated to the Administrator by the provisions of this part.

(5) *Person.* Person means any individual, firm, copartnership, corporation, company, association, joint-stock association, or body politic; and includes any trustee, receiver, assignee, or other similar representative thereof.[1]

[1] As defined in section 1 of the Civil Aeronautics Act of 1938, as amended.

(6) *Prime manufacturer.* A prime manufacturer means the person who initiated the design and construction of the product and who applied for the type certificate, or any person to whom a current right to reproduce the product has been transferred.

(7) *Subsidiary manufacturer.* A subsidiary manufacturer means the person who contracted with the prime manufacturer to produce and to supply to the prime manufacturer major assemblies and components which are manufactured in conformity with the prime manufacturer's approved drawings and data for the fabrication of the product.

(8) *United States.* United States means the several States, the District of Columbia, and the several Territories and possessions of the United States, including the Territorial waters and the overlying air space thereof.[1]

(b) *Design*—(1) *Aircraft.* An aircraft means any contrivance now known or hereafter invented, used, or designed for navigation of or flight in the air.[1]

(2) *Aircraft engine.* An aircraft engine means an engine used, or intended to be used, for propulsion of aircraft and includes all parts, appurtenances, and accessories thereof other than propellers.[1]

(3) *Appliances.* Appliances mean instruments, equipment, apparatus, parts, appurtenances, or accessories, of whatever description, which are used, or are capable of being or intended to be used, in the navigation, operation, or control of aircraft in flight (including parachutes and including communication equipment and any other mechanism or mechanisms installed in or attached to aircraft during flight), and which are not a part or parts of aircraft, aircraft engines, or propellers.[1]

(4) *Product.* The term product, as used in this part, means: (i) An aircraft, (ii) an aircraft engine, (iii) a propeller, or (iv) any appliance specified in this subchapter (the Civil Air Regulations) as eligible for a type certificate.

(5) *Propeller.* A propeller includes all parts, appurtenances, and accessories thereof.[1]

§ 1.2 *Type design.* The type design shall consist of such drawings and specifications as are necessary to disclose the configuration of the product and all the design features covered in the requirements of that part of the regulations in this subchapter under which the product is certificated, such information on dimensions, materials, and processes as is necessary to define the structural strength of the product, and such other data as are necessary to permit by comparison the determination of the airworthiness of subsequent products of the same type.

TYPE CERTIFICATES

§ 1.10 *Application.* Any person, whether or not a citizen of the United States, may apply for the issuance of a type certificate. The application for a type certificate for a specified product shall be made upon a form and in a manner prescribed by the Administrator.

§ 1.11 *Products for which issued.* A type certificate may be issued for an aircraft, aircraft engine, propeller, or any appliance for which certification is provided elsewhere in this subchapter.

§ 1.12 *Requirements for issuance.* A type certificate for a product shall be issued when:

(a) The applicant has submitted the type design (see § 1.2), test reports, and computations as may be required by that part of the regulations in this subchapter under which the product is to be certificated.

(b) Upon examination of the type design and the completion of all tests and inspections, the Administrator finds that the type design meets the requirements of the applicable regulations in this subchapter.

§ 1.13 *Location of manufacturing facilities.* No type certificate for a product shall be issued if the manufacturing facilities therefor are located outside the United States, unless where facilities are located outside the United States the Administrator finds that no undue burden on the Government is created in administering applicable requirements of the act or regulations issued thereunder.

§ 1.14 *Transferability.* A type certificate may be transferred or made available to third persons by licensing agreements, and the grantor shall immediately notify the Administrator in writing of any transfer, licensing agreement, or termination thereof. The provisions of § 1.13 shall be complied with.

§ 1.15 *Inspections and tests.* (a) A representative of the Administrator shall be permitted to make such inspections and, in the case of aircraft, flight tests as may be necessary to determine compliance with applicable requirements.

(b) A product manufactured under a type certificate only shall be required to undergo inspection by a representative of the Administrator to determine whether individual products conform with the type design.

(c) The manufacturer of a product being manufactured under a type certificate only shall maintain at the place of manufacture such technical data and drawings as may be necessary to determine whether the product or any part thereof conforms to the current type design.

(d) A manufacturer producing a product under the terms of a type certificate without a related production certificate shall provide, for products manufactured after six months from the date of issuance of the type certificate, a production inspection system approved by the Administrator which will give assurance that each article produced is in conformity with the type design and is in a condition for safe operation.

§ 1.16 *Duration.* A type certificate shall remain in effect until surrendered, suspended, revoked, or a termination date is otherwise established by the Board.

1.17 *Display.* Type certificates shall be made available for examination by an authorized representative of the Board or of the Administrator.

§ 1.18 *Privileges.* The holder or licensee of a type certificate for a product may, in the case of aircraft, obtain airworthiness certificates (see applicable §§ 1.60 through 1.72), or in the case of engines, propellers, or other products, obtain approval for installation on certificated aircraft; he may obtain a production certificate for such products (see §§ 1.30 through 1.46).

§ 1.19 *Statement of conformity.* (a) The holder of a type certificate only or of a current right to the benefits of a type certificate only under a licensing arrangement, upon the initial transfer by him of the ownership of any product manufactured under such type certificate or upon application for original issuance of an airworthiness certificate for an aircraft, shall furnish to an authorized representative of the Administrator a statement of conformity for such product on a form prescribed by the Administrator. For aircraft manufactured under a type certificate only, there shall be included a statement that the aircraft referred to has been flight checked. For aircraft engines and for variable pitch propellers manufactured under a type certificate only, there shall be included a statement that the engine or propeller referred to has been subjected by the manufacturer to a final operational check. When a production certificate is held in addition to the type certificate, the provisions of § 1.35 shall apply. The Administrator may consider military acceptance in lieu of a statement of conformity for a product which has been manufactured for the military service.

(b) A statement of conformity shall be furnished to an authorized representative of the Administrator, upon a form and in a manner prescribed by the Administrator, for any prototype product presented for type certification.

CHANGES IN TYPE DESIGN

§ 1.20 *General.* When the type design is changed, the applicant shall demonstrate that the product complies with the requirements of that part of the regulations in this subchapter under which it was certificated.

§ 1.21 *Classification of changes.* Changes shall be classified as minor and major. A minor change shall be one which has no appreciable effect on the weight, balance, structural strength, reliability, operational characteristics, or other characteristics affecting the airworthiness of the product. A major change shall be one not classified as a minor change.

§ 1.22 *Approval of minor changes.* Minor changes in a type design may be approved in accordance with a method acceptable to the Administrator prior to the submittal to the Administrator of any substantiating or descriptive data.

§ 1.23 *Approval of major changes.* Major changes in a type design shall be approved only after receipt by the Administrator of substantiating data and necessary descriptive data for inclusion in the type design.

§ 1.24 *Service experience changes.* (a) Where the Administrator finds as a result of service experience that an unsafe condition exists with respect to a design feature, part or characteristic of any product, and that such a condition is likely to exist or develop in other products of the same type design, he shall provide notice[2] thereof for all operators of products of that type, and the product shall not thereafter be operated until the unsafe condition has been corrected, unless otherwise authorized by the Administrator under specified conditions and limitations, including inspections. In addition, the provisions of subparagraphs (1) and (2) of this paragraph shall apply.

(1) When the Administrator finds that design changes are necessary to correct the unsafe condition of the product, the holder of the type certificate, upon request of the Administrator, shall submit appropriate design changes for the approval of the Administrator.

(2) Upon approval, the descriptive data covering the changes shall be made available by the holder of the type certificate to all operators of products previously certificated under such type certificate.

(b) Where no current unsafe condition exists but the Administrator or the holder of the type certificate finds through service experience that changes in type design will contribute to the safety of the product, the holder of the type certificate may submit appropriate design changes for the approval of the Administrator. Upon approval of such changes the manufacturer shall make available to all operators of the same type of product information on the design changes.

SUPPLEMENTAL TYPE CERTIFICATES

§ 1.25 *Supplemental type certificates.* When a person, other than the holder of the type certificate for a product, alters the product by introducing a major change (see § 1.21) in a previously approved type design, and the change is not so extensive as to require application for a new type certificate (see §§ 3.11 (e), 4b.11 (e), 5.11 (e), 6.11 (e), 13.11 (e), and 14.11 (e) of this chapter), such person shall apply for the issuance of a supplemental type certificate covering the design change. The application shall be made upon a form and in a manner prescribed by the Administrator.

§ 1.26 *Applicable requirements.* The applicant for a supplemental type certificate shall demonstrate that the altered product meets the airworthiness requirements which are applicable to the product involved (see §§ 3.11 (d), 4b.11 (d), 5.11 (d), 6.11 (d), 13.11 (d), and 14.11 (d) of this chapter).

§ 1.27 *Requirements for issuance.* Upon receipt of an application and a satisfactory demonstration of compliance with the applicable requirements in accordance with §§ 1.25 and 1.26, the Administrator shall indicate approval of the change in type design. Such approval together with the previously issued type certificate for the product shall constitute a supplemental type certificate.

§ 1.28 *Privileges.* The holder or licensee of a supplemental type certificate for an altered product may, in the case of aircraft, obtain airworthiness certificates (see applicable §§ 1.60 through 1.72), or in the case of engines, propellers, or other products, obtain approval for installation on certificated aircraft; he may obtain a production certificate (see §§ 1.30 through 1.46) with respect to the change in the type design for which approval was obtained in accordance with § 1.27.

NOTE: The provisions of this section are not intended to affect in any way the proprietary rights of the holder of a type certificate or of a supplemental type certificate.

PRODUCTION CERTIFICATES

§ 1.30 *Application.* Any person, whether or not a citizen of the United States, may apply for the issuance of a production certificate. The application for a production certificate shall be made upon a form and in a manner prescribed by the Administrator.

§ 1.31 *Products for which issued.* A production certificate shall be issued only for products for which a type certificate is currently in effect. The applicant shall hold a currently effective type certificate for the product to be manufactured or shall hold a current right to the benefits of such certificate under a licensing agreement.

§ 1.32 *Requirements for issuance.* A person shall be issued a production certificate when the Administrator finds, after examination of the supporting data and after inspection of the organization and production facilities, that the applicant complies with the requirements of §§ 1.33 through 1.36.

§ 1.33 *Location of manufacturing facilities.* No production certificate for a product shall be issued if the manufacturing facilities therefor are located outside the United States, unless where facilities are located outside the United States the Administrator finds that no undue burden on the Government is created in administering applicable requirements of the act or regulations issued thereunder.

§ 1.34 *Quality control.* The applicant shall show that he is adequately prepared to manufacture and control the quality of any product for which he requests production certification, so that each article shall conform with the design provisions of the pertinent type certificate. A product manufactured under a production certificate may be required to undergo inspection by a representative of the Administrator to determine whether the individual product conforms to the type design.

§ 1.35 *Privileges.* It shall not be necessary for the holder of a production certificate to furnish a statement of conformity for each of the products produced under the terms of the production certificate. The holder of a production certificate may obtain an airworthiness certificate in the case of aircraft (see § 1.67 (a)) and in the case of engines, propellers, or other products may obtain approval for installation on certificated aircraft.

[2] Notification of any unsafe condition, of the required corrective action, and of compliance dates is usually provided through the medium of Airworthiness Directives issued by the Administrator.

§ 1.36 *Quality control data requirements; prime manufacturer.* The applicant shall submit for approval by the Administrator, as evidence of his ability to control the quality of any product for which he requests a production certificate, data describing the inspection and test procedures necessary to insure that each article produced is in conformity with the type design and is in a condition for safe operation. The data submitted shall include such of the following as are applicable to the product involved:

(a) A statement describing assigned responsibilities and delegated authority of the quality control organization, together with a chart indicating the functional relationship of the quality control organization to management and to other organizational components and indicating the chain of authority and responsibility within the quality control organization.

(b) A description of inspection procedures applying to raw materials, outside purchased items, and parts and assemblies produced by subsidiary manufacturers. The information shall include the methods used to insure acceptable quality of parts and assemblies which cannot be completely inspected for conformity and quality when delivered to the prime manufacturer's plant.

(c) A description of the methods used for production inspection of individual parts and complete assemblies, including the identification of any special manufacturing processes involved, the description of the means used to control such processes, a description of the final test procedure for the complete product, and, in the case of aircraft, a copy of the manufacturer's production flight test procedure and checkoff list.

(d) An outline of the materials review system, including the procedure for recording review board decisions and disposing of rejected parts.

(e) An outline of a system by means of which company inspectors are kept currently informed regarding changes in engineering drawings, specifications, and quality control procedures.

(f) A list or chart showing location and type of inspection stations.

§ 1.37 *Information on subsidiary manufacturers.* The prime manufacturer shall make available information regarding all major inspections accomplished by a subsidiary manufacturer for acceptance of parts or assemblies for which the prime manufacturer is responsible.

§ 1.38 *Changes in quality control system.* Subsequent to the issuance of a production certificate, any changes to the quality control system shall be subject to review by the Administrator. The holder of a production certificate shall immediately notify the Administrator in writing of any such changes affecting the data prescribed in § 1.36.

§ 1.39 *Multiple products.* The Administrator may authorize more than one type certificated product to be manufactured under the terms of one production certificate provided that the products have similar production characteristics.

§ 1.40 *Production limitation record.* A production limitation record shall be issued as part of a production certificate. The record shall list the type certificate of every product which the applicant is authorized to manufacture under the terms of a production certificate. Where different models of a basic type approved under the same type certificate number require different fabrication methods and processes, the Administrator may list the model designation of the product for which authorization is given, as well as the type certificate number, on the production limitation record.

§ 1.41 *Modification of the production limitation record.* The holder of a production certificate desiring the addition of a type certificate and/or model to the production certificate shall submit an application therefor upon a form and in a manner prescribed by the Administrator. The applicant shall comply with the applicable requirements of §§ 1.32 through 1.36 and 1.38.

§ 1.42 *Transferability.* A production certificate shall not be transferred.

§ 1.43 *Inspections and tests.* A representative of the Administrator shall be permitted to make such inspections and, in the case of aircraft, flight tests as may be necessary to determine compliance with the requirements of the regulations in this subchapter.

§ 1.44 *Duration.* A production certificate shall remain in effect until surrendered, suspended, revoked, or a termination date is otherwise established by the Board, or the location of the manufacturing facility is changed.

§ 1.45 *Display.* A production certificate shall be prominently displayed in the main office of the factory.

§ 1.46 *Responsibility of holder.* The holder of a production certificate shall maintain the quality control system in conformity with the data and procedures approved for the production certificate. He also shall determine that each completed product submitted for airworthiness certification or approval is in conformity with the type design and is in a condition for safe operation.

AIRCRAFT AND PRODUCT IDENTIFICATION

§ 1.50 *Identification.* (a) Each product manufactured under the terms of a type or production certificate shall display permanently such data as may be required to show its identity. The data shall include such of the following items as the Administrator finds appropriate: (1) Manufacturer's name, (2) model designation, (3) manufacturer's serial number (if article is numbered serially), otherwise the date of manufacture, except that articles subject to deterioration as a result of aging (parachutes, parachute flares, etc.), shall bear the date of manufacture in addition to the serial number, if any, (4) type certificate number, (5) production certificate number, (6) capacity or rating.

REPLACEMENT AND MODIFICATION PARTS

§ 1.55 *Applicable rules.* Any person other than the holder of the type certificate producing replacement or modification parts for sale for installation on a type certificated product shall comply with §§ 1.12 (a) and (b), 1.13, 1.15 (a) and (d), 1.20, and 1.50 (also see § 1.25).

NOTE: The provisions of this section are not applicable to parts produced under the terms of a type and/or production certificate, to parts produced by owners or operators for maintaining or altering their own product, or to standard parts (such as bolts and nuts) conforming to established industry or Government specifications; e. g., SAE and military specifications, and CAA Technical Standard Orders.

AIRWORTHINESS CERTIFICATES

§ 1.60 *Application.* Any U. S. citizen may apply for issuance of an airworthiness certificate for an aircraft provided that he is the registered owner of the aircraft or his agent. The application for an airworthiness certificate shall be made upon a form and in a manner prescribed by the Administrator.

§ 1.61 *Aircraft categories for which airworthiness certificates are issued.* Airworthiness certificates are issued for aircraft whose type design has been certificated under the normal, utility, acrobatic, or transport categories, for aircraft of the restricted category, and for surplus military aircraft in the limited category. In addition, experimental certificates and special flight permits are issued.

§ 1.62 *Amendment or modification.* An airworthiness certificate may be amended or modified only upon application to the Administrator.

§ 1.63 *Transferability.* An airworthiness certificate shall be transferred with the aircraft.

§ 1.64 *Duration.* (a) Unless sooner surrendered, suspended, revoked, or a termination date is otherwise established by the Board, the duration of an airworthiness certificate shall be in accordance with the provisions of subparagraphs (1) through (3) of this paragraph.

(1) *Experimental aircraft.* An experimental certificate shall remain in effect for one year from the date of issuance or renewal, unless a shorter period is established by the Administrator.

(2) *Aircraft maintained under a continuous maintenance system.* An airworthiness certificate issued for an aircraft maintained under an approved continuous maintenance system shall remain in effect without renewal during the period the aircraft is maintained in accordance with such a system.

(3) *Other aircraft.* Except as provided in subparagraphs (1) and (2) of this paragraph, airworthiness certificates on other aircraft shall remain in effect for one year after the date of issuance or renewal. The airworthiness certificate shall be renewed upon satisfactory completion of the annual inspection elsewhere required in the regulations of this subchapter.

(b) The Administrator may, from time to time, reinspect any aircraft or part thereof to see whether it is in an airworthy condition. The owner, operator, or bailee of the aircraft shall make it available for such inspection upon request.

(c) Upon suspension, revocation, or the general termination by order of the Board of an airworthiness certificate, the owner, operator, or bailee of an aircraft shall, upon request, surrender the certificate to an authorized representative of the Administrator.

§ 1.65 *Display.* An airworthiness certificate shall be carried in the aircraft at all times, and shall be displayed as prescribed by the Administrator.

§ 1.66 *Airworthiness certificates for normal, utility acrobatic, and transport categories.* Aircraft certificated in the normal, utility, acrobatic, and transport categories may be used for the carriage of persons and property for compensation or hire. This provision shall also apply to import aircraft certificated in accordance with Part 10 of this subchapter and § 1.67 (c) of this part.

§ 1.67 *Airworthiness certificate; requirements for issuance.* The requirements for the issuance of an airworthiness certificate are stated in paragraphs (a) through (c) of this section.

(a) *Aircraft manufactured under a production certificate.* An applicant for the original issuance of an airworthiness certificate for an aircraft, whose type design was certificated in categories other than the limited category, manufactured under the terms of a production certificate, may be issued such certificate without further showing. The Administrator may inspect the aircraft to see if it conforms to the type design.

(b) *Aircraft manufactured under type certificate only.* An applicant for the original issuance of an airworthiness certificate for an aircraft, whose type design was certificated in categories other than the limited category, manufactured under the terms of a type certificate only, shall be issued such certificate upon presentation of a statement of conformity for such aircraft issued by the manufacturer when, upon inspection of the aircraft, the Administrator finds that the aircraft conforms to the type design, and is in a condition for safe operation.

(c) *Import aircraft.* An applicant for the original issuance of an airworthiness certificate for an import aircraft type certificated in accordance with Part 10 of this subchapter shall be issued such certificate when the government of the country where the aircraft was manufactured certifies, or the Administrator finds, that the aircraft conforms to the type design and is in a condition for safe operation.

§ 1.68 *Airworthiness certificates for restricted category aircraft.* Aircraft certificated in the restricted category shall not be used for the carriage of persons or cargo for compensation or hire. For purposes of this section, crop dusting, seeding, and other similar specialized operations are not considered as the carriage of persons or cargo for compensation or hire. Other special limitations for such aircraft are prescribed under the provisions of Part 8 of this subchapter. This section shall also apply to import aircraft certificated in accordance with Part 10 of this subchapter and § 1.69 of this part.

§ 1.69 *Airworthiness certificates for restricted category aircraft; requirements for issuance.* The requirements for issuance of an airworthiness certificate for an aircraft in the restricted category are as stated in paragraphs (a) and (b) of this section.

(a) *Aircraft manufactured under a production certificate or type certificate only.* An applicant for the original issuance of an airworthiness certificate for an aircraft in the restricted category, type certificated under the provisions of § 8.10 (a) (1) of this subchapter, shall comply with the appropriate provisions of § 1.67.

(b) *Other aircraft.* An applicant for the issuance of an airworthiness certificate for aircraft of the restricted category other than those referred to in paragraph (a) of this section, such as surplus military aircraft and modified civil aircraft, may be issued such certificate when he demonstrates compliance with the provisions of subparagraphs (1) through (3) of this paragraph.

(1) The aircraft has been type certificated under the provisions of § 8.10 (a) (2) of this subchapter, or modified under the provisions of § 8.10 (b) of this subchapter;

(2) The aircraft has been inspected by the Administrator and found by him to be in a good state of preservation and repair and in condition for safe operation; and

(3) The Administrator has prescribed operating limitations in accordance with Part 8 of this subchapter.

§ 1.70 *Multiple airworthiness certification.* Multiple airworthiness certification shall conform to the provisions of paragraphs (a) and (b) of this section.

(a) An aircraft shall be issued an airworthiness certificate in the restricted category and in any one or more of the other airworthiness categories prescribed by the regulations in this subchapter, if the applicant shows compliance with the requirements for each category when the aircraft is in the configuration for that category and if the aircraft can be converted from one category to another by removal or addition of equipment by simple mechanical means.

(b) Any aircraft certificated in the restricted and any other category shall be inspected and approved by an authorized representative of the Administrator, or by a certificated mechanic with an appropriate airframe rating, to determine airworthiness each time the aircraft is converted from the restricted category to another category for the carriage of passengers for compensation or hire, unless the Administrator finds this unnecessary for safety in a particular case.

§ 1.71 *Airworthiness certificate for limited category aircraft.* Airworthiness certificates in the limited category are issued for surplus military aircraft type certificated under Part 9 of this subchapter. Aircraft in the limited category may not be used for the carriage of persons or property for compensation or hire.

§ 1.72 *Airworthiness certificate for limited category aircraft; requirements for reissuance.* An applicant for an airworthiness certificate for an aircraft in the limited category shall show that the aircraft has been previously type certificated in the limited category, and that the aircraft complies fully with the requirements of Part 9 of this subchapter.

§ 1.73 *Experimental certificates.* Experimental certificates are issued for amateur-built aircraft and for aircraft which are to be used for experiment, for exhibition, for air racing, and to show compliance with the regulations in this subchapter for the issuance of type certificates and related purposes.

§ 1.74 *Experimental certificates; requirements for issuance.* The requirements for the issuance of experimental certificates are as stated in paragraphs (a) and (b) of this section.

(a) In applying for an experimental certificate the applicant shall submit:

(1) A statement upon a form and in a manner prescribed by the Administrator setting forth the purpose for which the aircraft is to be used,

(2) Sufficient data, such as photographs, to identify the aircraft, and

(3) Upon inspection of the aircraft, any pertinent information found necessary by the Administrator to safeguard the general public.

(b) The Administrator shall prescribe appropriate operating restrictions for the use of experimental aircraft. Such restrictions shall include the prohibition of carrying persons or property for compensation or hire.

§ 1.75 *Special flight permits.* A special flight permit may be issued for an aircraft which may not currently meet applicable airworthiness requirements, but which is capable of safe flight, for the purpose of permitting the aircraft to be flown to a base where repairs or alterations are to be made, or to permit the delivery or export of the aircraft, or to permit production flight tests of new production aircraft.

§ 1.76 *Special flight permits; requirements for issuance.* The requirements for the issuance of special flight permits are as stated in paragraphs (a) and (b) of this section.

(a) Where found necessary by the Administrator, an applicant for a special flight permit shall submit a statement in a form approved by the Administrator indicating the purpose of the flight, the proposed itinerary, the duration of authorization requested, the persons to be on board the aircraft, the particulars, if any, in which the aircraft does not comply fully with the applicable airworthiness requirements, and the restrictions, if any, deemed necessary for safe operation of the aircraft.

(b) The Administrator shall accomplish, or shall require the applicant to accomplish, such appropriate inspections or tests as the Administrator may deem necessary in the interest of safety.

(c) Nothing in paragraphs (a) and (b) of this section shall prevent the issuance to an air carrier by the Administrator of a general authorization to conduct ferry flights for specified purposes as provided in those paragraphs, under such terms and conditions as may from time to time be prescribed by the Administrator.

AIRCRAFT NATIONALITY AND REGISTRATION MARKS

§ 1.100 *General.* The identification of each aircraft shall be marked, and the markings shall be displayed as required in §§ 1.101 through 1.107. No design, mark, or symbol which modifies or confuses the identification marks shall be placed on an aircraft, except with the approval of the Administrator.

§ 1.101 *Display of identification marks.* Identification marks shall be displayed in accordance with the provisions in paragraphs (a) and (b) of this section.

(a) Aircraft registered for the first time after December 31, 1948, shall display identification marks consisting of the Roman capital letter "N", denoting United States registration, followed by the registration number. Other aircraft which display identification marks containing an airworthiness symbol "C", "R", "X", or "L" and which are operated solely within the United States may display such identification marks until the first time such aircraft are recovered or refinished to an extent necessitating the reapplication of the identification mark. Thereafter, such aircraft, and after December 31, 1950, all aircraft of United States registry operated outside of the United States, shall display identification marks consisting of the Roman capital letter "N", denoting United States registration, followed by the registration number.

(b) When an identification mark including only the Roman capital letter "N" and the registration number is utilized, limited and restricted category aircraft and experimental aircraft shall display the words "limited," "restricted," or "experimental," respectively, near each entrance to the cabin or cockpit of the aircraft. These markings shall be in letters not less than 2 inches nor more than 6 inches in height.

§ 1.102 *Location of identification marks.* Identification marks shall be located in accordance with paragraphs (a) through (e) of this section.

(a) *Fixed-wing aircraft.* The requirements of subparagraphs (1) through (3) of this paragraph shall be applicable to fixed-wing aircraft.

(1) *Wing surfaces.* Identification marks shall be displayed on the right half of the upper surface and the left half of the lower surface of the wing structure. As far as possible, the marks shall be located an equal distance from the leading and trailing edges of the wing. The top of the marks shall be toward the leading edge of the wing.

(2) *Vertical tail surfaces.* Identification marks shall be displayed on the upper half of the vertical tail surface. They shall be displayed on both sides of a single tail surface and on the outer sides of multitail surfaces. They may be placed either horizontally or vertically.

(3) *Fuselage surfaces.* Identification marks shall be displayed on the fuselage when the aircraft does not have a vertical tail surface. The marks shall be located on each side of the top half of the fuselage, just forward of the leading edge of the horizontal tail surface. They may be placed either horizontally or vertically.

(b) *Rotorcraft.* The requirements of subparagraphs (1) and (2) of this paragraph shall be applicable to rotorcraft.

(1) *Bottom fuselage surfaces.* Identification marks shall be displayed on the bottom surface of the fuselage or cabin. The top of the marks shall be toward the left side of the fuselage.

(2) *Side fuselage surfaces.* Identification marks shall be displayed below the window lines and as near the cockpit as possible.

(c) *Airships.* The requirements of subparagraphs (1) and (2) of this paragraph shall be applicable to airships.

(1) *Horizontal stabilizer surfaces.* Identification marks shall be displayed on the upper surface of the right horizontal stabilizer and on the under surface of the left horizontal stabilizer. The top of the marks shall be toward the leading edge of the stabilizer. The marks shall be placed horizontally.

(2) *Vertical stabilizer surfaces.* Identification marks shall be displayed on each side of the bottom half of the vertical stabilizer. The marks shall be placed horizontally.

(d) *Spherical balloons.* Identification marks for spherical balloons shall be displayed on two places diametrically opposite, and shall be located near the maximum horizontal circumference of the balloon.

(e) *Nonspherical balloons.* Identification marks for nonspherical balloons shall be displayed on each side. They shall be located near the maximum cross section of the balloon, immediately above either the rigging band or the points of attachment of the basket or cabin suspension cables.

§ 1.103 *Measurements of identification marks.* The measurements of identification marks shall conform to the provisions of paragraphs (a) through (d) of this section.

(a) *Fixed-wing aircraft.* The requirements of subparagraphs (1) and (2) of this paragraph shall be applicable to fixed-wing aircraft.

(1) *Wing surfaces.* The height of the identification marks on the wings shall be at least 20 inches.

(2) *Fuselage and vertical tail surfaces.* Identification marks shall be such as to leave at least a margin of 2 inches along each edge of the surface. Within these stipulations, the marks shall be as large as practicable, except that this rule shall not be interpreted as requiring the use of marks exceeding 6 inches in height or permitting the use of marks smaller than 2 inches in height. The letters and numbers of each separate group of identification marks shall be of equal height.

(b) *Rotorcraft.* The requirements of subparagraphs (1) and (2) of this paragraph shall be applicable to rotorcraft.

(1) *Fuselage or cabin bottom surfaces.* Identification marks shall be at least ⅔ as high as the fuselage is wide, but need not be more than 20 inches high.

(2) *Fuselage or cabin side surfaces.* Identification marks shall conform to requirements stipulated in subparagraph (a) (2) of this section.

(c) *Lighter-than-air aircraft.* The requirements of subparagraph (1) of this paragraph shall be applicable to lighter-than-air aircraft.

(1) On each airship, spherical balloon, or nonspherical balloon identification marks shall be at least 20 inches high.

(d) *All aircraft.* The requirements of subparagraphs (1) through (3) of this paragraph shall be applicable to all aircraft.

(1) *Width.* Identification marks shall be ⅔ as wide as they are high with the exception of number "1" which shall be ⅙ as wide as it is high.

(2) *Thickness.* Identification marks shall be formed by solid lines of a thickness equal to ⅙ of the character height.

(3) *Spacing.* The space between the identification numbers and letters shall be not less than ¼ of the character width.

§ 1.104 *Color.* On each aircraft, identification marks shall contrast in color with the background.

§ 1.105 *Affixation.* On each aircraft, identification marks shall be painted or shall be affixed by such other means as will insure a similar degree of permanence and legibility, except that aircraft intended for immediate delivery to a foreign purchaser may display identification marks affixed with readily removable material.

§ 1.106 *Design.* On each aircraft, identification marks shall have no ornamentation.

§ 1.107 *Maintenance.* On each aircraft, identification marks shall be kept clean and legible at all times.

§ 1.108 *Identification marks for nonconventional aircraft.* The identification marking rules prescribed in §§ 1.101 through 1.107 are intended to apply to conventional aircraft as they are known today. When aircraft are developed which do not conform to the general configuration of present-day aircraft, a procedure for identification marking shall be prescribed by the Administrator.

§ 1.109 *Identification marks for export aircraft.* An aircraft manufactured in the United States for delivery outside the United States or its possessions may display such identification marks as are required by the State of registry of the aircraft. Such aircraft shall be operated only for the purpose of test and demonstration flights for a limited period of time or while in necessary transit to the purchaser.

§ 1.110 *Removal of aircraft identification marks.* When an aircraft of United States registry is sold to a citizen of a foreign country, the United States identification marks must be removed from such aircraft by the United States registered owner or his agent prior to its delivery to the purchaser.

[F. R. Doc. 55-8379; Filed, Oct. 13, 1955; 8:52 a. m.]

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 164]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

PROCEDURE ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

NOTE: Where the general classification (LFR, VAR, ADF, ILS, GCA, or VOR), location, and procedure number (if any) of any procedure in the amendments which follow, are identical with an existing procedure, that procedure is to be substituted for the existing one, as of the effective date given, to the extent that it differs from the existing procedure; where a procedure is canceled, the existing procedure is revoked; new procedures are to be placed in appropriate alphabetical sequence within the section amended.

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility: class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances	Minimum altitude over facility on final approach course (ft.)	Course and distance, facility to airport	Ceiling and visibility minimums: Condition	Type aircraft: 75 m. p. h. or less	Type aircraft: More than 75 m. p. h.	If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished
1	2	3	4	5	6	7	8	9	10	11
CROSS CITY, FLA. Cross City, 42'. SBRAZ-CTY. Procedure No. 1. Amendment 6. Effective date: November 5, 1955. Supersedes Amendment 5, dated July 2, 1955. Major changes: reduce alternate minima.	Cross City VOR	264—1.0	1,200	E side of SE course: 135° outbound. 315° inbound. 1,200' within 10 miles.	700	315—2.7	2 engines or less T-dn C-dn S-dn 31 More than 2 engines T-dn C-dn S-dn 31 All aircraft A-dn	300-1 400-1 400-1 ---------- ---------- ---------- 800-2	300-1 500-1 400-1 200-½ 500-1½ 400-1 800-2	Within 2.7 miles climb to 1,300' on NW course (315°) within 25 miles.
DAYTONA BEACH, FLA. Daytona Beach, 34'. SBMLZ-DTV DAB. Procedure No. 1. Amendment 7. Effective date: November 5, 1955. Supersedes Amendment 6, dated July 9, 1955. Major changes: Raise transition altitude.	Daytona Beach VOR	042—4.5	1,200	S side of W course: 281° outbound. 101° inbound. 1,300' within 10 miles.	600	101—2.1	2 engines or less T-dn C-dn S-dn 10 A-dn More than 2 engines T-dn C-dn S-dn 10 A-dn	300-1 400-1 400-1 800-2 ---------- ---------- ---------- ----------	300-1 500-1 400-1 800-2 200-½ 500-1½ 400-1 800-2	Within 2.1 miles climb to 1,400' on E course within 15 miles.
SHREVEPORT, LA. Downtown, 179'. SBRAZ-DTV SHV. Procedure No. 1. Amendment 7. Effective date: November 5, 1955. Supersedes Amendment 6, dated October 9, 1954. Major changes: Increase procedure turn altitude. Increase circling ceiling minima for aircraft less than 75 miles per hour stall. Add notes.	Shreveport VOR Dixie MHW (final)	159—14.0 146—10.0	1,700 1,100	E side of NW course:* 326° outbound. 146° inbound. 1,900' within 10 miles. Beyond 10 miles not authorized.	1,200	152—1.8	2 engines or less T-dn C-d C-n A-dn More than 2 engines T-dn C-n A-dn	300-1 600-1 600-1½ NA ---------- ---------- ----------	300-1 600-1 600-1½ NA 300-1 600-1½ NA	Within 1.8 miles climb to 1,500' on S course (172°) within 25 miles. *Turn nonstandard due ATC. No weather or communications available at this airport. CAUTION: 480' mean sea level TV tower located 1.6 miles S of airport. 1,446' mean sea level and 1,403' TV antennas located approximately 12 miles WNW of SHV LFR. AIR CARRIER NOTE: Air carrier use not authorized.

LFR STANDARD INSTRUMENT APPROACH PROCEDURE—Continued

City and State; airport name, elevation; facility: class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances	Minimum altitude over facility on final approach course (ft.)	Course and distance, facility to airport	Ceiling and visibility minimums: Condition	Type aircraft: 75 m. p. h. or less	Type aircraft: More than 75 m. p. h. 1	2	3	4	5	6	7	8	9	10	11
SHREVEPORT, LA. Greater Shreveport, 251'. SBRAZ-DTV SHV. Procedure No. 1. Amendment 4. Effective date: November 5, 1955. Supersedes Amendment 3, dated November 19, 1954. Major changes: Increase procedure turn altitude.	Shreveport VOR Dixie MHW (final)	159—14.0 146—10.0	1,700 1,100	E side of NW course:* 326° outbound. 146° inbound. 1,900' within 10 miles. Beyond 10 miles not authorized.	1,200	196—9.0	2 engines or less T-dn C-d C-n A-dn More than 2 engines T-dn C-d C-n A-dn	300-1 600-1 600-2 800-2 ---------- ---------- ---------- ----------	300-1 600-1 600-2 800-2 200-½ 600-1½ 600-2 800-2	Within 9 miles turn left, climb to 1,400' on course of 135°, intercept and proceed south on S course (172°) of SHV LFR within 25 miles, or when directed by ATC, climb to 1,500' intercept and proceed SW on SW course (233°) of BAD LFR within 25 miles. *Turn nonstandard due ATC. CAUTION: 1,446' and 1,403' TV antennas located approximately 12 miles WNW of SHV LFR.

2. The automatic direction finding procedures prescribed in § 609.8 are amended to read in part:

ADF STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic: Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.

If an ADF instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility: class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances	Minimum altitude over facility on final approach course (ft.)	Course and distance, facility to airport	Ceiling and visibility minimums: Condition	Type aircraft: 75 m. p. h. or less	Type aircraft: More than 75 m. p. h.	If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished

PAR. 2. Subpart C, including the heading thereof, is amended to read as follows:

SUBPART C—PROVISIONS RELATING TO DISTILLED SPIRITS, WINE, BEER, TOBACCO, AND CERTAIN FIREARMS

DISTILLED SPIRITS, WINE, AND BEER

Sec.
601.301 Imposition of taxes, qualification requirements, and regulations.
601.302 Taxes.
601.303 Claims.
601.304 Preparation and filing of claims.
601.305 Offers in compromise.
601.306 Application for approval of interlocking directors and officers under section 8 of the Federal Alcohol Administration Act.
601.307 Rulings.
601.308 Conferences.
601.309 Attorneys and agents.
601.310 Forms.

TOBACCO PRODUCTS, TOBACCO MATERIALS, AND CIGARETTE PAPERS AND TUBES

601.311 Imposition of taxes; regulations.
601.312 Special qualification and bonding requirements.
601.313 Collection of taxes.
601.314 Rulings.
601.315 Proposed assessments of additional or delinquent taxes.
601.316 Administrative remedies available to taxpayers after the purchase of tobacco tax stamps or after assessment or payment of tobacco taxes.
601.317 Offers in compromise.
601.318 Forms.

FIREARMS

601.319 Applicable laws.
601.320 Taxes relating to machine guns and certain other firearms.
601.321 Licensing under the Federal Firearms Act of manufacturers of, and dealers in, firearms or ammunition.
601.322 Seizures of vessels, vehicles, and aircraft in connection with contraband firearms.

AUTHORITY: §§ 601.301 to 601.322 issued under R. S. 161; 5 U. S. C. 220.

§ 601.301 *Imposition of taxes, qualification requirements, and regulations—*(a) *Imposition of taxes.* Subchapter A, of chapter 51 of the Internal Revenue Code of 1954 imposes taxes on distilled spirits (including alcohol), wine, and beer. Except as specifically provided, additional taxes are imposed when distilled spirits and wine are rectified by blending, compounding, etc. Subchapter A of chapter 51 of the Code also imposes taxes on stills, and condensers used to produce spirits. Occupational taxes are imposed upon still manufacturers, brewers, rectifiers, dealers in liquors, and as a prerequisite for drawback under section 5134 of the Code, upon manufacturers of nonbeverage products.

(b) *Qualification requirements.* Distillers, winemakers, brewers, warehousemen, denaturers, rectifiers, bottlers, liquor bottle manufacturers, dealers in specially denatured alcohol, users and transporters of tax-free and specially denatured alcohol, and wholesalers and importers of liquors, are required to qualify with the Internal Revenue Service, usually by filing notice or application and bond with, and procuring permit from, the assistant regional commissioner (alcohol and tobacco tax) of the region in which operations are to be conducted. Detailed information respecting such qualification, including the forms to be used and the procedure to be followed, is contained in the respective regulations described in paragraph (c) of this section.

(c) *Regulations.* The procedural requirements with respect to matters relating to liquors which are within the jurisdiction of the Alcohol and Tobacco Tax Division are published in the regulations described in this paragraph. These regulations contain full information as to the general course and method by which the functions concerning liquors are channeled and determined, including the nature and requirements of formal and informal procedures, the forms and other documents required and the contents of applications, notices, registrations, permits, bonds, and other documents. Copies of prescribed forms may be obtained from the offices of assistant regional commissioners (alcohol and tobacco tax) excepting Forms 45, 52–A, 52–B, 52–C, 52–D, 52–E, 52–F, 122, 230, 237, 338, 2051, and 2054–2060, and Records 133 and 134 which may be purchased from commercial printers who may procure specimen copies of the forms from such offices. The following is a brief description of the several regulations arranged according to the principal subjects and operations concerned:

(1) *Production and disposition of industrial alcohol.* Part 182 of this chapter contains the regulations relative to the production, disposition, and use of industrial alcohol, including denatured alcohol. The regulations cover the establishment and operation of industrial alcohol plants, bonded warehouses, and denaturing plants, the production, taxpayment, transfer, exportation, and denaturation of alcohol, formulas for denaturation, the use of alcohol free of tax, the sale and use of denatured alcohol, the transportation of tax-free and specially denatured alcohol, the packaging, labeling, and sale of articles containing denatured alcohol, and the bringing into this country of alcohol and articles containing alcohol. The regulations also cover the issuance of permits covering the production of alcohol and denatured alcohol, the sale of specially denatured alcohol, and the transportation and use of tax-free and specially denatured alcohol.

(2) *Production and removal of distilled spirits.* Part 220 of this chapter, contains the regulations relative to the production of distilled spirits and the removal thereof from a registered distillery. The regulations cover the location, construction and equipment of the distillery; action by the assistant regional commissioner (alcohol and tobacco tax) in connection with the establishment and operation of the distillery; control and supervision of the distillery; production and removal of distilled spirits; and concern the sale, shipment, losses, records and reports, of distilled spirits. The term "distilled spirits" includes whisky, brandy, rum, gin and spirits, but excludes alcohol. (The production of rectified products, such as blended whisky, liqueurs and cordials, is governed by Part 235 of this chapter.)

(3) *Production and removal of brandy.* Part 221 of this chapter contains the regulations relative to the production of brandy and the removal thereof from a fruit distillery under the exemptions from certain provisions of law as provided in such regulations pursuant to section 5215 of the Code. The regulations cover the location, construction and equipment of the distillery; action by the assistant regional commissioner (alcohol and tobacco tax) in connection with the establishment and operation of the distillery; control and supervision of the distillery; production and removal of brandy; and concern the sale, shipment, losses, records and reports, of brandy.

(4) *Warehousing and bottling in bond of distilled spirits.* Part 225 of this chapter contains the regulations relative to the warehousing of distilled spirits (other than alcohol), and the bottling in bond, taxpayment and withdrawal thereof from internal revenue bonded warehouses. The regulations cover the location, construction and equipment of the warehouse; action by the assistant regional commissioner (alcohol and tobacco tax) in connection with the establishment and operation of the warehouse; control, custody, and supervision of the warehouse; deposit of spirits in the warehouse; losses of spirits in the warehouse or in transit thereto; withdrawal of distilled spirits from the warehouse for taxpaid or tax-free purposes; bottling of spirits in bond; alternate operations of bottling-in-bond department as taxpaid bottling house; transfers in bond between internal revenue bonded warehouses; exportation and shipment of distilled spirits; and records and reports of distilled spirits deposited, stored, bottled in bond, and withdrawn from internal revenue bonded warehouses.

(5) *Bottling of taxpaid distilled spirits.* Part 230 of this chapter contains the regulations relative to the bottling of taxpaid distilled spirits. The regulations cover the location, construction and equipment of the bottling house; alternate operations of the taxpaid bottling house as a bottling-in-bond department of an internal revenue bonded warehouse; the bottling of distilled spirits under trade names; action by the assistant regional commissioner (alcohol and tobacco tax) in connection with the establishment and operation of the bottling house; the operation and supervision of the taxpaid bottling house; the transfer of spirits to the taxpaid bottling house; the dumping, bottling, rebottling, labeling, relabeling, stamping, and restamping of bottled spirits; the removal of spirits from the taxpaid bottling house for exportation and shipment; and records and reports of spirits bottled at the taxpaid bottling house.

(6) *Rectification of distilled spirits and wines.* Part 235 of this chapter contains the regulations relative to the rectification of spirits and wines. The regulations cover the location, construction and equipment of the rectifying plant; action by the assistant regional commissioner (alcohol and tobacco tax) in connection with the establishment and operation of the rectifying plant; the operation and supervision of the rectfying plant; the receipt, dumping, rectification, bottling, rebottling, packaging, stamping, restamping, labeling, and relabeling of spirits; the removal of spirits from the rectifying plant; special taxes; and records and reports of operations at rectifying plants.

(7) *Gauging of alcohol and distilled spirits.* Part 188 of this chapter, contains the regulations for measuring alcohol at industrial alcohol plants, bonded warehouses and denaturing plants and distilled spirits at registered distilleries, fruit distilleries, internal revenue bonded warehouses, rectifying plants and taxpaid distilled spirits bottling houses.

(8) *Manufacture and use of containers for distilled spirits.* Part 175 of this chapter, contains the regulations relative to the traffic in containers of distilled spirits. The regulations cover the manufacture and sale of bottles for packaging distilled spirits; use of bottles for packaging distilled spirits; reports and inventories of liquor bottles; imports and exports of liquor bottles; labeling of distilled spirits; permits and revocation proceedings; and the purchase, sale and possession of used containers.

(9) *Labeling and advertising of distilled spirits.* Regulations No. 5 (27 CFR Part 5), issued under the Federal Alcohol Administration Act, as amended, contain the requirements relative to the labeling and advertising of distilled spirits, including standards of identity for distilled spirits, standards of fill for bottled distilled spirits, and the issuance of certificates of label approval and certificates of exemption from label approval.

(10) *Denaturation of rum.* Part 216 of this chapter contains the regulations relative to the denaturation of rum and its withdrawal from the distillery denaturing bonded warehouse. The regulations cover the location, construction and equipment of the distillery denaturing bonded warehouse; action by the assistant regional commissioner (alcohol and tobacco tax) in connection with the establishment and operation of the warehouse; the control, custody, and supervision of the warehouse; transfer of rum to the warehouse; the denaturation of rum; the disposition of denatured rum; and the use, exportation, shipment, losses, records and reports, of rum and denatured rum.

(11) *Production and removal of beer.* Part 245 of this chapter contains the regulations relative to the production, taxpayment, and withdrawal from breweries of beer and cereal beverages. The regulations cover the location and use of breweries, brewery construction, equipment and meters; action by the assistant regional commissioner (alcohol and tobacco tax) in connection with the establishment and operation of the brewery; special taxes; tax on beer; marks, and brands; exportation, free of tax, of beer; use of beer as supplies on vessels and aircraft; and the maintenance of records and filing of reports in connection with the foregoing operations and conditions.

(12) *Labeling and advertising of malt beverages.* Regulations No. 7 (27 CFR Part 7), issued under the Federal Alcohol Administration Act, as amended, contain the requirements relative to the labeling and advertising of malt beverages, including the withdrawal of imported malt beverages from customs custody and the issuance of certificates of label approval and release for imported malt beverages, and certificates of approval of labels for malt beverages domestically bottled or packed.

(13) *Production and removal of wine.* Part 240 of this chapter contains the regulations relative to the establishment and operation of bonded wine cellars, including bonded wineries, for the production, cellar treatment, and storage of wines, including amelioration, sweetening, addition of wine spirits, blending, and other cellar treatment; the taxpayment, exportation, and use of wine for distilling material and manufacture of vinegar.

(14) *Bottling of taxpaid wine.* Part 231 of this chapter contains the regulations relative to the bottling of taxpaid wine at premises other than rectifying plants and taxpaid distilled spirits bottling houses. The regulations cover the establishment and operation of taxpaid wine bottling houses for the bottling and packaging of taxpaid United States and foreign wines, including the bottling or packaging of wine under trade names.

(15) *Labeling and advertising of wine.* Regulations No. 4 (27 CFR Part 4), issued under the Federal Alcohol Administration Act, as amended, contain the requirements relative to the labeling and advertising of wine under the Federal Alcohol Administration Act, including standards of identity for wine, standards of fill for containers of wine, and the issuance of certificates of label approval and certificates of exemption from label approval.

(16) *Bulk sales and bottling of distilled spirits.* Regulations No. 3 (27 CFR Part 3), issued under the Federal Alcohol Administration Act, as amended, contain the requirements relative to bulk sales and bottling of distilled spirits under the Federal Alcohol Administration Act, including the terms of warehouse receipts for distilled spirits in bulk.

(17) *Wholesale and retail dealers in liquors.* Part 194, of this chapter, contains the regulations relative to the payment of occupaitonal taxes by liquor dealers, maintenance of records, destruction of marks on containers, and packaging of alcohol for industrial purposes.

(18) *Removals of alcoholic liquors, tobacco products and other articles of domestic manufacture to foreign-trade zones.* Part 253 of this chapter contains the regulations governing the removal to, and deposit in, foreign-trade zones, of liquor, flavoring extracts, medicinal or toilet preparations made with taxpaid alcohol, stills, and condensers, and tobacco and tobacco products, under the fourth proviso of section 3 of the Foreign-Trade Zones Act (48 Stat. 999; 19 U. S. C. 81c), as amended. The regulations also cover requirements governing the filing of applications, and the issuance of permits, for the removal of such articles to foreign-trade zones; the filing of bonds and consents of surety covering such removals; and the accounting for the deposit of articles in foreign-trade zones.

(19) *Importation of liquors.* Part 251 of this chapter contains the regulations relative to the importation of distilled spirits, wine, and beer into the United States, and includes requirements relative to special (occupational) and commodity taxes, permits, marking, branding, labeling, and stamping of containers and packages, and records and reports.

(20) *Liquors and articles from Puerto Rico and Virgin Islands.* Part 250 of this chapter, contains the regulations relative to the collection of internal revenue taxes on alcoholic products coming into the United States from Puerto Rico and the Virgin Islands, including procedure in those countries in connection with shipment of the products to the continental United States, the submission of formulas, and the stamping and marking of containers.

(21) *Drawback of tax on distilled spirits, wine and beer.* Part 252 of this chapter, contains the regulations relative to the allowance of drawback of internal revenue tax on (i) domestic alcohol used in the manufacture or production of flavoring extracts, and medicinal or toilet preparations (including perfumery), upon the exportation of such products, (ii) distilled spirits and wine bottled or packaged especially for export, upon the exportation thereof, (iii) distilled spirits exported in distillers' original packages containing not less than 20 wine gallons each, and (iv) beer brewed or produced in the United States, and exported .

(22) *Drawback of tax on distilled spirits used in the manufacture of nonbeverage products.* Part 197 of this chapter, contains the regulations relative to the allowance of drawback of internal revenue tax on taxpaid domestic distilled spirits used in the manufacture or production of medicine, medicinal preparations, food products, flavors, or flavoring extracts which are unfit for beverage purposes, including payment of occupational tax, maintenance of records, and filing of claims for drawback.

(23) *Nonindustrial use of distilled spirits and wine.* Regulations No. 2 (27 CFR Part 2), issued under the Federal Alcohol Administration Act, as amended, contain the requirements relative to the nonindustrial use of distilled spirits and wine under the Federal Alcohol Administration Act, including distilled spirits in containers of a capacity of one gallon or less.

(24) *Disposition of substances used in the manufacture of distilled spirits, and articles.* Part 173 of this chapter contains the regulations relative to the returns and records of the dispositions of substances or articles of the character used in the manufacture or recovery of distilled spirits.

(25) *Production of vinegar by the vaporizing process.* Part 195 of this chapter contains the regulations relative to the production of vinegar by the vaporizing process (fermentation and distillation of alcoholic liquid), including

the location, use, construction, equipment, process used, and records of vinegar plants using such process.

(26) *Production of volatile fruit-flavor concentrates.* Part 198 of this chapter contains the regulations relative to the manufacture of volatile fruit-flavor concentrates; the storage, removal, sale, transportation, and use of such concentrates and the mash and juice from which produced; the alcoholic content thereof; and the addition of substances that will render the concentrates unfit for use as beverages. The regulations cover the location, use and qualification of concentrate plants; their construction and equipment; action by the assistant regional commissioner (alcohol and tobacco tax) in connection with the establishment and operation of concentrate plants; and the recording and reporting of the receipt, use, removal and disposal of concentrates and the mash and juice from which produced.

(27) *Stills and distilling apparatus.* Part 196 of this chapter contains the regulations relative to the manufacture, taxpayment, removal, use, and registration of stills and worms or condensers, and the exportation of stills with benefit of drawback of internal revenue tax and the exportation free of tax of distilling apparatus not intended for use in distilling spirits.

(28) *Basic permit requirements under the Federal Alcohol Administration Act.* Regulations No. 1 (27 CFR Part 1), contain the requirements relative to the procurement of basic permits by importers, producers, rectifiers, blenders, bottlers, warehousemen, and wholesalers of distilled spirits, wine, or malt beverages.

(29) *Rules of practice in permit proceedings.* Part 200 of this chapter contains the regulations for the issuance of citations covering the contemplated disapproval of initial or renewal applications and for orders to show cause why basic permits should not be suspended, revoked or annulled. The procedures set forth therein apply to all permit proceedings under the Federal Alcohol Administration Act (27 U. S. C. 201) and chapters 51 and 52 of the Internal Revenue Code of 1954. Such rules also govern, insofar as applicable, any adversary proceeding involving adjudication required by statute to be determined on the record, after opportunity for hearing, under laws administered by the Alcohol and Tobacco Tax Division.

(30) *Inducements furnished to retailers.* Regulations No. 6 (27 CFR Part 6), issued under the Federal Alcohol Administration Act, as amended, contain the requirements relative to the furnishing of equipment, fixtures, signs, supplies, money, services, or other things of value to retailers of distilled spirits, wine, and malt beverages, by other members of the liquor industry (principally vendors), including the furnishing of samples and advertising cuts.

(31) *Credit period to be extended to retailers of alcoholic beverages.* Regulations No. 8 (27 CFR Part 8), contain the requirements relative to the credit period which may be extended to retailers of alcoholic beverages under the Federal Alcohol Administration Act.

(32) *National emergency transfers of distilled spirits.* Treasury Decision 5864, which added Subpart G to 26 CFR (1939) Part 171, Miscellaneous Regulations Relating to Liquor, contains requirements, in addition to the applicable provisions of Regulations 3, 4, 5, and 10 (26 CFR (1939) Parts 182, 183, 184, 185), concerning national emergency transfers of distilled spirits, including removals, free of tax, for use of the United States, pursuant to section 3183 of the 1939 Internal Revenue Code, as made applicable to section 5217 of the 1954 Code by Treasury Decision 6091.

(33) *Remission or mitigation of forfeitures.* Treasury Decision 5535, which added Subpart E to 26 CFR (1939) Part 171, Miscellaneous Regulations Relating to Liquor, contains the regulations concerning remission or mitigation of forfeitures under section 3726 of the 1939 Internal Revenue Code, as made applicable to section 7327 of the 1954 Code by Treasury Decision 6091.

§ 601.302 *Taxes*—(a) *Collection.* Taxes on distilled spirits are paid principally by stamps purchased from the district director of internal revenue. In the case of distilled spirits taxpaid in bulk gauging tanks for removal in tank cars, tank trucks or by pipeline, there is the optional method of paying by purchase of a certificate of payment (Form 1595) or by use of distilled spirits excise tax stamps (series of 1950), issued in various denominations. Form 1595 is attached to the tank and later, in the case of removal by pipeline, canceled and surrendered to the appropriate internal revenue officer. In the case of removals in tank cars and tank trucks it is canceled and attached to the route board of such container for removal and scalping at the consignee premises. The distilled spirits excise tax stamps are canceled and surrendered in the exact amount to the appropriate internal revenue officer. In the case of removals in tank cars and tank trucks, a wholesale liquor dealer stamp is issued by the appropriate internal revenue officer for attachment to the route board of such container for removal and scalping at the consignee premises. Distilled spirits excise tax stamps are also used to taxpay distilled spirits bottled in bond and the cases are marked appropriately to indicate taxpayment. Taxes on wine are paid by return (Form 2050), filed with remittance with the district director of internal revenue. Taxes on beer are paid by return (Form 2034), filed with remittance with the district director of internal revenue. Special tax stamps are issued to denote the payment of occupational taxes by liquor dealers and others. Such stamps are required to be posted in the taxpayer's place of business as evidence of taxpayment. Detailed information respecting the payment of taxes on liquors and the payment of occupational taxes by still manufacturers, brewers, rectifiers, dealers in liquors, and manufacturers of nonbeverage products, including the forms to be used and the procedure to be followed, is contained in the respective regulations described in § 601.301.

(b) *Assessment.* If additional or delinquent tax liability is disclosed by an investigation, or by an examination of records, of a qualified plant or permittee, a notice (except where delay may jeopardize collection of the tax, or where the amount involved is nominal or the result of an evident mathematical error) is sent to the taxpayer advising him of the basis and amount of the liability and affording him an opportunity to submit a protest, with supporting facts, or to request a conference.

§ 601.303 *Claims*—(a) *Claims for remission.* When untaxpaid distilled spirits or wine have been lost or destroyed the assistant regional commissioner (alcohol and tobacco tax) may require the person responsible for the tax to file a claim for remission if such person desires to be relieved of the liability. Upon receipt of the claim, the assistant regional commissioner (alcohol and tobacco tax) makes a factual determination and notifies the claimant of the allowance or rejection of the claim. If the claim for remission of tax on distilled spirits is rejected, and the circumstances warrant, the assistant regional commissioner (alcohol and tobacco tax) may require that the spirits be immediately taxpaid upon the original quantity entered into the warehouse.

(b) *Claims for abatement.* When the tax on distilled spirits, wine or beer, or the rectification tax is assessed and the taxpayer thinks that the tax is not due under the law, he may file a claim for abatement of the tax on Form 843 with the district director of internal revenue. Forms 843 may be procured from a district director. The district director forwards the claim to the assistant regional commissioner (alcohol and tobacco tax) for consideration, and the district director may call upon the taxpayer to file a bond in double the amount of the tax in order to insure collection of the tax if the claim is rejected. When the claim is acted upon, both the taxpayer and the district director are notified of the allowance or rejection of the claim. If the claim is rejected, the district director will proceed to collect the tax.

(c) *Claims for refund.* The taxpayer may, after payment of the tax, file a claim for refund on Form 843 with the district director of internal revenue to whom the tax was paid. Such claim must be filed within three years (two years under certain circumstances) after the date of payment of the tax. The district director forwards the claim to the assistant regional commissioner (alcohol and tobacco tax) for consideration. If the claim is rejected, the taxpayer is notified of the rejection by registered mail, and he may then bring suit in the United States District Court or the Court of Claims for recovery of the tax. Such suits must be filed generally within two years from the date of mailing of the rejection notice. If the claim is allowed, an appropriate notice of allowance with a check for the amount of the refund and allowable interest is forwarded to the taxpayer, unless there are other unpaid taxes outstanding against the taxpayer, in which event delivery of the refund check to the taxpayer is held in abeyance pending payment of the unpaid taxes.

§ 601.304 *Preparation and filing of claims*—(a) *Alcohol.* Claims for remission of tax on alcohol lost at industrial alcohol plants, bonded warehouses, and denaturing plants, and for losses of tax-free and specially denatured alcohol at denaturing plants and at dealers' and users' premises, must be prepared and filed in accordance with Part 182 of this chapter. The regulations in Part 182 of this chapter contain full information in respect to the procedure in the verification and examination of such claims.

(b) *Distilled spirits at distilleries.* Claims for remission of tax on distilled spirits lost at distilleries must be prepared and filed in accordance with Parts 220 and 221 of this chapter, which contain complete information respecting the procedure followed in verifying and examining such claims.

(c) *Distilled spirits at bonded warehouses.* Claims for losses of spirits at bonded warehouses and for losses of spirits withdrawn free of tax for exportation, etc., must be prepared and filed in accordance with Part 225 of this chapter. The regulations in Part 225 of this chapter contain full information relative to the investigation and consideration of such claims.

(d) *Rum.* Claims for losses of rum and specially denatured rum at distillery denaturing bonded warehouses and in transit after removal from the warehouse must be prepared and filed in accordance with Part 216 of this chapter, which set out the procedure followed in the handling and consideration of such claims.

(e) *Low wines at vinegar plants.* Claims for remission of tax on low wines (distilled spirits) lost at vinegar plants producing vinegar by the vaporizing process must be prepared and filed in accordance with Part 195 of this chapter, which regulations set forth the procedure followed in the handling of such claims.

(f) *Special taxes.* Claims for abatement or refund of occupational taxes and penalties erroneously assessed or collected, and claims for redemption of special tax stamps for occupational taxes, must be prepared and filed in accordance with Part 194 of this chapter. When claim for redemption of a special tax stamp is filed, the stamp (or a Certificate in Lieu of Lost or Destroyed Special Tax Stamp, accompanied by affidavits attesting to destruction of the stamp) must be surrendered with the claim and the claim must be submitted within three years from the date of payment of the tax.

(g) *Stills and distilling apparatus.* Claims for drawback of tax paid on stills or distilling apparatus manufactured for export and actually exported must be prepared and filed in accordance with Part 196 of this chapter, which regulations set forth the procedure to be followed and the forms to be used.

(h) *Drawback of tax on distilled spirits and wines.* Claims for drawback of taxes paid on (1) domestic alcohol used in the manufacture of flavoring extracts, medicinal or toilet preparations, which are exported, (2) distilled spirits and wines bottled or packaged especially for export and actually exported, (3) distilled spirits exported in distillers' original packages, and (4) beer exported, must be prepared and filed in accordance with Part 252 of this chapter. The regulations in Part 252 of this chapter contain full information in respect to the procedure to be followed, the forms to be used, the time within which the claims must be filed, and the supporting documents which must be submitted with the claim.

(i) *Drawback of tax on distilled spirits used in non-beverage products.* Claims for drawback of tax on domestic distilled spirits used in the manufacture or production of medicine, medicinal preparations, food products, flavors, or flavoring extracts, which are unfit for beverage purposes, must be prepared and filed in accordance with Part 197 of this chapter. Such claims must be filed within the three months next succeeding the quarter in which the spirits are used. Part 197 of this chapter contains full information respecting the preparation of such claims, the supporting documents to be filed therewith, and the verification of, and action on, the claims by the assistant regional commissioner (alcohol and tobacco tax).

§ 601.305 *Offers in compromise*—(a) *Liability under Internal Revenue Code.* Persons desiring to submit offers in compromise in order to avoid forfeiture or prosecution proceedings, and taxpayers who disclaim liability for the amount of taxes assessed, or claim inability to pay the taxes in full, may submit offers in compromise to the district director of internal revenue, or to an internal revenue officer. (For offers in compromise generally, see § 601.203.) Form 656 is used in all cases where the amount of the offer is tendered in full at the time the offer is filed. Form 656–C is used when the offer is payable in installments. Such offers are forwarded by the district director to the assistant regional commissioner (alcohol and tobacco tax) for consideration and transmittal to the Commissioner for appropriate action. When the offer is acted upon, the district director and the assistant regional commissioner (alcohol and tobacco tax) are notified of the acceptance or rejection of the offer, and the assistant regional commissioner (alcohol and tobacco tax) in turn notifies the proponent. If the offer is rejected, the sum submitted with the offer is returned to the proponent and forfeiture, prosecution, or collection proceedings are resumed. If the offer is accepted, the taxpayer is notified and the case is closed. Acceptance of an offer in compromise of civil liabilities does not remit criminal liabilities, nor does acceptance of an offer in compromise of criminal liabilities remit civil liabilities.

(b) *Violations of Federal Alcohol Administration Act.* The Federal Alcohol Administration Act provides penalties for violations of its provisions. The Director of the Alcohol and Tobacco Tax Division in the National Office is authorized to compromise such liabilities. Persons desiring to submit offers in compromise of such liabilities, in order to avoid prosecution proceedings, may submit offers in compromise on Form 656–D to the assistant regional commissioner (alcohol and tobacco tax) or one of his inspectors. Such offers are considered by such assistant regional commissioner and are forwarded to the Director of the Alcohol and Tobacco Tax Division for final action. When the offer is acted upon, the proponent and the assistant regional commissioner (alcohol and tobacco tax) are notified of the acceptance or rejection of the offer. If the offer is rejected, the sum submitted with the offer in compromise is returned to the proponent. If the offer is accepted, the proponent is notified and the case is closed.

§ 601.306 *Application for approval of interlocking directors and officers under section 8 of the Federal Alcohol Administration Act.* Any person who is an officer or director of a corporation now engaged in business as a distiller, rectifier or blender of distilled spirits, or of an affiliate thereof, who desires to take office in other companies similarly engaged, must obtain permission to do so from the Director of the Alcohol and Tobacco Tax Division. Applications for such permission to take office shall be prepared and filed in accordance with AT-Circular, A. T. No. 956, issued January 15, 1948, copies of which have been furnished to distillers, rectifiers, and blenders of distilled spirits, and additional copies of which may be procured from the assistant regional commissioner (alcohol and tobacco tax) or from the Director of the Alcohol and Tobacco Tax Division, Internal Revenue Service, Washington 25, D. C.

§ 601.307 *Rulings.* Any person who is in doubt as to any matter arising in connection with his operations or transactions with respect to liquors may request a ruling thereon by addressing a letter to the Director, Alcohol and Tobacco Tax Division, Internal Revenue Service, Washington 25, D. C., or to the assistant regional commissioner (alcohol and tobacco tax) of the region in which his business is located.

§ 601.308 *Conferences.* Any person desiring a conference in the office of the assistant regional commissioner (alcohol and tobacco tax) of his region or of the Director, Alcohol and Tobacco Tax Division, in Washington, relative to any matter arising in connection with his operations, will be accorded such a conference upon request. No formal requirements are prescribed for such conference.

§ 601.309 *Attorneys and agents.* Attorneys and agents representing taxpayers before the Service, in the office of the Director, Alcohol and Tobacco Tax Division, or in the office of the assistant regional commissioner (alcohol and tobacco tax), must be enrolled to practice before the Treasury Department and be authorized by power of attorney, filed with the Service, to represent the taxpayer in the matter under discussion. (See Subpart E of this part.)

§ 601.310 *Forms.* For forms to be used, see § 601.301 (c).

TOBACCO PRODUCTS, TOBACCO MATERIALS, AND CIGARETTE PAPERS AND TUBES

§ 601.311 *Imposition of taxes; regulations*—(a) *Taxes.* Subchapter A of chapter 52 of the Internal Revenue Code imposes certain taxes on cigars, cigarettes, tobacco, and cigarette papers and tubes manufactured in or imported into the United States.

(b) *Regulations.* Rules bearing upon the functions of the Service, the forms used, etc., in connection with these taxes are contained in the following regulations:

(1) Part 270 of this chapter, relating to the taxes on cigars and cigarettes, and the operations of manufacturers and importers of and dealers in such products.

(2) Part 275 of this chapter, relating to the taxes on manufactured tobacco and the operations of manufacturers and importers of and dealers in such products.

(3) Part 280 of this chapter, relating to the operations of dealers in tobacco materials and the purchase and sale of tobacco materials.

(4) Part 285 of this chapter, relating to the taxes on cigarette papers and tubes and the operations of manufacturers and importers of and dealers in such articles.

(5) Part 290 of this chapter, relating to exportation of tobacco materials, tobacco products, and cigarette papers and tubes, without payment of tax, or with benefit of drawback of tax.

(6) Part 295 of this chapter, relating to removal of tobacco products and cigarette papers and tubes, without payment of tax, for use of the United States.

§ 601.312 *Special qualification and bonding requirements*—(a) *Manufacturers and dealers.* Before commencing business, every dealer in tobacco materials, manufacturer of tobacco, cigars, or cigarettes, and cigarette papers and tubes must make application to the appropriate assistant regional commissioner (alcohol and tobacco tax) for a permit to carry on such business. The application shall show his name or style, and place where the business is to be carried on. The application for permit form is Form 2093, copies of which may be obtained from any assistant regional commissioner (alcohol and tobacco tax). Every person required to file application for permit must support such application by a bond, in duplicate, on the prescribed form and in such amount, as well as other documents, required by the applicable regulations referred to in § 601.311 (b). When the application for permit, supporting bond and other required documents are received and approved by the assistant regional commissioner (alcohol and tobacco tax), he will issue to the person named in the application an appropriate permit. This permit must be posted in accordance with the requirements of the regulations in this chapter.

(b) *Warehouse proprietors.* Every proprietor of an internal revenue tobacco warehouse, as defined in Part 290 is also required to file application to establish such a warehouse and furnish a bond to the proper assistant regional commissioner (alcohol and tobacco tax) to cover the operation of the warehouse to protect the Government with respect to any liability incurred in connection with the operation of the warehouse. A proprietor of a customs bonded manufacturing warehouse, Class 6, desiring to remove cigars from his warehouse, without payment of tax, for export to a foreign country or a possession of the United States, shall, prior to making the first removal, file with the assistant regional commissioner (alcohol and tobacco tax) a bond on the prescribed form.

(c) *Drawback of tax.* Tobacco products on which the tax has been paid may be exported with benefit of drawback of such tax.

§ 601.313 *Collection of taxes*—(a) *Cigars, cigarettes, and manufactured tobacco.* The taxes on cigars, cigarettes, and manufactured tobacco are paid by stamps affixed to the box or package, and are due upon removal of domestic products from the factory and release of imported products from customs custody. Information reports are required to be filed monthly with the assistant regional commissioner (alcohol and tobacco tax) of the region in which the manufacturer is located, on or before the 20th day of the month following the month in which domestic products are removed from the factory. Such reports show the quantities of tobacco materials, tobacco products, and internal revenue tobacco products tax stamps handled. In addition to the monthly information reports, each manufacturer is required to prepare on the prescribed form and submit to the assistant regional commissioner (alcohol and tobacco tax) a true inventory of any tobacco materials, tobacco products and tax stamps on hand, at commencement of business and at the time of discontinuing business.

(b) *Cigarette papers and tubes.* The taxes on cigarette papers and tubes, unlike the taxes on tobacco and tobacco products, are payable by the manufacturer or importer by return. In the case of a domestic manufacturer the return, accompanied by remittance of tax, must be filed with the proper district director on or before the 10th day of the month following that in which the liability to tax occurs. With respect to cigarette papers and tubes subject to tax, which are imported into the United States, importers are required to file a return covering each importation, accompanied by remittance of the amount of the tax.

§ 601.314 *Rulings.* The procedure to be followed in securing a ruling on any question arising in connection with the tobacco taxes is the same as set forth in § 601.307.

§ 601.315 *Proposed assessments of additional or delinquent taxes.* When additional or delinquent tax liability with respect to tobacco, tobacco products, cigarette papers and tubes, is discovered a notice to show cause against the proposed assessment of such tax shall be forwarded to the taxpayer. (See section 5703 (d) of the Internal Revenue Code.)

§ 601.316 *Administrative remedies available to taxpayers after the purchase of tobacco tax stamps or after assessment or payment of tobacco taxes*—(a) *Redemption of stamps.* Tobacco products tax stamps which have been spoiled, destroyed, or rendered useless or unfit for the purpose intended, or for which the owner may have no use, or which through mistake may have been improperly or unnecessarily used, or have been used in excess of the amount of tax actually due, or affixed to tobacco products withdrawn from the market, or affixed to tobacco products which are lost (otherwise than by theft) or destroyed by fire, casualty, or act of God while in the possession or ownership of the manufacturer or importer, may be redeemed if proper claim is filed with the assistant regional commissioner (alcohol and tobacco tax). Such claims must be prepared on Form 843 in accordance with the instructions shown on the form and in accordance with the provisions of the regulations referred to in § 601.311 (b). Copies of Form 843 are obtainable from offices of assistant regional commissioners (alcohol and tobacco tax).

(b) *Drawback claims.* Section 5706 of the Internal Revenue Code authorizes allowance of drawback of internal revenue taxes paid on tobacco products, and cigarette papers and tubes which are shipped from the United States for consumption or use beyond the jurisdiction of the internal revenue laws of this country. Form 2147 is required to be used for this purpose. Copies are obtainable from offices of assistant regional commissioners (alcohol and tobacco tax). As a condition precedent to the allowance of any such drawback claim, the claimant is required to file a bond on Form 2148 in a penal sum equal to the amount for which the claim is made, conditioned that he will furnish satisfactory evidence that the articles covered by his claim have been landed at a port outside the jurisdiction of the United States, or that the articles were lost (otherwise than by theft) or destroyed by fire, casualty, or act of God, and have not been relanded within the limits of the United States.

(c) *Claims for abatement or refund.* Where a tobacco tax has been paid other than by stamp, the taxpayer may file a claim for refund for any part of the payment. Similarly, any person against whom an assessment has been made but which has not been paid, may file a claim for abatement. In either case, the procedure to be followed by the claimant is the same as that set forth in the case of claims for abatement or refund of taxes as described in § 601.303 (b) and (c). All claims for refund of tobacco taxes paid pursuant to an assessment must be filed within three years after payment of the tax..

(d) *Claims for remission of tax.* Where tobacco products on which the tax has not been paid, are lost (otherwise than by theft) or destroyed by fire, casualty, or act of God, while in the possession or ownership of the manufacturer, a claim for remission of such tax may be filed. Such claim shall be in letter form, in duplicate, accompanied by evidence necessary to support the claim.

(e) *General.* Detailed instructions as to the requirements necessary to be complied with in connection with the filing of claims for redemption, drawback, refund, and remission are fully set forth in the regulations referred to in § 601.311 (b).

§ 601.317 *Offers in compromise.* The procedure in the case of offers in compromise of liability under the Internal Revenue Code relating to tobacco, cigars, cigarettes, and cigarette papers and tubes, is the same as that set forth in § 601.305 (a).

§ 601.318 *Forms.* Detailed information as to all forms prescribed for use in connection with the taxes referred to in § 601.311 (a) is contained in the regulations referred to in § 601.311 (b). Copies of these regulations, together with copies of all necessary forms and instructions as to their preparation and filing, may be obtained from assistant regional commissioners (alcohol and tobacco tax).

FIREARMS

§ 601.319 *Applicable laws.* Chapter 53 of the Internal Revenue Code of 1954 (26 U. S. C. 5801–5862), the provisions of which are chiefly derived from the National Firearms Act, as amended (act of June 26, 1934, 48 Stat. 1236), imposes a tax on the manufacture, and transfer in the United States, of machine guns and certain types of short-barreled firearms, and an occupational tax upon every importer and manufacturer of, and dealer and pawnbroker in, such machine guns and firearms. Section 1 (b) (2) of the act of August 9, 1939 (53 Stat. 1291; 49 U. S. C. 781–788) makes provision for the seizure of vessels, vehicles and aircraft on which are transported, carried, or possessed, any firearm with respect to which there has been committed any violation of the National Firearms Act or any regulations issued pursuant thereto. The Federal Firearms Act (53 Stat. 1250; 15 U. S. C. 901–909) makes it unlawful for any manufacturer or dealer (except a manufacturer or dealer having a license issued under the provisions of the act), or any person who is under indictment or who has been convicted of a crime of violence or who is a fugitive from justice, to transport, ship, or receive any firearms or ammunition in interstate or foreign commerce.

§ 601.320 *Taxes relating to machine guns and certain other firearms.* Part 179 of this chapter contains the regulations relative to the (a) payment of special taxes by manufacturers and importers of, and dealers (including pawnbrokers) in, certain types of firearms, including machine guns and silencers or mufflers, (b) payment of the tax on the making or transfer of such firearms, (c) registration, identification, importation and exportation of such firearms, (d) keeping of books and records and rendering of returns, and (e) the forfeiture and disposition of seized firearms under the provisions of the National Firearms Act.

§ 601.321 *Licensing under the Federal Firearms Act of manufactures of, and dealers in, firearms or ammunition.* Part 315 (26 CFR (1939)) contains the regulations relative to the licensing of manufacturers of, and dealers in, firearms and ammunition, the records required to be kept by the licensees, and the forfeiture and disposition of seized firearms or ammunition, under the provisions of the Federal Firearms Act.

§ 601.322 *Seizures of vessels, vehicles, and aircraft in connection with contraband firearms.* Part 468 (26 CFR (1939)) covered by section 1 (b) (2), act of August 9, 1939, and Treasury Decision 5067, approved August 29, 1941, as amended by Treasury Decision 5791, approved May 22, 1950, contain the procedural and substantive requirements relative to the seizure of vessels, vehicles, and aircraft in connection with contraband firearms, the custody and disposition including forfeitures of such conveyances or firearms, the filing of claims therefor and petitions for remission or mitigation of forfeiture, and awards for seizures or furnishing information leading to forfeiture by persons not officers of the United States.

[SEAL] T. COLEMAN ANDREWS,
Commissioner of Internal Revenue.

TITLE 29—LABOR

Chapter V—Wage and Hour Division, Department of Labor

PART 527—EMPLOYMENT OF STUDENT WORKERS

Pursuant to authority under Section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended, 29 U. S. C. 214), Reorganization Plan No. 6 of 1950 (5 U. S. C. 611), and General Order No. 45A (15 F. R. 3290), the Administrator of the Wage and Hour Division, United States Department of Labor, hereby issues Regulations, Part 527, entitled Employment of Student Workers, to read as follows:

Sec.
527.1 Applicability of the regulations contained in this part.
527.2 Definitions.
527.3 Application for a student-worker certificate.
527.4 Procedure for action upon an application.
527.5 Conditions governing issuance for a student-worker certificate.
527.6 Terms and conditions of employment under student-worker certificates.
527.7 Employment records to be kept.
527.8 Amendment or replacement of a student-worker certificate.
527.9 Amendment to the regulations in this part.

AUTHORITY: §§ 527.1 to 527.10 issued under sec. 14, 52 Stat. 1068, as amended; 29 U. S. C. 214.

§ 527.1 *Applicability of the regulations contained in this part.* The regulations contained in this part are issued under section 14 of the Fair Labor Standards Act of 1938, as amended, to provide for the employment under special certificates of student-workers at wages lower than the minimum wage applicable under section 6 of the act. Such certificates shall be subject to the terms and conditions hereinafter set forth.

§ 527.2 *Definitions.* As used in the regulations contained in this part: A "student-worker" is a student who is receiving instruction in an educational institution and who is employed on a part-time basis in shops owned by the educational institution, for the purpose of enabling the student to defray part of his school expenses.

§ 527.3 *Application for a student-worker certificate.* (a) Whenever the employment of student-workers as learners at wages lower than the minimum wage applicable under section 6 of the Fair Labor Standards Act of 1938, as amended, is believed necessary to prevent curtailment of opportunities for employment in a specified educational institution, an application for a special certificate authorizing the employment of such student-workers as learners at subminimum wage rates may be filed by an appropriate official of the educational institution with the Administrator of the Wage and Hour and Public Contracts Divisions, United States Department of Labor, Washington 25, D. C. A copy of such application shall be filed simultaneously with the appropriate Regional Office of these Divisions.

(b) Application must be made on the official form furnished by these Divisions and must contain all information required by such form, including among other things, the industries and occupations within each industry in which the student-workers are to be employed as learners, the number of student-workers requested, their proposed hourly rates and learning periods in number of hours, the number of full-time experienced workers in such ocupations and their straight-time average hourly earnings during the past year, and a description of the products being manufactured in the school-operated industry. Any applicant may also submit such additional information as may be pertinent.

(c) Any application which fails to present the information required by the forms may be returned to the applicant with a notation of deficiencies and without prejudice against submission of a new or revised application.

§ 527.4 *Procedure for action upon an application.* (a) Upon receipt of an application for the employment of student-workers as learners, the Administrator or his authorized representative shall issue a special certificate or deny the application or, in appropriate circumstances, provide an opportunity to interested parties to present their views on the application prior to granting or denying a student-worker certificate.

(b) If a student-worker certificate is issued, it shall be mailed to the educational institution. If a student-worker certificate is denied, notice of such denial shall be sent to the educational institution and such denial shall be without prejudice to the filing of any subsequent application.

(c) If a student-worker certificate is issued, there shall be published in the FEDERAL REGISTER a statement of the terms of such certificate.

§ 527.5 *Conditions governing issuance of a student-worker certificate.* The following conditions shall govern the issuance of a special certificate authorizing the employment of student-workers as learners at subminimum wage rates:

(a) The employment of the student-workers at subminimum wages authorized by the special certificate must be necessary to prevent curtailment of opportunities for employment in a specified educational institution;

(b) The student-workers must be at least 16 years of age or at least 18 years of age if employed in any occupation declared to be particularly hazardous by order of the Secretary of labor pursuant to the Fair Labor Standards Act of 1938, as amended;

(c) The occupation for which the student-workers are receiving training must require a sufficient degree of skill to necessitate an appreciable learning period;

(d) The issuance of a student-worker certificate will not tend to create unfair competitive labor cost advantages nor have the effect of impairing or depressing wage or working standards established for experienced workers for work of a like or comparable character in the industry;

(e) There have been no serious outstanding violations of the provisions of a student-worker certificate previously issued to the educational institution, nor have there been any serious violations of the act which provide reasonable grounds to conclude that the terms of a student-worker certificate may not be complied with, if issued.

§ 527.6 *Terms and conditions of employment under student-worker certificates.* (a) The student-worker certificate, if issued, shall specify, among other things: (1) The name and address of the educational institution employing the student-workers; (2) the particular industry and the occupations in which the student-workers are to be trained; (3) the number of student-workers authorized to be employed on any one day; (4) the subminimum wage rates permitted during the authorized learning period; (5) the learning period for each authorized learner occupation or group of occupations within each industry; and (6) the effective and expiration dates of the certificate.

(b) The subminimum wage rate shall be not less than 75 percent of the wage rate applicable under section 6 of the Fair Labor Standards Act of 1938, as amended, or the progressive wage schedule shall average not less than 75 percent of such applicable minimum over the authorized learning period.

(c) No student-worker certificate may be issued retroactively.

(d) A student-worker certificate may be issued for a period not to exceed the length of one school year, unless a longer period is found to be justified by extraordinary circumstances.

(e) No provision of a student-worker certificate shall excuse noncompliance with higher standards applicable to student-workers employed as learners which may be established under any other Federal law, or any State law, or municipal ordinance.

§ 527.7 *Employment records to be kept.* In addition to any other records required under the record keeping regulations (Part 516 of this chapter), the educational institution shall keep the following records specifically relating to student-workers employed as learners at subminimum wage rates:

(a) Each student-worker employed as a learner under a student-worker certificate shall be designated as such on the payroll records kept by the school, with each student-worker's occupation and rate of pay being shown.

(b) The records required in this section, including a copy of any special certificate issued, shall be kept and made available for inspection at all times for at least three years from the last effective date of the certificate.

§ 527.8 *Amendment or replacement of a student-worker certificate.* The Administrator upon his own motion may amend the provisions of a student-worker certificate when it is necessary by reason of the amendment of these regulations, or may withdraw a student-worker certificate and issue a replacement certificate when necessary to correct omissions or apparent defects in the original certificate.

§ 527.9 *Amendment to the regulations in this part.* The Administrator may at any time upon his own motion or upon written request of any interested person setting forth reasonable grounds therefor, and after opportunity has been given to interested persons to present their views, amend or revoke any of the terms of the regulations contained in this part.

These regulations shall become effective October 14, 1955.

Signed at Washington, D. C., this 10th day of October 1955.

[SEAL] NEWELL BROWN,
Administrator,
Wage and Hour Division.

TITLE 42—PUBLIC HEALTH

Chapter I—Public Health Service, Department of Health, Education, and Welfare

PART 21—COMMISSIONED OFFICERS

PRESCRIPTION OF NUMBERS IN GRADE

Section 21.111 of Subpart G is amended to read as follows:

§ 21.111 *Prescription of numbers in grade.* The following maximum number of officers is authorized to be on active duty in the Regular Corps in each of the grades from the junior assistant grade to the director grade, inclusive, during the fiscal year beginning July 1, 1955, and ending June 30, 1956:

Director grade	240
Senior grade	450
Full grade	415
Senior assistant grade	335
Assistant grade	60
Junior assistant grade	0

(Sec. 215, 58 Stat. 690; 42 U. S. C. 216. Interprets or applies sec. 206, 58 Stat. 694, as amended; 42 U. S. C. 207)

This amendment shall be effective as of July 1, 1955.

[SEAL] LEONARD A. SCHEELE,
Surgeon General.

Approved October 10, 1955.

HEROLD C. HUNT,
Acting Secretary.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 955]

HANDLING OF GRAPEFRUIT GROWN IN ARIZONA; IMPERIAL COUNTY, CALIFORNIA, AND THAT PART OF RIVERSIDE COUNTY, CALIFORNIA, SITUATED SOUTH AND EAST OF THE SAN GORGONIO PASS

NOTICE OF PROPOSED RULE MAKING WITH RESPECT TO APPROVAL OF EXPENSES AND FIXING OF RATE OF ASSESSMENT FOR 1955-56 FISCAL PERIOD

Consideration is being given to the following proposals submitted by the Administrative Committee, established under Marketing Agreement No. 96, as amended, and Order No. 55, as amended (7 CFR Part 955), regulating the handling of grapefruit grown in the State of Arizona; in Imperial County, California; and in that part of Riverside County, California, situated south and east of the San Gorgonio Pass, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), as the agency to administer the terms and provisions thereof: (1) That the Secretary of Agriculture find that expenses not to exceed $20,250.00 will be necessarily incurred during the fiscal period August 1, 1955, to July 31, 1956, for the maintenance and functioning of the committee established under the aforesaid amended marketing agreement and order, and (2) that the Secretary of Agriculture fix, as the share of such expenses which each handler who first ships grapefruit shall pay during the aforesaid fiscal period in accordance with the aforesaid amended marketing agreement and order, the rate of assessment at $0.015 per standard box of fruit shipped by such handler as the first handler thereof during such fiscal period.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals should file the same with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Room 2077, South Building, Washington 25, D. C., not later than the 10th day after the publication of this notice in the FEDERAL REGISTER. All documents should be filed in quadruplicate.

As used in this section, "handler," "shipped," "fruit," "fiscal period" and "standard box" shall have the same meaning as is given to each term in said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: October 11, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55-8375; Filed, Oct. 13, 1955; 8:51 a. m.]

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

CALIFORNIA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

OCTOBER 7, 1955.

The Department of the Navy has filed an application Serial Number Los Angeles 099557, for the withdrawal of the lands described below from all forms of appropriation including grazing, mining, and mineral leasing.

The applicant desires the land for use by the Fleet Marine Force, Pacific, as an artillery range and an air support training area.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections in writing to the State Supervisor, Bureau of Land Management, Department of the Interior, at Room 801, California Fruit Building, 4th and J Streets, Sacramento 14, California.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

DIRECTOR, COTTON DIVISION

DELEGATION OF AUTHORITY

Pursuant to the authority vested in me by the Administrator of the Agricultural Marketing Service on January 1, 1954 (19 F. R. 35) the Director, Cotton Division, Agricultural Marketing Service, under my supervision and direction, is hereby delegated authority to exercise the powers and functions, except promulgation of new or revised regulations and standards, vested in the Administrator of the Agricultural Marketing Service by the regulations hereinafter set forth.

The regulations are as follows:

1. 7 CFR Part 27—Cotton Classification under Cotton Futures Legislation.
2. 7 CFR Part 28—Cotton Standards.
3. 7 CFR Part 61—Cottonseed Sold or Offered for Sale for Crushing Purposes (Inspection, Sampling, and Certification).

The Director of the Cotton Division is further authorized to redelegate any or all of the aforesaid authority to any officer or employee of the Agricultural Marketing Service under his supervision.

Any action heretofore taken by the Director or his delegates with respect to the foregoing matters is hereby ratified and confirmed, and shall remain in full force and effect unless and until expressly modified, amended, suspended, revoked, or terminated.

The delegation of authority set forth herein shall not preclude the Administrator or the Deputy Administrator, Agricultural Marketing Service, from exercising any of the powers and functions or from performing any of the duties conferred hereby, and the delegation is subject at all times to withdrawal or amendment by the Administrator or Deputy Administrator.

Done at Washington, D. C., this 11th day of October 1955.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator,
Agricultural Marketing Service.

Commodity Credit Corporation

SALES OF CERTAIN COMMODITIES

OCTOBER 1955 DOMESTIC AND EXPORT SALES LISTS

Pursuant to the policy of Commodity Credit Corporation issued October 12, 1954 (19 F. R. 6669), and subject to the conditions stated therein, the following commodities are available for sale in the quantities stated and on the price basis set forth:

OCTOBER 1955 MONTHLY SALES LIST

Commodity and approximate quantity available (subject to prior sale)	Sales price or method of sale
Dairy products	Domestic prices apply "in store" [1] at location of stocks. Export prices apply f. a. s. U. S. port of export, or in store at location of stocks at f. a. s. price less export freight rate to agreed port of export. Available through Cincinnati and Portland CSS Commodity Offices for domestic sale, and through the Livestock and Dairy Division, CSS, USDA, Washington 25, D. C., for export sale.
Nonfat dry milk solids (in carloads only); Spray, 32,000,000 pounds; roller, as available.	Domestic, unrestricted use: Spray process, U. S. Extra Grade: In barrels and drums, 17 cents per pound; in bags, 16.15 cents per pound. Roller process, U. S. Extra Grade: In barrels and drums, 15.25 cents per pound; in bags, 14.40 cents per pound. Domestic, restricted use (animal and poultry feed): 11¼ cents per pound delivered in North Dakota, South Dakota, Nebraska, Kansas, Missouri, Iowa, Minnesota, Wisconsin, Illinois, Indiana, Ohio, and Michigan. 12½ cents per pound delivered in all other States and in the District of Columbia. Sales to be made under Announcement LD-14 and Supplements. Export, unrestricted use: Spray process, U. S. Extra Grade: In barrels and drums, 11.75 cents per pound; in bags, 10.90 cents per pound. Roller process, U. S. Extra Grade: In barrels and drums, 10 cents per pound; in bags, 9.15 cents per pound. Special export: Competitive bid on 4,000,000 pounds, spray process in accordance with Announcement LD-5. Offers to be considered daily until this quantity is sold or program is terminated.
Salted creamery butter (in carloads only), 120,000,000 pounds.	Domestic, unrestricted use: U. S. Grade A and higher: 61.25 cents per pound, New York, New Jersey, Pennsylvania, New England, and other States bordering the Atlantic Ocean and Gulf of Mexico. All other States 60.5 cents per pound. U. S. Grade B: 2 cents per pound, less than Grade A prices. Domestic, restricted use: Competitive bid in accordance with Announcement DA-111 and supplements for use as an extender for cocoa butter in the manufacture of chocolate. Export, unrestricted use: U. S. Grade A: Not less than 41 cents per pound. U. S. Grade B: Not less than 39 cents per pound. Export, restricted use: Competitive bid (1) in accordance with Announcement DA-111 and supplements for use, (a) in recombining with U. S. produced nonfat dry milk solids into liquid milk and evaporated milk, and (b) in making butter oil or ghee, and (2) in accordance with Announcement LD-19 and supplements for industrial uses. Special export: Competitive bid on 8,000,000 pounds butter in accordance with Announcement LD-7. Offers to be considered daily until this quantity is sold or program is terminated.
Cheddar cheese: Cheddars, flats, twins and rindless blocks (standard moisture basis in carloads only), 268,000,000 pounds.	Domestic: U. S. Grade A and higher: 36¼ cents per pound, for New York, New Jersey, Pennsylvania, New England, and other States bordering the Atlantic and Pacific Ocean and Gulf of Mexico. All other States 35¼ cents per pound. U. S. Grade B: 1 cent per pound, less than Grade A prices. Export: U. S. Grade A: 25.5 cents per pound, basis port of export. U. S. Grade B: 24.5 cents per pound, basis port of export. Cheese prices are subject to usual adjustments for moisture content.
Wool, shorn and pulled grease (including small quantities of scoured) 149,000,000 pounds.	Domestic or export: Prices basis ex-warehouse where stored, as determined by the Boston CSS Commodity Office, reflecting not less than 103 percent of the 1954 schedule of loan rates per pound plus an allowance for sales commission, Boston basis, adjusted for net freight on wool stored outside the Boston storage area. No change in pricing policy through Oct. 31, 1955.
Cotton, Upland and Extra Long Staple.	Domestic or export: Competitive bid but not less than the higher of (1) 105 percent of the current support price plus reasonable carrying charges, or (2) the domestic market price as determined by CCC. Detailed terms and conditions will be issued by the New Orleans CSS Commodity Office. A catalog showing quantities, qualities, and locations may be obtained for a nominal fee from that office.[4]
Cotton linters	Domestic or export: Competitive bid in carlot quantities as follows: (a) First Cut Linters and Mill Run Linters catalogued on U. S. Grades, (b) Second Cut and Mill Run Linters and Hull Fiber catalogued on Cellulose Content, and will be sold on basis of 73 percent cellulose, with premiums and discounts of 0.04 cent per pound, fractions in proportion, for each 1 percent of cellulose above or below 73 percent. Detailed terms and conditions are available from the New Orleans CSS Commodity Office. A catalog showing quantities, qualities, and locations may be obtained for a nominal fee from that office.[4]
Cottonseed oil, refined	Domestic: Limited quantities on competitive bid but not less than the market price on date of sale f. o. b. tankcars or tankwagons at points of storage locations. Available New Orleans CSS Commodity Office and Oils and Peanut Division, CSS, USDA, Washington 25, D. C. Export: Competitive bid on limited quantities as announced by the New Orleans CSS Commodity Office, subject to the terms and conditions of NO-CS-12.[3]
Linseed oil	Domestic: Market price on date of sale but not less than equivalent of the 1954 support price for flaxseed. No change in pricing policy through Oct. 31, 1955. Available Cincinnati CSS Commodity Office. Export: Competitive bid as announced by the Cincinnati CSS Commodity Office; subject to the terms and conditions of CT-OP-4 and CT-OP-6.
Tung oil	Domestic or export: Competitive bid as announced by the Cincinnati CSS Commodity Office; subject to the terms and conditions of CT-OP-7 and amendments thereto.
Soybeans, bulk (domestic sales for crushing only). Flaxseed, bulk (as available domestic sales for crushing only).	Domestic or export: Market price on date of sale. Limited quantities available Chicago, Kansas City, and Minneapolis CSS Commodity Offices. Domestic: On LCL lots, market price on date of sale, basis in store. On all other storable lots market price but not less than the 1954 support price. No change in pricing policy through Oct. 31, 1955. Available Chicago and Minneapolis CSS Commodity Offices.

See footnotes at end of table.

OCTOBER 1955 MONTHLY SALES LIST—Continued

Commodity and approximate quantity available (subject to prior sale)	Sales price or method of sale				
Rice, milled, 1,000,000 hundredweight.	Domestic: For U. S. No. 2 (4 percent brokens), the market price but not less than the legal minimum price (the equivalent loan rate for rough rice by varieties plus 5 percent, adjusted for milling margins and converted to cents per hundredweight). Examples of minimum prices of milled rice per hundredweight, as milled:				
		Head U. S. No. 2 (4 percent brokens)	U. S. No. 5 (35 percent brokens)	Second heads U. S. No. 3

Birdsfoot Trefoil seed, 1,000 hundredweight.	Domestic: $65 per 100 pounds. Available Portland CSS Commodity Office. Export: Competitive bid as announced by Portland CSS Commodity Office.
Alfalfa Seed Northern, 47,000 hundredweight.	Domestic: $35 per 100 pounds.[4] Available Minneapolis and Portland CSS Commodity Offices. Export: Competitive bid as announced by Portland CSS Commodity Office.
Alfalfa seed (certified), Ladak, 2,500 hundredweight; Buffalo, 22,000 hundredweight.	Domestic: $40 per 100 pounds. Ladak available Portland and Kansas City, and Buffalo available Portland CSS Commodity Offices.[4] Export: Competitive bid as announced. Ladak by Kansas City, and Buffalo by Portland CSS Commodity Offices.
Tall Fescue seed (common), 23,000 hundredweight.	Domestic: $18 per 100 pounds. Available Portland, Kansas City, Dallas, and Chicago CSS Commodity Offices.[4] Export: Competitive bid as announced by Chicago CSS Commodity Office.
Tall Fescue seed (certified), 84,000 hundredweight.	Domestic: $20 per 100 pounds. Available Portland, Dallas, and Chicago CSS Commodity Offices.[4] Export: Competitive bid as announced by Portland CSS Commodity Office.
Gum rosin (in galvanized metal drums averaging 517 pounds net).	Domestic or export: Offer and acceptance, "as is" in the stated quantities at the designated storage yards, subject to the prices, terms, and conditions of Announcement TB-21 and Supplements issued not more often than weekly by the American Turpentine Farmers' Association Cooperative, Valdosta, Ga.
Gum turpentine (bulk in tanks)..	Domestic or export: Offer and acceptance, "as is" in the stated quantities in the designated storage tanks, subject to the prices, terms, and conditions of Announcement TB-21 and Supplements issued not more often than weekly by the American Turpentine Farmers' Association Cooperative, Valdosta, Ga.

[1] At the processor's plant or warehouse but with any prepaid storage and outhandling charges for the benefit of the buyer.
[2] Sales of grains made under Title I, P. L. 480, may be made on terms and conditions of GR 301 and GR 302. Other commodities under the announcement indicated.
[3] In those counties in which grain is stored in CCC bin sites, delivery will be made f. o. b. buyer's conveyance at bin site without additional cost; sales will also be made in store approved warehouses in such county and adjacent counties at the same price, provided the buyer makes arrangements with the warehousemen for storage documents.
[4] Prices for basic specifications will not be reduced through the period ending June 30, 1956.

(Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 407, 63 Stat. 1055; 7 U. S. C. 1427, sec. 208, 63 Stat. 901)

Issued: October 7, 1955.

[SEAL] EARL M. HUGHES,
Executive Vice-President,
Commodity Credit Corporation.

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214) and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners and learning periods for certificates issued under general learner regulations (§§ 522.1 to 522.12) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Apparel Industry Learner Regulations (29 CFR 522.20 to 522.24, as amended April 19, 1955, 20 F. R. 2304).

A. C. M. Corp., Winder, Ga., effective 9-29-55 to 9-28-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' dress pants).

Allen Garment Co., College Street, Franklin, Ky., effective 10-12-55 to 10-11-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' sport shirts).

Archbald Sewing Co., 140 Cherry Street, Archbald, Pa., effective 10-8-55 to 10-7-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (children's dresses).

Ashland-Benton Corp., Ashland, Miss., effective 10-11-55 to 10-10-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (cotton shirts).

Blue Bell, Inc., Belmont, Miss., effective 10-13-55 to 10-12-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (work pants).

Blue Bell, Inc., Tupelo, Miss., effective 10-13-55 to 10-12-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (western-type shirts).

Cassie Sportswear, Inc., 306-10 Catawissa Street, Nesquehoning, Pa., effective 10-27-55 to 10-26-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (ladies' blouses).

Cowden Manufacturing Co., 120 South Bank Street., Mount Sterling, Ky., effective 10-23-55 to 10-22-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (cotton work suits and coats; Denim dungarees and wash slacks).

Crystal Springs Shirt Corp., Crystal Springs, Miss., effective 10-21-55 to 10-20-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (boys' shirts).

Empire Manufacturing Co., Winder, Ga., effective 9-29-55 to 9-28-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (work pants and shirts).

The Enro Shirt Co., Inc., 1010 South Preston Street, Louisville, Ky., effective 10-19-55 to 10-18-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's pajamas, shirts and sportshirts).

Lebanon Garment Co., East Market Street, Lebanon, Tenn.; effective 10-4-55 to 10-3-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' trousers).

The Owenby Manufacturing Co., Andrews, N. C., effective 9-30-55 to 2-29-56; 50 learners for plant expansion purposes (dresses).

Page Manufacturing Co., 508 West Main Street, Lexington, Ky., effective 9-30-55 to 2-29-56; 10 learners for plant expansion purposes (ladies' cotton dresses).

Page Manufacturing Co., 508 West Main Street, Lexington, Ky., effective 9-30-55 to 9-29-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (ladies' cotton dresses).

Reliance Manufacturing Co., Dixie Factory, 100 Ferguson Street, Hattiesburg, Miss.; effective 9-30-55 to 2-7-56; 20 learners for plant expansion purposes (work shirts and pants).

Rosenau Bros., West Bertsch Street, Lansford, Pa., effective 10-21-55 to 10-20-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (children's dresses).

Rosenau Bros., Inc., Main Street, Red Hill, Pa., effective 10-6-55 to 10-5-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (children's dresses).

Sandye Shirt Corp., Portland, Tenn.; effective 9-29-55 to 2-29-56; 60 learners for plant expansion purposes (men's and boys' sport shirts).

Selma Garment Co., 1508 Water Avenue, Selma, Ala., effective 10-3-55 to 10-2-56; 10 learners for normal labor turnover purposes (western style blue jeans).

Southland Manufacturing Co., Inc., 1510 South Third Street, Wilmington, N. C., effective 9-27-55 to 9-26-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (dress and sport shirts).

T and T Pants Manufacturing Co., Inc., 1101 Wyoming Avenue, Scranton, Pa., effective 10-4-55 to 10-3-56; 10 learners for normal labor turnover purposes (men's trousers).

Wilgree Manufacturing Co., Inc., 28 South Scott Street, Camilla, Ga., effective 9-28-55 to 9-27-56; 25 learners for plant expansion purposes (men's sport and dress shirts).

Williamson-Dickie Manufacturing Co., P. O. Box 1551, McAllen, Tex., effective 9-28-55 to 9-27-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (work pants).

Glove Industry Learner Regulations (29 CFR 522.60 to 522.65, as amended April 19, 1955, 20 F. R. 2304).

Good Luck Glove Co., Carbondale, Ill., effective 10-15-55 to 10-14-56; 10 percent of the total number of machine stitchers for normal labor turnover purposes (cotton, Jersey and leather combination work gloves).

Knitted Wear Industry Learner Regulations (29 CFR 522.30 to 522.35, as amended April 19, 1955, 20 F. R. 2304).

Ilena Mills, Inc., Manufacturers' Road, Chattanooga, Tenn.; effective 10-3-55 to 10-2-56; 5 percent of the total number of factory production workers for normal labor turnover purposes (men's, women's and children's knitted underwear).

Kain-Murphey Corp., Manufacturers' Road, Chattanooga, Tenn.; effective 10-3-55 to 10-2-56; 5 percent of the total number of factory production workers for normal labor turnover purposes (children's knitted sleeping garments).

Knickerbocker Manufacturing Co., West Point, Miss.; effective 10-13-55 to 10-12-56; 5 percent of the total number of factory production workers for normal labor turnover purposes (men's woven sleepwear and shorts).

Rockwood Garment Co., Inc., Rockwood, Pa., effective 10-8-55 to 10-7-56; 5 learners for normal labor turnover purposes (ladies' rayon panties).

Signal Knitting Mills, Manufacturers' Road, Chattanooga, Tenn.; effective 10-3-55 to 10-2-56; 5 percent of the total number of factory production workers for normal labor turnover purposes (men's, women's and children's knitted underwear).

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.12, as amended February 28, 1955, 20 F. R. 645).

The following special learner certificates were issued in Puerto Rico to the companies hereinafter named. The effective and expiration dates, the number of learners, the learner occupations, the length of the learning periods and the learner wage rates are indicated, respectively.

Debmar Corp., Canovanas, P. R., effective 9-21-55 to 3-20-56; 100 persons may be employed as learners on any one workday in the occupation of Sewing Machine Operator for 240 hours at 45 cents an hour, and 240 hours at 50 cents an hour (brassieres).

Standard Products Co., Inc., 461 Francia Street, Hato Rey, P. R., effective 9-12-55 to 3-11-56; 34 persons may be employed as learners on any one workday in the occupations of multiple winding; coil processing; stacking; saw operators; testing; finishing; and press operators. In each occupation 240 hours at 50 cents an hour, and 240 hours at 60 cents an hour. (Assembly of transformers.)

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be canceled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 5th day of October 1955.

MILTON BROOKE,
Authorized Representative of the Administrator.

CIVIL AERONAUTICS BOARD

[Docket No. 7189; Order E-9627]

BONANZA AIR LINES, INC.

STATEMENT OF TENTATIVE FINDINGS AND CONCLUSIONS AND ORDER TO SHOW CAUSE[1]

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 6th day of October 1955.

[1] This statement does not necessarily represent the views of all Members of the Board with respect to all issues.

In the matter of the application of Bonanza Air Lines, Inc., under section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended, for a certificate of public convenience and necessity of unlimited duration for Route No. 105.

Bonanza Air Lines, Inc. (Bonanza), on May 31, 1955, filed an application pursuant to section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended (the Act), requesting the Board to issue Bonanza a certificate of public convenience and necessity of unlimited duration for route No. 105 authorizing air transportation of persons, property and mail between certain named points.

Section 401 (e) (3) of the Act (effective May 19, 1955) provides: "If any applicant who makes application for a certificate within one hundred and twenty days after the date of enactment of this paragraph shall show that, from January 1, 1953, to the date of its application, it or its predecessor in interest, was an air carrier furnishing, within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property, and mail, under a temporary certificate of public convenience and necessity issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which the applicant or its predecessors in interest have no control) the Board, upon proof of such fact only, shall unless the service rendered by such applicant during the period since its last certification has been inadequate and inefficient, issue a certificate or certificates of unlimited duration, authorizing such applicant to engage in air transportation between the terminal and intermediate points within the continental limits of the United States between which it, or its predecessor, so continuously operated between the date of enactment of this paragraph and the date of its application: *Provided*, That the Board in issuing the certificate is empowered to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points it finds have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification at such time."

Bonanza alleges in its application that it is a citizen of the United States of America as defined by section 1 (13) of the Act. Proof of this fact has been submitted by Bonanza in other certification proceedings and no information to the contrary has since come to the knowledge of the Board.

Bonanza further alleges in its application that it has continuously operated as an air carrier furnishing local or feeder air transportation of persons, property and mail within the continental limits of the United States during the period January 1, 1953 to the date of its application under a temporary certificate of public convenience and necessity for route No. 105 issued by the Board, except as to interruptions of service over which it had no control. The various schedules and reports required to be filed with the Board by local service carriers indicate that Bonanza has so continuously operated since January 1, 1953.

Section 401 (e) (3) of the Act requires in effect that the Board find as a prerequisite to the granting of a certificate of unlimited duration to Bonanza that the service rendered by Bonanza during the period since its last certification has not been inadequate or inefficient. The carrier in its application for such certificate filed May 31, 1955, alleges its service rendered during the aforesaid period has been adequate and efficient. The Board during the said period has received no complaints from the public relating to the overall service provided by this carrier. The Board is possessed of no information from which it could find that, considered as a whole, the service provided by this carrier during the period from January 25, 1955, the date of Bonanza's last certificate for route No. 105, to the present has been inadequate or inefficient within the meaning of section 401 (e) (3) of the Act.

Bonanza further alleges in its application that it has from the date of the enactment of section 401 (e) (3) (May 19, 1955) to the date of its application, continuously served the following terminal and intermediate points:

Reno, Nev.	San Diego, Calif.
Hawthorne, Nev.	Santa Ana-Laguna Beach, Calif.
Tonopah, Nev.	Los Angeles, Calif.
Las Vegas, Nev.	Burbank, Calif.
Kingman, Ariz.	Blythe, Calif.
Prescott, Ariz.	Indio, Calif.
Phoenix, Ariz.	Riverside-Ontario, Calif.
Yuma, Ariz.	
El Centro, Calif.	

Section 401 (e) (3) provides in effect that all terminal points served by the local service carrier applicant during the period from May 19, 1955 to May 31, 1955 shall be certificated for a period of unlimited duration. The certificate we propose to issue to Bonanza (which is set forth below as Appendix A) accomplishes this.

Section 401 (e) (3) empowers the Board to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points the Board finds have generated insufficient traffic to warrant a finding that the public convenience and necessity require permanent certification. The Board has proposed an industry-wide traffic standard upon which to base a tentative conclusion as to whether a particular intermediate point should be permanently or temporarily certificated. A standard which can be applied on an industry-wide basis will assure that all the intermediate cities are equitably treated. The Board has concluded, on the basis of an analysis of the latest available traffic data, that an average of five or more passengers enplaned per day provides a reasonable basis for selection of those intermediate points to be permanently certificated at this time.

As indicated above, the recent amendment of the Act provides for the certification for an unlimited duration of all terminal points and of at least one-half of the intermediate points named in the certificate. This means that in the future the applicant carrier will be providing services over permanently certificated segments. During the years of local service carrier experience, the Board, in consideration of the subsidized nature of the operation, has found that

on-line intermediate points generating in the neighborhood of 300 passengers on and off monthly have borne a reasonable share of the expense incurred by the carrier in providing service to the intermediate points on existing flights. In the past, the Board has also found that local service carrier points generating in the neighborhood of five or more enplaned passengers per day have warranted recertification. This leads us to conclude that in the absence of a further showing, the five passenger per day standard is a reasonable one for selecting those intermediate points to be permanently certificated.

The proposed certificate which is set forth below as Appendix A grants Bonanza permanent authority at those intermediate stations shown in Appendixes C, D and E[2] to have met this five-passenger per day standard and temporary authority at all other intermediate stations served by Bonanza during the period May 19, 1955 to May 31, 1955. Appendixes C and D set forth in tabular form, the average number of daily passengers enplaned at each Bonanza intermediate point for the calendar year 1954 and for the twelve-month periods ended March 31, 1955 and June 30, 1955. The average number of passengers enplaned at intermediate points generating less than five passengers per day is set forth in Appendix E on a quarterly basis for the years 1952, 1953, 1954 and for the twelve-month periods ended March 31, 1955 and June 30, 1955.

The Board believes that except for cities presenting special considerations warranting permanent certification, those intermediate points which have generated less than five enplaned passengers per day should be certificated for a temporary period of three years. Certification for this period will enable the Board to assess the future traffic development at these points and to consider at a later time whether or not they should be made permanent. These cities will be afforded an opportunity before the expiration of the temporary period to demonstrate their ability to generate a sufficient volume of traffic to warrant permanent certification or continuation of service for a further temporary period.

It is also the Board's tentative conclusion that under the provisions of section 401 (e) (3) of the Act a point named in Bonanza's presently effective certificate of public convenience and necessity for route No. 105 which has never been served by Bonanza, is not eligible for inclusion as a point in any certificate that may be issued to Bonanza pursuant to said section of the Act.

Thus, the certificate which the Board proposes to issue to Bonanza pursuant to section 401 (e) (3) of the act, will carry forward Bonanza's authority to serve Gabbs, Nevada, and Oceanside, California, only for the term of its present temporary authorization. The presently effective temporary suspension of service at Oceanside is being continued by the proposed supplementary order set forth below as Appendix B.

[2] Filed as part of the original document.

The Board further believes that the general terms and conditions set forth in the certificate of public convenience and necessity last issued by the Board to Bonanza may not be expanded in a certificate to be issued pursuant to section 401 (e) (3) of the act in such manner as to grant authority to said carrier in excess of that set forth in the certificate of public convenience and necessity last issued to this carrier.

The Board does not believe that authority granted to Bonanza pursuant to § 202.4 and Part 205 of the Economic Regulations of the Board, subsequent to the issuance of the last certificate of public convenience and necessity issued by the Board to said air carrier permitting on-segment changes in the service pattern, should be incorporated in a certificate issued to Bonanza pursuant to section 401 (e) (3) of the act. In the interest of convenience and clarity the Board will restate the carrier's outstanding service pattern modifications in a single order, a draft of which is set forth below as Appendix B.

It is our intention to strictly limit this proceeding to a consideration of issues directly pertaining to the grant, pursuant to section 401 (e) (3) of the Act, of permanent or temporary authority to serve points served by Bonanza during the period from May 19, 1955 to May 31, 1955. We believe the public interest requires expeditious disposition of the proceeding and are therefore adopting a procedure intended to shorten the proceeding while at the same time fully protecting the interests of all interested persons. We are requiring Bonanza to show cause why the Board should not issue an order making final the tentative findings and conclusions set forth in this order and issue a certificate of public convenience and necessity in the form set forth below as Appendix A. After allowing interested persons a reasonable period within which to submit objections to the Board's order, Bonanza's application and the order to show cause will be set for immediate hearing in Washington before a hearing examiner of the Board. Bonanza and all interested persons who desire to be heard in connection with this matter are hereby notified that they may file written objection to the Board's tentative findings and conclusions within 15 days from the date of this order. The hearing will be limited to consideration of the issues raised by such objections. Objections should be in the nature of exceptions, should be brief and concise, and should not contain argument or factual data which the objecting party intends to rely on at the hearing in support of its objections.

It is also our intention to officially notice all reports, tariffs and schedules required to be filed with the Board by all air carriers, as well as all public Board reports based on these data,[3] so that these materials need not be specially compiled for the record in this proceeding.

[3] We will also officially notice the Origination-Destination Airline Traffic Surveys published by the Airline Finance and Accounting Conference from information compiled by the Board.

On the basis of the foregoing considerations and the data set forth in Appendixes C, D, E and F[2] hereof, which are hereby incorporated into this order and shall constitute part of the record in this proceeding, the Board finds that:

1. Bonanza is a citizen of the United States of America as defined by section 1 (13) of the Act.

2. From January 1, 1953, to May 31, 1955, Bonanza was an air carrier providing within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property and mail pursuant to a temporary certificate of public convenience and necessity for route No. 105 issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which Bonanza had no control).

3. Bonanza has continuously served the following terminal and intermediate points during the period from May 19, 1955, to May 31, 1955:

Reno, Nev.	San Diego, Calif.
Hawthorne, Nev.	Santa Ana - Laguna Beach, Calif.
Tonopah, Nev.	Los Angeles, Calif.
Las Vegas, Nev.	Burbank, Calif.
Kingman, Ariz.	Blythe, Calif.
Prescott, Ariz.	Indio, Calif.
Phoenix, Ariz.	Riverside-Ontario,
Yuma, Ariz.	Calif.
El Centro, Calif.	

4. The service rendered by Bonanza during the period from January 25, 1955, the date of its last certification, to the present has been adequate and efficient within the meaning of section 401 (e) (3) of the Act.

5. The following intermediate points, which, on the basis of the most recent available data have generated an average of five or more enplaned passengers per day, should be designated as points of unlimited duration:

(a) On Bonanza's segment 1, the intermediate points Las Vegas, Nevada and Prescott, Arizona;

(b) On Segment 2, the intermediate points Yuma, Arizona and El Centro, Santa Ana-Laguna Beach, and San Diego, California;

(c) On segment 3, the intermediate point Riverside-Ontario, California.

6. On the basis of the most recent available data the following intermediate points have generated less than an average of five enplaned passengers per day, and therefore have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification; but that certification of each of said points for a period of three years is warranted:

(a) On Bonanza's segment 1, the intermediate points Hawthorne and Tonopah, Nevada and Kingman, Arizona;

(b) On segment 3, the intermediate points Blythe and Indio, California.

7. The intermediate points Gabbs, Nevada, and Oceanside, California, are ineligible for certification pursuant to the terms of section 401 (e) (3) of the Act because the points were never served by Bonanza. It is, however, appropriate to include all Bonanza's effective authority in one document, so Bonanza's present authority to serve Gabbs and Oceanside should be carried forward in the certificate to be issued in this proceeding: *Therefore, it is ordered*, That:

1. Bonanza is directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein and issue the proposed certificate of public convenience and necessity in the form set forth below as Appendix A, and further issue the proposed supplementary order in the form attached hereto as Appendix B;

2. Bonanza and any other interested person having objection to the issuance of an order making final the tentative findings and conclusions stated herein, or to the issuance of the aforesaid proposed certificate and supplementary order, shall, within 15 days from the date hereof, file written notice of objection with the Board;

3. On the expiration of the 15-day period allowed for the filing of objections, this proceeding shall be set for immediate hearing before an examiner of this Board. The hearing shall be limited to consideration of issues raised by the objections filed;

4. Copies of this order shall be served on Bonanza, the Mayors of Gabbs, Nevada and Oceanside, California, the Mayor of each city served by Bonanza during the period May 19, 1955 to May 31, 1955, and on every certificated air carrier serving a point served by Bonanza during that period;

5. This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

APPENDIX A

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR LOCAL OR FEEDER SERVICE

Bonanza Air Lines, Inc., is hereby authorized, subject to the provisions hereinafter set forth, the provisions of Title IV of the Civil Aeronautics Act of 1938, as amended, and the orders, rules and regulations issued thereunder, to engage in air transportation with respect to persons, property and mail, as follows:

1. Between the terminal point Reno, Nev., the intermediate points Hawthorne, Gabbs, Tonopah and Las Vegas, Nev., Kingman and Prescott, Ariz., and the terminal point Phoenix, Ariz.;

2. Between the terminal point Phoenix, Ariz., the intermediate points Yuma, Ariz., El Centro, San Diego, Oceanside and Santa Ana-Laguna Beach, Calif., and the co-terminal points Los Angeles and Burbank, Calif.;

3. Between the terminal point Phoenix, Ariz., the intermediate points Blythe, Indio and Riverside-Ontario, Calif., and the co-terminal points Los Angeles and Burbank, Calif.,

to be known as Route No. 105.

The service herein authorized is subject to the following terms, conditions and limitations:

(1) The holder shall render service to and from each of the points named herein, except as temporary suspensions of service may be authorized by the Board; and may begin or terminate, or begin and terminate, trips at points short of terminal points.

(2) The holder may continue to serve regularly any point named herein through the airport last regularly used by the holder to serve such point prior to the effective date of this certificate. Upon compliance with such procedure relating thereto as may be prescribed by the Board, the holder may, in addition to the service hereinabove expressly prescribed, regularly serve a point named herein through any airport convenient thereto.

(3) On each trip operated by the holder over all or part of segments 2 and 3 of the three route segments in this certificate, the holder shall stop at each point named between the point of origin and point of termination of such trip on such segment, except a point or points with respect to which (1) the Board, pursuant to such procedure as the Board may from time to time prescribe, may by order relieve the holder from the requirements of such condition, (2) the holder is authorized by the Board to suspend service, or (3) the holder is unable to render service on such trip because of adverse weather conditions or other conditions which the holder could not reasonably have been expected to foresee or control.

(4) Each trip scheduled between the co-terminal points Los Angeles and Burbank, Calif., on the one hand, and the intermediate point San Diego, Calif., on the other shall originate or terminate at Phoenix, Ariz.

The exercise of the privileges granted by this certificate shall be subject to such other reasonable terms, conditions and limitations required by the public interest as may from time to time be prescribed by the Board.

The services authorized by this certificate were originally established pursuant to a determination of policy by the Civil Aeronautics Board that in the discharge of its obligation to encourage and develop air transportation under the Civil Aeronautics Act, as amended, it is in the public interest to establish certain air carriers who will be primarily engaged in short-haul air transportation as distinguished from the service rendered by trunkline air carriers. In accepting this certificate the holder acknowledges and agrees that the primary purpose of this certificate is to authorize and require it to offer short-haul, local or feeder, air transportation service of the character described above.

This certificate shall be effective on ------, 1955; *Provided, however*, That prior to the date on which the certificate would otherwise become effective the Board, either on its own initiative or upon the timely filing of a petition or petitions seeking reconsideration of the Board's order of ----------, 1955, (Order E-__) insofar as such order authorizes the issuance of this certificate may by order or orders extend such effective date from time to time.

The authority of the holder to serve Gabbs, Nev., shall terminate March 26, 1956. The authority of the holder to serve Oceanside, Calif., shall continue in effect up to and including December 31, 1957. The authority of the holder to serve Kingman, Ariz., Blythe and Indio, Calif. and Hawthorne and Tonopah, Nev., shall continue in effect up to and including ----------.

In witness whereof, the Civil Aeronautics Board has caused this certificate to be executed by its Chairman, and the seal of the Board to be affixed hereto, attested by the Secretary of the Board, on the -------- day of ----------, 1955.

[SEAL] ROSS RIZLEY,
Chairman.

Secretary.

APPENDIX B

PROPOSED DRAFT OF ORDER EXTENDING EFFECTIVE PERIOD OF TEMPORARY SERVICE AUTHORIZATIONS

The Board has by Order E-____, dated ---------- 1955, granted a certificate of public convenience and necessity of unlimited duration to Bonanza Air Lines, Inc. (Bonanza) authorizing Bonanza to engage in air transportation of persons, property and mail over route No. 105. In the past, Bonanza has been authorized to conduct operations differing in certain particulars from the authority stated in its temporary certificate of public convenience and necessity for route No. 105.

The term of effectiveness of these authorizations is unlimited. The reasons for issuance of these temporary authorizations appear to be still applicable to Bonanza in its operation under the certificate of unlimited duration concurrently issued herewith. It, therefore, appears to the Board that it is in the public interest and consistent with the Act to continue these outstanding temporary authorizations in effect for an additional period of time. In extending these authorizations, it appears desirable to include all currently effective authorizations which are not included in or disposed of in the new certificate in one order which will become effective at the same time the new certificate of unlimited duration becomes effective.

Accordingly, The Board, acting pursuant to sections 205 (a) of the Civil Aeronautics Act of 1938, as amended, and to § 202.4 and Part 205 of its Economic Regulations, finds:

1. That the enforcement of the condition in Bonanza's certificate which requires it on each flight over all or part of the several numbered route segments on route No. 105 to stop at each point named between the point of origin and the point of termination of such flight unless otherwise authorized by the Board, to the extent that it would prevent the service pattern hereinafter authorized, would prevent a service pattern which is in the public interest and which is consistent with Bonanza's performance of a local or feeder air transportation service and is not required by nor is it in the public interest;

2. That the temporary suspensions of service authorized hereinafter do not substantially change the character of the service for which the certificate of public convenience and necessity of unlimited duration is being granted to Bonanza and are otherwise in the public interest;

Accordingly, it is ordered, That:

1. Bonanza be and hereby is authorized to suspend service temporarily at Oceanside, California, an intermediate point on segment 2 of its route No. 105 until such time as adequate airport facilities at Oceanside, California, are available for use by Bonanza in its scheduled air carrier operations (previously authorized by Order E-6614);

2. Bonanza be and hereby is authorized to omit service to any point or points on trips scheduled over all or part of segment 1 (previously authorized by Order E-3597);

3. The authority previously granted to Bonanza by Orders E-3597 and E-6614 shall be terminated on the date this order and the certificate of public convenience and necessity of unlimited duration for route No. 105 being issued to Bonanza concurrently with the issuance of this order become effective.

4. The change in service pattern and temporary suspension authorizations granted herein shall become effective, ----------, concurrently with the effective date of the certificate issued to Bonanza in Docket No. 7189;

5. This order or any part thereof may be amended or revoked at any time in the discretion of the Board without notice and without hearing.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[F. R. Doc. 55-8354; Filed, Oct. 13, 1955; 8:45 a. m.]

[Docket No. 7338; Order E-9631]

SOUTHERN AIRWAYS, INC.

STATEMENT OF TENTATIVE FINDINGS AND CONCLUSIONS AND ORDER TO SHOW CAUSE [1]

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 7th day of October 1955.

In the matter of the application of Southern Airways, Inc., under section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended, for a certificate of public convenience and necessity of unlimited duration for Route No. 98.

Southern Airways, Inc. (Southern), on August 2, 1955, filed an application pursuant to section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended (the Act), requesting the Board to issue Southern a certificate of public convenience and necessity of unlimited duration for Route No. 98 authorizing air transportation of persons, property and mail between certain named points.

Section 401 (e) (3) of the Act (effective May 19, 1955) provides: "If any applicant who makes application for a certificate within one hundred and twenty days after the date of enactment of this paragraph shall show that, from January 1, 1953, to the date of its application, it or its predecessor in interest, was an air carrier furnishing, within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property, and mail, under a temporary certificate of public convenience and necessity issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which the applicant or its predecessors in interest have no control) the Board, upon proof of such fact only, shall, unless the service rendered by such applicant during the period since its last certification has been inadequate and inefficient, issue a certificate or certificates of unlimited duration, authorizing such applicant to engage in air transportation between the terminal and intermediate points within the continental limits of the United States between which it, or its predecessor, so continuously operated between the date of enactment of this paragraph and the date of its application: *Provided*, That the Board in issuing the certificate is empowered to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points it finds have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification at such time."

Southern alleges in its application that it is a citizen of the United States of America as defined by section 1 (13) of the Act. Proof of this fact has been submitted by Southern in other certification proceedings and no information to the contrary has since come to the knowledge of the Board.

Southern further alleges in its application that it has continuously operated as an air carrier furnishing local or feeder air transportation of persons, property and mail within the continental limits of the United States during the period January 1, 1953, to the date of its application under a temporary certificate of public convenience and necessity for route No. 98 issued by the Board, except as to interruptions of service over which it had no control. The various schedules and reports required to be filed with the Board by local service carriers indicate that Southern has so continuously operated since January 1, 1953.

Section 401 (e) (3) of the Act requires in effect that the Board find as a prerequisite to the granting of a certificate of unlimited duration to Southern that the service rendered by Southern during the period since its last certification has not been inadequate or inefficient. The carrier in its application for such certificate filed August 2, 1955, alleges its service rendered during the aforesaid period has been adequate and efficient. The Board during the said period has received no complaints from the public relating to the overall service provided by this carrier. The Board is possessed of no information from which it could find that, considered as a whole, the service provided by this carrier during the period from April 14, 1953, the date of Southern's last certificate for route No. 98, to the present has been inadequate or inefficient within the meaning of section 401 (e) (3) of the Act.

Southern further alleges in its application that it has from the date of the enactment of section 401 (e) (3) (May 19, 1955) to the date of its application, continuously served the following terminal and intermediate points:

Memphis, Tenn.	Moultrie, Ga.
Tupelo, Miss.	Valdosta, Ga.
Columbus, Miss.	Jacksonville, Fla.
Tuscaloosa, Ala.	Greenville, Miss.
Birmingham, Ala.	Monroe, La.
Gadsden, Ala.	Vicksburg, Miss.
Atlanta, Ga.	Jackson, Miss.
Athens, Ga.	Natchez, Miss.
Greenwood, S. C.	Baton Rouge, La.
Greenville, S. C.	New Orleans, La.
Spartanburg, S. C.	Laurel, Miss.
Charlotte, N. C.	Gulfport-Biloxi, Miss
Columbus, Ga.	Mobile, Ala.
Albany, Ga.	

Section 401 (e) (3) provides in effect that all terminal points served by the local service carrier applicant during the period from May 19, 1955 to August 2, 1955 shall be certificated for a period of unlimited duration. The certificate we propose to issue to Southern (which is set forth below as Appendix A) accomplishes this.

Section 401 (e) (3) empowers the Board to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points the Board finds have generated insufficient traffic to warrant a finding that the public convenience and necessity require permanent certification. The Board has proposed an industry-wide traffic standard upon which to base a tentative conclusion as to whether a particular intermediate point should be permanently or temporarily certificated. A standard which can be applied on an industry-wide basis will assure that all the intermediate cities are equitably treated. The Board has concluded, on the basis of an analysis of the latest available traffic data, that an average of five or more passengers enplaned per day provides a reasonable basis for selection of those intermediate points to be permanently certificated at this time.

As indicated above, the recent amendment of the Act provides for the certification for an unlimited duration of all terminal points and of at least one-half of the intermediate points named in the certificate. This means that in the future the applicant carrier will be providing services over permanently certificated segments. During the years of local service carrier experience, the Board, in consideration of the subsidized nature of the operation, has found that on-line intermediate points generating in the neighborhood of 300 passengers on and off monthly have borne a reasonable share of the expense incurred by the carrier in providing service to the intermediate point on existing flights. In the past, the Board has also found that local service carrier points generating in the neighborhood of five or more enplaned passengers per day have warranted recertification. This leads us to conclude that in the absence of a further showing, the five passenger per day standard is a reasonable one for selecting those intermediate points to be permanently certificated.

The proposed certificate which is set forth below as Appendix A grants Southern permanent authority at those intermediate stations shown in Appendixes C, D and E [2] to have met this five-passenger per day standard and temporary authority at all other intermediate stations served by Southern during the period May 19, 1955, to August 2, 1955. Appendixes C and D set forth in tabular form, the average number of daily passengers enplaned at each Southern intermediate point for the calendar year 1954 and for the twelve month periods ended March 31, 1955, and June 30, 1955. The average number of passengers enplaned at intermediate points generating less than five passengers per day is set forth in Appendix E on a quarterly basis for the years 1952, 1953, 1954 and for the twelve month periods ended March 31, 1955 and June 30, 1955.

The Board believes that except for cities presenting special considerations warranting permanent certification, those intermediate points which have generated less than five enplaned passengers per day should be certificated for a temporary period of three years. Certification for this period will enable the Board to assess the future traffic development at these points and to consider at a later time whether or not they should be made permanent. These cities will be afforded an opportunity before the expiration of the temporary period to demonstrate their ability to generate a sufficient volume of traffic to warrant permanent certification or continuation of service for a further temporary period.

[1] This statement does not necessarily represent the views of all Members of the Board with respect to all issues.

[2] Filed as part of the original document.

The Board further believes that a point named in the last certificate issued to the carrier as a point on more than one designated segment in the certificate, but as to which point, pursuant to section 205 of the Board's Economic Regulations, a temporary suspension of service has been granted to the carrier and which point has been served on only one segment because of the authorized temporary suspension of service on the other segment, is eligible to be certificated pursuant to the provisions of section 401 (e) (3) of the act only as a point on the segment where the point was served during the period from May 19, 1955, to August 2, 1955.

Thus, the certificate which the Board proposes to issue to Southern pursuant to section 401 (e) (3) of the act will carry forward Southern's authority to serve the terminal point Columbus, Mississippi, on segment 4 only for the term of its present temporary authorization. The presently effective temporary suspension of service at Columbus on segment 4 will be continued by the proposed supplementary order set forth below as Appendix B.

The Board further tentatively concludes that a point which has been authorized for service, has received service from the carrier, but which was not served during the statutory grandfather period because service had been temporarily suspended for economic reasons, is not eligible for certification pursuant to section 401 (e) (3) of the act. Such a point is ineligible because it was not served during the statutory grandfather period for economic reasons advanced and supported by the carrier.

Thus, the certificate which the Board proposes to issue to Southern in this proceeding will carry forward Southern's authority to serve Clarksdale, Mississippi and La Grange, Georgia only for the term of its present temporary authority. The presently effective temporary suspension of service at these points is being continued by the proposed supplementary order set forth below as Appendix B.

The Board further believes that the general terms and conditions set forth in the certificate of public convenience and necessity last issued by the Board to Southern may not be expanded in a certificate to be issued pursuant to section 401 (e) (3) of the Act in such manner as to grant authority to said carrier in excess of that set forth in the certificate of public convenience and necessity last issued to this carrier.

The Board does not believe that authority granted to Southern pursuant to § 202.4 and Part 205 of the Economic Regulations of the Board, subsequent to the issuance of the last certificate of public convenience and necessity issued by the Board to said air carrier permitting on-segment changes in the service pattern, should be incorporated in a certificate issued to Southern pursuant to section 401 (e) (3) of the Act. In the interest of convenience and clarity the Board will restate the carrier's outstanding service pattern modifications in a single order, a draft of which is set forth below as Appendix B.

It is our intention to strictly limit this proceeding to a consideration of issues directly pertaining to the grant, pursuant to section 401 (e) (3) of the Act, of permanent or temporary authority to serve points served by Southern during the period from May 19, 1955, to August 2, 1955. We believe the public interest requires expeditious disposition of the proceeding and are therefore adopting a procedure intended to shorten the proceeding while at the same time fully protecting the interests of all interested persons. We are requiring Southern to show cause why the Board should not issue an order making final the tentative findings and conclusions set forth in this order and issue a certificate of public convenience and necessity in the form set forth below as Appendix A. After allowing interested persons a reasonable period within which to submit objections to the Board's order, Southern's application and the order to show cause will be set for immediate hearing in Washington before a hearing examiner of the Board. Southern and all interested persons who desire to be heard in connection with this matter are hereby notified that they may file written objection to the Board's tentative findings and conclusions within 15 days from the date of this order. The hearing will be limited to consideration of the issues raised by such objections. Objections should be in the nature of exceptions, should be brief and concise, and should not contain argument or factual data which the objecting party intends to rely on at the hearing in support of its objections.

It is also our intention to officially notice all reports, tariffs and schedules required to be filed with the Board by all air carriers, as well as all public Board reports based on these data,[3] so that these materials need not be specially compiled for the record in this proceeding.

On the basis of the foregoing considerations and the data set forth in Appendixes C, D, E and F [2] hereof, which are hereby incorporated into this order and shall constitute part of the record in this proceeding, the Board finds that:

1. Southern is a citizen of the United States of America as defined by section 1 (13) of the Act.

2. From January 1, 1953, to August 2, 1955, Southern was an air carrier providing within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property and mail pursuant to a temporary certificate of public convenience and necessity for route No. 98 issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which Southern had no control).

3. Southern has continuously served the following terminal and intermediate points during the period from May 19, 1955, to August 2, 1955:

Memphis, Tenn.	Moultrie, Ga.
Tupelo, Miss.	Valdosta, Ga.
Columbus, Miss.	Jacksonville, Fla.
Tuscaloosa, Ala.	Greenville, Miss.
Birmingham, Ala.	Monroe, La.
Gadsden, Ala.	Vicksburg, Miss.
Atlanta, Ga.	Jackson, Miss.
Athens, Ga.	Natchez, Miss.
Greenwood, S. C.	Baton Rouge, La.
Greenville, S. C.	New Orleans, La.
Spartanburg, S. C.	Laurel, Miss.
Charlotte, N. C.	Gulfport-Biloxi,
Columbus, Ga.	Miss.
Albany, Ga.	Mobile, Ala.

4. The service rendered by Southern during the period from April 14, 1953, the date of its last certification, to the present has been adequate and efficient within the meaning of section 401 (e) (3) of the Act.

5. The following points, which on the basis of the most recent available data have generated an average of five or more enplaned passengers per day, should be designated as points of unlimited duration:

(a) On Southern's segment 1, the intermediate points Tupelo and Columbus, Miss., Tuscaloosa, Birmingham and Gadsden, Ala., Atlanta and Athens, Ga., and Greenville, S. C.;

(b) On segment 2, the intermediate points Columbus, Albany, Moultrie and Valdosta, Ga.;

(c) On segment 3, the intermediate points Greenville, Miss., Monroe, La., Vicksburg, Jackson and Natchez, Miss. and Baton Rouge, La.;

(d) On segment 4, the intermediate points Jackson and Gulfport-Biloxi, Miss.

6. On the basis of the most recent available data the following intermediate points have generated less than an average of five enplaned passengers per day, and therefore have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification; but that certification of each of said points for a period of three years is warranted:

(a) On Southern's segment 1, the intermediate points Greenwood and Spartanburg, S. C.;

(b) On segment 4, the intermediate point Laurel, Miss.

7. The points Clarksdale, Miss., La Grange, Ga., and Columbus, Miss. on segment 4, are ineligible for certification pursuant to section 401 (e) (3) of the Act since they were not served by Southern during the period May 19, 1955 to August 2, 1955 because service was temporarily suspended for reasons within the carrier's control. It is, however, appropriate to include all Southern's effective certificate authority in one document, so Southern's present authority to serve Clarksdale, Miss., La Grange, Ga., and Columbus, Miss. on segment 4, should be carried forward in the certificate to be issued in this proceeding: *Therefore it is ordered*, That:

1. Southern is directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein and issue the proposed certificate of public convenience and necessity in the form set forth below as Appendix A, and further issue the pro-

[3] We will also officially notice the Origination-Destination Airline Traffic Surveys published by the Airline Finance and Accounting Conference from information compiled by the Board.

posed supplementary order in the form set forth below as Appendix B.

2. Southern and any other interested person having objection to the issuance of an order making final the tentative findings and conclusions stated herein, or to the issuance of the aforesaid proposed certificate and supplementary order, shall, within 15 days from the date hereof, file written notice of objection with the Board.

3. On the expiration of the 15-day period allowed for the filing of objections, this proceeding shall be set for immediate hearing before an examiner of this Board. The hearing shall be limited to consideration of issues raised by the objections filed.

4. Copies of this order shall be served on Southern, the Mayors of La Grange, Ga. and Clarksdale, Miss., the Mayor of each city served by Southern during the period May 19, 1955 to August 2, 1955, and on every certificated air carrier serving a point served by Southern during that period.

5. This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

APPENDIX A

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR LOCAL OR FEEDER SERVICE

Southern Airways, Inc., is hereby authorized, subject to the provisions hereinafter set forth, the provisions of Title IV of the Civil Aeronautics Act of 1938, as amended, and the orders, rules, and regulations issued thereunder, to engage in air transportation with respect to persons, property, and mail, as follows:

1. Between the terminal point Memphis, Tenn., the intermediate points Tupelo and Columbus, Miss., Tuscaloosa, Birmingham and Gadsden, Ala., Atlanta and Athens, Ga., Greenwood, Greenville and Spartanburg, S. C., and the terminal point Charlotte, N. C.;

2. Between the terminal point Atlanta, Ga., the intermediate points La Grange, Columbus, Albany, Moultrie and Valdosta, Ga., and the terminal point Jacksonville, Fla.;

3. Between the terminal point Memphis, Tenn., the intermediate points Clarksdale and Greenville, Miss., Monroe, La., Vicksburg, Jackson and Natchez, Miss., Baton Rouge, La., and the terminal point New Orleans, La.;

4. Between the terminal point Columbus, Miss., the intermediate points Jackson, Laurel, and Gulfport-Biloxi, Miss., and the terminal point Mobile, Ala.

to be known as Route No. 98.

The service herein authorized is subject to the following terms, conditions, and limitations:

(1) The holder shall render service to and from each of the points named herein, except as temporary suspensions of service may be authorized by the Board; and may begin or terminate, or begin and terminate, trips at points short of terminal points.

(2) The holder may continue to serve regularly any point named herein through the airport last regularly used by the holder to serve such point prior to the effective date of this certificate. Upon compliance with such procedure relating thereto as may be prescribed by the Board, the holder may, in addition to the service hereinabove expressly prescribed, regularly serve a point named herein through any airport convenient thereto.

(3) On each trip operated by the holder over all or part of one of the four numbered route segments in this certificate, the holder shall stop at each point named between the point of origin and point of termination of such trip on such segment, except a point or points with respect to which (a) the Board, pursuant to such procedure as the Board may from time to time prescribe, may by order relieve the holder from the requirements of such condition, (b) the holder is authorized by the Board to suspend service, or (c) the holder is unable to render service on such trip because of adverse weather conditions or other conditions which the holder could not reasonably have been expected to foresee or control.

(4) Notwithstanding the provisions of paragraph (3) above, the holder, on each trip scheduled over all or part of segment 3, may omit a point or points on such segment, subject to the following conditions:

(a) On each trip on which service is scheduled between Memphis and Jackson, the holder shall schedule, between such points, service to a minimum of two intermediate points on such segment,

(b) On each trip on which service is scheduled between Jackson and New Orleans, the holder shall schedule, between such points, service to a minimum of two intermediate points on such segment, and

(c) On each trip on which service is scheduled between Memphis and New Orleans, the holder shall schedule service to a minimum of three intermediate points on such segment, except that if Jackson is scheduled for service on such trip, the holder shall comply with conditions (a) and (b) above.

The exercise of the privileges granted by this certificate shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

The services authorized by this certificate were originally established pursuant to a determination of policy by the Civil Aeronautics Board that in the discharge of its obligation to encourage and develop air transportation under the Civil Aeronautics Act, as amended, it is in the public interest to establish certain air carriers who will be primarily engaged in short-haul air transportation as distinguished from the service rendered by trunkline air carriers. In accepting this certificate the holder acknowledges and agrees that the primary purpose of this certificate is to authorize and require it to offer short-haul, local or feeder, air transportation service of the character described above.

This certificate shall be effective on ------, 1955: *Provided, however,* That prior to the date on which the certificate would otherwise become effective the Board, either on its own initiative or upon the timely filing of a petition or petitions seeking reconsideration of the Board's order of ------, 1955, (Order E-----) insofar as such order authorizes the issuance of this certificate may by order or orders extend such effective date from time to time. The authorization to serve Greenwood and Spartanburg, S. C. and Laurel, Miss. shall continue in effect up to and including ------. The authorization to serve Columbus, Miss., on segment 4, Clarksdale, Miss. and La Grange, Ga. shall continue in effect up to and including December 31, 1956.

In witness whereof, the Civil Aeronautics Board has caused this certificate to be executed by its Chairman, and the seal of the Board to be affixed hereto, attested by the Secretary of the Board, on the ---------- day of ------, 1955.

[SEAL] ROSS RIZLEY,
Chairman.

Secretary.

APPENDIX B

PROPOSED DRAFT OF ORDER EXTENDING EFFECTIVE PERIOD OF TEMPORARY SERVICE AUTHORIZATIONS

The Board has by Order E-----, dated ----------, 1955, granted a certificate of public convenience and necessity of unlimited duration to Southern Airways, Inc. (Southern) authorizing Southern to engage in air transportation of persons, property and mail over route No. 98. In the past, Southern has been authorized to conduct operations differing in certain particulars from the authority stated in its temporary certificate of public convenience and necessity for route No. 98.

The term of effectiveness of some of these authorizations is unlimited, while others would expire sixty days after final determination by the Board in any proceeding involving renewal of route No. 98. The reasons for issuance of these temporary authorizations appear to be still applicable to Southern in its operation under the certificate of unlimited duration concurrently issued herewith. It, therefore, appears to the Board that it is in the public interest and consistent with the Act to continue these outstanding temporary authorizations in effect for an additional period of time. In extending these authorizations, it appears desirable to include all currently effective authorizations which are not included in or disposed of in the new certificate in one order which will become effective at the same time the new certificate of unlimited duration becomes effective.

Accordingly, the Board, acting pursuant to sections 205 (a) of the Civil Aeronautics Act of 1938, as amended, and to § 202.4 and Part 205 of its Economic Regulations, finds:

1. That the enforcement of the condition in Southern's certificate which requires it on each flight over all or part of the several numbered route segments on route No. 98 to stop at each point named between the point of origin and the point of termination of such flight unless otherwise authorized by the Board, to the extent that it would prevent the service pattern hereinafter authorized, would prevent a service pattern which is in the public interest and which is consistent with Southern's performance of a local or feeder air transportation service and is not required by nor is it in the public interest;

2. That the temporary suspensions of service authorized hereinafter do not substantially change the character of the service for which the certificate of public convenience and necessity of unlimited duration is being granted to Southern and are otherwise in the public interest: *Accordingly, it is ordered,* That:

1. Southern be and hereby is authorized to suspend service at Clarksdale, Mississippi, an intermediate point on segment 3 of its route No. 98 (previously authorized by Order E-7975);

2. Southern be and hereby is authorized temporarily to suspend service at La Grange, Georgia, an intermediate point on segment 2 of its route No. 98 (previously authorized by Order E-8178);

3. Southern be and hereby is authorized to temporarily suspend service at Columbus, Mississippi, as a terminal point on segment 4 of route No. 98 (previously authorized by Order E-8772);

4. Southern be and hereby is authorized to omit service to La Grange, Ga., and Greenwood, S. C., on flights in excess of two daily round trips (previously authorized by Order E-6929);

5. Southern be and hereby is authorized to omit service at Gulfport-Biloxi, Mississippi, an intermediate point on segment 4 of route No. 98, on one scheduled flight daily (previously authorized by Order E-8733);

6. Southern be and hereby is authorized to render flag-stop service on its route No. 98 by omitting the physical landing of its aircraft at any intermediate point scheduled to be served on a particular flight: *Provided,* That there are no persons, property, or mail on the aircraft destined for such point and no such traffic available at such point for the flight at the scheduled time of departure: *Provided, further,* That the Board in its discretion may at any time disapprove the use of such authority with respect to service to any point on any flight or flights (previously authorized by Orders E-5592 and E-6139);

7. The authority previously granted to Southern by Orders E-5592 and E-6139 insofar as they pertain to Southern, E-6929, E-7975, E-8178, E-8733 and E-8772, shall be terminated on the date this order and the certificate of public convenience and necessity of unlimited duration for route No. 98 being issued to Southern concurrently with the issuance of this order become effective;

8. The change in service pattern and temporary suspension authorizations granted herein shall become effective ------, ------, concurrently with the effective date of the certificate issued to Southern in Docket No. 7338;

9. This order or any part thereof may be amended or revoked at any time in the discretion of the Board without notice and without hearing.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[F. R. Doc. 55-8355; Filed, Oct. 13, 1955; 8:45 a. m.]

[Docket No. 7178; Order E-9637]

CENTRAL AIRLINES, INC.

STATEMENT OF TENTATIVE FINDINGS AND CONCLUSIONS AND ORDER TO SHOW CAUSE [1]

Adopted by the Civil Aeronautics Board at its office in Washington, D. C. on the 7th day of October 1955.

In the matter of the application of Central Airlines, Inc., under section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended, for a certificate of public convenience and necessity of unlimited duration for Route No. 81.

Central Airlines, Inc. (Central) on May 25, 1955, filed an application pursuant to section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended (the act), requesting the Board to issue Central a certificate of public convenience and necessity of unlimited duration for route No. 81 authorizing air transportation of persons, property and mail between certain named points.

Section 401 (e) (3) of the act (effective May 19, 1955) provides: "If any applicant who makes application for a certificate within one hundred and twenty days after the date of enactment of this paragraph shall show that, from January 1, 1953, to the date of its application, it or its predecessor in interest, was an air carrier furnishing, within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property, and mail, under a temporary certificate of public convenience and necessity issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which the applicant or its predecessors in interest have no control) the Board, upon proof of such fact only, shall, unless the service rendered by such applicant during the period since its last certification has been inadequate and inefficient, issue a certificate or certificates of unlimited duration, authorizing such applicant to engage in air transportation between the terminal and intermediate points within the continental limits of the United States between which it, or its predecessor, so continuously operated between the date of enactment of this paragraph and the date of its application: *Provided,* That the Board in issuing the certificate is empowered to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points it finds have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification at such time."

Central alleges in its application that it is a citizen of the United States of America as defined by section 1 (13) of the act. Proof of this fact has been submitted by Central in other certification proceedings and no information to the contrary has since come to the knowledge of the Board.

Central further alleges in its application that it has continuously operated as an air carrier furnishing local or feeder air transportation of persons, property and mail within the continental limits of the United States during the period January 1, 1953, to the date of its application under a temporary certificate of public convenience and necessity for route No. 81 issued by the Board, except as to interruptions of service over which it had no control. The various schedules and reports required to be filed with the Board by local service carriers indicate that Central has so continuously operated since January 1, 1953.

Section 401 (e) (3) of the act requires in effect that the Board find as a prerequisite to the granting of a certificate of unlimited duration to Central that the service rendered by Central during the period since its last certification has not been inadequate or inefficient. The Board during the said period has received no complaints from the public relating to the overall service provided by this carrier. The Board is possessed of no information from which it could find that, considered as a whole, the service provided by this carrier during the period from February 19, 1953, the date of Central's last certificate, to the present has been inadequate or inefficient within the meaning of section 401 (e) (3) of the act.

Central further alleges in its application that it has from the date of the enactment of section 401 (e) (3) (May 19, 1955) to the date of its application, continuously served the following terminal and intermediate points:

Amarillo, Tex.	Ada, Okla.
Borger, Tex.	Ardmore, Okla.
Woodward, Okla.	Stillwater, Okla.
Enid, Okla.	Lawton-Fort Sill, Okla.
Ponca City, Okla.	Duncan, Okla.
Bartlesville, Okla.	Fayetteville, Ark.
Tulsa, Okla.	Fort Smith, Ark.
Muskogee, Okla.	Hot Springs, Ark.
McAlester, Okla.	Little Rock, Ark.
Dallas, Tex.	Kansas City, Mo.
Fort Worth, Tex.	Joplin, Mo.
Paris, Tex.	
Wichita, Kans.	
Oklahoma City, Okla.	

Section 401 (e) (3) provides in effect that all terminal points served by the local service carrier applicant during the period from May 19, 1955, to May 25, 1955, shall be certificated for a period of unlimited duration. The certificate we propose to issue to Central (set forth below as Appendix A) accomplishes this.

Section 401 (e) (3) empowers the Board to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points the Board finds have generated insufficient traffic to warrant a finding that the public convenience and necessity require permanent certification. The Board has proposed an industry-wide traffic standard upon which to base a tentative conclusion as to whether a particular intermediate point should be permanently or temporarily certificated. A standard which can be applied on an industry-wide basis will assure that all the intermediate cities are equitably treated. The Board has concluded, on the basis of an analysis of the latest available traffic data, that an average of five or more passengers enplaned per day provides a reasonable basis for selection of those intermediate points to be permanently certificated at this time.

As indicated above, the recent amendment of the Act provides for the certification for an unlimited duration of all terminal points and of at least one-half of the intermediate points named in the certificate. This means that in the future the applicant carrier will be providing service over permanently certificated segments. During the years of local service carrier experience, the Board, in consideration of the subsidized nature of the operation, has found that on-line intermediate points generating in the neighborhood of 300 passengers on and off monthly have borne a reasonable share of the expense incurred by the carrier in providing service to the intermediate point on existing flights. In the past, the Board has also found that local service carrier points generating in the neighborhood of five or more enplaned passengers per day have warranted recertification. This leads us to conclude that in the absence of a further showing, the five passenger per day standard is a reasonable one for selecting those intermediate points to be permanently certificated.

The proposed certificate which is set forth below as Appendix A grants Central permanent authority at those intermediate stations shown in Appendixes C, D and E to have met this five-passenger per day standard and temporary author-

[1] This statement does not necessarily represent the views of all Members of the Board with respect to all issues.

ity at all other intermediate stations served by Central during the period May 19, 1955, to May 25, 1955. Appendixes C and D set forth in tabular form, the average number of daily passengers enplaned at each Central intermediate point for the calendar year 1954 and for the twelve month periods ended March 31, 1955, and June 30, 1955. The average number of passengers enplaned at intermediate points generating less than five passengers per day is set forth in Appendix E [2] on a quarterly basis for the years 1952, 1953, 1954, and for the twelve month periods ended March 31, 1955, and June 30, 1955.

The Board believes that except for cities presenting special considerations warranting permanent certification, those intermediate points which have generated less than five enplaned passengers per day should be certificated for a temporary period of three years. Certification for this period will enable the Board to assess the future traffic development at these points and to consider at a later time whether or not they should be made permanent. These cities will be afforded an opportunity before the expiration of the temporary period to demonstrate their ability to generate a sufficient volume of traffic to warrant permanent certification or continuation of service for a further temporary period.

The Board further believes that a point named in the last certificate issued to the carrier as a point on more than one designated segment in the certificate, but as to which point, pursuant to section 205 of the Board's Economic Regulations, a temporary suspension of service has been granted to the carrier and which point has been served on only one segment because of the authorized temporary suspension of service on the other segment, is eligible to be certificated pursuant to the provisions of section 401 (e) (3) of the act only as a point on the segment where the point was served during the period from May 19, 1955, to May 25, 1955.

Thus, this order will provide that Central will be required to show cause why Paris, Texas, should not be certificated as a point on segment 7 only.

The Board further tentatively concludes that where since the last certificate issued to this carrier the Board has authorized Central, by exemption, to provide service to additional points on a segment or to provide service between points named in such certificate on segments different from that designated in the certificate, the said points are eligible to be certificated pursuant to section 401 (e) (3) of the act as served by the carrier pursuant to such exemptions during the period from May 19, 1955, to May 25, 1955.

Thus, the Board proposes to require the carrier to show cause why the service between the points Ada and Tulsa, Oklahoma, should not be certificated in the manner service was performed during the period from May 19, 1955, to May 25, 1955, and why on segment 7 Dallas, Texas, should not be certificated as an intermediate point and Fort Worth, Texas, as a terminal point, in lieu of the present certificate designation providing for service to the terminal point Dallas-Fort Worth, Texas, through the Amon Carter Airfield.

The Board further concludes that a point which has been authorized for service, has received service from the carrier, but where service has been interrupted and temporarily suspended because of inadequate airport facilities, is eligible for certification pursuant to section 401 (e) (3) of the act even though no service was rendered during the statutory grandfather period, because it is a point at which service has been interrupted for reasons over which the carrier had no control.

Thus, the certificate which the Board proposes to issue to Central pursuant to section 401 (e) (3) of the act, provides for the certification for a period of three years of the intermediate point Sherman-Denison, Texas. The presently effective temporary suspension of service at this point is being continued by the proposed supplementary order set forth below as Appendix B.

The Board further tentatively concludes that a point which has been authorized for service, has received service from the carrier, but which was not served during the statutory grandfather period because service had been temporarily suspended for economic reasons, is not eligible for certification pursuant to section 401 (e) (3) of the act. Such a point is ineligible because it was not served during the statutory grandfather period for economic reasons advanced and supported by the carrier.

Thus, the certificate which the Board proposes to issue to Central in this proceeding will carry forward Central's authority to serve Shawnee and Chickasha, Oklahoma, and Paris, Texas, on segment 2 only for the term of its present temporary authorization.

The Board further believes that the general terms and conditions set forth in the certificate of public convenience and necessity last issued by the Board to Central may not be expanded in a certificate to be issued pursuant to section 401 (e) (3) of the act in such manner as to grant authority to said carrier in excess of that set forth in the certificate of public convenience and necessity last issued to this carrier.

The Board does not believe that authority granted to Central pursuant to § 202.4 and Part 205 of the Economic Regulations of the Board or by temporary exemption, subsequent to the issuance of the last certificate of public convenience and necessity issued by the Board to said air carrier permitting onsegment changes in the service pattern should be incorporated in a certificate issued to Central pursuant to section 401 (e) (3) of the act. In the interest of convenience and clarity the Board will restate the carrier's outstanding service pattern modifications in a single order, a draft of which is set forth below as Appendix B.

It is our intention to strictly limit this proceeding to a consideration of issues directly pertaining to the grant, pursuant to section 401 (e) (3) of the act, of permanent or temporary authority to serve points served by Central during the period from May 19, 1955, to May 25, 1955. We believe the public interest requires expeditious disposition of the proceeding and are therefore adopting a procedure intended to shorten the proceeding while at the same time fully protecting the interests of all interested persons. We are requiring Central to show cause why the Board should not issue an order making final the tentative findings and conclusions set forth in this order and issue a certificate of public convenience and necessity in the form set forth below as Appendix A. After allowing interested persons a reasonable period within which to submit objections to the Board's order, Central's application and the order to show cause will be set for immediate hearing in Washington before a hearing examiner of the Board. Central and all interested persons who desire to be heard in connection with this matter are hereby notified that they may file written objection to the Board's tentative findings and conclusions within 15 days from the date of this order. The hearing will be limited to consideration of the issues raised by such objections. Objections should be in the nature of exceptions, should be brief and concise, and should not contain argument or factual data which the objecting party intends to rely on at the hearing in support of its objections.

It is also our intention to officially notice all reports, tariffs and schedules required to be filed with the board by all air carriers, as well as all public Board reports based on these data,[3] so that these materials need not be specially compiled for the record in this proceeding.

On the basis of the foregoing considerations and the data set forth in Appendixes C, D, E and F [2] hereof, which are hereby incorporated into this order and shall constitute part of the record in this proceeding, the Board finds that:

1. Central is a citizen of the United States of America as defined by section 1 (13) of the act.

2. From January 1, 1953, to May 25, 1955, Central was an air carrier providing within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property and mail pursuant to a temporary certificate of public convenience and necessity issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which Central had no control).

3. Central has continuously served the following terminal and intermediate points during the period from May 19, 1955, to May 25, 1955:

Amarillo, Tex.
Borger, Tex.
Woodward, Okla.
Enid, Okla.
Ponca City, Okla.
Bartlesville, Okla.
Tulsa, Okla.
Muskogee, Okla.
McAlester, Okla.
Dallas, Tex.
Fort Worth, Tex.
Wichita, Kans.
Oklahoma City, Okla.
Ada, Okla.
Ardmore, Okla.
Stillwater, Okla.
Lawton-Fort Sill, Okla.
Duncan, Okla.
Fayetteville, Ark.
Fort Smith, Ark.
Hot Springs, Ark.
Little Rock, Ark.
Kansas City, Mo.
Joplin, Mo.
Paris, Tex.

4. The intermediate point Sherman-Denison, Texas, is eligible for certification pursuant to section 401 (e) (3) although not served during the period May 19, 1955, to May 25, 1955, because service was interrupted for reasons over which Central had no control.

5. The service rendered by Central during the period from February 19, 1953, the date of its last certification, to the present has been adequate and efficient within the meaning of section 401 (e) (3) of the act.

6. The following intermediate points, which, on the basis of the most recent available data have generated an average of five or more enplaned passengers per day, should be designated as points of unlimited duration:

(a) On Central's segment 1, the intermediate point Borger, Tex., Enid, Ponca City, and Bartlesville, Okla.;

(b) On segment 2, the intermediate points Muskogee, Okla., and Dallas, Tex.;

(c) On segment 3, the intermediate points Ponca City, Enid, Oklahoma City, Okla., and Dallas, Tex.;

(d) On segment 5, the intermediate points Lawton-Fort Sill and Duncan, Okla.;

(e) On segment 6, the intermediate points Muskogee, Okla., Fayetteville, Fort Smith, and Hot Springs, Ark.;

(f) On segment 7, the intermediate points Joplin, Mo., Muskogee, Okla., Fayetteville and Ft. Smith, Ark., and Dallas, Texas.

7. On the basis of the most recent available data the following intermediate points have generated less than 5 enplaned passengers per day, and therefore have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification; but that certification of each of said points for a period of 3 years is warranted:

(a) On Central's segment 1, the intermediate point Woodward, Okla.;

(b) On segment 2, the intermediate point McAlester, Okla.;

(c) On segment 3, the intermediate points Ada and Ardmore, Okla.;

(d) On segment 4, the intermediate point Stillwater, Okla.;

(e) On segment 7, the intermediate point Paris, Tex.

8. The intermediate points, Shawnee and Chickasha, Oklahoma, and Paris, Texas, on segment 2 are ineligible for certification pursuant to section 401 (e) (3) of the act since they were not served by Central during the period May 19, 1955, and May 25, 1955, because service was temporarily suspended for economic reasons. It is, however, appropriate to include all Central's effective certificate authority in one document, so Central's present authority to serve Shawnee, Chickasha, and Paris on segment 2 should be carried forward in the certificate to be issued in this proceeding: *Therefore, it is ordered,* That:

1. Central is directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein and issue the proposed certificate of public convenience and necessity in the form set forth below as Appendix A, and further issue the proposed supplementary order in the form set forth below as Appendix B;

2. Central and any other interested person having objection to the issuance of an order making final the tentative findings and conclusions stated herein, or to the issuance of the aforesaid proposed certificate and supplementary order, shall, within 15 days from the date hereof, file written notice of objection with the Board;

3. On the expiration of the 15-day period allowed for the filing of objections, this proceeding shall be set for immediate hearing before an examiner of this Board. The hearing shall be limited to consideration of issues raised by the objections filed;

4. Copies of this order shall be served on Central, the Mayors of Shawnee and Chickasha, Okla., and Sherman-Denison, Texas, the Mayor of each city served by Central during the period May 19, 1955, to May 25, 1955, and every certificated air carrier serving a point served by Central during that period;

5. This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

APPENDIX A

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSARY FOR LOCAL OR FEEDER SERVICE

Central Airlines, Inc., is hereby authorized, subject to the provisions hereinafter set forth, the provisions of Title IV of the Civil Aeronautics Act of 1938, as amended, and the orders, rules and regulations issued thereunder, to engage in air transportation with respect to persons, property and mail, as follows:

1. Between the terminal point Amarillo, Tex., the intermediate points Borger, Tex., Woodward, Enid, Ponca City and Bartlesville, Okla., and the terminal point Tulsa, Okla.;

2. Between the terminal point Tulsa, Okla., the intermediate points Muskogee and McAlester, Okla., Paris and Dallas, Tex., and the terminal point Fort Worth, Tex.;

3. Between the terminal point Fort Worth, Tex., the intermediate points Dallas and Sherman-Denison, Tex., Ardmore and Ada, Okla., and (a) beyond Ada, the terminal point Tulsa, Okla., and (b) beyond Ada, the intermediate points Shawnee, Oklahoma City, Enid and Ponca City, Okla., and the terminal point Wichita, Kans.;

4. Between the terminal point Tulsa, Okla., the intermediate point Stillwater, Okla., and the terminal point Oklahoma City, Okla.;

5. Between the terminal point Oklahoma City, Okla., the intermediate points Chickasha, Lawton-Fort Sill, and Duncan, Okla., and the terminal point Dallas-Fort Worth, Tex. (to be served through the Amon Carter Air Field);

6. Between the terminal point Tulsa, Okla., the intermediate point Muskogee, Okla., and (a) beyond Muskogee, the intermediate points Fayetteville, Fort Smith and Hot Springs, Ark., and the terminal point Little Rock, Ark., and (b) beyond Muskogee, the intermediate points Fort Smith and Hot Springs, Ark., and the terminal point Little Rock, Ark.;

7. Between the terminal point Kansas City, Mo., the intermediate point Joplin, Mo., the alternate intermediate points Muskogee, Okla., and Fayetteville, Ark., the intermediate points Fort Smith, Ark., Paris and Dallas, Tex., and the terminal point Fort Worth, Tex.,

to be known as Route No. 81.

The service herein authorized is subject to the following terms, conditions and limitations:

(1) The holder shall render service to and from each of the points named herein, except as temporary suspensions of service may be authorized by the Board; and may begin or terminate, or begin and terminate, trips at points short of terminal points.

(2) The holder may continue to serve regularly any point named herein through the airport last regularly used by the holder to serve such point prior to the effective date of this certificate. Upon compliance with such procedure relating thereto as may be prescribed by the Board, the holder may regularly serve a point named herein through any airport convenient thereto.

(3) On each trip operated by the holder over all or part of one of the seven numbered route segments in this certificate, the holder shall stop at each point named between the point of origin and point of termination of such trip on such segment, except a point or points with respect to which (a) the Board, pursuant to such procedure as the Board may from time to time prescribe, may by order relieve the holder from the requirements of such condition, (b) the holder is authorized by the Board to suspend service, or (c) the holder is unable to render service on such trip because of adverse weather conditions or other conditions which the holder could not reasonably have been expected to foresee or control.

(4) On each trip scheduled between Little Rock, Ark., and Kansas City, Mo., the holder shall schedule service at a minimum of four points between said points.

The exercise of the privileges granted by this certificate shall be subject to such other reasonable terms, conditions and limitations required by the public interest as may from time to time be prescribed by the Board.

The services authorized by this certificate were originally established pursuant to a determination of policy by the Civil Aeronautics Board that in the discharge of its obligation to encourage and develop air transportation under the Civil Aeronautics Act, as amended, it is in the public interest to establish certain air carriers who will be primarily engaged in short-haul air transportation as distinguished from the service rendered by trunkline air carriers. In accepting this certificate the holder acknowledges and agrees that the primary purpose of the certificate is to authorize and require it to offer short-haul, local or feeder, air transportation service of the character described above.

This certificate shall be effective on ------, 1955: *Provided, however,* That prior to the date on which the certificate would otherwise become effective the Board, either on its own initiative or upon the timely filing of a petition or petitions seeking reconsideration of the Board's order of --------, 1955 (Order No. E---), insofar as such order authorizes the issuance of this certificate may by order or orders extend such effective date from time to time.

[1] Filed as part of the original document.

[2] We will also officially notice the Origination-Destination Airline Traffic Surveys published by the Airline Finance and Accounting Conference from information compiled by the Board.

The authority to serve Paris, Tex., on segment 7, and Woodward, McAlester, Ada, Ardmore and Stillwater, Okla., and Sherman-Denison, Tex., shall continue in effect up to and including _____. The authorization to serve Paris, Tex., on segment 2 and Shawnee and Chickasha, Okla., shall continue in effect up to and including February 19, 1956.

In witness whereof, the Civil Aeronautics Board has caused this certificate to be executed by its Chairman, and the seal of the Board to be affixed hereto, attested by the Secretary of the Board on the ------ day of --------, 1955.

[SEAL] _____
Chairman.

Attest:

_____
Secretary.

APPENDIX B

PROPOSED DRAFT OF ORDER EXTENDING EFFECTIVE PERIOD OF TEMPORARY SERVICE AUTHORIZATIONS

The Board has by Order E-____, dated _____ 1955, granted a certificate of public convenience and necessity of unlimited duration to Central Airlines, Inc. (Central), authorizing Central to engage in air transportation of persons, property and mail over route No. 81. In the past, Central has been authorized to conduct operations differing in certain particulars from the authority stated in its temporary certificate of public convenience and necessity for route No. 81.

The term of effectiveness of some of these authorizations is unlimited, while others would expire sixty days after final determination by the Board in any proceeding involving renewal of route No. 81 or at the end of a stated period. The reasons for issuance of these temporary authorizations appear to be still applicable to Central in its operation under the certificate of unlimited duration concurrently issued herewith. It, therefore, appears to the Board that it is in the public interest and consistent with the Act to continue these outstanding temporary authorizations in effect for an additional period of time. In extending these authorizations, it appears desirable to include all currently effective authorizations which are not included in or disposed of in the new certificate in one order which will become effective at the same time the new certificate of unlimited duration becomes effective.

Accordingly, the Board, acting pursuant to sections 205 (a) and 416 (b) of the Civil Aeronautics Act of 1938, as amended, and to § 202.4 and Part 205 of its Economic Regulations, finds:

1. That the enforcement of the provisions of section 401 (a) of the Act and of Central's certificate, insofar as it would otherwise prevent the operations hereinafter authorized, would be an undue burden upon Central by reason of the limited extent of, or unusual circumstances affecting its operations and is not in the public interest;

2. That the enforcement of the condition in Central's certificate which requires it on each flight over all or part of the several numbered route segments on route No. 81 to stop at each point named between the point of origin and the point of termination of such flight unless otherwise authorized by the Board, to the extent that it would prevent the service pattern hereinafter authorized, would prevent a service pattern which is in the public interest and which is consistent with Central's performance of a local or feeder air transportation service and is not required by nor is it in the public interest;

3. That the temporary suspensions of service authorized hereinafter do not substantially change the character of the service for which the certificate of public convenience and necessity of unlimited duration is being granted to Central and are otherwise in the public interest;

4. The authority granted by ordering paragraph 1 of Order E-8688, October 7, 1954, authorizing Central to provide service between Ada and Tulsa, Okla., should be terminated because the point Tulsa is included as a terminal point on segment 3 of the certificate being issued to Central concurrently with this order.

5. The authority granted by Order E-8765, November 17, 1954, which exempted Central from serving the point Ft. Worth-Dallas on segment 7 through Amon Carter Air Field and authorized Central to serve Dallas through Love Field as an intermediate point on segment 7 should be terminated because Dallas is included as an intermediate point on segment 7 in the certificate being issued to Central concurrently with this order: *Accordingly, it is ordered*, That:

1. Central be and hereby is authorized to suspend service temporarily at Chickasha, Oklahoma, an intermediate point on segment 5 of route No. 81 (previously authorized by Order E-9016);

2. Central be and hereby is authorized to suspend service at Sherman-Denison, Tex., on segment 3 of route No. 81 until adequate airport facilities are available at said point for use by Central with equipment operated by it in scheduled air carrier operations (previously authorized by Order E-5395);

3. Central be and hereby is authorized temporarily to suspend service at Shawnee, Oklahoma, and Paris, Texas on segment 2. This authority shall expire on December 31, 1955 (previously authorized by ordering paragraph 2 of Order E-8688);

4. Central be and hereby is authorized to omit service at Enid or Ponca City, Oklahoma, but not both, on flights in excess of two one-way trips per day over segment 1. This authority shall expire on December 31, 1955 (previously authorized by ordering paragraph 3 of Order E-8688);

5. Central be and hereby is authorized to omit service at Woodward, Oklahoma, an intermediate point on segment 1 of route No. 81, on all flights in excess of one round trip per day at said point for the duration of its existing authority to serve the said point (previously authorized by Order E-8360);

6. Central be and hereby is exempted temporarily from the provisions of section 401 (a) of the act, insofar as the said provisions would otherwise prevent Central from serving Sherman-Denison, Texas, as an intermediate point between Dallas, Texas, and McAlester, Oklahoma, on segment 2 of its route No. 81 in lieu of service to and from the aforesaid point on segment 3 of its route. This authority shall continue in effect for a period of one year from September 26, 1955 (previously authorized by Order E-9588);

7. Central be and hereby is authorized to render flag-stop service on its route No. 81 by omitting the physical landings of its aircraft at any intermediate point scheduled to be served on a particular flight: *Provided*, That there are no persons, property or mail on the aircraft destined for such point and no such traffic available at such point for the flight at the scheduled time of departure: *Provided, further*, That the Board in its discretion may at any time disapprove the use of such authority with respect to service to any point on any flight or flights (previously authorized by Order E-6545);

8. The authority previously granted to Central by Orders E-5395, E-6545, E-8360, E-8688, E-8765, E-9016 and E-9588 shall be terminated on the date this order and the certificate of public convenience and necessity of unlimited duration for route No. 81 being issued to Central concurrently with the issuance of this order become effective.

9. The change in service pattern, temporary suspension and temporary exemption authorizations granted herein shall become effective _____, _____, concurrently with the effective date of the certificate issued to Central in Docket No. 7178;

10. This order or any part thereof may be amended or revoked at any time in the discretion of the Board without notice and without hearing.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[F. R. Doc. 55-8359; Filed, Oct. 13, 1955; 8:47 a. m.]

[Docket No. 7357; Order E-9634]

PIEDMONT AVIATION, INC.

STATEMENT OF TENTATIVE FINDINGS AND CONCLUSIONS AND ORDER TO SHOW CAUSE [1]

Adopted by the Civil Aeronautics Board at its office in Washington, D. C. on the 7th day of October 1955.

In the matter of the application of Piedmont Aviation, Inc., under section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended, for a certificate of public convenience and necessity of unlimited duration for Route No. 87.

Piedmont Aviation, Inc. (Piedmont) on August 15, 1955, filed an application pursuant to section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended (the act), requesting the Board to issue Piedmont a certificate of public convenience and necessity of unlimited duration for route No. 87 authorizing air transportation of persons, property and mail between certain named points.

Section 401 (e) (3) of the act (effective May 19, 1955) provides: "If any applicant who makes application for a certificate within one hundred and twenty days after the date of enactment of this paragraph shall show that, from January 1, 1953, to the date of its application, it or its predecessor in interest, was an air carrier furnishing, within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property, and mail, under a temporary certificate of public convenience and necessity issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which the applicant or its predecessors in interest have no control) the Board, upon proof of such fact only, shall, unless the service rendered by such applicant during the period since its last certification has been inadequate and inefficient, issue a certificate or certificates of unlimited duration, authorizing such applicant to engage in air transportation between the terminal and intermediate points within the continental limits of the United States between which it, or its predecessor, so continuously operated between the date of enactment of this paragraph and the date of its application: Provided, That the Board in issuing the certificate is empowered to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points it finds have generated

[1] This statement does not necessarily represent the views of all Members of the Board with respect to all issues.

insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification at such time."

Piedmont alleges in its application that it is a citizen of the United States of America as defined by section 1 (13) of the act. Proof of this fact has been submitted by Piedmont in other certification proceedings and no information to the contrary has since come to the knowledge of the Board.

Piedmont further alleges in its application that it has continuously operated as an air carrier furnishing local or feeder air transportation of persons, property and mail within the continental limits of the United States during the period January 1, 1953, to the date of its application under a temporary certificate of public convenience and necessity for route No. 87 issued by the Board, except as to interruptions of service over which it had no control. The various schedules and reports required to be filed with the Board by local service carriers indicate that Piedmont has so continuously operated since January 1, 1953.

Section 401 (e) (3) of the act requires in effect that the Board find as a prerequisite to the granting of a certificate of unlimited duration to Piedmont that the service rendered by Piedmont during the period since its last certification has not been inadequate or inefficient. The carrier in its application for such certificate filed August 15, 1955, alleges its service rendered during the aforesaid period has been adequate and efficient. The Board during the said period has received no complaints from the public relating to the overall service provided by this carrier. The Board is possessed of no information from which it could find that, considered as a whole, the service provided by this carrier during the period from May 26, 1952, the date of Piedmont's last certificate for route No. 87, to the present has been inadequate or inefficient within the meaning of section 401 (e) (3) of the act.

Piedmont further alleges in its application that it has from the date of the enactment of section 401 (e) (3) (May 19, 1955) to the date of its application, continuously served the following terminal and intermediate points:

Cincinnati, Ohio.
Louisville, Ky.
Lexington, Ky.
London-Corbin, Ky.
Bristol, Virginia-Tennessee-Kingsport-Johnson City, Tenn.
Asheville, N. C.
Hickory, N. C.
Charlotte, N. C.
Fayetteville, N. C.
Wilmington, N. C.
New Bern, N. C.
Winston-Salem, N. C.
Greensboro-High Point, N. C.
Raleigh-Durham, N. C.
Kinston, N. C.
Norfolk, Va.
Newport News-Hampton-Warwick, Va.
Richmond, Va.
Lynchburg, Va.
Roanoke, Va.
Princeton-Bluefield, W. Va.
Beckley, W. Va.
Charleston, W. Va.
Parkersburg, W. Va.-Marietta, Ohio.
Columbus, Ohio.
Ashland, Kentucky-Huntington, W. Va.
Danville, Va.
Knoxville, Tenn.

Piedmont is authorized to serve Morehead City-Beaufort, North Carolina, and Myrtle Beach, South Carolina, only during the period between May 1 and September 30, inclusive, of each year and to serve Southern Pines-Pinehurst-Aberdeen, North Carolina only during the period from October 1 to April 30, inclusive, of each year. By Order E-8183, March 25, 1954, the Board authorized Piedmont to suspend service at Morehead City-Beaufort and Myrtle Beach from May 1 through May 31, inclusive, of each year and for that part of September beginning twenty-four hours after Labor Day through September 30, inclusive, of each year. Therefore, Morehead City-Beaufort and Myrtle Beach were not continuously served during the statutory grandfather period, May 19, 1955, to August 15, 1955, and Southern Pines-Pinehurst-Aberdeen received no service during the grandfather period. All three points were continuously served throughout the seasonal period authorized for service by the Board; therefore, we believe the points are eligible for certification in this proceeding. Since the purpose of the amendment to the Act appears to be the desire of Congress to preserve services as previously operated, we do not believe section 401 (e) (3) should be interpreted to exclude points continuously served on a seasonal basis during particular months of the year which do not coincide with the period established by the Act, namely May 19, 1955 to August 15, 1955. See Mayflower Airlines, Inc.-Grandfather Certificate, 2 CAB 175 (1940); Pan American Airways, Inc., Fairbanks-Nome-Bethel, 3 CAB 902 (1942).

Section 401 (e) (3) provides in effect that all terminal points served by the local service carrier applicant during the period from May 19, 1955, to August 15, 1955, shall be certificated for a period of unlimited duration. The certificate we propose to issue to Piedmont (which is set forth below as Appendix A) accomplishes this.

Section 401 (e) (3) empowers the Board to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points the Board finds have generated insufficient traffic to warrant a finding that the public convenience and necessity require permanent certification. The Board has proposed an industry-wide traffic standard upon which to base a tentative conclusion as to whether a particular intermediate point should be permanently or temporarily certificated. A standard which can be applied on an industry-wide basis will assure that all the intermediate cities are equitably treated. The Board has concluded, on the basis of an analysis of the latest available traffic data, that an average of five or more passengers enplaned per day provides a reasonable basis for selection of those intermediate points to be permanently certificated at this time.

As indicated above, the recent amendment of the act provides for the certification for an unlimited duration of all terminal points and of at least one-half of the intermediate points named in the certificate. This means that in the future the applicant carrier will be providing services over permanently certificated segments. During the years of local service carrier experience, the Board, in consideration of the subsidized nature of the operation, has found that on-line intermediate points generating in the neighborhood of 300 passengers on and off monthly have borne a reasonable share of the expense incurred by the carrier in providing service to the intermediate point on existing flights. In the past, the Board has also found that local service carrier points generating in the neighborhood of five or more enplaned passengers per day have warranted recertification. This leads us to conclude that, in the absence of a further showing, the five passenger per day standard is a reasonable one for selecting those intermediate points to be permanently certificated.

The proposed certificate which is set forth below as Appendix A grants Piedmont permanent authority at those intermediate stations shown in Appendixes C, D and E [2] to have met this five-passenger per day standard and temporary authority at all other intermediate stations served by Piedmont during the period May 19, 1955, to August 15, 1955. Appendixes C and D set forth in tabular form, the average number of daily passengers enplaned at each Piedmont intermediate point for the calendar year 1954 and for the twelve-month periods ended March 31, 1955, and June 30, 1955. The average number of passengers enplaned at intermediate points generating less than five passengers per day is set forth in Appendix E on a quarterly basis for the years 1952, 1953, and 1954 and for the twelve-month periods ended March 31, 1955, and June 30, 1955.

The Board believes that except for cities presenting special considerations warranting permanent certification, those intermediate points which have generated less than five enplaned passengers per day should be certificated for a temporary period of three years. Certification for this period will enable the Board to assess the future traffic development at these points and to consider at a later time whether or not they should be made permanent. These cities will be afforded an opportunity before the expiration of the temporary period to demonstrate their ability to generate a sufficient volume of traffic to warrant permanent certification or continuation of service for a further temporary period.

It is also the Board's tentative conclusion that under the provisions of section 401 (e) (3) of the act a point named in Piedmont's presently effective certificate of public convenience and necessity for route No. 87 which has never been served by Piedmont or where service was first instituted after the statutory grandfather period, is not eligible for inclusion as a point in any certificate that may be issued to Piedmont pursuant to said section of the Act.

[2] Filed as part of the original document.

Thus, the certificate which the Board proposes to issue to Piedmont pursuant to section 401 (e) (3) of the act, will carry forward Piedmont's authority to serve Charlottesville, Virginia, on segment 2, and Middlesboro-Harlan, Kentucky, only for the term of its present temporary authorization. The presently effective temporary suspension of service at Middleboro-Harlan is being continued by the proposed supplementary order set forth below as Appendix B.

The Board further tentatively concludes that a point which has been authorized for service by the Board by certificate amendment becoming effective during the statutory grandfather period but which point was not served by the carrier pursuant to that authority during the grandfather period is ineligible for permanent certification pursuant to section 401 (e) (3) of the act because the point was not continuously served during the statutory grandfather period. See, Pan American Airways, Inc.-Certificate of Public Convenience, 2 C. A. B. 111 (1940). The Board will, therefore, carry forward the carrier's present temporary authority to serve such points for the term of the temporary authorization.

Thus, the proposed certificate set forth below as Appendix A carries forward Piedmont's temporary certificate authority to serve the intermediate point Charlottesville, Virginia, and the terminal point Washington, D. C., on segment 4 for the term of Piedmont's present temporary authorization.

The Board further believes that a point named in the last certificate issued to the carrier as a point on more than one designated segment in the certificate, but as to which point, pursuant to § 202.4 of the Board's Economic Regulations, a temporary omission of service has been granted to the carrier and which point has been served on only one segment because of the authorized temporary omission of service on the other segment, is eligible to be certificated pursuant to the provisions of section 401 (e) (3) of the act only as a point on the segment where the point was served as authorized.

Thus, this order will require Piedmont to show cause why the point Morehead City-Beaufort, North Carolina, should not be certificated pursuant to the provisions of section 401 (e) (3) of the act as a terminal point on segment 1 (b) only. Piedmont's present authority to serve Morehead City-Beaufort on segment 1 (a) will be carried forward in the certificate to be issued in this proceeding for the term of its present temporary authorization and the presently effective authorization to omit service at Morehead City-Beaufort on segment 1 (a) will be carried forward in the supplementary order set forth below as Appendix B.

The Board further tentatively concludes that where since the last certificate issued to this carrier the Board has authorized Piedmont, by exemption, to provide service between points named in such certificate on segments different from that designated in the certificate, the said points are eligible to be certificated pursuant to section 401 (e) (3) of the act as served by the carrier pursuant to such exemption during the period from May 19, 1955, to August 15, 1955.

Thus, the Board proposes to require the carrier to show cause why Ashland, Kentucky-Huntington, West Virginia, should not be permanently certificated as an alternate intermediate point to Lexington, Kentucky, on segment 1 and why Princeton-Bluefield, West Virginia, should not be permanently certificated as an intermediate point on segment 4.

The Board further believes that the general terms and conditions set forth in the certificate of public convenience and necessity last issued by the Board to Piedmont may not be expanded in a certificate to be issued pursuant to section 401 (e) (3) of the act in such manner as to grant authority to said carrier in excess of that set forth in the certificate of public convenience and necessity last issued to this carrier.

The Board does not believe that authority granted to Piedmont pursuant to § 202.4 and Part 205 of the Economic Regulations of the Board, subsequent to the issuance of the last certificate of public convenience and necessity issued by the Board to said air carrier permitting on-segment changes in the service pattern should be incorporated in a certificate issued to Piedmont pursuant to section 401 (e) (3) of the act. In the interest of convenience and clarity the Board will restate the carrier's outstanding service pattern modifications in a single order, a draft of which is set forth below as Appendix B.

It is our intention to strictly limit this proceeding to a consideration of issues directly pertaining to the grant, pursuant to section 401 (e) (3) of the act, of permanent or temporary authority to serve points served by Piedmont during the period from May 19, 1955, to August 15, 1955. We believe the public interest requires expeditious disposition of the proceeding and are therefore adopting a procedure intended to shorten the proceeding while at the same time fully protecting the interests of all interested persons. We are requiring Piedmont to show cause why the Board should not issue an order making final the tentative findings and conclusions set forth in this order and issue a certificate of public convenience and necessity in the form set forth below as Appendix A. After allowing interested persons a reasonable period within which to submit objections to the Board's order, Piedmont's application and the order to show cause will be set for immediate hearing in Washington before a hearing examiner of the Board. Piedmont and all interested persons who desire to be heard in connection with this matter are hereby notified that they may file written objection to the Board's tentative findings and conclusions within 15 days from the date of this order. The hearing will be limited to consideration of the issues raised by such objections. Objections should be in the nature of exceptions, should be brief and concise, and should not contain argument or factual data which the objecting party intends to rely on at the hearing in support of its objections.

It is also our intention to officially notice all reports, tariffs and schedules required to be filed with the Board by all air carriers, as well as all public Board reports based on these data,[2] so that these materials need not be specially compiled for the record in this proceeding.

On the basis of the foregoing considerations and the data set forth in Appendixes C, D, E, and F[1] hereof, which are hereby incorporated into this order and shall constitute part of the record in this proceeding, the Board finds that:

1. Piedmont is a citizen of the United States of America as defined by section 1 (13) of the Act.

2. From January 1, 1953, to August 15, 1955, Piedmont was an air carrier providing within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property and mail pursuant to a temporary certificate of public convenience and necessity for route No. 87 issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which Piedmont had no control).

3. Piedmont has continuously served the following terminal and intermediate points during the period from May 19, 1955, to August 15, 1955:

Cincinnati, Ohio.
Louisville, Ky.
Lexington, Ky.
London-Corbin, Ky.
Bristol, Virginia-Tennessee-Kingsport-Johnson City, Tenn.
Asheville, N. C.
Hickory, N. C.
Charlotte, N. C.
Fayetteville, N. C.
Wilmington, N. C.
New Bern, N. C.
Winston-Salem, N. C.
Greensboro-High Point, N. C.
Raleigh-Durham, N. C.
Kinston, N. C.
Norfolk, Va.
Newport News-Hampton-Warwick, Va.
Richmond, Va.
Lynchburg, Va.
Roanoke, Va.
Princeton-Bluefield, W. Va.
Beckley, W. Va.
Charleston, W. Va.
Parkersburg, W. Va.-Marietta, Ohio.
Columbus, Ohio.
Ashland, Kentucky-Huntington, W. Va.
Danville, Va.
Knoxville, Tenn.

4. Piedmont has continuously served the points Morehead City-Beaufort, North Carolina, on segment 1 (b), Myrtle Beach, South Carolina, and Southern Pines - Pinehurst - Aberdeen, North Carolina, during the period of its seasonal authorization and these points are eligible for certification on a seasonal basis pursuant to section 401 (e) (3) of the act.

5. The service rendered by Piedmont, during the period from May 26, 1952, the date of its last certification, to the present has been adequate and efficient within the meaning of section 401 (e) (3) of the act.

[1] Filed as part of the original document.

[2] We will also officially notice the Origination-Destination Airline Traffic Surveys published by the Airline Finance and Accounting Conference from information compiled by the Board.

6. The following intermediate points, which on the basis of the most recent available data have generated an average of five or more enplaned passengers per day, should be designated as points of unlimited duration:

(a) On Piedmont's segment 1, the intermediate points Lexington, Kentucky, Ashland, Kentucky-Huntington, West Virginia, Bristol, Virginia-Tennessee-Kingsport, Tennessee-Johnson City, Tennessee, Ashville, Hickory, Charlotte, Southern Pines-Pinehurst-Aberdeen, Fayetteville, Wilmington, Winston-Salem, Greensboro-High Point, Raleigh-Durham, Kinston, North Carolina, New Bern, North Carolina on segment 1 (b);

(b) On segment 2, the intermediate points Newport News-Hampton-Warwick, Richmond, Lynchburg, Roanoke, Virginia, Princeton-Bluefield, Beckley, Charleston, West Virginia, Parkersburg, West Virginia-Marietta, Ohio, Ashland, Kentucky-Huntington, West Virginia, and Lexington, Kentucky;

(c) On segment 3, the intermediate points Winston-Salem, Greensboro-High Point, Raleigh-Durham, and Fayetteville, North Carolina, and Myrtle Beach, South Carolina;

(d) On segment 4, the intermediate points Bristol, Virginia-Tennessee-Kingsport-Johnson City, Tennessee, Princeton-Bluefield, West Virginia, Roanoke, and Lynchburg, Virginia.

7. On the basis of the most recent available data the following intermediate points have generated less than an average of five enplaned passengers per day, and therefore have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification; but that certification of each of said points for a period of three years is warranted:

(a) On Piedmond's segment 1, the intermediate point London-Corbin, Kentucky;

(b) On segment 3, the intermediate point Danville, Virginia.

8. The points Charlottesville, Virginia, Washington, D. C., Morehead City-Beaufort, North Carolina, on segment 1 (a) and Middlesboro-Harlan, Kentucky, are ineligible for certification pursuant to section 401 (e) (3) of the act because they were not served by Piedmont during the period May 19, 1955, to August 15, 1955. It is, however, appropriate to include all Piedmont's effective certificate authority in one document, so Piedmont's present temporary authority to serve these points should be carried forward in the certificate to be issued in this proceeding: *Therefore it is ordered*, That:

1. Piedmont is directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein and issue the proposed certificate of public convenience and necessity in the form attached hereto as Appendix A, and further issue the proposed supplementary order in the form set forth below as Appendix B;

2. Piedmont and any other interested person having objection to the issuance of an order making final the tentative findings and conclusions stated herein, or to the issuance of the aforesaid proposed certificate and supplementary order, shall, within 15 days from the date hereof, file written notice of objection with the Board;

3. On the expiration of the 15-day period allowed for the filing of objections, this proceeding shall be set for immediate hearing before an examiner of this Board. The hearing shall be limited to consideration of issues raised by the objections filed;

4. Copies of this order shall be served on Piedmont, the Mayors of Charlottesville, Virginia, Middlesboro-Harlan, Kentucky, Southern Pines, Pinehurst, and Aberdeen, North Carolina, the Board of Commissioners of the District of Columbia, the Mayor of each city served by Piedmont during the period May 19, 1955, to August 15, 1955, and on every certificated air carrier serving a point served by Piedmont during that period;

5. This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

APPENDIX A

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR LOCAL OR FEEDER SERVICE

Piedmont Aviation, Inc., is hereby authorized, subject to the provisions hereinafter set forth, the provisions of Title IV of the Civil Aeronautics Act of 1938, as amended, and the orders, rules and regulations issued thereunder, to engage in air transportation with respect to persons, property, and mail, as follows:

1. Between the alternate terminal points Cincinnati, Ohio, and Louisville, Ky., the alternate intermediate points Lexington, Ky., and Ashland, Ky.-Huntington, W. Va., the intermediate points London-Corbin and Middlesboro-Harlan, Ky., and Bristol, Va.-Tenn.-Kingsport-Johnson City, Tenn., and (a) beyond Bristol, Va.-Tenn.-Kingsport-Johnson City, Tenn., the alternate intermediate points Asheville and Hickory, N. C., the intermediate points Charlotte, Southern Pines-Pinehurst-Aberdeen, Fayetteville, Wilmington, Morehead City-Beaufort, N. C., and the terminal point New Bern, N. C., and (b) beyond Bristol, Va.-Tenn.-Kingsport-Johnson City, Tenn., the intermediate points Hickory, Winston-Salem, Greensboro-High Point, Raleigh-Durham, Kinston and New Bern, N. C., and the terminal point Morehead City-Beaufort, N. C.;

2. Between the terminal point Norfolk, Va., the intermediate points Newport News-Hampton-Warwick, Richmond, Charlottesville, Lynchburg and Roanoke, Va., Princeton-Bluefield and Beckley, W. Va., and (a) beyond Beckley, W. Va., the intermediate point Lexington, Ky., and the terminal point Louisville, Ky., and (b) beyond Beckley, W. Va., the intermediate point Charleston, W. Va., and (1) beyond Charleston, W. Va., the intermediate point Parkersburg, W. Va., Marietta, Ohio, and the terminal point Columbus, Ohio, and (11) beyond Charleston, W. Va., the intermediate point Ashland, Ky.-Huntington, W. Va., and the terminal point Cincinnati, Ohio;

3. Between the terminal point Roanoke, Va., the alternate intermediate points Danville, Va., and Winston-Salem, N. C., the intermediate points Greenboro-High Point, Raleigh-Durham, and Fayetteville, N. C., Myrtle Beach, S. C., and the terminal point Wilmington, N. C.;

4. Between the terminal point Knoxville, Tenn., the intermediate points Bristol, Va.-Tenn.-Kingsport-Johnson City, Tenn., Princeton-Bluefield, W. Va., Roanoke and Lynchburg, Va., and (a) beyond Lynchburg, Va., the intermediate point Charlottesville, Va., and the terminal point Washington, D. C., and (b) beyond Lynchburg, Va., the terminal point Richmond, Va.,

to be known as Route No. 87.

The service herein authorized is subject to the following terms, conditions and limitations:

(1) The holder shall render service to and from each of the points named herein, except as temporary suspensions of service may be authorized by the Board; and may begin or terminate, or begin and terminate, trips at points short of terminal points.

(2) The holder may continue to serve regularly any point named herein through the airport last regularly used by the holder to serve such point prior to the effective date of this certificate. Upon compliance with such procedure relating thereto as may be prescribed by the Board, the holder may regularly serve a point named herein through any airport convenient thereto.

(3) On each trip operated by the holder over all or part of one of the four numbered route segments in this certificate, the holder shall stop at each point named between the point or origin and point of termination of such trip on such segment, except a point or points with respect to which (a) the Board, pursuant to such procedure as the Board may from time to time prescribe, may by order relieve the holder from the requirements of such condition, (b) the holder is authorized by the Board to suspend service, or (c) the holder is unable to render service on such trip because of adverse weather conditions or other conditions which the holder could not reasonably have been expected to foresee or control.

(4) The holder shall serve Morehead City-Beaufort, N. C., on segment No. 1, above; and Myrtle Beach, S. C., on segment No. 3, above, only during the period between May 1 and September 30, inclusive, of each year.

(5) The holder shall serve Southern Pines-Pinehurst-Aberdeen, N. C., on segment No. 1, above, only during the period between October 1 and April 30, inclusive, of each year.

(6) Notwithstanding the provisions of paragraph (3) above, the holder may operate nonstop service between Charleston, W. Va., and Columbus, Ohio.

(7) The holder shall not serve on the same flight Washington, D. C., on the one hand, and Danville, Va., Richmond, Va., Norfolk, Va., Winston-Salem, N. C., or Greensboro-High Point, N. C., on the other hand.

(8) The holder shall not serve Ashland, Ky.-Huntington, W. Va., on flights serving Louisville, Ky., on segment 1.

The exercise of the privileges granted by this certificate shall be subject to such other reasonable terms, conditions and limitations required by the public interest as may from time to time be prescribed by the Board.

The services authorized by this certificate were originally established pursuant to a determination of policy by the Civil Aeronautics Board that in the discharge of its obligation to encourage and develop air transportation under the Civil Aeronautics Act, as amended, it is in the public interest to establish certain air carriers who will be primarily engaged in short-haul air transportation as distinguished from the service rendered by trunkline air carriers. In accepting this certificate the holder acknowledges and agrees that the primary purpose of this certificate is to authorize and require it to offer short-haul, local or feeder, air transportation service of the character described above.

This certificate shall be effective on ------, 1955; *Provided, however*, That prior to the date on which the certificate would otherwise become effective the Board, either on its own initiative or upon the timely filing of a petition or petitions seeking reconsideration of the Board's order of ------,

1955, (Order E-____) insofar as such order authorizes the issuance of this certificate may by order or orders extend such effective date from time to time. The authority to serve Morehead City-Beaufort, N. C., on segment 1 (a) shall terminate on July 25, 1953.[1] The authority to serve segment 4 between Lynchburg, Va., and Washington, D. C., via Charlottesville, Va., shall terminate on July 15, 1958. The authority to serve London-Corbin, Kentucky and Danville, Virginia shall continue in effect up to and including ----------. The authority to serve Charlottesville, Virginia, on segment 2 and Middlesboro-Harlan, Kentucky shall continue in effect up to and including December 31, 1957.

In witness whereof, the Civil Aeronautics Board has caused this certificate to be executed by its Chairman and the seal of the Board to be affixed hereto, attested by the Secretary of the Board, on the ____ day of ----------, 1955.

[SEAL] ROSS RIZLEY,
Chairman.

Attest:

Secretary.

APPENDIX B

PROPOSED DRAFT OF ORDER EXTENDING EFFECTIVE PERIOD OF TEMPORARY SERVICE AUTHORIZATIONS

The Board has by Order E-__, dated ----------, 1955, granted a certificate of public convenience and necessity of unlimited duration to Piedmont Aviation, Inc. (Piedmont) authorizing Piedmont to engage in air transportation of persons, property and mail over route No. 87. In the past, Piedmont has been authorized to conduct operations differing in certain particulars from the authority stated in its temporary certificate of public convenience and necessity for route No. 87.

The term of effectiveness of some of these authorizations is unlimited, while others would expire sixty days after final determination by the Board in any proceeding involving renewal of route No. 87 or at the end of a stated period. The reasons for issuance of these temporary authorizations appear to be still applicable to Piedmont in its operation under the certificate of unlimited duration concurrently issued herewith. It, therefore, appears to the Board that it is in the public interest and consistent with the act to continue these outstanding temporary authorizations in effect for an additional period of time. In extending these authorizations, it appears desirable to include all currently effective authorizations which are not included in or disposed of in the new certificate in one order which will become effective at the same time the new certificate of unlimited duration becomes effective.

Accordingly, the Board, acting pursuant to section 205 (a) of the Civil Aeronautics Act of 1938, as amended, and to § 202.4 and Part 205 of the Economic Regulations, finds that:

1. The enforcement of the condition in Piedmont's certificate which requires it on each flight over all or part of the several numbered route segments on route No. 87 to stop at each point named between the point of origin and the point of termination of such flight unless otherwise authorized by the Board, to the extent that it would prevent the service pattern hereinafter authorized, would prevent a service pattern which is in the public interest and which is consistent with Piedmont's performance of a local or feeder air transportation service and is not required by nor is it in the public interest;

2. The temporary suspensions of service authorized hereinafter do not substantially change the character of the service for which the certificate of public convenience and necessity of unlimited duration is being granted to Piedmont and are otherwise in the public interest;

3. Piedmont was authorized by Order E-6605, July 14, 1952, to omit service at Beckley, West Virginia, on flights scheduled to arrive during hours of darkness provided that the point be served by two round trip flights daily. Subsequently the carrier was authorized by Order E-6633, July 25, 1952, to omit stops at Beckley on all flights in excess of two daily round trips on segment 2 (a) and on segment 2 (b). By Order E-7488, June 17, 1953, Piedmont was authorized to omit service at Beckley on all flights in excess of one daily round trip over segment 2 (a). The authority granted by Orders E-6605, E-6633, and E-7488 should and will be terminated and the presently effective authority granted to Piedmont by these orders will be restated in this order.

4. The authority granted by Order E-8714, October 19, 1954, insofar as it authorized service to Ashland-Huntington, West Virginia, as an alternate intermediate point to Lexington, Kentucky, on segment 1 and service to Princeton-Bluefield, West Virginia, as an intermediate point between Roanoke, Virginia, and Bristol, Virginia-Tennessee-Kingsport-Johnson City, Tennessee, on segment 4 should and will be terminated because the point Ashland-Huntington is included as an alternate intermediate point to Lexington on segment 1, and Princeton-Bluefield is included as an intermediate point on segment 4 of the certificate to be issued to Piedmont concurrently with this order: *Accordingly, it is ordered,* That:

1. Piedmont be and hereby is authorized to suspend service temporarily at Middlesboro-Harlan, Ky., until such time as adequate airport facilities become available (previously authorized by Order E-1163);

2. Piedmont be and hereby is authorized to omit service at Asheville, N. C., on flights over segment 1 of route No. 87, which flights would serve Asheville, N. C., during hours of darkness: *Provided,* That Piedmont shall serve Asheville, N. C., on at least two daily round trip flights over segment 1 of said route until such time as the lighting facilities at Asheville-Henderson Airport are adequate to permit scheduled air carrier operations at said airport during hours of darkness (previously authorized by Order E-3329);

3. Piedmont be and hereby is authorized to omit stops at the following points authorized to be served under the certificate issued for route No. 87:

(a) At Hickory, N. C., on segment 1 (b) on flights in excess of one round trip daily;

(b) At Aberdeen-Southern Pines-Pinehurst, N. C., on flights in excess of one round trip daily;

(c) At Lynchburg and Newport News, Va., on flights in excess of three daily round trips over segment 2 (previously authorized by ordering paragraph 3 of Order E-6460);

4. Piedmont be and hereby is authorized to omit service at Beckley, West Virginia, an intermediate point on segment 2 of route No. 87, on flights scheduled to arrive at said point during hours of darkness until such time as lighting facilities at the Beckley airport are adequate to permit landings by Piedmont during hours of darkness: *Provided,* That Piedmont shall serve Beckley on at least one round trip daily on segment 2 (a) and on at least two rounds trips daily on segment 2 (b) (previously authorized by Orders E-6605, E-6633, and E-7488);

5. Piedmont be and hereby is authorized to omit service at Morehead City-Beaufort, North Carolina, an intermediate point on its route segment 1 (a) of route No. 87 between Wilmington, North Carolina, and New Bern, North Carolina, during the period May 1 through September 30 of each year: *Provided,* That during that period Morehead City-Beaufort is served on at least one round trip flight daily on segment 1 (b). This authority shall continue in effect until 60 days after final decision has been made by the Board in Piedmont's application in Docket No. 6059 (previously authorized by Order E-7302);

6. Piedmont be and hereby is authorized to omit service at Lexington, Kentucky, on one round-trip flight daily between Louisville, Kentucky, and Bristol, Virginia-Tennessee-Kingsport, Tennessee-Johnson City, Tennessee, over segment 1 of route No. 87: *Provided,* That Lexington shall continue to be served by at least two daily round trip flights to and from Bristol, Virginia-Tennessee-Kingsport, Tennessee-Johnson City, and Louisville, Kentucky (previously authorized by Order E-7360);

7. Piedmont be and hereby is authorized to overfly London-Corbin, an intermediate point on segment 1 of route no. 87, on flights in excess of one daily one-way trip southbound, and in excess of two daily one-way trips northbound, through December 31, 1955 (previously authorized by Order E-8660);

8. Piedmont be and hereby is authorized to omit service at Princeton-Bluefield, West Virginia, an intermediate point on segment 2 of route No. 87, on flights in excess of three daily round trips (previously authorized by Order E-9202);

9. Piedmont be and hereby is authorized to suspend service at Morehead City-Beaufort, a terminal point on segment 1 of route No. 87, and at Myrtle Beach, an intermediate point on segment 3 of the aforesaid route No. 87, from May 1 through May 31, inclusive, each year and for that part of September beginning 24 hours after Labor Day and through September 30, inclusive, each year (previously authorized by Order E-8183);

10. Piedmont be and hereby is authorized to render flag-stop service on its route No. 87, by omitting the physical landing of its aircraft at any intermediate point scheduled to be served on a particular flight: *Provided,* That there are no persons, property or mail on the aircraft destined for such point and no such traffic available at such point for the flight at the scheduled time of departure: *Provided, further,* That the Board in its discretion may at any time disapprove the use of such authority with respect to service to any point on any flight or flights (previously authorized by Orders E-5695 and E-6139);

11. The authority previously granted to Piedmont by Orders E-1163, E-3329, E-5695, and E-6139 insofar as they pertain to Piedmont, ordering paragraph 3 of E-6460, E-6605, E-6633, E-7488, E-7302, E-7360, E-8669, E-9202, E-8183 and E-871 shall be terminated on the date this order and the certificate of public convenience and necessity of unlimited duration for route No. 87 being issued to Piedmont concurrently with the issuance of this order become effective.

12. The change in service pattern and temporary suspension authorizations granted herein shall become effective ----------, ----------, concurrently with the effective date of the certificate issued to Piedmont in Docket No. 7357;

13. This order or any part thereof may be amended or revoked at any time in the discretion of the Board without notice and without hearing.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[F. R. Doc. 55-8358; Filed, Oct. 13, 1955; 8:46 a. m.]

[1] On April 1, 1953, the holder filed an application, Docket No. 6059, for an amendment to this certificate to renew this authorization.

[Docket No. 7206; Order No. E-9632]

OZARK AIR LINES, INC.

STATEMENT OF TENTATIVE FINDINGS AND CONCLUSIONS AND ORDER TO SHOW CAUSE[1]

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 7th day of October 1955.

In the matter of the application of Ozark Air Lines, Inc., under section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended, for a certificate of public convenience and necessity of unlimited duration for Route No. 107.

Ozark Air Lines, Inc. (Ozark) on June 10, 1955, filed an application pursuant to section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended, (the act), requesting the Board to issue Ozark a certificate of public convenience and necessity of unlimited duration for Route No. 107 authorizing air transportation of persons, property and mail between certain named points.

Section 401 (e) (3) of the act (effective May 19, 1955) provides: "If any applicant who makes application for a certificate within one hundred and twenty days after the date of enactment of this paragraph shall show that, from January 1, 1953, to the date of its application, it or its predecessor in interest, was an air carrier furnishing, within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property, and mail, under a temporary certificate of public convenience and necessity issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which the applicant or its predecessors in interest have no control) the Board, upon proof of such fact only, shall, unless the service rendered by such applicant during the period since its last certification has been inadequate and inefficient, issue a certificate or certificates of unlimited duration, authorizing such applicant to engage in air transportation between the terminal and intermediate points within the continental limits of the United States between which it, or its predecessor, so continuously operated between the date of enactment of this paragraph and the date of its application: *Provided,* That the Board in issuing the certificate is empowered to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points it finds have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification at such time."

Ozark alleges in its application that it is a citizen of the United States of America as defined by section 1 (13) of the act. Proof of this fact has been submitted by Ozark in other certification proceedings and no information to the contrary has since come to the knowledge of the Board.

Ozark further alleges in its application that it has continuously operated as an air carrier furnishing local or feeder air transportation of persons, property and mail within the continental limits of the United States during the period January 1, 1953, to the date of its application under a temporary certificate of public convenience and necessity for route No. 107 issued by the Board, except as to interruptions of service over which it had no control. The various schedules and reports required to be filed with the Board by local service carriers indicate that Ozark has so continuously operated since January 1, 1953.

Section 401 (e) (3) of the act requires in effect that the Board find as a prerequisite to the granting of a certificate of unlimited duration to Ozark that the service rendered by Ozark during the period since its last certification has not been inadequate or inefficient. The Board during the said period has received no complaints from the public relating to the overall service provided by this carrier. The Board is possessed of no information from which it could find that, considered as a whole, the service provided by this carrier during the period from August 20, 1954, the date of Ozark's last certificate for route No. 107, to the present has been inadequate or inefficient within the meaning of section 401 (e) (3) of the act.

Ozark further alleges in its application that it has from the date of the enactment of section 401 (e) (3) (May 19, 1955) to the date of its application, continuously served the following terminal and intermediate points:

Milwaukee, Wis.	Cape Girardeau, Mo.
Rockford, Ill.	Cairo, Ill.
Davenport, Iowa-	Paducah, Ky.
Moline, Ill.	Nashville, Tenn.
Peoria, Ill.	Columbia, Mo.
Springfield, Ill.	Jefferson City, Mo.
St. Louis, Mo.	Springfield, Mo.
Decatur, Ill.	Joplin, Mo.
Champaign-Urbana, Ill.	Pittsburg, Kans.
Danville, Ill.	Chanute, Kans.
Indianapolis, Ind.	Wichita, Kans.
Chicago, Ill.	Kansas City, Mo.
Mattoon-Charleston, Ill.	Quincy, Illinois-
Marion-Herrin, Ill.	Hannibal, Mo.
	Bloomington, Ill.
	Clinton, Iowa.

Section 401 (e) (3) provides in effect that all terminal points served by the local service carrier applicant during the period from May 19, 1955, to June 10, 1955, shall be certificated for a period of unlimited duration. The certificate we propose to issue to Ozark (which is attached as Appendix A) accomplishes this.

Section 401 (e) (3) empowers the Board to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points the Board finds have generated insufficient traffic to warrant a finding that the public convenience and necessity require permanent certification. The Board has proposed an industry-wide traffic standard upon which to base a tentative conclusion as to whether a particular intermediate point should be permanently or temporarily certificated. A standard which can be applied on an industry-wide basis will assure that all the intermediate cities are equitably treated. The Board has concluded, on the basis of an analysis of the latest available traffic data, that an average of five or more passengers enplaned per day provides a reasonable basis for selection of those intermediate points to be permanently certificated at this time.

As indicated above, the recent amendment of the act provides for the certification for an unlimited duration of all terminal points and of at least one-half of the intermediate points named in the certificate. This means that in the future the applicant carrier will be providing services over permanently certificated segments. During the years of local service carrier experience, the Board, in consideration of the subsidized nature of the operation, has found that on-line intermediate points generating in the neighborhood of 300 passengers on and off monthly have borne a reasonable share of the expense incurred by the carrier in providing service to the intermediate points on existing flights. In the past, the Board has also found that local service carrier points generating in the neighborhood of five or more enplaned passengers per day have warranted recertification. This leads us to conclude that in the absence of a further showing, the five passenger per day standard is a reasonable one for selecting those intermediate points to be permanently certificated.

The proposed certificate which is set forth below as Appendix A grants Ozark permanent authority at those intermediate stations shown in Appendixes C, D and E[2] to have met this five-passenger per day standard and temporary authority at all other intermediate stations served by Ozark during the period May 19, 1955, to June 10, 1955. Appendixes C and D set forth in tabular form, the average number of daily passengers enplaned at each Ozark intermediate point for the calendar year 1954 and for the twelve-month period ended March 31, 1955. The average number of passengers enplaned at intermediate points generating less than five passengers per day is set forth in Appendix E on a quarterly basis for the years 1952, 1953, 1954, and for the twelve-month period ended March 31, 1955.

The Board believes that except for cities presenting special considerations warranting permanent certification, those intermediate points which have generated less than five enplaned passengers per day should be certificated for a temporary period of three years. Certification for this period will enable the Board to assess the future traffic development at these points and to consider at a later time whether or not they should be made permanent. These cities will be afforded an opportunity before the expiration of the temporary period to demonstrate their ability to generate a sufficient volume of traffic to warrant permanent certification or continuation of service for a further temporary period.

The Board tentatively concludes that a point which has been authorized for service by the Board by certificate amendment becoming effective during or after the statutory grandfather period but which point was not served by the carrier pursuant to that authority during the grandfather period, or a point served

[1] This statement does not necessarily represent the views of all Members of the Board with respect to all issues.

[2] Filed as part of original document.

during part but not all of the grandfather period is ineligible for permanent certification pursuant to section 401 (e) (3) of the act because the point was not continuously served during the statutory grandfather period. See Pan American Airways, Inc.-Certificate of Public Convenience, 2 C. A. B. 111 (1940). The Board will, therefore, carry forward the carrier's present temporary authority to serve such points for the term of the temporary authorization.

Thus, the proposed certificate set forth below as Appendix A carries forward Ozark's temporary certificate authority to serve the intermediate point Owensboro, Kentucky, and the terminal point Louisville, Kentucky, on segment 4 (b), the intermediate point Clarksville, Tennessee - Fort Campbell - Hopkinsville, Kentucky, on segment 4 (a) and the intermediate point Galesburg, Illinois, on segment 2, and to serve segment 8 for the term of Ozark's present temporary authorization.

Ozark requests that the certificate of unlimited duration to be issued in this proceeding not include authorization to serve the intermediate point Cairo, Illinois.[3] The points to be included in certificates issued under section 401 (e) (3) are those which the applicant carrier continuously served from May 19, 1955, the date of enactment of the section, to June 10, 1955, the date of Ozark's application. Since Ozark continuously served Cairo during said period, it should be included in the certificate to be issued in this proceeding.

The Board further believes that the general terms and conditions set forth in the certificate of public convenience and necessity last issued by the Board to Ozark may not be expanded in a certificate to be issued pursuant to section 401 (e) (3) of the act in such manner as to grant authority to said carrier in excess of that set forth in the certificate of public convenience and necessity last issued to this carrier.

The Board does not believe that authority granted to Ozark pursuant to § 202.4 and Part 205 of the Economic Regulations of the Board, subsequent to the issuance of the last certificate of public convenience and necessity issued by the Board to said air carrier permitting on-segment changes in the service pattern should be incorporated in a certificate issued to Ozark pursuant to section 401 (e) (3) of the act. In the interest of convenience and clarity the Board will restate the carrier's outstanding service pattern modifications in a single order, a draft of which is set forth below as Appendix B.

It is our intention to strictly limit this proceeding to a consideration of issues directly pertaining to the grant, pursuant to section 401 (e) (3) of the act, of permanent or temporary authority to serve points served by Ozark during the period from May 19, 1955, to June 10, 1955. We believe the public interest requires expeditious disposition of the proceeding and are therefore adopting a procedure intended to shorten the proceeding while at the same time fully protecting the interests of all interested persons. We are requiring Ozark to show cause why the Board should not issue an order making final the tentative findings and conclusions set forth in this order and issue a certificate of public convenience and necessity in the form set forth below as Appendix A. After allowing interested persons a reasonable period within which to submit objections to the Board's order, Ozark's application and the order to show cause will be set for immediate hearing in Washington before a hearing examiner of the Board. Ozark and all interested persons who desire to be heard in connection with this matter are hereby notified that they may file written objection to the Board's tentative findings and conclusions within 15 days from the date of this order. The hearing will be limited to consideration of the issues raised by such objections. Objections should be in the nature of exceptions, should be brief and concise, and should not contain argument or factual data which the objecting party intends to rely on at the hearing in support of its objections.

It is also our intention to officially notice all reports, tariffs and schedules required to be filed with the Board by all air carriers, as well as all public Board reports based on these data,[4] so that these materials need not be specially compiled for the record in this proceeding.

On the basis of the foregoing considerations and the data set forth in Appendixes C, D, E, and F[3] hereof, which are hereby incorporated into this order and shall constitute part of the record in this proceeding, the Board finds that:

1. Ozark is a citizen of the United States of America as defined by section 1 (13) of the act.

2. From January 1, 1953, to June 10, 1955, Ozark was an air carrier providing within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property and mail pursuant to a temporary certificate of public convenience and necessity for route No. 107 issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which Ozark had no control).

3. Ozark has continuously served the following terminal and intermediate points during the period from May 19, 1955, to June 10, 1955:

Milwaukee, Wis.	Cape Girardeau, Mo.
Rockford, Ill.	Cairo, Ill.
Davenport, Iowa-Moline, Ill.	Paducah, Ky.
Peoria, Ill.	Nashville, Tenn.
Springfield, Ill.	Columbia, Mo.
St. Louis, Mo.	Jefferson City, Mo.
Decatur, Ill.	Springfield, Mo.
Champaign-Urbana, Ill.	Joplin, Mo.
Danville, Ill.	Pittsburg, Kans.
Indianapolis, Ind.	Chanute, Kans.
Chicago, Ill.	Wichita, Kans.
Mattoon-Charleston, Ill.	Kansas City, Mo.
Marion-Herrin, Ill.	Quincy, Illinois-Hannibal, Mo.
	Bloomington, Ill.
	Clinton, Iowa.

4. The service rendered by Ozark during the period from August 20, 1954, the date of its last certification, to the present has been adequate and efficient within the meaning of section 401 (e) (3) of the act.

5. The following intermediate points, which on the basis of the most recent available data have generated an average of five or more enplaned passengers per day, should be designated as points of unlimited duration:

(a) On Ozark's segment 1, the intermediate points Rockford, Illinois, Davenport, Iowa-Moline, Illinois, Peoria and Springfield, Illinois;

(b) On segment 2, the intermediate points Peoria, Springfield, Decatur, and Champaign-Urbana, Illinois;

(c) On segment 3, the intermediate points Champaign-Urbana, Decatur, and Springfield, Illinois;

(d) On segment 4, the intermediate point Paducah, Kentucky;

(e) On segment 5, the intermediate points Columbia, Jefferson City, Springfield, and Joplin, Missouri;

(f) On segment 6, the intermediate points Jefferson City and Columbia, Missouri, Quincy, Illinois-Hannibal, Missouri, Springfield, Peoria, and Bloomington, Illinois;

(g) On segment 7, the intermediate point Rockford, Illinois.

6. On the basis of the most recent available data the following intermediate points have generated less than an average of five enplaned passengers per day, and therefore have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification; but that certification of each of said points for a period of three years is warranted:

(a) On Ozark's segment 2, the intermediate point Danville, Illinois;

(b) On segment 3, the intermediate point Mattoon-Charleston, Illinois;

(c) On segment 4, the intermediate points Marion-Herrin, Illinois, Cape Girardeau, Missouri, and Cairo, Illinois;

(d) On segment 5, the intermediate points Pittsburg and Chanute, Kansas;

(e) On segment 7, the intermediate point Clinton, Iowa.

7. The intermediate point Owensboro and the terminal point Louisville, Kentucky, on segment 4 (b), the intermediate point Galesburg, Illinois, on segment 2 and the various terminal and intermediate points on segment 8 are ineligible for certification pursuant to section 401 (e) (3) of the act because they were not served by Ozark during the period May 19, 1955, to June 10, 1955. It is, however, appropriate to include all of Ozark's effective certificate authority in one document, so Ozark's present temporary authority to serve these points should be carried forward in the certificate to be issued in this proceeding.

8. The intermediate point Clarksville, Tennessee-Fort Campbell-Hopkinsville, Kentucky, is ineligible for certification pursuant to section 401 (e) (3) of the act because it was not continuously served by Ozark during the period May 19, 1955, to June 10, 1955. It is, however, appropriate to include all of Ozark's effective certificate authority in one document, so Ozark's present temporary authority to serve this point should be carried forward in the certificate to be issued in this proceeding: *Therefore it is ordered*, That:

1. Ozark is directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein and issue the proposed certificate of public convenience and necessity in the form set forth below as Appendix A, and further issue the proposed supplementary order in the form set forth below as Appendix B;

2. Ozark and any other interested person having objection to the issuance of an order making final the tentative findings and conclusions stated herein, or to the issuance of the aforesaid proposed certificate and supplementary order, shall, within 15 days from the date hereof, file written notice of objection with the Board;

3. On the expiration of the 15-day period allowed for the filing of objections, this proceeding shall be set for immediate hearing before an examiner of this Board. The hearing shall be limited to consideration of issues raised by the objections filed;

4. Copies of this order shall be served on Ozark, the Mayors of Galesburg, Illinois, Fort Campbell, Hopkinsville, Owensboro, and Louisville, Kentucky, Clarksville, Tennessee, Sioux City, Fort Dodge, Waterloo, Mason City, and Dubuque, Iowa, the Mayor of each city served by Ozark during the period May 19, 1955, to June 10, 1955, and on every certificated air carrier serving a point served by Ozark during that period;

5. This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

APPENDIX A

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR LOCAL OR FEEDER SERVICE

Ozark Air Lines, Inc., is hereby authorized, subject to the provisions hereinafter set forth, the provisions of Title IV of the Civil Aeronautics Act of 1938, as amended, and the orders, rules and regulations issued thereunder, to engage in air transportation with respect to persons, property and mail, as follows:

1. Between the terminal point Milwaukee, Wis., the intermediate points Rockford, Ill., Davenport, Iowa-Moline, Ill., Peoria and Springfield, Ill., and the terminal point St. Louis, Mo.;

2. Between the terminal point Davenport, Iowa-Moline, Ill., the intermediate points Galesburg, Peoria, Springfield, Decatur, Champaign-Urbana, and Danville, Ill., and the terminal point Indianapolis, Ind.;

3. Between the terminal point Chicago, Ill., the intermediate points Champaign-Urbana and Decatur, Ill., and (a) beyond Decatur, Ill., the intermediate point Springfield, Ill., and the terminal point St. Louis, Mo., and (b) beyond Decatur, Ill., the intermediate point Mattoon - Charleston, Ill., and the terminal point St. Louis, Mo.;

4. Between the terminal point St. Louis, Mo., the intermediate points Marion-Herrin, Ill., Cape Girardeau, Mo., Cairo, Ill. and Paducah, Ky., and (a) beyond Paducah, Ky., the intermediate points Clarksville, Tenn.-Fort Campbell-Hopkinsville, Ky., and the terminal point Nashville, Tenn., and (b) beyond Paducah, Ky., the intermediate point Owensboro, Ky., and the terminal point Louisville, Ky.;

5. Between the terminal point St. Louis, Mo., the intermediate points Columbia, Jefferson City, Springfield, and Joplin, Mo., Pittsburg and Chanute, Kans., and the terminal point Wichita, Kans.;

6. Between the terminal point Kansas City, Mo., the intermediate points Jefferson City and Columbia, Mo., Quincy, Ill.-Hannibal, Mo., and Springfield, Ill., and (a) beyond Springfield, Ill., the intermediate point Peoria, Ill., and the terminal point Chicago, Ill., and (b) beyond Springfield, Ill., the intermediate point Bloomington, Ill., and the terminal point Chicago, Ill.;

7. Between the terminal point Davenport, Iowa-Moline, Ill., the intermediate points Clinton, Iowa, Rockford, Ill., and the terminal point Chicago, Ill.;

8. Between the terminal point Sioux City, Iowa, the intermediate points Fort Dodge, Mason City, Waterloo, and Dubuque, Iowa, and Rockford, Ill., and the terminal point Chicago, Ill.,

to be known as Route No. 107.

The service herein authorized is subject to the following terms, conditions and limitations:

(1) The holder shall render service to and from each of the points named herein, except as temporary suspensions of service may be authorized by the Board; and may begin or terminate, or begin and terminate, trips at points short of terminal points.

(2) The holder may continue to serve regularly any point named herein through the airport last regularly used by the holder to serve such point prior to the effective date of this certificate. Upon compliance with such procedure relating thereto as may be prescribed by the Board, the holder may regularly serve a point named herein through any airport convenient thereto.

(3) On each trip operated by the holder over all or part of one of the eight numbered route segments in this certificate, the holder shall stop at each point named between the point of origin and point of termination of such trip on such segment, except a point or points with respect to which (a) the Board, pursuant to such procedure as the Board may from time to time prescribe, may by order relieve the holder from the requirements of such condition, (b) the holder is authorized by the Board to suspend service, (c) the holder is unable to render service on such trip because of adverse weather conditions or other conditions which the holder could not reasonably have been expected to foresee or control, or (d) the holder has scheduled at least two round trips a day, in which case it may omit such point or points on any additional trip scheduled over all or part of such segment, subject to the restrictions set forth in paragraphs (4) and (5) below.

(4) Except with respect to trips confined to segment seven, the holder shall schedule service to a minimum of two intermediate points between terminals, whether such terminals be on the same or different segments.

(5) The holder shall not schedule nonstop service between Chicago and Springfield, Ill., nor between Peoria, Ill., and St. Louis, Mo.

(6) The holder in operating over segment 5 or 6 may omit service to Jefferson City, Mo., on flights serving Columbia, Mo., or omit service to Columbia, Mo., on flights serving Jefferson City, Mo.

The exercise of the privileges granted by this certificate shall be subject to such other reasonable terms, conditions and limitations required by the public interest as may from time to time be prescribed by the Board.

The services authorized by this certificate were originally established pursuant to a determination of policy by the Civil Aeronautics Board that in the discharge of its obligation to encourage and develop air transportation under the Civil Aeronautics Act, as amended, it is in the public interest to establish certain air carriers who will be primarily engaged in short-haul air transportation as distinguished from the service rendered by trunkline air carriers. In accepting this certificate the holder acknowledges and agrees that the primary purpose of this certificate is to authorize and require it to offer short-haul, local or feeder, air transportation service of the character described above.

This certificate shall be effective on ----------, 1955: *Provided, however*, That prior to the date on which the certificate would otherwise become effective the Board, either on its own initiative or upon the timely filing of a petition or petitions seeking reconsideration of the Board's order of ----------, 1955 (Order E-----) insofar as such order authorizes the issuance of this certificate may by order or orders extend such effective date from time to time.

The authority to serve Cape Girardeau, Mo., Clinton, Iowa, Marion-Herrin, Mattoon-Charleston, Cairo, and Danville, Ill., and Pittsburg and Chanute, Kans., shall continue in effect up to and including ----------. The authority of the holder to serve Owensboro and Louisville, Ky., on segment 4 (b) shall, unless otherwise continued, terminate with final Board action on Eastern's application (Docket No. 4732) in the Additional Southwest-Northeast Service Case, Docket No. 2355 et al. The authority to serve Galesburg, Ill., Clarksville, Tenn., Fort Campbell-Hopkinsville, Ky., and to serve segment 8 shall continue in effect up to and including September 30, 1958.

In witness whereof, the Civil Aeronautics Board has caused this certificate to be executed by its Chairman, and the seal of the Board to be affixed hereto, attested by the Secretary of the Board, on the -- day of ---------- 1955.

[SEAL] ROSS RIZLEY, *Chairman.*

Attest:

----------, *Secretary.*

APPENDIX B

PROPOSED DRAFT OF ORDER EXTENDING EFFECTIVE PERIOD OF TEMPORARY SERVICE AUTHORIZATIONS

The Board has by Order E-__, dated ----------, 1955, granted a certificate of public convenience and necessity of unlimited duration to Ozark Air Lines, Inc. (Ozark), authorizing Ozark to engage in air transportation of persons, property and mail over route No. 107. In the past, Ozark has been authorized to conduct operations differing in certain particulars from the authority stated in its temporary certificate of public convenience and necessity for route No. 107.

The term of effectiveness of some of these authorizations is unlimited, while others would expire at the end of a stated period. The reasons for issuance of these temporary authorizations appear to be still applicable to Ozark in its operation under the certificate of unlimited duration concurrently issued herewith. It, therefore, appears to the Board that it is in the public interest and consistent with the Act to continue these outstanding temporary authorizations in effect for an additional period of time. In extending these authorizations, it appears desirable to include all currently effective authorizations which are not included in or disposed of in the new certificate in one order which will become effective at the same time the new certificate of unlimited duration becomes effective.

Accordingly, the Board, acting pursuant to section 205 (a) of the Civil Aeronautics Act of 1938, as amended, and to § 202.4 and Part 205 of its Economic Regulations, finds:

[3] Amendment No. 1 to Application of Ozark Air Lines, Inc., for Certificate of Unlimited Duration filed September 9, 1955.

[4] Filed as part of original document.

[5] We will also officially notice the Origination-Destination Airline Traffic Surveys published by the Airline Finance and Accounting Conference from information compiled by the Board.

1. That the enforcement of the condition in Ozark's certificate which requires it on each flight over all or part of the several numbered route segments on route No. 107 to stop at each point named between the point of origin and the point of termination of such flight unless otherwise authorized by the Board, to the extent that it would prevent the service pattern hereinafter authorized, would prevent a service pattern which is in the public interest and which is consistent with Ozark's performance of a local or feeder air transportation service and is not required by nor is it in the public interest;

2. That the temporary suspensions of service authorized hereinafter do not substantially change the character of the service for which the certificate of public convenience and necessity of unlimted duration is being granted to Ozark and are otherwise is in the public interest: *Accordingly, it is ordered*, That:

1. Ozark be and hereby is authorized to suspend service temporarily at Chanute Municipal Airport, Chanute, Kansas, until such time as adequate runway repairs have been made (previously authorized by Order E-9444);

2. Ozark be and hereby is authorized to suspend service temporarily at Columbia, Missouri, on segments 5 and 6 on its route No. 107 until the runway at Columbia Municipal Airport is made safe for scheduled service (previously authorized by Order E-9507);

3. Ozark be and hereby is authorized to render flag-stop service on its route No. 107 by omitting the physical landing of its aircraft at any intermediate point scheduled to be served on a particular flight: *Provided*, That there are no persons, property or mail on the aircraft destined for such point and no such traffic available at such point for the flight at the scheduled time of departure: *Provided, further*, That the Board in its discretion may at any time disapprove the use of such authority with respect to service to any point on any flight or flights (previously authorized by Order E-6477);

4. The authority previously granted to Ozark by Orders E-6477, E-9444, and E-9507 shall be terminated on the date this order and the certificate of public convenience and necessity of unlimited duration for route No. 107 being issued to Ozark concurrently with the issuance of this order become effective.

5. The change in service pattern and temporary suspension authorizations granted herein shall become effective ------, ------, concurrently with the effective date of the certificate issued to Ozark in Docket No. 7206;

6. This order or any part thereof may be amended or revoked at any time in the discretion of the Board without notice and without hearing.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[F. R. Doc. 55-8356; Filed, Oct. 13, 1955; 8:45 a. m.]

[Docket No. 7355; Order No. E-9633]

ALLEGHENY AIRLINES, INC.

STATEMENT OF TENTATIVE FINDINGS AND CONCLUSIONS AND ORDER TO SHOW CAUSE [1]

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 7th day of October 1955.

[1] This statement does not necessarily represent the views of all Members of the Board with respect to all issues.

In the matter of the application of Allegheny Airlines, Inc., under section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended, for a certificate of public convenience and necessity of unlimited duration for Route No. 97.

Allegheny Airlines, Inc. (Allegheny), on August 12, 1955, filed an application pursuant to section 401 (e) (3) of the Civil Aeronautics Act of 1938, as amended (the act), requesting the Board to issue Allegheny a certificate of public convenience and necessity of unlimited duration for Route No. 97 authorizing air transportation of persons, property and mail between certain named points.

Section 401 (e) (3) of the act (effective May 19, 1955) provides: "If any applicant who makes application for a certificate within one hundred and twenty days after the date of enactment of this paragraph shall show that, from January 1, 1953, to the date of its application, it or its predecessor in interest, was an air carrier furnishing, within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property, and mail, under a temporary certificate of public convenience and necessity issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which the applicant or its predecessors in interest have no control) the Board, upon proof of such fact only, shall, unless the service rendered by such applicant during the period since its last certification has been inadequate and inefficient, issue a certificate or certificates of unlimited duration, authorizing such applicant to engage in air transportation between the terminal and intermediate points within the continental limits of the United States between which it, or its predecessor, so continuously operated between the date of enactment of this paragraph and the date of its application: *Provided*, That the Board in issuing the certificate is empowered to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points it finds have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification at such time."

Allegheny alleges in its application that it is a citizen of the United States of America as defined by section 1 (13) of the act. Proof of this fact has been submitted by Allegheny in other certification proceedings and no information to the contrary has since come to the knowledge of the Board.

Allegheny further alleges in its application that it has continuously operated as an air carrier furnishing local or feeder air transportation of persons, property and mail within the continental limits of the United States during the period January 1, 1953, to the date of its application under a temporary certificate of public convenience and necessity for route No. 97 issued by the Board, except as to interruptions of service over which it had no control. The various schedules and reports required to be filed with the Board by local service carriers indicate that Allegheny has so continuously operated since January 1, 1953.

Section 401 (e) (3) of the act requires in effect that the Board find as a prerequisite to the granting of a certificate of unlimited duration to Allegheny that the service rendered by Allegheny during the period since its last certification has not been inadequate or inefficient. The carrier in its application for such certificate filed August 12, 1955, alleges its service rendered during the aforesaid period has been adequate and efficient. The Board during the said period has received no complaints from the public relating to the overall service provided by this carrier. The Board is possessed of no information from which it could find that, considered as a whole, the service provided by this carrier during the period from April 10, 1953, the date of Allegheny's last certificate for route No. 97, to the present has been inadequate or inefficient within the meaning of section 401 (e) (3) of the act.

Allegheny further alleges in its application that it has from the date of the enactment of section 401 (e) (3) (May 19, 1955) to the date of its application, continuously served the following terminal and intermediate points:

Washington, D. C.
Baltimore, Md.
Hagerstown, Md.
Altoona, Pa.
Johnstown, Pa.
Pittsburgh, Pa.
Cumberland, Md.
Easton-Cambridge, Md.
Salisbury, Md.
Georgetown-Rehoboth Beach, Del.[2]
Cape May, N. J.
Dover, Del.
Atlantic City, N. J.
Asbury Park-Long Branch-Monmouth Beach, N. J.
New York, N. Y.
Newark, N. J.
Harrisburg, Pa.
Scranton-Wilkes-Barre, Pa.
Lancaster, Pa.
Wilmington, Del.
Philadelphia, Pa.-Camden, N. J.
Oil City-Franklin, Pa.
Bradford, Pa.
Jamestown, N. Y.
Buffalo, N. Y.
Wheeling, W. Va.
Parkersburg, W. Va.
Huntington, W. Va.
Clearfield-DuBois-Philipsburg, Pa.
Bellefonte-State College, Pa.
Lock Haven, Pa.
Williamsport, Pa.
Cleveland, Ohio.
Erie, Pa.

Allegheny is authorized by its present temporary certificate of public convenience and necessity to provide air service to Georgetown-Rehoboth Beach, Delaware, commencing not earlier than June 1 or later than June 15 and terminating not earlier than September 1 or later than September 15, inclusive of each year, except that the Board may enlarge said period if the Board determines that said period does not permit adequate seasonal service. Although Georgetown-Rehoboth Beach was not continuously served during the period May 19, 1955, to the date of Allegheny's

[2] Seasonal operation.

application, we believe the point is eligible for certification in the present proceeding as a point continuously served during the period of its seasonal authorization. Since the purpose of the amendment to the act appears to be the desire of Congress to preserve services as previously operated, we do not believe section 401 (e) (3) should be interpreted to exclude points continuously served on a seasonal basis during particular months of the year which do not coincide with the period established by the act, namely May 19, 1955, to August 12, 1955. See Mayflower Airlines, Inc.—Grandfather Certificate, 2 CAB 175 (1940).

Section 401 (e) (3) provides in effect that all terminal points served by the local service carrier applicant during the period from May 19, 1955, to August 12, 1955, shall be certificated for a period of unlimited duration. The certificate we propose to issue to Allegheny (which is set forth below as Appendix A) accomplishes this.

Section 401 (e) (3) empowers the Board to limit the duration of the certificate as to not over one-half of the intermediate points named therein, which points the Board finds have generated insufficient traffic to warrant a finding that the public convenience and necessity require permanent certification. The Board has proposed an industry-wide traffic standard upon which to base a tentative conclusion as to whether a particular intermediate point should be permanently or temporarily certificated. A standard which can be applied on an industry-wide basis will assure that all the intermediate cities are equitably treated. The Board has concluded, on the basis of an analysis of the latest available traffic data, that an average of five or more passengers enplaned per day provides a reasonable basis for selection of those intermediate points to be permanently certificated at this time.

As indicated above, the recent amendment of the act provides for the certification for an unlimited duration of all terminal points and of at least one-half of the intermediate points named in the certificate. This means that in the future the applicant carrier will be providing services over permanently certificated segments. During the years of local service carrier experience, the Board, in consideration of the subsidized nature of the operation, has found that on-line intermediate points generating in the neighborhood of 300 passengers on and off monthly have borne a reasonable share of the expense incurred by the carrier in providing service to the intermediate point on existing flights. In the past, the Board has also found that local service carrier points generating in the neighborhood of five or more enplaned passengers per day have warranted recertification. This leads us to conclude that in the absence of a further showing, the five passenger per day standard is a reasonable one for selecting those intermediate points to be permanently certificated.

The proposed certificate which is set forth below as Appendix A grants Allegheny permanent authority at those intermediate stations shown in Appendixes C, D, and E,[3] to have met this five-passenger per day standard and temporary authority at all other intermediate stations served by Allegheny during the period May 19, 1955, to August 12, 1955. Appendixes C and D set forth in tabular form, the average number of daily passengers enplaned at each Allegheny intermediate point for the calendar year 1954 and for the twelve-month periods ended March 31, 1955, and June 30, 1955. The average number of passengers enplaned at intermediate points generating less than five passengers per day is set forth in Appendix E on a quarterly basis for the years 1952, 1953, 1954, and for the twelve-month periods ended March 31, 1955, and June 30, 1955.

The Board believes that except for cities presenting special considerations warranting permanent certification, those intermediate points which have generated less than five enplaned passengers per day should be certificated for a temporary period of three years. Certification for this period will enable the Board to assess the future traffic development at these points and to consider at a later time whether or not they should be made permanent. These cities will be afforded an opportunity before the expiration of the temporary period to demonstrate their ability to generate a sufficient volume of traffic to warrant permanent certification or continuation of service for a further temporary period.

It is also the Board's tentative conclusion that under the provisions of section 401 (e) (3) of the act a point named in Allegheny's presently effective certificate of public convenience and necessity for route No. 97 which has never been served by Allegheny, is not eligible for inclusion as a point in any certificate that may be issued to Allegheny pursuant to said section of the act.

Thus, the certificate which the Board proposes to issue to Allegheny pursuant to section 401 (e) (3) of the act, will carry forward Allegheny's authority to serve Stroudsburg-East Stroudsburg, Pennsylvania, only for the term of its present temporary authorization. The presently effective temporary suspension of service at this point is being continued by the proposed supplementary order set forth below as Appendix B.

The Board further tentatively concludes that a point which has been authorized for service by the Board by certificate amendment or by temporary exemption authorization becoming effective before or during the statutory grandfather period but which point was served by the carrier pursuant to that authority during part but not all of the statutory grandfather period is ineligible for permanent certification pursuant to section 401 (e) (3) of the act because the point was not continuously served during the statutory grandfather period. See Pan American Airways, Inc.—Certificate of Public Convenience and Necessity, 2 C. A. B. 111 (1940). The Board will, therefore, carry forward the carrier's present temporary authority to serve such points for the term of the temporary authorization.

[3] Filed as part of original document.

Thus, the proposed certificate set forth below as Appendix A carries forward Allegheny's temporary certificate authority to serve the intermediate point Trenton, New Jersey, and the coterminal points New York, New York, and Newark, New Jersey, on segment 3 for the term of Allegheny's present temporary authorization. Allegheny's present temporary exemption authority to serve the intermediate points Oil City-Franklin, Clearfield-DuBois-Philipsburg, and Bellefonte-State College, Pennsylvania, on segment 7 will be carried forward in the proposed supplementary order set forth below as Appendix B for the term of its present temporary authorization.

The Board tentatively concludes that where since the last certificate issued to this carrier, the Board has authorized Allegheny, by exemption, to provide service between points named on separate legs of a route segment, the points are eligible to be certificated pursuant to section 401 (e) (3) of the act as served by the carrier during the period May 19, 1955 to August 12, 1955.

Thus, the Board proposes to require Allegheny to show cause why Cumberland, Maryland and Altoona, Pennsylvania, should not be certificated as successive intermediate points on segment 1.

The Board further believes that the general terms and conditions set forth in the certificate of public convenience and necessity last issued by the Board to Allegheny may not be expanded in a certificate to be issued pursuant to section 401 (e) (3) of the act in such manner as to grant authority to said carrier in excess of that set forth in the certificate of public convenience and necessity last issued to this carrier.

The Board does not believe that authority granted to Allegheny pursuant to § 202.4 and Part 205 of the Economic Regulations of the Board or by temporary exemption, subsequent to the issuance of the last certificate of public convenience and necessity issued by the Board to said air carrier permitting on-segment changes in the service pattern should be incorporated in a certificate issued to Allegheny pursuant to section 401 (e) (3) of the act. In the interest of convenience and clarity the Board will restate the carrier's outstanding service pattern modifications in a single order, a draft of which is set forth below as Appendix B.

It is our intention to strictly limit this proceeding to a consideration of issues directly pertaining to the grant, pursuant to section 401 (e) (3) of the act, of permanent or temporary authority to serve points served by Allegheny during the period from May 19, 1955, to August 12, 1955. We believe the public interest requires expeditious disposition of the proceeding and are therefore adopting a procedure intended to shorten the proceeding while at the same time fully protecting the interests of all interested persons. We are requiring Allegheny to show cause why the Board should not issue an order making final the tentative findings and conclusions set forth in this order and issue a certificate of public convenience and necessity in the form set forth below as Appendix A. After

allowing interested persons a reasonable period within which to submit objections to the Board's order, Allegheny's application and the order to show cause will be set for immediate hearing in Washington before a hearing examiner of the Board. Allegheny and all interested persons who desire to be heard in connection with this matter are hereby notified that they may file written objection to the Board's tentative findings and conclusions within 15 days from the date of this order. The hearing will be limited to consideration of the issues raised by such objections. Objections should be in the nature of exceptions, should be brief and concise, and should not contain arguments or factual data which the objecting party intends to rely on at the hearing in support of its objections.

It is also our intention to officially notice all reports, tariffs and schedules required to be filed with the Board by all air carriers, as well as all public Board reports based on these data,[4] so that these materials need not be specially compiled for the record in this proceeding.

On the basis of the foregoing considerations and the data set forth in Appendixes C, D, E, and F[3] hereof, which are hereby incorporated into this order and shall constitute part of the record in this proceeding, the Board finds that:

1. Allegheny is a citizen of the United States of America as defined by section 1 (13) of the act.

2. From January 1, 1953, to August 12, 1955, Allegheny was an air carrier providing within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property and mail pursuant to a temporary certificate of public convenience and necessity for route No. 97 issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which Allegheny had no control).

3. Allegheny has continuously served the following terminal and intermediate points during the period from May 19, 1955, to August 12, 1955:

Washington, D. C.
Baltimore, Md.
Hagerstown, Md.
Altoona, Pa.
Johnstown, Pa.
Pittsburgh, Pa.
Cumberland, Md.
Easton-Cambridge, Md.
Salisbury, Md.
Georgetown-Rehoboth Beach, Del.[2]
Cape May, N. J.
Dover, Del.
Atlantic City, N. J.
Asbury Park-Long Branch-Monmouth Beach, N. J.
New York, N. Y.
Newark, N. J.
Harrisburg, Pa.
Scranton-Wilkes-Barre, Pa.
Lancaster, Pa.
Wilmington, Del.
Philadelphia, Pa.-Camden, N. J.
Oil City-Franklin, Pa.
Bradford, Pa.
Jamestown, N. Y.
Buffalo, N. Y.
Wheeling, W. Va.
Parkersburg, W. Va.
Huntington, W. Va.
Clearfield-DuBois-Philipsburg, Pa.
Bellefonte-State College, Pa.
Lock Haven, Pa.
Williamsport, Pa.
Cleveland, Ohio.
Erie, Pa.

4. Allegheny has continuously served the intermediate point Georgetown-Rehoboth Beach, Delaware, during the period of its seasonal authorization and Georgetown-Rehoboth Beach is a point eligible for certification on a seasonal basis pursuant to section 401 (e) (3) of the act.

5. The service rendered by Allegheny during the period from April 10, 1953, the date of its last certification, to the present has been adequate and efficient within the meaning of section 401 (e) (3) of the act.

6. The following intermediate points, which, on the basis of the most recent available data have generated an average of five or more enplaned passengers per day, should be designated as points of unlimited duration:

(a) On Allegheny's segment 1, the intermediate points Hagerstown, Maryland, Altoona and Johnstown, Pennsylvania;

(b) On segment 2, the intermediate points Salisbury, Maryland, Georgetown-Rehoboth Beach, Delaware, Cape May and Atlantic City, New Jersey;

(c) On segment 3, the intermediate points Johnstown, Altoona, Harrisburg, and Lancaster, Pennsylvania, and Philadelphia, Pennsylvania-Camden, New Jersey;

(d) On segment 4, the intermediate points Oil City-Franklin and Bradford, Pennsylvania, and Jamestown, New York;

(e) On segment 5, the intermediate points Wheeling and Parkersburg, West Virginia;

(f) On segment 6, the intermediate points Johnstown, Altoona, Clearfield-DuBois-Philipsburg, Bellefonte-State College, Williamsport, and Scranton-Wilkes-Barre, Pennsylvania;

(g) On segment 7, the intermediate points Jamestown, New York, Erie, Bradford, Williamsport, Scranton-Wilkes-Barre, Harrisburg, and Lancaster, Pennsylvania.

7. On the basis of the most recent available data the following intermediate points have generated less than an average of five enplaned passengers per day, and therefore have generated insufficient traffic to warrant a finding that the public convenience and necessity requires permanent certification; but that certification of each of said points for a period of three years is warranted:

(a) On Allegheny's segment 1, the intermediate point Cumberland, Maryland;

(b) On segment 2, the intermediate points Easton-Cambridge, Maryland, Dover, Delaware, and Asbury Park-Long Branch-Monmouth Beach, New Jersey;

(c) On segment 3, the intermediate point Wilmington, Delaware;

(d) On segment 6, the intermediate point Lock Haven, Pennsylvania;

(e) On segment 7, the intermediate point Wilmington, Delaware.

8. The intermediate point Stroudsburg-East Stroudsburg, Pennsylvania, is ineligible for certification pursuant to section 401 (e) (3) of the act because the point was never served by Allegheny. It is, however, appropriate to include all Allegheny's effective certificate authority in one document, so Allegheny's present authority to serve Stroudsburg-East Stroudsburg should be carried forward in the certificate to be issued in this proceeding.

9. The intermediate point Trenton, New Jersey, and the coterminal points New York, New York, and Newark, New Jersey, on segment 3 are ineligible for certification pursuant to section 401 (e) (3) of the act because they were not continuously served during the period May 19, 1955, to August 12, 1955. Allegheny's present authority to serve these points should, however, be carried forward in the certificate to be issued in this proceeding for the term of its present temporary authorization.

10. The intermediate points Oil City-Franklin, Clearfield-DuBois-Philipsburg, and Bellefonte-State College, Pennsylvania, on segment 7 are ineligible for certification pursuant to section 401 (e) (3) of the act because they were not continuously served during the period May 19, 1955, to August 12, 1955. Allegheny's present authority to serve these points on segment 3 should, however, be carried forward in the supplementary order to be issued in this proceeding for the term of its present temporary authorization: *Therefore it is ordered*, That:

1. Allegheny is directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein and issue the proposed certificate of public convenience and necessity in the form set forth below as Appendix A, and further issue the proposed supplementary order in the form set forth below as Appendix B;

2. Allegheny and any other interested person having objection to the issuance of an order making final the tentative findings and conclusions stated herein, or to the issuance of the aforesaid proposed certificate and supplementary order, shall, within 15 days from the date hereof, file written notice of objection with the Board;

3. On the expiration of the 15-day period allowed for the filing of objections, this proceeding shall be set for immediate hearing before an examiner of this Board. The hearing shall be limited to consideration of issues raised by the objections filed;

4. Copies of this order shall be served on Allegheny, the Mayor of Stroudsburg-East Stroudsburg, Pennsylvania, the Mayor of each city served by Allegheny on route No. 97 during the period May 19, 1955, to August 12, 1955, and on every certificated air carrier serving a point served by Allegheny on route No. 97 during that period;

[2] Seasonal operation.
[3] Filed as part of the original document.
[4] We will also officially notice the Origination-Destination Airline Traffic Surveys published by the Airline Finance and Accounting Conference from information compiled by the Board.

5. This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

APPENDIX A

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR LOCAL OR FEEDER SERVICE

Allegheny Airlines, Inc., is hereby authorized, subject to the provisions hereinafter set forth, the provisions of Title IV of the Civil Aeronautics Act of 1938, as amended, and the orders, rules, and regulations issued thereunder, to engage in air transportation with respect to persons, property and mail, as follows:

1. Between the coterminal points Washington, D. C., and Baltimore, Md., the intermediate points Hagerstown and Cumberland, Md., Altoona and Johnstown, Pa., and the terminal point Pittsburgh, Pa.;

2. Between the coterminal points Washington, D. C., and Baltimore, Md., the intermediate points Easton-Cambridge and Salisbury, Md., Georgetown-Rehoboth Beach, Del., Cape May, N. J., Dover, Del., Atlantic City and Asbury Park-Long Branch-Monmouth Beach, N. J., and the coterminal points New York, N. Y.-Newark, N. J.;

3. Between the terminal point Pittsburgh, Pa., the intermediate points Johnstown, Altoona and Harrisburg, Pa., and (a) beyond Harrisburg, Pa., the terminal point Scranton-Wilkes-Barre, Pa., and (b) beyond Harrisburg, Pa., the intermediate points Lancaster, Pa., Wilmington, Del., Philadelphia, Pa.-Camden, N. J., and (i) beyond Philadelphia, Pa.-Camden, N. J., the intermediate point Trenton, N. J., and the coterminal points New York, N. Y.-Newark, N. J., and (ii) beyond Philadelphia, Pa.-Camden, N. J., the terminal point Atlantic City, N. J.;

4. Between the terminal point Pittsburgh, Pa., the intermediate points Oil City-Franklin and Bradford, Pa., Jamestown, N. Y., and the terminal point Buffalo, N. Y.;

5. Between the terminal point Pittsburgh, Pa., the intermediate points Wheeling and Parkersburg, W. Va., and the terminal point Huntington, W. Va.;

6. Between the terminal point Pittsburgh, Pa., the intermediate points Johnstown, Altoona, Clearfield-Dubois-Philipsburg, Bellefonte-State College, Lock Haven, Williamsport, Scranton-Wilkes-Barre, and Stroudsburg-East Stroudsburg, Pa., and the coterminal points Newark, N. J., and New York, N. Y.;

7. Between the terminal point Cleveland, Ohio, the intermediate points Erie, Pa., Jamestown, N. Y., Bradford and Williamsport, Pa., and (a) beyond Williamsport, Pa., the intermediate points Scranton-Wilkes-Barre and Stroudsburg-East Stroudsburg, Pa., and the coterminal points New York, N. Y., and Newark, N. J., and (b) beyond Williamsport, the intermediate points Harrisburg and Lancaster, Pa., Wilmington, Del., and the terminal point Philadelphia, Pa.-Camden, N. J.,

to be known as Route No. 97.

The service herein authorized is subject to the following terms, conditions and limitations:

(1) The holder shall render service to and from each of the points named herein, except as temporary suspensions of service may be authorized by the Board; and may begin or terminate, or begin and terminate, trips at points short of terminal points.

(2) The holder may continue to serve regularly any point named herein through the airport last regularly used by the holder to serve such point prior to the effective date of this certificate. Upon compliance with such procedure relating thereto as may be prescribed by the Board, the holder may, in addition to the service hereinabove expressly prescribed, regularly serve a point named herein through any airport convenient thereto.

(3) On each trip operated by the holder over all or part of one of the seven numbered route segments in this certificate, the holder shall stop at each point named between the point of origin and point of termination of such trip on such segment, except a point or points with respect to which (a) the Board, pursuant to such procedure as the Board may from time to time prescribe, may by order relieve the holder from the requirements of such condition, (b) the holder is authorized by the Board to suspend service, or (c) the holder is unable to render service on such trip because of adverse weather conditions or other conditions which the holder could not reasonably have been expected to foresee or control.

(4) Notwithstanding the provisions of paragraph (3) above, the holder on each trip scheduled over all or part of Segments 2, 3, 6, and 7 may omit a point or points subject to the following conditions:

(a) A minimum of four intermediate points shall be scheduled to be served on each trip scheduled between Cleveland, Ohio, on the one hand, and New York, N. Y./Newark, N. J., or Philadelphia, Pa.-Camden, N. J., on the other hand;

(b) A minimum of three intermediate points shall be scheduled to be served on each trip scheduled between New York, N. Y./Newark, N. J., and Washington, D. C./Baltimore, Md.; between Pittsburgh, Pa., and Atlantic City, N. J.; and between Pittsburgh, Pa., and New York, N. Y./Newark, N. J.;

(c) A minimum of two intermediate points shall be scheduled to be served on each trip scheduled between Bradford, Pa., and New York, N. Y./Newark, N. J.; and between Bradford, Pa., and Philadelphia, Pa.-Camden, N. J.;

(d) A minimum of one intermediate point shall be scheduled to be served on each trip scheduled between Atlantic City, N. J., and New York, N. Y./Newark, N. J.; between Atlantic City, N. J., and Washington, D. C./Baltimore, Md.; between Harrisburg, Pa., and Pittsburgh, Pa.; between Harrisburg, Pa., and New York, N. Y./Newark, N. J.; and between Bradford, Pa. and Cleveland, Ohio.

(5) The authority granted in paragraph (4) above to operate skip-stop service on Segment 6 is subject to the condition that at least two round trips per day shall be scheduled to serve every intermediate point on such segment.

(6) The authority granted in paragraph (4) above to operate skip-stop service on Segment 3 between Harrisburg, Pa., and the co-terminal points New York, N. Y., and Newark, N. J., is subject to the condition that at least two round trips per day shall be scheduled to serve Trenton, N. J.

(7) The intermediate points Georgetown-Rehoboth Beach, Del., Cape May, N. J., and Stroudsburg-East Stroudsburg, Pa., shall only be served during the period commencing not earlier than June 1 or later than June 15 and terminating not earlier than September 1 or later than September 15, inclusive of each year, except that the Board may enlarge said period if the Board determines that said period does not permit adequate seasonal service.

(8) Notwithstanding the provisions of paragraph (3) of these terms, conditions and limitations, the holder may render nonstop service between Hagerstown, Md., on the one hand, and Altoona, Pa., on the other hand, and between Cumberland, Md., on the one hand, and Johnstown, Pa., on the other hand.

The exercise of the privileges granted by this certificate shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

The services authorized by this certificate were originally established pursuant to a determination of policy by the Civil Aeronautics Board that in the discharge of its obligation to encourage and develop air transportation under the Civil Aeronautics Act, as amended, it is in the public interest to establish certain air carriers who will be primarily engaged in short-haul air transportation as distinguished from the service rendered by trunkline air carriers. In accepting this certificate the holder acknowledges and agrees that the primary purpose of this certificate is to authorize and require it to offer short-haul, local or feeder, air transportation service of the character described above.

The certificate shall be effective on _____, 1955: *Provided, however*, That prior to the date on which the certificate would otherwise become effective the Board, either on its own initiative or upon the timely filing of a petition or petitions seeking reconsideration of the Board's order of _____, 1955 (Order E-____) insofar as such order authorizes the issuance of this certificate may by order or orders extend such effective date from that time. The authorization to serve Cumberland and Easton-Cambridge, Md., Dover and Wilmington, Del., Asbury Park-Long Branch-Monmouth Beach, N. J., and Lock Haven, Pa., shall continue in effect up to and including _____. The authorization to serve Stroudsburg-East Stroudsburg, Pa.; the authorization to serve the intermediate point Trenton, N. J., and the coterminal points New York, N. Y., and Newark, N. J., on segment 3; condition (6), above; and condition (4) (d), above, insofar as it pertains to service between Harrisburg, Pa., and New York, N. Y./Newark, N. J., shall continue in effect up to and including December 31, 1956.

In witness whereof, the Civil Aeronautics Board has caused this certificate to be executed by its Chairman, and the seal of the Board to be affixed hereto, attested by the Secretary of the Board, on the day of _____, 1955.

[SEAL] ROSS RIZLEY,
Chairman.

Attest:

_____,
Secretary.

APPENDIX B

PROPOSED DRAFT OF ORDER EXTENDING EFFECTIVE PERIOD OF TEMPORARY SERVICE AUTHORIZATIONS

The Board has by Order E-__, dated _____ 1955, granted a certificate of public convenience and necessity of unlimited duration to Allegheny Airlines, Inc. (Allegheny) authorizing Allegheny to engage in air transportation of persons, property, and mail over route No. 97. In the past, Allegheny has been authorized to conduct operations differing in certain particulars from the authority stated in its temporary certificate of public convenience and necessity for route No. 97.

The term of effectiveness of some of these authorizations is unlimited, while others would expire sixty days after final determination by the Board in any proceeding involving renewal of route No. 97 or at the end of a stated period. The reasons for issuance of these temporary authorizations appear to be still applicable to Allegheny in its operation under the certificate of unlimited duration concurrently issued herewith. It, therefore, appears to the Board that it is in the public interest and consistent with the act to continue these outstanding temporary authorizations in effect for an additional period of time. In extending these authorizations, it appears desirable to include all currently effective authorizations which are not included in or disposed of in the new certificate in one order which will become effective at the same time the new

certificate of unlimited duration becomes effective.

Accordingly, the Board, acting pursuant to sections 205 (a) and 416 (b) of the Civil Aeronautics Act of 1938, as amended, and to § 202.4 and Part 205 of its Economic Regulations, finds:

1. That the enforcement of the provisions of section 401 (a) of the act and of Allegheny's certificate, insofar as it would otherwise prevent the operations hereinafter authorized, would be an undue burden upon Allegheny by reason of the limited extent of, or unusual circumstances affecting its operations and is not in the public interest;

2. That the enforcement of the condition in Allegheny's certificate which requires it on each flight over all or part of the several numbered route segments on route No. 97 to stop at each point named between the point of origin and the point of termination of such flight unless otherwise authorized by the Board, to the extent that it would prevent the service pattern hereinafter authorized, would prevent a service pattern which is in the public interest and which is consistent with Allegheny's performance of a local or feeder air transportation service and is not required by nor is it in the public interest;

3. That the temporary suspensions of service authorized hereinafter do not substantially change the character of the service for which the certificate of public convenience and necessity of unlimited duration is being granted to Allegheny and are otherwise in the public interest;

4. The authority granted by Order E–7969, December 16, 1953, insofar as it authorized Allegheny to serve Cumberland, Maryland and Altoona, Pennsylvania, on the same flight on segment 1 of route No. 97 should and will be terminated because Cumberland and Altoona are included as successive intermediate points on segment 1 of the certificate being issued to Allegheny concurrently with this order; *Accordingly, it is ordered*, That:

1. Allegheny be and hereby is authorized to continue temporary suspension of service at Stroudsburg-East Stroudsburg, Pennsylvania, an intermediate point on its route No. 97 until such time as adequate airport facilities are available at said point for scheduled air operations by Allegheny (previously authorized by Order E–7452);

2. a. Allegheny be and hereby is temporarily exempted from the provisions of section 401 of the act and the terms and conditions of its certificate of public convenience and necessity insofar as they would otherwise require Allegheny on each trip scheduled between Bradford, Pa., and New York, N. Y./Newark, N. J., or Philadelphia, Pa./Camden, N. J., to schedule service to a minimum of two intermediate points, and on each trip scheduled between Bradford, Pa., and Cleveland, Ohio, to schedule service to a minimum of one intermediate point, such exemption to continue in effect for such period of time as service by United at Bradford is suspended;

b. Allegheny be and hereby is temporarily exempted from the provisions of section 401 of the act and the terms and conditions of its certificate of public convenience and necessity to the extent necessary to permit it on trips scheduled between Cleveland, Ohio, on the one hand, and New York, N. Y./Newark, N. J., or Philadelphia, Pa./Camden, N. J., on the other hand, to omit service to all intermediate points in excess of three;

c. The authority granted in paragraphs (a) and (b) above is subject to the condition that at least two round trips per day shall be scheduled to serve every intermediate point on segment 7 (previously authorized by Order E–8549);

3. Allegheny be and hereby is temporarily exempted from the terms of its certificate insofar as they would otherwise prevent it from overflying Johnstown and Altoona, Pennsylvania, on flight scheduled over segment 6 of route No. 97; *Provided*, That Allegheny serve Altoona and Johnstown on at least four daily round trips and provide at least one daily westbound flight from Clearfield/DuBois/Philipsburg to Pittsburgh via Johnstown; *And, provided, further*, That Allegheny shall operate at least one daily single-plane, round-trip service between Johnstown and Altoona, on the one hand, and Scranton-Wilkes-Barre and New York/Newark, on the other hand. This authority shall terminate one year from September 24, 1954 (previously authorized by Order E–8651);

4. Allegheny be and hereby is temporarily exempted from the provisions of section 401 of the Act and the terms of its certificate of public convenience and necessity, with respect to segment 6 of route No. 97, insofar as they would otherwise require Allegheny during the period of the year when daylight saving time is not in effect to schedule service to Lock Haven, Pennsylvania, in excess of one daily round-trip flight (previously authorized by Order E–8872);

5. Allegheny be and hereby is temporarily exempted from the provisions of section 401 (a) of the Act, and the terms, conditions and restrictions of its temporary certificate insofar as they would otherwise prevent Allegheny from serving Oil City-Franklin, Clearfield-DuBois-Philipsburg, and Bellefonte-State College on one round-trip flight scheduled daily over segment 7 of route No. 97 between the terminal points Cleveland and Philadelphia/Camden, and from serving Oil City-Franklin on one round-trip flight scheduled daily over segment 7 between the terminal points Cleveland and New York. This authority shall expire one year from April 27, 1955 (previously authorized by Order E–9141);

6. Allegheny be and hereby is authorized to conduct nonstop service between Pittsburgh, Pennsylvania, and Atlantic City, New Jersey, over segment 3 of its route No. 97: *Provided*, That Allegheny continues to operate the quantity of service presently provided to intermediate points on trips operating between Pittsburgh and Atlantic City. This authority shall remain in effect through September 30, 1955 (previously authorized by Order E–9260);

7. Allegheny be and hereby is authorized to extend its service to and from Cape May, New Jersey, until November 1, 1955, on a trial basis for the 1955 summer season (previously authorized by Order E–9571);

8. Allegheny be and hereby is authorized to render flag-stop service on its route No. 97 by omitting the physical landing of its aircraft at any intermediate point scheduled to be served on a particular flight: *Provided*, That there are no persons, property or mail on the aircraft destined for such point and no such traffic available at such point for the flight at the scheduled time of departure: *Provided, further*, That the Board in its discretion may at any time disapprove the use of such authority with respect to service to any point on any flight or flights (previously authorized by Orders E–3920 and E–6139);

9. The authority previously granted to Allegheny by Orders E–3920 and E–6139 insofar as they pertain to Allegheny E–7452, E–7969, E–8549, E–8651, E–8872, E–9141, E–9260, and E–9571, shall be terminated on the date this order and the certificate of public convenience and necessity of unlimited duration for route No. 97 being issued to Allegheny concurrently with the issuance of this order become effective;

10. The change in service pattern, temporary suspension and temporary exemption authorizations granted herein shall become effective ----------, ---------, concurrently with the effective date of the certificate issued to Allegheny in Docket No. 7355;

11. This order or any part thereof may be amended or revoked at any time in the discretion of the Board without notice and without hearing.

By the Civil Aeronautics Board.

INTERSTATE COMMERCE COMMISSION

DESCRIPTION OF ORGANIZATION

TRANSPORT MOBILIZATION STAFF

OCTOBER 10, 1955.

The following is added to the description of the organization of bureaus and offices of the Interstate Commerce Commission:

Transport Mobilization Staff. This staff, under the direction of the Commissioner who is responsible for the supervision of the Bureau of Safety and Service, performs duties pertaining to the administration and performance of the functions with respect to domestic transportation, storage and port facilities, as that term is defined in section 601 (k) of Executive Order 10480, dated August 14, 1953 (18 F. R. 4939), delegated to the Commission and redelegated to said Commissioner under the Defense Production Act of 1950, as amended.

[SEAL] HAROLD D. MCCOY, *Secretary.*

[F. R. Doc. 55–8364; Filed, Oct. 13, 1955; 8:49 a. m.]

[Sec. 5a Application 58]

MACHINERY HAULERS ASSN.

APPLICATION FOR APPROVAL OF AGREEMENT

OCTOBER 12, 1955.

The Commission is in receipt of the above-entitled and numbered application for approval of an agreement under the provisions of section 5a of the Interstate Commerce Act.

Filed October 10, 1955.

A. R. Fowler, Secretary, Machinery Haulers Association, 2288 University Avenue, St. Paul 14, Minn.

Agreement involved: An agreement between and among common carriers by motor vehicle, members of the Machinery Haulers Association, relating to rates, classifications, divisions, allowances, and charges (including charges between carriers and compensation paid or received for the use of facilities and equipment), and rules and regulations pertaining thereto, governing the transportation of machinery or related articles between points in the United States.

The complete application may be inspected at the office of the Commission in Washington, D. C.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 20 days from the date of this notice. As provided by the General Rules of Practice of the Commission, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing.

By the Commission, division 2.

[SEAL] HAROLD D. MCCOY, *Secretary.*

[Docket No. G–9201]

SOUTHERN NATURAL GAS CO.

NOTICE OF HEARING

OCTOBER 11, 1955.

Take notice that Southern Natural Gas Company (Applicant), a Delaware corporation whose address is Watts Building, Birmingham, Alabama, filed on August 8, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to construct and operate facilities for the transportation of natural gas in interstate commerce as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to construct as an integral part of its present system approximately 100 feet of 4½ inch pipeline for the purpose of transporting, selling and delivering natural gas on an interruptible basis to Southern Nitrogen Company (Nitrogen) for industrial use in its synthetic nitrogen plant to be constructed by Nitrogen near Savannah, Georgia.

Said line will run from a tap on Applicant's existing 14 inch Savannah line for approximately 100 feet in a westerly direction to a meter station to be located at or near the proposed plant.

Applicant also proposes (1) to construct a measuring and regulating station at the terminus of said line, (2) to increase by 1,000 horsepower the existing compression facilities at the Ocmulgee compressor station by supercharging four 1,100 horsepower engines so as to add 250 horsepower to each unit, and (3) to construct a new compressor station at Wrens, Georgia, having a single portable compressor of 660 horsepower.

The estimated cost of constructing Applicant's proposed facilities is $266,800.00 The cost of construction will be defrayed from cash on hand or to be derived from current operations. It is estimated that the full cost of constructing the facilities will be recovered in about 1½ years based upon the estimated net annual operating revenues arising from the proposed sale.

Applicant proposes to supply Nitrogen with its entire plant requirements of natural gas for process gas and for fuel, estimated at a maximum of 11,000 Mcf per day and 500 Mcf per hour, subject to curtailment or interruption of deliveries

at any time and from time to time except that no interruption is annually anticipated from June 1 to October 31 except as may be necessary during this period on account of force majeure.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on Friday, October 28, 1955, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (c) (2) of the Commission's Rules of Practice and Procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

and wholesome milk and be in the public interest;

(3) The said order regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in this order, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expenses of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, 5 cents per hundredweight or such amount not exceeding 5 cents per hundredweight as the Secretary may prescribe, with respect to all receipts within the month of milk from producers and other source milk which is classified as Class I milk and which is not subject to administrative assessment under another Federal order.

(b) *Additional findings.* In view of the fact that this order will constitute the original imposition of a regulatory program of this nature for the market, the provisions other than those relating to prices and payments to producers should be put into effect prior to the effective date of the provisions relating to prices and payments to producers, in order that handlers may have opportunity to make necessary adjustments in their accounting and other operational procedures to conform with all provisions of the order. As of the date upon which the record hearing and reporting provisions become effective, the only action required of handlers is the taking of a physical inventory of milk and milk products on hand. Reasonable time will have been afforded parties to prepare to comply with the aforesaid provisions. It is hereby found and determined, in view of the aforesaid facts and circumstances that good cause exists for making all of the terms and provisions of this order except §§ 916.22 (i), 916.50 through 916.72, 916.74 and 916.75 effective on October 16, 1955 and that it would be contrary to the public interest to delay such effective date beyond that specified.

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order which is marketed within the Upstate Michigan marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order is approved or favored by at least three-fourths of the producers who participated in a referendum on the question of approval of its issuance and who during the determined representative period (June, 1955) were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Upstate Michigan marketing area shall be in conformity to and in compliance with the following terms and conditions as set forth below:

DEFINITIONS

§ 916.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C., 601 et seq.).

§ 916.2 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States, or any other officer or employee of the United States authorized to exercise the powers or to perform the duties of the Secretary of Agriculture.

§ 916.3 *U. S. D. A.* "U. S. D. A." means the United States Department of Agriculture.

§ 916.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 916.5 *Upstate Michigan marketing area.* "Upstate Michigan marketing area", hereinafter referred to as the "marketing area" means all of the territory, including all municipal corporations, within: the counties of Manistee, Benzie, Grand Traverse, Kalkaska, Crawford, Leelanau, Antrim, Otsego, Charlevoix, Emmett, and Cheboygan; Presque Isle County except for the civil townships of Krakow and Presque Isle; and the Townships of Wexford, Springville, and Hanover in Wexford County.

§ 916.6 *Fluid milk plant.* "Fluid milk plant" means all the premises, buildings, and facilities of any milk receiving, processing, or packaging plant from which:

(a) Any fluid milk product is disposed of during the month in the marketing area either on the premises or to retail or wholesale routes, directly or through vendors; or

(b) Milk or skim milk is delivered to a plant(s) described in paragraph (a) of this section on 11 or more days in any of the months of July through November or on 6 or more days in any of the months of December through June; and all or a portion of the skim milk and butterfat in the milk or skim milk so delivered is assigned to Class I utilization in the transferee plant pursuant to § 916.46 or § 916.47.

§ 916.7 *Handler.* "Handler" means (a) a person who operates a fluid milk plant or any other plant from which fluid milk products are disposed of during the month in the marketing area, or (b) a cooperative association with respect to milk customarily received by a handler as described under paragraph (a) of this section, which is diverted to a nonhandler for the account of the association.

§ 916.8 *Producer.* "Producer" means a person, other than a producer-handler, who produces milk in conformity with the sanitation requirements of any duly constituted health authority relating to milk for consumption in the marketing area in the form of a fluid milk product, which milk is received directly from the farm at a fluid milk plant or is diverted from such plant for the account of a cooperative association.

§ 916.9 *Producer-handler.* "Producer-handler" means a person who is a handler and who produces milk, but receives no milk from other producers.

§ 916.10 *Producer milk.* "Producer milk" means milk delivered by one or more producers.

§ 916.11 *Other source milk.* "Other source milk" means all skim milk and butterfat received at a fluid milk plant in any form, other than that contained in producer milk.

§ 916.12 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers, duly organized as such under the laws of any State, which the Secretary determines:

(a) To be qualified under the standards set forth in the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act;"

(b) To have full authority in the sale of milk of its members; and

(c) To be engaged in making collective sales or marketing milk or its products for its members.

§ 916.13 *Fluid milk product.* "Fluid milk product" means milk, flavored milk, skim milk, buttermilk, or half-and-half.

MARKET ADMINISTRATOR

§ 916.20 *Designation.* The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal by, the Secretary.

§ 916.21 *Powers.* The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 916.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including, but not limited to the following:

(a) Within 30 days following the date on which he enters upon his duties, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon such duties and conditioned

orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and a proposed order regulating the handling of milk in the Upstate Michigan marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure

upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay, out of the funds provided by § 916.73:

(1) The cost of his bond and of the bonds of his employees,

(2) His own compensation, and

(3) All other expenses, except those incurred under § 916.74, necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided in this part, and, upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Publicly announce, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, within 10 days after the day upon which he is required to perform such acts, has not made (1) reports pursuant to §§ 916.30 and 916.31, or (2) payments pursuant to §§ 916.70, 916.72, 916.73, and 916.74;

(g) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(h) Audit records of all handlers to verify the reports and payments required pursuant to the provisions of this part; and

(i) Publicly announce the prices determined for each month as follows:

(1) On or before the 5th day of each month, the minimum class prices for the preceding month computed pursuant to §§ 916.51 and 916.52, and the handler butterfat differential computed pursuant to § 916.53, and

(2) On or before the 12th day of each month the uniform price for each handler for the preceding month, computed pursuant to § 916.61, and the producer butterfat differential computed pursuant to § 916.71.

REPORTS, RECORDS, AND FACILITIES

§ 916.30 *Monthly reports of receipts and utilization.* On or before the 5th working day of each month, each handler shall report to the market administrator for the preceding month, in the detail and on forms prescribed by the market administrator, the following with respect to (a) all producer milk received, (b) all skim milk and butterfat in any form received from other handlers, and (c) all other source milk (except any nonfluid milk product which is disposed of in the same form as received) received at a plant(s) described in § 916.6:

(1) The quantities of butterfat and skim milk contained in such receipts, and their sources;

(2) The utilization or disposition of such receipts; and

(3) Such other information with respect to such receipts and their utilization or disposition as the market administrator may prescribe.

§ 916.31 *Other reports.* (a) Each producer-handler and each handler shall make reports at such time and in such manner as the market administrator may request.

(b) On or before the 20th day of each month each handler who received milk from producers shall report his producer payroll for the preceding month which shall show:

(1) The pounds of milk received from each producer and the percentage of butterfat contained therein;

(2) The amount and date of payment to each producer (or to a cooperative association); and

(3) The nature and amount of each deduction or charge involved in the payments referred to in subparagraph (2) of this paragraph.

§ 916.32 *Records and facilities.* Each handler shall maintain and make available to the market administrator, during the usual hours of business, such accounts and records of all of his operations and such facilities as are necessary to verify reports or to ascertain the correct information with respect to (a) the receipts and utilization or disposition of all skim milk and butterfat received, including all milk products received and disposed of in the same form, (b) the weights and tests for butterfat, skim milk and other contents of all milk and milk products handled, and (c) payments to producers and cooperative associations.

§ 916.33 *Retention of records.* All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided,* That, if within such three-year period, the market administrator notifies a handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records until further written notification from the market administrator. The market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 916.40 *Skim milk and butterfat to be classified.* All skim milk and butterfat received at a handler plant (a) in milk from producers or from a cooperative association, (b) in any form from other handlers, and (c) in other source milk required to be reported pursuant to § 916.30, shall be classified (separately as skim milk and butterfat) in the classes set forth in § 916.41.

§ 916.41 *Classes of utilization.* Subject to the conditions set forth in §§ 916.42 and 916.43, the classes of utilization shall be:

(a) Class I utilization shall be all skim milk and butterfat (1) disposed of for consumption in fluid form as milk, flavored milk, skim milk, buttermilk, and half-and-half or other mixtures of cream and milk containing less than 18 percent butterfat; and (2) not accounted for as Class II utilization.

(b) Class II utilization shall be all skim milk and butterfat (1) used to produce any product other than those specified in paragraph (a) of this section; (2) disposed of as fluid cream or for livestock feed or skim milk dumped subject to prior notification to and inspection (at his discretion) by the market administrator; (3) in shrinkage of producer milk up to 2 percent of receipts from producers; or (4) in shrinkage of other source milk.

§ 916.42 *Shrinkage.* (a) If producer milk is utilized in conjunction with other source milk, the shrinkage shall be allocated pro rata between the receipts of skim milk and butterfat in producer milk and other source milk.

(b) Producer milk transferred by a handler to another handler without first having been received for the purpose of weighing and testing in the transferor handler's plant shall be included in the receipts at the plant of the transferee handler for the purpose of computing his shrinkage and shall be excluded at the plant of the transferor handler in computing his shrinkage.

§ 916.43 *Transfers.* (a) Skim milk and butterfat disposed of from a fluid milk plant to another handler in the form of milk or skim milk shall be Class I utilization, unless Class II utilization is indicated by both handlers in their reports submitted pursuant to § 916.30: *Provided,* That in no event shall the amount so classified in Class II be greater than the amount of producer milk used in such class by the transferee handler after allocating other source milk in his plant in series beginning with the lowest priced utilization.

(b) Skim milk and butterfat moved in the form of milk or skim milk from a fluid milk plant to a person not a handler shall be Class I utilization unless all of the following conditions are met:

(1) Class II utilization is indicated by the handler in his report submitted pursuant to § 916.30;

(2) The operator of the transferee plant had actually used in the month of such movement an equivalent amount of skim milk and butterfat in Class II, or moved such amount to another plant not operated by a handler which meets the requirments of subparagraph (3) of this paragraph and utilized in the month an equivalent amount of skim milk and butterfat in Class II.

(3) The operator of the transferee plant maintains books and records which are made available if requested by the market administrator and which are adequate for the verification of such Class II utilization.

(c) Skim milk and butterfat disposed of from a fluid milk plant to a producer handler shall be Class I utilization.

§ 916.44 *Responsibility of handlers and reclassification.* All skim milk and butterfat shall be classified as Class I utilization unless the handler who first received such skim milk or butterfat proves to the market administrator that such skim milk or butterfat should be classified otherwise.

§ 916.45 *Computation of skim milk and butterfat in each class.* For each month the market administrator shall correct for mathematical and obvious errors the monthly report submitted by each handler and compute the total pounds of skim milk and butterfat, respectively, in Class I and Class II utilization for such handler.

§ 916.46 *Allocation of butterfat classified.* The pounds of butterfat remaining after making the following computations shall be the pounds in each class allocated to milk received from producers:

(a) Subtract from the total pounds of butterfat in Class II utilization, the pounds of butterfat shrinkage allowed pursuant to § 916.41 (b) (3);

(b) Subtract from the pounds of butterfat remaining in each class, in series beginning with the lowest priced utilization, the pounds of butterfat in other source milk received from a plant(s) other than those subject to another marketing agreement or order issued pursuant to the act;

(c) Subtract from the pounds of butterfat remaining in each class, in series beginning with the lowest priced utilization, the pounds of butterfat in other source milk received in bulk from a plant(s) which is subject to another marketing agreement or order issued pursuant to the act;

(d) Subtract from the pounds of butterfat in each class the pounds of butterfat contained in milk or milk products received in packaged form which were classified and priced under another marketing agreement or order issued pursuant to the act and disposed of in the same form as received.

(e) Subtract from the remaining pounds of butterfat in each class, the pounds of butterfat received from other handlers in such classes pursuant to § 916.43 (a); and

(f) Add to the remaining pounds of butterfat in Class II utilization the pounds subtracted pursuant to paragraph (a) of this section;

(g) If the remaining pounds of butterfat in all classes exceed the pounds of butterfat in milk received from producers, subtract such excess from the remaining pounds of butterfat in each class in series, beginning with the lowest-priced utilization.

§ 916.47 *Allocation of skim milk classified.* Allocate the pounds of skim milk in each class to milk received from producers in a manner similar to that prescribed for butterfat in § 916.46.

MINIMUM PRICES

§ 916.50 *Basic formula price.* The basic formula price to be used in determining the price per hundredweight of Class I utilization shall be the highest of the prices computed pursuant to paragraphs (a), (b), and (c) of this section.

(a) The average of the basic or field prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the U. S. D. A.:

Present Operator and Location

Borden Co., Mount Pleasant, Mich.
Borden Co., New London, Wis.
Borden Co., Orfordville, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Sparta, Mich.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed by adding together the plus values computed pursuant to subparagraphs (1) and (2) of this paragraph:

(1) From the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the mid-point of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the U. S. D. A. during the month; subtract 3 cents, add 20 percent thereof and multiply by 3.5.

(2) From the simple average, as computed by the market administrator, of the weighted averages of carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the U. S. D. A., deduct 5.5 cents and then multiply by 8.2.

(c) The average of the basic or field prices per hundredweight reported to have been paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants:

Beatrice Foods Co., Cadillac, Mich.
Borden Co., Mount Pleasant, Mich.
Carnation Co., Sparta, Mich.
Kraft Cheese Co., Clare, Mich.

§ 916.51 *Class I milk price.* During the 18-month period following the effective date of this subpart the minimum price per hundredweight to be paid by each handler, f. o. b. his plant as described in § 916.6 for milk of 3.5 percent butterfat content received from producers or from cooperative associations, during the month, which is classified as Class I utilization shall be the basic formula price plus $1.15.

§ 916.52 *Class II milk price.* The minimum price per hundredweight to be paid by each handler, f. o. b. his plant as described in § 916.7 for milk of 3.5 percent butterfat content received from producers or from a cooperative association, during the month, which is classified as Class II utilization, shall be the price as computed by the market administrator pursuant to § 916.50 (c).

§ 916.53 *Handler butterfat differential.* There shall be added to or subtracted from, as the case may be, the prices of milk for each class as computed pursuant to §§ 916.51 and 916.52, for each one-tenth of one percent variation in the average butterfat test of the milk in each class above or below 3.5 percent an amount equal to the producer butterfat differential determined pursuant to § 916.71.

§ 916.54 *Handler location adjustments.* For milk which is received from producers at a fluid milk plant located more than 90 miles but not more than 100 miles, by shortest highway distance, as determined by the market administrator, from the court house in either Gaylord or Traverse City, whichever is closer, and utilized as Class I (prorating to such milk the utilization of all producer milk received at the plant), the price shall be the price effective pursuant to § 916.51, less 18 cents, and less 1 cent additional for each 10 miles or fraction thereof over 100 miles.

HANDLER'S OBLIGATION AND UNIFORM PRICE

§ 916.60 *Value of producer milk.* The value of producer milk received by each handler during the month shall be the sum of money computed by the market administrator by multiplying the hundredweight of skim milk and butterfat in each class by the applicable class prices and adding together the resulting amounts, and adding or subtracting, as the case may be, the amount necessary to correct errors in classification for previous months as disclosed by audit of the market administrator: *Provided,* That, if a handler, after the subtraction of other source milk and receipts from other handlers, has disposed of skim milk or butterfat in excess of the skim milk or butterfat which on the basis of his reports for the month, pursuant to § 916.30, has been credited to his producers as having been received from them there shall be added to the value of his producer milk a further amount computed by multiplying the pounds in each class as subtracted pursuant to § 916.46 (g) and the corresponding step of § 916.47 by the applicable class price.

§ 916.61 *Computation of uniform price.* For such month the market administrator shall compute for each handler a "uniform price" per hundredweight of producer milk of 3.5 percent butterfat content delivered to plants located in the marketing area, as follows:

(a) To the value computed pursuant to § 916.60 add an amount equal to the total value of the location differentials computed pursuant to § 916.72;

(b) Subtract from the value of milk computed for such handler pursuant to § 916.60, if the weighted average butterfat test of all producer milk represented by such value is greater than 3.5 percent or add, if the weighted average butterfat test of such milk is less than 3.5 percent, an amount computed by multiplying the total pounds of butterfat represented by the difference of such weighted average butterfat test from 3.5 percent, by the

butterfat differential computed pursuant to § 916.71 multiplied by 10;

(c) Adjust the resulting amount by the sum of money used in adjusting the uniform price, pursuant to paragraph (e) of this section for the previous month to the nearest cent;

(d) Divide the result by the total hundredweight of producer milk represented by the amounts computed pursuant to § 916.60; and

(e) Adjust the resulting figure to the nearest cent.

§ 916.62 *Notification.* On or before the 12th day after the end of each month, the market administrator shall mail to each handler, at his last known address, a statement showing for such month:

(a) The amount and value of his producer milk in each class;

(b) The uniform price for such handler computed pursuant to § 916.61, and the butterfat differential computed pursuant to § 916.71; and

(c) The amounts to be paid by such handler pursuant to §§ 916.72 and 916.73.

PAYMENT FOR MILK

§ 916.70 *Time and method of payment.* (a) Except as provided in paragraph (b) of this section, on or before the 15th day after the end of each month each handler who received milk from producers shall pay for milk received during such month to each producer for milk received from him the uniform price as provided in § 916.61 adjusted by the butterfat differential pursuant to § 916.71 and the location adjustment pursuant to § 916.72.

(b) (1) Upon receipt of a written request from a cooperative association which the Secretary determines is authorized by its members to collect payment for their milk and receipt of a written promise to reimburse the handler the amount of any actual loss incurred by him because of any improper claim on the part of the association, each handler shall pay to the cooperative association on or before the 16th day of each month, in lieu of payments pursuant to paragraph (a) of this section an amount equal to the gross sum due for all milk received from certified members, less amounts owing by each member-producer to the handler for supplies purchased from him on prior written order or as evidenced by a delivery ticket signed by the producer and submit to the cooperative association written information which shows for each such member-producer (i) the total pounds of milk received from him during the preceding month, (ii) the total pounds of butterfat contained in such milk, (iii) the number of days on which milk was received, and (iv) the amounts withheld by the handler in payment for supplies sold. The foregoing payment and submission of information shall be made with respect to milk of each producer whom the cooperative association certifies is a member, which is received on and after the first day of the calendar month next following receipt of such certification through the last day of the month next preceding receipt of notice from the cooperative association of a termination of membership or until the original request is rescinded in writing by the association.

(2) A copy of each such request, promise to reimburse, and a certified list of members shall be filed simultaneously with the market administrator by the association and shall be subject to verification at his discretion, through audit of the records of the cooperative association pertaining thereto. Exceptions, if any, to the accuracy of such certification by a producer claimed to be a member, or by a handler shall be made by written notice to the market administrator, and shall be subject to his determination.

§ 916.71 *Producer butterfat differential.* In making payments pursuant to § 916.70, the uniform price shall be increased or decreased for each one-tenth of one percent of butterfat content in the milk received from each producer or a cooperative association above or below 3.5 percent, as the case may be, by a butterfat differential of 7 cents when the average price of butter as described in § 916.50 (b) (1) is 60 cents, which differential shall be increased one-half cent for each full 5 cents variance in such price of butter above 60 cents and decreased one-half cent for each full 5-cent variance in such price of butter below 64.99 cents.

§ 916.72 *Producer location adjustments.* In making payments to producers or cooperative associations pursuant to § 916.70 a handler may deduct, with respect to all milk received by him from producers at a plant located by shortest highway distance as determined by the market administrator, more than 90 miles from the court house in either Gaylord or Traverse City area the amount per hundredweight applicable to the plant as set forth in § 916.54.

§ 916.73 *Expense of administration.* As his pro rata share of the expense of administration of this part, each handler shall pay to the market administrator on or before the 13th day after the end of each month 5 cents per hundredweight, or such amount not exceeding 5 cents per hundredweight as the Secretary may prescribe, with respect to all receipts within the month of milk from producers, including milk of such handlers' own production, and to any other source milk allocated to Class I pursuant to §§ 916.46 and 916.47.

§ 916.74 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, each handler, in making payments pursuant to § 916.70 for milk received from each producer (including milk of such handler's own production) at a plant not operated by a cooperative association of which such producer is a member, shall deduct 5 cents per hundredweight, or such amount not exceeding 5 cents per hundredweight as the Secretary may prescribe, and, on or before the 13th day after the end of each month, shall pay such deductions to the market administrator. Such moneys shall be used by the market administrator to verify weights, samples, and tests of milk received from producers and to provide producers with market information, such services to be performed by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of producers whose milk is received at a plant not operated by a cooperative association of which such producers are members, and for whom a cooperative association is actually performing the services described in paragraph (a) of this section, as determined by the Secretary, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions from payments required pursuant to § 916.70 as may be authorized by such producers, and pay such deductions on or before the 13th day after the end of the month to the cooperative association rendering such services of which such producers are members.

§ 916.75 *Errors in payments.* Whenever audit by the market administrator of any handler's reports, books, records, or accounts discloses adjustments to be made, for any reason, which result in moneys due:

(a) To the market administrator from such handler,

(b) To such handler from the market administrator, or

(c) To any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any such amount due; and payment thereof shall be made on or before the next date for making payment set forth in the provision under which such error occurred, following the 5th day after such notice.

§ 916.76 *Overdue accounts.* Any unpaid obligation of a handler or of the market administrator pursuant to §§ 916.72, 916.73, and 916.74 shall be increased one-half of one percent on the first day of the month next following the due date of such obligation and on the first day of each month thereafter until such obligation is paid.

§ 916.77 *Termination of obligations.* (a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the month during which the market administrator receives the handler's report of utilization of the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to a cooperative association, the name of such producers or association, or, if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books or records required by this order to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the month following the month during which such books and records pertaining to such obligation are made available to the market administrator or his representative.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or wilful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

APPLICATION OF PROVISIONS

§ 916.80 *Milk caused to be delivered by cooperative associations.* Milk referred to in this part as received from producers by a handler shall include milk of producers caused to be delivered to such handler by a cooperative association.

§ 916.81 *Producer-handler exemption.* A producer-handler shall be exempt from all provisions of this part except §§ 916.31, 916.32, and 916.33.

§ 916.82 *Handler Exemption.* A handler who operates a plant from which an average of less than 200 points (one point being defined as one-half pint of cream or one quart of any other Class I product) of Class I milk per day is disposed of in the marketing area during the delivery month on a route(s) operating wholly or partly within the marketing area, or a handler who operates a plant which the Secretary finds is subject, during the delivery month, to another Federal order shall, with respect to such plant, be exempted for such delivery period from all provisions of this subpart except §§ 916.31, 916.32, and 916.33.

§ 916.83 *Milk subject to other Federal orders.* Milk received at the plant of a handler at which the handling of milk is fully subject during the month to the pricing and payment provisions of another marketing agreement or order issued pursuant to the act and from which the disposition of Class I milk in the other Federal marketing area, either during the month or during the average of the 12 preceding months, exceeds that in the Upstate Michigan marketing area shall be exempted for such month from all the provisions hereof except §§ 916.31, 916.32, and 916.33 unless the Secretary determines that such plant is more appropriately regulated under this part.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 916.90 *Effective time.* The provisions of this part, or of any amendment to this part, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 916.91 *When suspended or terminated.* The Secretary shall, whenever he finds that this part, or any provision thereof, obstructs or does not tend to effectuate the declared policy of the act, terminate or suspend the operation of this part or any such provision thereof.

§ 916.92 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this part, there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 916.93 *Liquidation.* Upon the suspension or termination of the provisions of this part, except this section, the market administrator, or such other liquidating agent as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers, in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 916.100 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

§ 916.101 *Separability of provisions.* If any provision of this part, or its application to any person or circumstances, is held invalid the application of such provision, and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

Issued at Washington, D. C., this 13th day of October 1955, to be effective as follows: §§ 916.0 through 916.22 (h), 916.30 through 916.47, 916.73, and 916.76 through 916.101 shall be effective on and after October 16, 1955, and all of the remaining terms and provisions of this order (§§ 916.22 (i), 916.50 through 916.72, 916.74, and 916.75) shall be effective on and after November 1, 1955.

[SEAL] EARL L. BUTZ,
Assistant Secretary.

[Valencia Orange Reg. 58]

PART 922—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 922.358 *Valencia Orange Regulation 58*—(a) *Findings.* (1) Pursuant to Order No. 22 (7 CFR Part 922), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective March 31, 1954, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The Valencia Orange Administrative Committee held an open meeting on October 13, 1955, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto

which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of Valencia oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., October 16, 1955, and ending at 12:01 a. m., P. s. t., October 23, 1955, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 323,400 boxes;

(iii) District 3: Unlimited movement.

(2) Valencia oranges handled pursuant to the provisions of this section shall be subject to any size restrictions applicable thereto which have heretofore been issued on the handling of such oranges and which are effective during the period specified herein.

(3) As used in this section, "handled," "handler," "boxes," "District 1," "District 2," and "District 3," shall have the same meaning as when used in said order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: October 14, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55-8445; Filed, Oct. 14, 1955; 11:49 a. m.]

[Lemon Reg. 611]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATIONS OF SHIPMENTS

§ 953.718 *Lemon Regulation 611*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 19 F. R. 7175; 20 F. R. 2913), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on October 12, 1955, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., October 16, 1955, and ending at 12:01 a. m., P. s. t., October 23, 1955, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 150 carloads;

(iii) District 3: Unlimited movement.

(2) As used in this section, "handled," "carloads," "District 1," "District 2," and "District 3" shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: October 13, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

TITLE 17—COMMODITY AND SECURITIES EXCHANGES

Chapter I—Commodity Exchange Authority (Including Commodity Exchange Commission), Department of Agriculture

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

INCREASE OF REGISTRATION FEES

By virtue of the authority vested in the Secretary of Agriculture under section 8a of the Commodity Exchange Act (7 U. S. C. 12a), as amended by Public Law 248, 84th Congress, 1st Session, approved August 5, 1955 (69 Stat. 535), and pursuant to notice published in the FEDERAL REGISTER on August 24, 1955 (20 F. R. 6193), Part 1 of Chapter I, Title 17, Code of Federal Regulations, as amended, is hereby further amended as follows:

1. By amending § 1.11 to read:

§ 1.11 *Registration fees; form of remittance.* Each application for registration, or renewal thereof, as futures commission merchant shall be accompanied by a fee of $25. Each application for registration, or renewal thereof, as floor broker shall be accompanied by a fee of $15. Duplicates of registration certificates may be procured on request upon payment of $2 for each duplicate. Fees shall be remitted by money order, bank draft, or check, payable to the Commodity Exchange Authority, U. S. D. A. Applications and fees shall be forwarded to the Commodity Exchange Authority, United States Department of Agriculture, Washington 25, D. C.

2. By changing the headnote of § 1.12 to read: "*Posting of registration certificate.*"

3. By deleting the last paragraph of § 1.12.

Effective date. The foregoing amendments shall become effective upon publication in the FEDERAL REGISTER except that the present $10 fee shall remain in effect with respect to applications for registration, or renewal thereof, for the period ending December 31, 1955.

These amendments in part implement section 8a (4) of the Commodity Exchange Act, as amended August 5, 1955, by Public Law 248, 84th Congress, 1st Session, by increasing fees relating to registration periods beginning after December 31, 1955, in conformity with the provision of the Independent Offices Appropriation Act, 1952, that agencies should recover the aggregate cost of registration and licensing "to the full extent possible," and to this extent should be made effective as soon as possible in the public interest. Registration fees are deposited in the Treasury as general receipts and are not available for expenditure by the Department of Agriculture. The amendments also consolidate into § 1.11 those provisions of present § 1.12 related to fees for duplicates of registration certificates. This change is administrative in nature and will not affect the rights or obligations of any person subject to the regulations. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is found upon good cause that notice and other public procedure with respect to the latter change are unnecessary, and good cause is found for making the amendments effective less than 30 days after publication in the FEDERAL REGISTER.

(Sec. 8a, as added by sec. 10, 49 Stat. 1500, as amended; 69 Stat. 535; 7 U. S. C. 12a)

Issued this 12th day of October 1955.

[SEAL] EARL L. BUTZ,
Assistant Secretary.

[F. R. Doc. 55-8392; Filed, Oct. 14, 1955; 8:48 a. m.]

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 165]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

PROCEDURE ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.

When a LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility; class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distances	Minimum altitude (ft.)	Ceiling and visibility minimums: Condition	Ceiling and visibility minimums: Type aircraft: 75 m. p. h. or less	Ceiling and visibility minimums: Type aircraft: More than 75 m. p. h.	If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished	Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances

PUEBLO, COLO. Pueblo Municipal No. 2, 4,712'. BVOR-DTV-PUB. Procedure No. 1. Original. Effective June 28, 1954.	PROCEDURE CANCELED—SEPTEMBER 16, 1955.									

4. The very high frequency omnirange procedures prescribed in § 609.9 (c) are amended to read in part:

VOR/DME STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses, and radials are magnetic. Elevations and altitude are in feet MSL.

If a VOR/DME instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator of Civil Aeronautics for such airport. Initial approaches shall be made over specific routes. Minimum altitude(s) shall correspond with those established for enroute operation in the particular area or as set forth below.

NOTE: Distances are in nautical miles unless otherwise indicated except visibilities, which are in statute miles.

Oklahoma City, Okla.; Will Rogers Field; elevation 1,283'; facility BVOR-DME; identification OKC; amendment No. 1; effective date November 12, 1955, Original; supersedes amendment, dated October 15, 1955.

6. The ground controlled approach procedures prescribed in § 609.13 are amended to read in part:

GOA STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If a GOA instrument approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified fix or final approach course at or above minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the ground controller. Procedure must be conducted with GOA to final authorized landing minimums, the instructions of the GOA controller are mandatory except when (A) visual reference with ground is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach.

City and State; airport name, elevation; effective date	Radar terminal area; maneuvering altitudes by sectors and limiting distances	Ceiling and visibility minimums: Runway No.	Condition	Precision approach (PAR): 75 m. p. h. or less	Precision approach (PAR): More than 75 m. p. h.	Surveillance approach (ASR): 75 m. p. h. or less	Surveillance approach (ASR): More than 75 m. p. h.	Except when the ground controller may direct otherwise prior to final approach, a missed approach procedure shall be executed as provided below when (a) communication on final approach is lost for more than 5 seconds, (b) directed by ground controller, (c) visual reference is not established upon descent to the authorized landing minimums; or (d) landing is not accomplished

These procedures shall become effective on the dates indicated in Column 1 of the procedures.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

[SEAL]

F. B. LEE,
Administrator of Civil Aeronautics.

[F. R. Doc. 55-8255; Filed, Oct. 14, 1955; 8:45 a. m.]

[Amdt. 92]

PART 610—MINIMUM EN ROUTE IFR ALTITUDES

ALTERATIONS

The minimum en route IFR altitudes appearing hereinafter have been coordinated with interested members of the industry in the regions concerned insofar as practicable. The altitudes are adopted without delay in order to provide for safety in air commerce. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 610 is amended as follows: (Listed items to be placed in appropriate sequence in the sections indicated.)

Section 610.14 *Green civil airway 4* is amended to read in part:

From—	To—	Minimum altitude
Cuervo INT, N. Mex..	Tucumcari,[1] N. Mex., LFR.	7,000

[1] 6,000'—minimum crossing altitude at Tucumcari LFR, westbound.

Section 610.15 *Green civil airway 5* is amended to read in part:

From—	To—	Minimum altitude
Riverside,[1] Calif., LFR.	Palm Springs INT, Calif.	13,000
Banning, Calif., FM...	Riverside, Calif., LFR westbound only.	10,000
Palm Springs[2] INT., Calif.	Blythe, Calif., LFR..	8,000

[1] 11,000'—minimum crossing altitude at Riverside LFR, eastbound.
[2] 13,000'—minimum crossing altitude at Palm Springs INT, westbound.

Section 610.16 *Green civil airway 6* is amended to read in part:

From—	To—	Minimum altitude
Lake Charles, La., LFR.	Lafayette, La., LF/RBN.	1,500
Lafayette, La., LF/RBN.	New Orleans, La., LFR.	1,400
New Orleans, La., LFR.	Horn INT, Miss.....	1,400
Horn INT, Miss.....	Bay Minette, Ala., LF/RBN.	1,600

Section 610.20 *Green civil airway 10* is amended to read in part:

From—	To—	Minimum altitude
Pendleton,[1] Oreg., LFR.	Baker, Oreg., LFR...	10,000
La Grande, Oreg., FM..	Pendleton, Oreg., LFR, northwestbound only.	7,000

[1] 4,500'—minimum crossing altitude at Pendleton LFR, southeastbound.

Section 610.107 *Amber civil airway 7* is amended to read in part:

From—	To—	Minimum altitude
West Palm Beach, Fla., LFR.	Melbourne, Fla., LFR.	1,300

Section 610.210 *Red civil airway 10* is amended to read in part:

From—	To—	Minimum altitude
Hainsville INT, Tex...	Shreveport, La., LFR.	1,900

Section 610.211 *Red civil airway 11* is amended to read in part:

From—	To—	Minimum altitude
Springfield, Mo., LFR..	Vichy, Mo., LF/RBN.	2,600
Vichy, Mo., LF/RBN..	St. Peters INT, Mo...	2,200

Section 610.230 *Red civil airway 30* is amended to read in part:

From—	To—	Minimum altitude
Shreveport, La., LFR..	Converse INT, La....	1,600
Converse INT, La.....	Alexandria, La., LFR.	1,500

Section 610.238 *Red civil airway 38* is amended to read in part:

From—	To—	Minimum altitude
Medina INT, Tex.....	Beckmann INT, Tex..	2,700
Beckmann INT, Tex..	San Antonio, Tex. LFR.	2,200

Section 610.253 *Red civil airway 53* is amended to read in part:

From—	To—	Minimum altitude
Walla Walla, Wash., LFR.	Spokane, Wash., LFR.	5,000

Section 610.271 *Red civil airway 71* is amended to read in part:

From—	To—	Minimum altitude
Roswell, N. Mex., LFR.	Elkins INT, N. Mex..	5,600

Section 610.272 *Red civil airway 72* is amended to read in part:

From—	To—	Minimum altitude
Hartly INT, Del.....	New Castle, Del., LFR.	1,600

Section 610.273 *Red civil airway 73* is amended to read in part:

From—	To—	Minimum altitude
New Castle, Del., LFR.	Elmer INT, N. J.....	1,600

Section 610.298 *Red civil airway 98* is amended to read:

From—	To—	Minimum altitude
Vichy, Mo., LF/RBN..	Belleville, Ill., Scott AFB, LFR.	2,500

Section 610.601 *Blue civil airway 1* is amended to read in part:

From—	To—	Minimum altitude
Miami, Fla., LFR.....	La Belle INT, Fla....	1,100
La Belle INT, Fla.....	Tampa, Fla, LFR....	1,300

Section 610.613 *Blue civil airway 13* is amended to read in part:

From—	To—	Minimum altitude
Shreveport, La., LFR.	Texarkana, Ark., LFR.	1,900

Section 610.687 *Blue civil airway 87* is amended to read in part:

From—	To—	Minimum altitude
Lexington, Ky., LF/RBN.	Cincinnati, Ohio, LFR.	2,300
Cincinnati, Ohio, LFR.	Wright Patterson, AFB, Dayton, Ohio, LFR.	2,500

Section 610.1001 *Direct route, U. S.* is amended to read in part:

From—	To—	Minimum altitude
Richmond, Tex., LFR.	Fairbanks INT, Tex..	1,800

Section 610.1001 *Direct route, U. S.* is amended by adding:

From—	To—	Minimum altitude
Houston, Tex., LFR...	Prairie Hill, Tex., LF/RBN.	1,800

Section 610.6003 *VOR civil airway 3* is amended to delete:

From—	To—	Minimum altitude
Vero Beach, Fla., VOR, via W alter.	Daytona Beach, Fla., VOR, via W alter.	1,400

Section 610.6004 *VOR civil airway 4* is amended to read in part:

From—	To—	Minimum altitude
Evansville, Ind., VOR	Apalona INT, Ind	2,500
Apalona INT, Ind	Elizabeth INT, Ind.[1]	2,500
Elizabeth INT, Ind	Louisville, Ky., VOR	2,500
Louisville, Ky., VOR	Mt. Eden INT., Ky.[2]	2,200
Mt. Eden INT, Ky.[2]	Lexington, Ky., VOR	2,200

[1] 4,200′—Minimum reception altitude.
[2] 4,000′—Minimum reception altitude.

Section 610.6006 *VOR civil airway 6* is amended to read in part:

From—	To—	Minimum altitude
Wells, Nev., VOR	Lucin, Utah, VOR	12,000
Lucin, Utah, VOR	Ogden, Utah, VOR	11,000

Section 610.6008 *VOR civil airway 8* is amended to read in part:

From—	To—	Minimum altitude
Mansfield, Ohio, VOR	Mt. Hope INT, Ohio[1]	2,500
Mt. Hope INT, Ohio[1]	Bergholz INT, Ohio	2,500
Bergholz INT, Ohio	Pittsburgh, Pa., VOR	2,700

[1] 4,000′—minimum reception altitude.

Section 610.6010 *VOR civil airway 10* is amended to delete:

From—	To—	Minimum altitude
Emporia, Kans., VOR, via N alter.	Kansas City, Mo., VOR, via N alter.	[1] 3,700

[1] 2,500′—minimum terrain clearance altitude.

Section 610.6011 *VOR civil airway 11* is amended to read in part:

From—	To—	Minimum altitude
Houston, Tex., VOR	Lufkin, Tex., VOR	[1] 4,000

[1] 1,600′—minimum terrain clearance altitude.

Section 610.6011 *VOR civil airway 11* is amended by adding:

From—	To—	Minimum altitude
Evansville, Ind., VOR, via E alter.	Scotland, Ind., VOR, via E alter.	2,000

Section 610.6012 *VOR civil airway 12* is amended to delete:

From—	To—	Minimum altitude
Emporia, Kans., VOR, via N alter.	Kansas City, Mo., VOR, via N alter.	2,500
Kansas City, Mo., VOR, via S alter.	Columbia, Mo., VOR, via S alter.	[1] 4,000

[1] 2,400′—minimum terrain clearance altitude.

Section 610.6012 *VOR civil airway 12* is amended to read in part:

From—	To—	Minimum altitude
Dayton, Ohio, VOR	West Jefferson, INT, Ohio.[1]	2,500
West Jefferson INT, Ohio.[1]	Columbus, Ohio, VOR.	2,500

[1] 3,800′—minimum reception altitude.

Section 610.6012 *VOR civil airway 12* is amended by adding:

From—	To—	Minimum altitude
Winslow, Ariz., VOR, via N alter.	Zuni, N. Mex., VOR, via N alter.	10,000

Section 610.6013 *VOR civil airway 13* is amended to delete:

From—	To—	Minimum altitude
Butler, Mo., VOR. via E alter.	Kansas City, Mo., VOR, via E alter.	3,000

Section 610.6013 *VOR civil airway 13* is amended to read in part:

From—	To—	Minimum altitude
Houston, Tex., VOR	Lufkin, Tex., VOR	[1] 4,000
Lufkin, Tex., VOR	Shreveport, La., VOR	2,400

[1] 1,600′—minimum terrain clearance altitude.

Section 610.6015 *VOR civil airway 15* is amended to read in part:

From—	To—	Minimum altitude
Houston, Tex., VOR	College Station, Tex., VOR.	1,800

Section 610.6018 *VOR civil airway 18* is amended to read in part:

From—	To—	Minimum altitude
Anniston, Ala., VOR, via S alter.	Roopville INT, Ga., via S alter.	4,000
Roopville INT, Ga., via S alter.	Atlanta, Ga., VOR, via S alter.	[1] 3,000

[1] 2,200′—minimum terrain clearance altitude.

Section 610.6022 *VOR civil airway 22* is amended to read in part:

From—	To—	Minimum altitude
Marianna, Fla., VOR, via N alter.	Calvary INT, Fla., via N alter.	1,500
Calvary INT, Fla., via N alter.	Tallahassee, Fla., VOR, via N alter.	1,400

Section 610.6022 *VOR civil airway 22* is amended by adding:

From—	To—	Minimum altitude
New Orleans, La., VOR	Cat INT, La.[1]	[2] 3,600
Cat INT, La.	Mobile, Ala., VOR	1,400

[1] 3,600′—minimum reception altitude.
[2] 1,600′—minimum terrain clearance altitude.

Section 610.6023 *VOR civil airway 23* is amended by adding:

From—	To—	Minimum altitude
White Oaks INT, Calif.	Bakersfield, Calif., VOR, N-bound only.	6,000
Portland, Oreg., VOR, via W alter.	Toledo INT, Wash., via W alter.	5,000
Toledo INT, Wash., via W alter.	Olympia, Wash. VOR, via W alter.: Southbound	5,000
	Northbound	4,000
Olympia, Wash., VOR, via W alter.	Shelton INT, Wash., via W alter.	3,000
Shelton INT, Wash., via W alter.	Seattle, Wash., VOR, via W alter.	3,000

Section 610.6025 *VOR civil airway 25* is amended to delete:

From—	To—	Minimum altitude
Los Angeles, Calif., VOR.[1]	Fillmore, Calif., VOR.	5,000
Shoreline INT, Calif.	Los Angeles, Calif., VOR, southeast-bound only.	3,000
Fillmore, Calif., VOR[2]	Paso Robles, Calif., VOR.	[3] 12,500

[1] 3,000′—minimum crossing altitude at Los Angeles, VOR, northwestbound.
[2] 10,500′—minimum crossing altitude at Fillmore, VOR, northwestbound.
[3] 9,500′—minimum terrain clearance altitude.

Section 610.6025 *VOR civil airway 25* is amended by adding:

From—	To—	Minimum altitude
Camarillo, Calif., LFR.	Santa Barbara, Calif., VOR.	6,000
Santa Barbara, Calif., VOR.	Paso Robles, Calif., VOR.	8,000

Section 610.6027 *VOR civil airway 27* is amended to read in part:

From—	To—	Minimum altitude
Hoquiam, Wash., VOR	Shelton INT, Wash.	3,500
Shelton INT, Wash.	Seattle, Wash., VOR	3,000

Section 610.6027 *VOR civil airway 27* is amended by adding:

From—	To—	Minimum altitude
Camarillo, Calif., LFR.	Santa Barbara, Calif., VOR.	6,000

Section 610.6029 *VOR civil airway 29* is amended to read in part:

From—	To—	Minimum altitude
Dover, Del., VOR	West Chester, Pa., VOR.	1,600

Section 610.6032 *VOR civil airway 32* is amended to read in part:

From—	To—	Minimum altitude
Elko, Nev. VOR	Bonneville, Utah, VOR.	13,000
Elko, Nev., VOR, via N alter.	Wells, Nev., VOR, via N alter.	13,000
Wells, Nev., VOR, via N alter.	Bonneville, Utah, VOR, via N alter.	12,000
Bonneville, Utah, VOR.	Salt Lake City, Utah, VOR.[1]	11,000

[1] 12,000′—minimum crossing altitude at Salt Lake City VOR, eastbound.

Section 610.6035 *VOR civil airway 35* is amended to read in part:

From—	To—	Minimum altitude
Tallahassee, Fla., VOR.	Albany, Ga., VOR	1,500

Section 610.6039 *VOR civil airway 39* is amended to read in part:

From—	To—	Minimum altitude

Kingsville INT, Tex.	Brownsville, Tex., VOR.	[1] 6,000

[1] 1,300′—minimum terrain clearance altitude.

Section 610.6069 *VOR civil airway 69* is amended to read in part:

From—	To—	Minimum altitude
Farmington, Mo. VOR	Crystal City[1] INT, Mo.	2,500
Crystal City INT, Mo.	Troy, Ill., VOR	2,200

[1] 3,000′—minimum reception altitude.

Section 610.6069 *VOR civil airway 69* is amended by adding:

From—	To—	Minimum altitude
Little Rock, Ark., VOR.	Lonoke INT, Ark.	1,500
Lonoke INT, Ark.	Walnut Ridge, Ark., VOR.	[1] 2,500

[1] 1,700′—minimum terrain clearance altitude.

Section 610.6070 *VOR civil airway 70* is amended to read in part:

From—	To—	Minimum altitude
Baton Rouge, La., VOR.	Madisonville[1] INT, La.	2,000

[1] 2,000′—minimum reception altitude.

Section 610.6071 *VOR civil airway 71* is amended to delete:

From—	To—	Minimum altitude
Springfield, Mo., VOR, via E alter.	Butler, Mo., VOR, via E alter.	2,500
Butler, Mo., VOR, via E alter.	Kansas City, Mo., VOR, via E alter.	3,000

Section 610.6071 *VOR civil airway 71* is amended to read in part:

From—	To—	Minimum altitude
Springfield, Mo., VOR.	Schell City[1] INT, Mo.	2,500
Schell City[1] INT, Mo.	Butler, Mo., VOR	2,500

[1] 4,000′—minimum reception altitude.

Section 610.6076 *VOR civil airway 76* is amended to read in part:

From—	To—	Minimum altitude
San Angelo, Tex., VOR.	Brady INT, Tex.	[1] 5,000
Brady INT, Tex.	Kingsland INT, Tex.	[2] 7,500
Kingsland INT, Tex.	Lake Travis INT, Tex.	[3] 5,000
Lake Travis INT, Tex.	Austin, Tex., VOR.	3,000

[1] 3,500′—minimum terrain clearance altitude.
[2] 3,100′—minimum terrain clearance altitude.
[3] 2,500′—minimum terrain clearance altitude.

Section 610.6088 *VOR civil airway 88* is amended to delete:

From—	To—	Minimum altitude
Crystal City INT, Mo.	Red Bud INT, Ill.	[1] 3,000
Red Bud INT, Ill.	Centralia, Ill., VOR	2,500

[1] 2,500′—minimum terrain clearance altitude.

Section 610.6092 *VOR civil airway 92* is amended to read in part:

From—	To—	Minimum altitude
Mansfield, Ohio, VOR.	Mt. Hope[1] INT., Ohio.	2,500
Mt. Hope[1] INT, Ohio.	Bergholz INT, Ohio.	2,500
Bergholz INT, Ohio.	Pittsburgh, Pa., VOR.	2,700

[1] 4,000′—minimum reception altitude.

Section 610.6097 *VOR civil airway 97* is amended to read in part:

From—	To—	Minimum altitude
Tallahassee, Fla., VOR.	Albany, Ga., VOR	1,500
Cincinnati, Ohio, VOR.	Acton[1] INT, Ind.	2,300
Acton[1] INT, Ind.	Indianapolis, Ind., VOR.	2,200

[1] 4,000′—minimum reception altitude.

Section 610.6097 *VOR civil airway 97* is amended by adding:

From—	To—	Minimum altitude
Cincinnati, Ohio, VOR.	Acton[1] INT, Ind.	2,300
Acton[1] INT, Ind.	Indianapolis, Ind., VOR.	2,200

[1] 4,000′—minimum reception altitude.

Section 610.6098 *VOR civil airway 98* is amended to read in part:

From—	To—	Minimum altitude
Lufkin, Tex., VOR	Shreveport, La., VOR	[1] 4,000

[1] 1,600′—minimum terrain clearance altitude.

Section 610.6098 *VOR civil airway 98* is amended by adding:

From—	To—	Minimum altitude
Winslow, Ariz., VOR, via N alter.	Zuni, N. Mex., VOR, via N alter.	10,000

Section 610.6100 *VOR civil airway 100* is amended to read in part:

From—	To—	Minimum altitude
Anniston, Ala., VOR, via S alter.	Roopville INT, Ga., via S alter.	4,000
Roopville INT, Ga., via S alter.	Atlanta, Ga., VOR, via S alter.	[1] 3,000

[1] 2,200′—minimum terrain clearance altitude.

Section 610.6102 *VOR civil airway 102* is amended to read in part:

From—	To—	Minimum altitude
Houston, Tex., VOR	Lufkin, Tex., VOR	[1] 4,000
Lufkin, Tex., VOR	Shreveport, La., VOR	2,400

[1] 1,600′—minimum terrain clearance altitude.

Section 610.6102 *VOR civil airway 102* is amended by adding:

From—	To—	Minimum altitude
Winslow, Ariz., VOR, via N alter.	Zuni, N. Mex., VOR, via N alter.	10,000

Section 610.6103 *VOR civil airway 103* is amended to read in part:

From—	To—	Minimum altitude
Anniston, Ala., VOR, via S alter.	Roopville INT, Ga., via S alter.	4,000
Roopville INT, Ga., via S alter.	Atlanta, Ga., VOR, via S alter.	[1] 3,000

[1] 2,200′—minimum terrain clearance altitude.

Section 610.6104 *VOR civil airway 104* is amended to read in part:

From—	To—	Minimum altitude
Houston, Tex., VOR	Lufkin, Tex., VOR	[1] 4,000
Lufkin, Tex., VOR	Shreveport, La., VOR	2,400

[1] 1,600′—minimum terrain clearance altitude.

Section 610.6104 *VOR civil airway 104* is amended by adding:

From—	To—	Minimum altitude
Winslow, Ariz., VOR, via N alter.	Zuni, N. Mex., VOR, via N alter.	10,000

Section 610.6105 *VOR civil airway 105* is amended to read in part:

From—	To—	Minimum altitude
Anniston, Ala., VOR, via S alter.	Roopville INT, Ga., via S alter.	4,000
Roopville INT, Ga., via S alter.	Atlanta, Ga., VOR, via S alter.	[1] 3,000

[1] 2,200′—minimum terrain clearance altitude.

Section 610.6106 *VOR civil airway 106* is amended to read in part:

From—	To—	Minimum altitude
Houston, Tex., VOR	Lufkin, Tex., VOR	[1] 4,000
Lufkin, Tex., VOR	Shreveport, La., VOR	2,400

[1] 1,600′—minimum terrain clearance altitude.

Section 610.6106 *VOR civil airway 106* is amended by adding:

From—	To—	Minimum altitude
Winslow, Ariz., VOR, via N alter.	Zuni, N. Mex., VOR, via N alter.	10,000

Section 610.6107 *VOR civil airway 107* is amended to read in part:

From—	To—	Minimum altitude
Anniston, Ala., VOR, via S alter.	Roopville INT, Ga., via S alter.	4,000
Roopville INT, Ga., via S alter.	Atlanta, Ga., VOR, via S alter.	[1] 3,000

[1] 2,200′—minimum terrain clearance altitude.

Section 610.6108 *VOR civil airway 108* is amended to read in part:

From—	To—	Minimum altitude
Houston, Tex., VOR	Lufkin, Tex., VOR	[1] 4,000
Lufkin, Tex., VOR	Shreveport, La., VOR	2,400

[1] 1,600′—minimum terrain clearance altitude.

Section 610.6108 *VOR civil airway 108* is amended by adding:

From—	To—	Minimum altitude
Winslow, Ariz., VOR, via N alter.	Zuni, N. Mex., VOR, via N alter.	10,000

Section 610.6109 *VOR civil airway 109* is amended to read in part:

From—	To—	Minimum altitude
Anniston, Ala., VOR, via S alter.	Roopville INT, Ga., via S alter.	4,000
Roopville INT, Ga., via S alter.	Atlanta, Ga., VOR, via S alter.	[1] 3,000

[1] 2,200′—minimum terrain clearance altitude.

Section 610.6110 *VOR civil airway 110* is amended to read in part:

From—	To—	Minimum altitude
Houston, Tex., VOR	Lufkin, Tex., VOR	[1] 4,000
Lufkin, Tex., VOR	Shreveport, La., VOR	2,400

[1] 1,600′—minimum terrain clearance altitude.

Section 610.6110 *VOR civil airway 110* is amended by adding:

From—	To—	Minimum altitude
Winslow, Ariz., VOR, via N alter.	Zuni, N. Mex., VOR, via N alter.	10,000

Section 610.6107 *VOR civil airway 107* is amended to read in part:

Lamoni, Iowa VOR.	Osceola INT, [4] Iowa.	2,300
Osceola INT, Iowa.	Des Moines, Iowa, VOR.	2,300

[1] 2,300′—minimum terrain clearance altitude.
[2] 2,400′—minimum terrain clearance altitude.
[3] 3,000′—minimum reception altitude.
[4] 4,300′—minimum reception altitude.

Section 610.6171 *VOR civil airway 171* is amended to read in part:

From—	To—	Minimum altitude
Louisville, Ky., VOR.	Martinsburg INT, Ind.[1]	[2] 3,000
Martinsburg INT, Ind.	Mitchell [1] INT, Ind.	[2] 3,000
Joliet, Ill. VOR.	Sycamore INT, Ill.	2,100
Sycamore INT, Ill.	Janesville, Wis., VOR.	2,000

[1] 3,600′—minimum reception altitude.
[2] 2,600′—minimum terrain clearance altitude.
[3] 3,000′—minimum reception altitude.

Section 610.6174 *VOR civil airway 174* is amended to read in part:

From—	To—	Minimum altitude
Mitchell [1] INT, Ind.	Martinsburg,[2] INT, Ind.	[3] 3,000
Martinsburg INT, Ind.	Louisville, Ky., VOR.	[3] 3,000
York, Ky. VOR.	Henderson INT., W. Va.	[3] 3,500
Henderson INT, W. Va.	Sandyville INT, W. Va.	[4] 4,000
Sandyville INT, W. Va.	Clara INT, W. Va.	3,000
Clara INT, W. Va.	Elkins, W. Va., VOR.	5,000

[1] 3,000′—minimum reception altitude.
[2] 3,600′—minimum reception altitude.
[3] 2,600′—minimum terrain clearance altitude.
[4] 2,500′—minimum terrain clearance altitude.

Section 610.6176 *VOR civil airway 176* is amended to delete:

From—	To—	Minimum altitude
Farmington, Mo., VOR.	Centralia, Ill., VOR.	2,400

Section 610.6177 *VOR civil airway 177* is amended to read:

From—	To—	Minimum altitude
Naperville, Ill., VOR.	Janesville, Wis., VOR.	2,200

Section 610.6191 *VOR civil airway 191* is amended to read:

From—	To—	Minimum altitude
Farmington, Mo., VOR.	Crystal City [1] INT, Mo.	2,500
Crystal City INT, Mo.	Troy, Ill., VOR.	2,200

[1] 3,000′—Minimum reception altitude.

Section 610.6195 *VOR civil airway 195* is amended by adding:

From—	To—	Minimum altitude
Bay Point, Calif., FM.	Sacramento, Calif., VOR, eastbound only.	2,000

Section 610.6200 *VOR civil airway 200* is amended to read in part:

From—	To—	Minimum altitude
Ukiah, Calif., VOR.	Williams, Calif., VOR.	7,000

Section 610.6204 *VOR civil airway 204* is added to read:

From—	To—	Minimum altitude
Hoquiam, Wash., VOR.	Olympia, Wash., VOR.	4,300

Section 610.6206 *VOR civil airway 206* is added to read:

From—	To—	Minimum altitude
Blue Springs, Mo., VOR.	Lexington INT, Mo.	[1] 4,000
Lexington INT, Mo.	Kirksville, Mo., VOR.	[1] 3,100

[1] 2,400′—minimum terrain clearance altitude.

Section 610.6208 *VOR civil airway 208* is added to read:

From—	To—	Minimum altitude
Thermal, Calif., VOR.	Needles, Calif., VOR.	[1] 10,000

[1] 6,500′—Minimum terrain clearance altitude.

Section 610.6209 *VOR civil airway 209* is added to read:

From—	To—	Minimum altitude
Los Angeles,[1] Calif., VOR.	Fillmore, Calif., VOR.	5,000
Shoreline INT, Calif.	Los Angeles, Calif., VOR, southeastbound only.	3,000
Fillmore,[2] Calif., VOR.	Paso Robles, Calif., VOR.	[1] 12,500

[1] 3,000′—minimum crossing altitude at Los Angeles VOR, northwestbound.
[2] 10,500′—minimum crossing altitude at Fillmore VOR, northwestbound.
[3] 9,500′—minimum terrain clearance altitude.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

These rules shall become effective November 3, 1955.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

TITLE 20—EMPLOYEES' BENEFITS

Chapter III—Bureau of Old-Age and Survivors Insurance, Social Security Administration, Department of Health, Education, and Welfare

[Regulations No. 4, Further Amended]

PART 404—FEDERAL OLD-AGE AND SURVIVORS INSURANCE (1950– ——)

FILING OF APPLICATIONS AND OTHER FORMS

Correction

In F. R. Document 55–8165, appearing in the issue for Saturday, October 8, 1955, at page 7537, make the following changes:

1. In § 404.604 (b), line 9, delete the comma following the word "officer".
2. In § 404.612 (b), line 4, insert the word "commences" following the word "section".

PART 422—STATEMENTS OF PROCEDURE

Part 422 of Title 20, Code of Federal Regulations (20 CFR 422.1 et seq.), is amended to read as follows:

Subpart A—Bureau of Old-Age and Survivors Insurance

Sec.
422.1 Procedures of the Bureau of Old-Age and Survivors Insurance.
422.2 Inspection of official records.

Subpart B—Office of the Appeals Council

422.6 Procedures of the Appeals Council.
422.7 Inspection of official records.

AUTHORITY: §§ 422.1 to 422.7 issued under sec. 1102, 49 Stat. 647, as amended; 42 U. S. C. 1302. Interpret or apply sec. 205, 49 Stat. 624, as amended, sec. 218, 64 Stat. 514; 42 U. S. C. 405, 418.

SUBPART A—BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

§ 422.1 *Procedures of the Bureau of Old-Age and Survivors Insurance*—(a) *Account and identification numbers*—(1) *Individual's account number.* (i) The Bureau maintains a record of the earnings reported for each individual. Every individual who has a social security account receives a social security account number card. The individual's name, together with the number on his card, identifies his account so that the wages or self-employment income reported on informational returns can be properly posted to his record. The form which an individual uses to apply for an account number is Treasury Department Form SS–5 "Application for Social Security Account Number."

(ii) Any person who wishes to file an application for an account number may do so by filing Form SS–5. Form SS–5 may be obtained at any social security district office. Upon request, the district office will distribute Forms SS–5 to labor or other representative organizations. All post offices, except the main post office in cities having a social security district office, supply Forms SS–5 on request. Except in cities having a social security district office, the United States Employment Service offices will upon request furnish applicants for jobs and unemployment compensation Forms SS–5. Form SS–5 is available also from district directors of internal revenue.

(iii) The social security district offices will assign an account number to an applicant on the basis of a completed Form SS–5. If it appears probable that an account number has been previously established for any applicant, his application is checked against the central files located in the Division of Accounting Operations, Bureau of Old-Age and Survivors Insurance, Candler Building, Baltimore 2, Maryland. In such case, if the applicant states that he needs a social security card at once, the district office prepares and gives to the applicant Form OAAN–5028 Temporary Unnumbered card.

(iv) As soon as it is determined that no account has been previously established for an applicant, the district office prepares and delivers Form OA–702, Account Number Card. The card shows the applicant's name and the number of his social security account.

(v) The Division of Accounting Operations uses the Forms SS–5 and duplicate copies of the Forms OA–702 to establish the necessary records for the maintenance of individual records of earnings. The duplicate copies of Form OA–702 are sent to State employment security offices which want them for use in establishing a numerical file of account numbers in that office. Form SS–5 is retained by the Division of Accounting Operations for use in identifying the individual to whom the account number is assigned.

(vi) In the event that a social security card is lost or damaged, an individual may obtain a duplicate card bearing the same account number. Any social security district office will issue a duplicate card at once upon presentation by an individual of the lower portion of the account number card previously issued to him.

(vii) An individual may obtain a duplicate account number card by submitting a properly completed Form SS–5, Application for Social Security Account Number, noted "Duplicate Requested" to any district office or to the Division of Accounting Operations, Baltimore 2, Md. A facsimile Form SS–5 is attached to Form Letter OAAN–L7012, sent to applicants by district offices in response to a letter requesting a duplicate card, if the letter contains insufficient identifying information. If an individual is in urgent need of a duplicate account number card, any district office will assist him in preparing a telegram to the Division of Accounting Operations, giving the necessary identifying information. Upon receipt of the request, the Division of Accounting Operations makes an immediate search for the account number and notifies the individual by telegram "collect" of the results of the search. If a previously assigned account number is located, the district office will issue a duplicate account number card. If no previously assigned number can be found, the district office will assign a new account number.

(viii) Form OAAN–7003, Request for Change in Your Social Security Records, should be completed by any person who wishes to correct or change the information he submitted previoulsy. These may be obtained from any district office, from the Division of Accounting Operations, or from one of the sources mentioned earlier where Forms SS–5 may be obtained. The completed request for change in records may be submitted to any office of the Bureau.

(2) *Employer's identification number.* (i) For every State or instrumentality of two or more States which enters into an agreement with the Secretary of Health, Education, and Welfare under section 218 of the Social Security Act, the Division of Accounting Operations assigns an employer's identification number to each State and each political subdivision or each instrumentality included in the agreement. The Division sends to the appropriate official of the State or instrumentality a Form OAR–S14, "Notice of Employer Identification Number," for each number assigned, and where appropriate, Form OAR–5002, "Register of Employer Identification Numbers Issued," covering all the numbers assigned to the State or its political subdivisions.

(ii) For all employers other than States, political subdivisions, or instrumentalities, identification numbers are issued by district directors of internal revenue and the appropriate procedures will be found in the Internal Revenue Service sections of the Code of Federal Regulations.

(b) *Records of earnings*—(1) *Maintenance of records of earnings.* (i) District Offices furnish employers with information on the established methods for insuring correct and complete reporting.

(ii) If an employer reports an employee without an account number, the Division of Accounting Operations corresponds with the employer regarding each of the incompletely reported earnings items. The employer is asked to furnish the missing account number or other identifying information. When an employer is unable to furnish the employee's account number or satisfactory identifying information and does furnish an address for the employee, the Division of Accounting Operations corresponds with the employee and requests him to furnish the necessary information so that the earnings reported may be properly posted to his account. For self-employment earnings items reported without an account number, the Division of Accounting Operations corresponds with the self-employed individual to obtain the missing account number.

(iii) If an employer reports an employee under an account number or name different from that shown on the employee's account number card and the

Division of Accounting Operations is unable to identify the employee from its records, correspondence is initiated with the employer regarding such unidentified incorrectly reported earnings items. When an employer is unable to furnish the corrected information and does furnish an address for the employee, the Division of Accounting Operations corresponds with the employee requesting him to furnish the necessary information so that the earnings reported may be properly posted to his account. When self-employment earnings items are reported with an incorrect name or account number and the Division of Accounting Operations is unable to identify the individual from its records, correspondence is initiated with the self-employed individual.

(iv) If an employer or self-employed individual fails to reply to the Division of Accounting Operations' correspondence regarding incompletely or incorrectly reported earnings items, copies of such correspondence are forwarded to the district office servicing the employer or self-employed individual. The copy of the correspondence is used by the district office in making an educational contact with the employer or self-employed individual to improve his reporting practices, to improve his response to correspondence received from the Division of Accounting Operations, and to secure the necessary information.

(v) The Division of Accounting Operations also corresponds with employers when the employer continually reports an employee under the same incorrect identifying information. In such cases, if the employer fails to correct his records on the basis of correspondence received from the Division of Accounting Operations, the district office servicing the employer's address is asked to make a personal call on the employer.

(2) *Statements of earnings.* An individual may obtain a statement of earnings recorded in his old-age and survivors insurance account by filling out and mailing Form OAR–7004, Request for Statement of Earnings, or by a signed written request giving his social security account number and date of birth addressed to Bureau of Old-Age and Survivors Insurance, Candler Building, Baltimore 2, Md. Upon receipt of this form or the required letter, the Bureau forwards to the individual a Form OAR–7014, Statement of Amounts Recorded in Your Old-Age and Survivors Insurance Account, containing the requested information. The Form OAR–7014 will show a grand total of earnings reported to date, the total for each of the last three complete years, and the amount of earnings reported since the last complete year. Itemized statements of earnings will not be furnished unless the itemization is needed for purposes related to Title II of the Social Security Act.

(3) *Wage discrepancies.* (i) If an individual disagrees with statement of earnings credited to his social security account he may request a revision by executing Form OAR–7008, Statement of Employment and Self-Employment. These forms may be obtained at any district office or from the Bureau of Old-Age and Survivors Insurance, Candler Building, Baltimore 2, Md. Upon receipt of this form the Bureau will initiate an investigation of his records of earnings.

(ii) District offices are authorized to investigate questions of coverage raised by individuals and requests for revision of records of earnings which cannot be resolved through examination of the Division of Accounting Operations records. In conducting such investigations, district office representatives may request employers and employees to submit information concerning the employment in question. On the basis of information submitted, the district office may determine, subject to review, whether the employment is covered by the Social Security Act. In the event that earnings cannot be established on the basis of the records of the employer, the district office will accept earnings evidence on behalf of the employee and will determine, subject to review, whether the evidence is sufficient to establish payment of the alleged earnings.

(iii) When self-employment income is involved, district offices will contact the self-employed individual to determine whether or not an income tax return (schedule Ca) had been filed or if the self-employed activity was covered under the provisions of the Social Security Act. From these contacts, the district office may advise the individual to contact the District Director of Internal Revenue and file a tax return; that his self-employment activity was not covered; to submit evidence of having filed a tax return; and of action to be taken to establish his self-employment income.

(iv) After the field investigation has been completed, and the results reviewed by the Division of Accounting Operations, the Bureau notifies the individual of the status of his record of earnings. The individual will also be informed of any determinations with respect to earnings or coverage questions which arose from the investigation and of his right to a reconsideration, hearing, or appeal.

(v) Form OAR–L5069, Letter Advising Employee of an Adverse Adjustment to His Account, is addressed to the employee to notify him of the adverse adjustment received subsequent to the issuance of the statement of earnings previously sent to him. The employee is requested to notify the Bureau if he disagrees with the adjustment to his account. This notice of disagreement must be received by the Bureau before the elapsed 6 months subsequent to the date indicated on the letter or within three years, two months, and 15 days after the year to be adjusted, whichever is later.

(4) *Compensation credited under the Railroad Retirement Act combined with earnings received for employment covered by the Social Security Act in certain cases.* Under certain circumstances, compensation credited under the Railroad Retirement Act is combined with earnings received for employment covered by the Social Security Act for the purpose of determining insurance benefits under Title II of the Social Security Act to railroad employees who have less than 10 years of railroad employment and to certain dependents and survivors of such employees. Where railroad employees have 10 years or more of railroad employment, such compensation and earnings will be combined under certain conditions to determine insurance benefits under Title II for certain survivors of such employees. Procedure has been established whereby the Bureau and the Railroad Retirement Board exchange information regarding earnings and compensation.

(c) *Claims procedure.* (1) The district offices provide local facilities for the public to file claims and to obtain assistance in perfecting them. To become entitled to any benefit or payment or to a recomputation of benefits, the apropriate application form, which can be obtained from any district office, must be filed with a Bureau office. (See §§ 404.601 and 403.701 of this chapter.) The application forms and related forms used by the public to file claims are as follows:

1. OA–C1, Application for Old-Age Insurance Benefits.
2. OA–C1.1, Application for Recomputation of Benefits.
3. OA–C1.2, Application for Recomputation of Primary Insurance Amount Based on Additional Work Since 1950.
4. OA–C1.4, Application for Recomputation of Primary Insurance Amount Based on Presumed Work Deductions Under a Retroactive State Agreement.
5. OA–C2, Application for Wife's Insurance Benefits.
6. OA–C3, Husband's Certification (this form must accompany the wife's application, Form OA–C2 above).
7. OA–C4, Application for Insurance Benefits for Child of Living Wage Earner or Self-Employed Person.
8. OA–C5, Application for Survivors Insurance Benefits (to be used by applicant for widow's benefits, mother's benefits, children's benefits).
9. OA–C6, Application on Behalf of Child for Survivors Insurance Benefits.
10. OA–C7, Application of Parent for Survivors Insurance Benefits.
11. OA–C8, Application for Lump-Sum Death Payment.
12. OA–C10, Application for Widow's or Widower's Insurance Benefits (to be used where widow or widower had previously filed for monthly benefits or a lump-sum on the same account).
13. OA–C11, Application for Substitution of Payee (for use when substitute payee files application to receive insurance benefits on behalf of self, minor child, or incompetent beneficiary).
14. OA–C12, Application by Divorced Wife for Mother's and Child's Insurance Benefits.
15. OA–C13, Application for Widower's Insurance Benefits.
16. OA–C14, Application for Husband's Insurance Benefits.
17. OA–C15, Wife's Certification (this form must accompany the husband's application, form OA–C14, above).
18. OA–D801, Application to Establish a Period of Disability.

(2) In addition to filing the appropriate application form, the claimant must establish by satisfactory evidence the material allegations in his application, except as to earnings shown in the Bureau's records. (See §§ 404.701 et seq. of this chapter). Claims application forms, instructions, report forms, and forms for the various proofs necessary to support the claims are available to the public in district offices, itinerant

stations, and resident stations. These offices assist claimants in preparing their applications and in obtaining the proofs required to support their claims. Claims adjudicated in the district offices are reviewed by one of the six area offices of the Bureau. Applications filed with the Railroad Retirement Board shall be deemed filed with the Bureau as of the date such forms were filed with the Railroad Retirement Board where compensation credited under the Railroad Retirement Act is considered in determining entitlement and the amount of benefits payable under the Social Security Act. The area office notifies claimants of the action taken on their claims, informing them at the same time of their right to a reconsideration, hearing, or appeal.

(3) The district offices also provide facilities for the public to file applications to establish a period of disability and to obtain assistance in perfecting these applications. To establish a period of disability an individual must file with a Bureau office an application form (OA–D801, Application to Establish a Period of Disability). In addition, the applicant must submit satisfactory medical evidence to support his claim for a disability determination. Determinations of disability are initially made by a designated State agency if the agency has entered into an appropriate agreement with the Secretary of Health, Education, and Welfare, and the case of the applicant is not in a class of individuals excluded from such an agreement. The Division of Disability Operations will make the determination of disability if the individual is in a State which has no agreement with the Secretary or is in a class or classes of individuals not included in the agreement of his State, or is outside the United States. When an applicant is already receiving OASI benefit, the appropriate area office will notify him of the action taken on his application for a disability determination, and the effect, if any, on his benefit amount informing him at the same time of his right to a reconsideration, hearing, or appeal. The area office will also notify all beneficiaries who may be receiving benefits on the account number of the applicant. In cases where the applicant is not entitled to OASI benefits, the Division of Disability Operations will notify him of the action taken on his application for a disability determination.

(4) Legislation enacted in 1946 extends protection of the survivors provisions of the Social Security Act in certain instances to survivors of servicemen who served in World War II and who died within 3 years after a discharge occurring prior to July 27, 1951. In addition, under the 1950 amendments to the act, wage credits of $160 for each month or fraction thereof are allowed, in certain cases, for periods of active military or naval service during World War II (September 16, 1940, to July 24, 1947), in determining entitlement to and computing monthly benefits for months after August 1950. Also, the 1952, 1953, 1954, and 1955 amendments provide similar wage credits of $160 for each month of active service beginning with the end of World War II through March 31, 1956. This applies to monthly benefits for months after August 1952. These wage credits are determined at the time of application for benefits and are not made part of the records of earnings.

(5) Recipients of monthly benefits are obligated to report to the Bureau the occurrence of certain events which suspend or terminate benefits. A post card, Form OA–C611a, for reporting these events is given the claimant at the time he files application for benefits. Additional ones may be obtained from any district office.

(d) *Reconsideration and hearing.* Provisions regarding requests for reconsideration of Bureau determinations are contained in §§ 404.901, 403.707 and 403.708 of this chapter. Provisions regarding requests for hearing with respect to Bureau determinations are contained in §§ 404.901, 403.707 and 403.709–403.711a, inclusive, of this chapter. Such requests may be filed with any Bureau office.

§ 422.2 *Inspection of official records.* Section 1106 of the Social Security Act prohibits disclosure of any official records except as prescribed by regulations of the Secretary of Health, Education, and Welfare. Circumstances under which disclosure may be made are set out in Part 401 of this chapter.

SUBPART B—OFFICE OF THE APPEALS COUNCIL

§ 422.6 *Procedures of the Appeals Council.*—(a) *Request for hearing by referee.* A claimant who is dissatisfied with a determination of the Bureau of Old-Age and Survivors Insurance of the Social Security Administration may file a request for a hearing of his case before a referee of the office of the Appeals Council. This request may be made on Form AC–501, Request for Hearing, which may be obtained at any referee's office or any office of the Bureau. Instead of executing the form, the request for hearing may be made by an informal letter. The executed form or informal letter may be filed at or mailed to any office of the Bureau or the office of any referee or the office of the Appeals Council. The request must be made within 6 months from date of mailing of notice of the Bureau's initial determination or within 3 months from date of mailing of notice of the Bureau's reconsidered determination. This time may be extended by a referee upon a showing of good cause.

(b) *Hearing by referee.* The referee holds a hearing, upon 10 days' notice to the claimant unless such notice is waived, at a place reasonably convenient to a claimant. A stenographic record of the testimony taken at the hearing is made. This record is not transcribed except where necessary in the judgment of the referee or where required by law. The referee may render a decision or certify the case to the Appeals Council in Washington for decision. In either case the claimant is furnished with a copy of the decision.

(c) *Review of referee's decision by Appeals Council.* If a claimant is dissatisfied with the referee's decision he may file a request for review of the decision by the Appeals Council in Washington. This request may be made on Form AC–520, Request for Review of Referee's Decision, which may be obtained at any referee's office or office of the Bureau, or the request for review may be made by an informal letter. The request may be filed at or mailed to any referee's office, any office of the Bureau, or the office of the Appeals Council in Washington. Such request must be made within 30 days after the date of mailing of the referee's notice of decision. It is within the discretion of the Appeals Council to grant or deny the request for review. If it denies the request the referee's decision stands as the final decision of the Department of Health, Education, and Welfare. If the request for review is granted the Appeals Council renders a decision either with or without the taking of further evidence. The Appeals Council also renders a decision in cases which are certified to it by a referee.

(d) *Judicial review.* A claimant may secure a court review of a decision by a referee, if the Appeals Council has denied the claimant's request for review, or of a decision by the Appeals Council by instituting a civil action in the United States District Court of his residence. Such action must be filed within 60 days of the Appeals Council's notice of denial of request for review of the referee's decision or notice of decision by the Appeals Council. This time may be extended by the Appeals Council upon a showing of good cause.

(e) *Where detailed procedural regulations are located.* Detailed procedural regulations relating to the work of the office of the Appeals Council may be found in Regulations No. 3 (Part 403 of this chapter) which have, by reference, been made a part of § 404.901 of Regulations No. 4 (Part 404 of this chapter), under the following subjects and section numbers.

Right to hearing; § 403.709 (a).
Time and place of filing request for hearing; § 403.709 (b).
Parties to a hearing; § 403.709 (c).
Referee; § 403.709 (d).
Time and place of hearing; § 403.709 (e).
Subpoenas; § 403.709 (f).
Conduct of hearing and evidence; § 403.709 (g).
Joint Hearings; § 403.709 (h).
Waiver of right to appear and present evidence; § 403.709 (i).
Dismissal of request for hearing; § 403.709 (j).
Referee's decision remanding to Bureau, or certification to Appeals Council; § 403.709 (k).
Effect of referee's decision or revision by Bureau; § 403.709 (l).
Removal of hearings to Appeals Council; § 403.709 (m).
Procedure before Appeals Council on certification by the referee; § 403.710 (a).
Review of referee's decision or Bureau's revised determination; § 403.710 (b).
Procedure before Appeals Council on review of referee's decision or Bureau's revised determination; § 403.710 (c).
Decision by Appeals Council or remanding of case; § 403.710 (d).
Effect of Appeals Council's decision or refusal to review; § 403.710 (e).
Extension of time; § 403.711 (a).
Revision for error; § 403.711 (b).
Hearing and review in cases involving wartime maritime services in the employ of the

United States and certain services in the employ of the Bonneville Power Administration; § 403.711a.

§ 422.7 *Inspection of official records.* Section 1106 of the Social Security Act prohibits disclosure of any official records, except as prescribed by regulations of the Secretary of Health, Education, and Welfare. Circumstances under which disclosure may be made are set out in Part 401 of this chapter.

[SEAL] W. L. MITCHELL,
Commissioner of Social Security.

Approved: October 7, 1955.

HEROLD C. HUNT,
Acting Secretary of Health, Education, and Welfare.

[F. R. Doc. 55-8303; Filed, Oct. 14, 1955; 8:45 a. m.]

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

LABELING OF DRUG PREPARATIONS CONTAINING SALICYLATES

By authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (sec. 701 (a), 52 Stat. 1055, 21 U. S. C. 371 (a)) and delegated to the Commissioner of Food and Drugs by the Secretary (20 F. R. 1996), and pursuant to the provisions of the Administrative Procedure Act (sec. 3, 60 Stat. 237, 238; 5 U. S. C. 1002), the following statement of interpretation is issued:

§ 3.43 *Labeling of drug preparations containing salicylates.* (a) Because salicylate preparations enjoy widespread use as analgesics and such articles are ordinarily not toxic in the amounts required for producing an analgesic action, they are frequently regarded by the public as harmless. Actually, salicylates are capable of causing injury and even death when consumed in excessive quantities. Salicylate preparations have caused a number of deaths through accidental misuse by both adults and children, which might have been avoided had the users been aware of their potential hazards.

(b) On the basis of a study and conclusions by the Medical Advisory Panel on the Accidental Ingestion and Misuse of Salicylate Preparations by Children, under date of February 14, 1955, and in the interest of protecting the public health, the following recommendations are made concerning the labeling that should be employed for salicylate preparations to meet the requirements of section 502 (f) (1) and (2) of the Federal Food, Drug, and Cosmetic Act.

(1) The labels of all packages of salicylate preparations that are labeled with directions for use should bear, clearly visible and in bold-face type, some such statement as one of the following:

(i) "Warning—Keep out of the reach of children"; or

(ii) "Warning—Keep this and all medications out of the reach of children."

(2) In lieu of specific dosage recommendations for children under three years of age, the labeling of salicylate preparations for oral use should bear a statement such as: "For children under 3 years of age, consult your physician."

(c) The labeling recommendations in paragraph (b) of this section are applicable to preparations containing aspirin, salicylamide, salicylic acid and its salts, and other salicylic acid derivatives used as analgesics, except as provided in paragraph (d) of this section.

(d) To the extent shown in this paragraph, the labeling recommendations of paragraph (b) of this section do not apply to the following preparations.

(1) Paragraph (b) (1) of this section does not apply to wintergreen oil subject to § 3.35.

(2) Paragraph (b) (1) of this section does not apply to effervescent salicylate preparations since such preparations do not lend themselves to accidental use or overdosage.

(3) Paragraph (b) (1) and (2) of this section does not apply to preparations of para-aminosalicylic acid and its salts, which are not labeled with directions for use as analgesics.

(e) This statement in no way exempts salicylate preparations from complying in all other respects with the requirements of the Federal Food, Drug, and Cosmetic Act.

(f) Copies of the recommendations adopted by the Medical Advisory Panel on the Accidental Ingestion and Misuse of Salicylate Preparations by Children, which convened on February 14, 1955, may be obtained from the Department of Health, Education, and Welfare, Food and Drug Administration, upon request.

(g) Six months will be allowed for modification of existing labeling to comply with this statement.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interprets or applies sec. 502, 52 Stat. 1050, as amended; 21 U. S. C. 352)

Dated: October 11, 1955.

[SEAL] GEO. P. LARRICK,
Commissioner of Food and Drugs.

[F. R. Doc. 55-8392; Filed, Oct. 14, 1955; 8:49 a. m.]

TITLE 15—COMMERCE AND FOREIGN TRADE

Chapter III—Bureau of Foreign Commerce, Department of Commerce

Subchapter B—Export Regulations

[7th Gen. Rev. of Export Regs., Amdt. 41 [1]]

PART 371—GENERAL LICENSES

PART 373—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

PART 382—DENIAL OR SUSPENSION OF EXPORT PRIVILEGES

MISCELLANEOUS AMENDMENTS

1. Section 371.23 *General License GHK; shipments of certain commodities to Hong Kong*, paragraph (a) *Scope* is amended in the following particulars:

a. The following commodities are added to the list of commodities:

Dept. of Commerce Schedule B No.	Commodity
030050–030570	Cattle and kip side upper leather, and calf and whole kip upper leather.
032400	Sole leather (bends, backs and sides).
032500	Boot and shoe cut stock.
033000	Belting leathers for industrial belts.
033210	Sole, welting and belting leather offal.
489900	Art corners, albums and paper tags only.
596098	Other non-metallic mineral products, the following only: agate articles, except jewelry; agates; blast furnace slag; carbon elinkers; cinders; crude chalk, except precipitated; crude vermiculite; dantore plaster aggregate; feldspar; firestone; fluxing stone; glaze frits; glazing stones; ground coal (sea coal); lava, unmanufactured; meerschaum, imitation and natural, unmanufactured; obsidianite; sea coal; slag, except basic; stucco; Supercel filter powder; and volcanic ash and earth.
705715	Electric household type refrigerators.
706100	Electric free air circulating fans.
706812–706820	Electric household laundry equipment.
706910–706930	Electric household vacuum cleaners, and specially fabricated parts and accessories, n. e. c.
706950	Electric household dishwashers.
707010	Electric household mixers, juicers, and blenders.
707050	Electric household motor-driven appliances, n. e. c. (except freezers, 705725), and specially fabricated parts, n. e. c.
707100	Electric flatirons.
707200–707220	Electric household cooking ranges, and specially fabricated parts, n. e. c.
707310	Electric household storage water heaters.
707360–707380	Electric household cooking and heating appliances and utensils, n. e. c., and specially fabricated parts, n. e. c.
709998	Parts, n. e. c., specially fabricated for electric free air circulating fans.
770970	Self-contained household water systems (with or without tanks).
958950	Parts, n. e. c., specially fabricated for watches.

This part of the amendment shall become effective as of 12:01 a. m., October 6, 1955.

b. The following commodities are deleted from the list of commodities:

Dept. of Commerce Schedule B No.	Commodity
487150	Bags of any size and shape made of film, foil or plastic, for use as primary containers for packaging less than 25 pounds of any commodity, or bags used as liners for other containers irrespective of capacity.

[1] This amendment was published in Current Export Bulletin No. 756, dated October 6, 1955.

This part of the amendment shall become effective as of 12:01 a. m., October 13, 1955, except that with respect to any commodities removed from General License GHK, shipments which were on dock for lading, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to 12:01 a. m., October 13, 1955, may be exported under the previous General License GHK provisions up to and including November 5, 1955. Any such shipment not laden aboard the exporting carrier on or before November 5, 1955, requires a validated license for export.

2. Section 373.2 *Confirmation of country of ultimate destination and verification of actual delivery, paragraph* (a) *Scope* is amended by adding a footnote symbol following the word "Austria" in subparagraph (1) (ii) and a footnote relating thereto to read as follows:

[2] Also see § 373.66 for requirement of Austrian Identification Number.

3. Section 373.66 *Austria* is amended to read as follows:

§ 373.66 *Austria.*[1] (a) Each applicant for a license to export commodities to Austria shall show in the import permit number item on the Application for Export License (Form IT- or FC-419), the Austrian import identification number on which the application is based. These numbers run in series from 1,000 to 339,999 inclusive, and in all instances will be preceded by the letters "IKN".

However, the Bureau of Foreign Commerce will consider the granting of an exception to this requirement where the ultimate consignee is unable to furnish the U. S. exporter with the Austrian Import Identification Number and the granting of an exception will not be contrary to the objectives of the United States export control program. The Bureau of Foreign Commerce may waive the requirement where it is shown that the inability of the foreign importer to provide the required information was due to discrimination against the U. S. exporter by the foreign government or for any other valid reason of similar importance.

(b) Each request for exception shall be by letter, in duplicate, accompanying the license application to which it applies, addressed to the Bureau of Foreign Commerce, Department of Commerce, Washington 25, D. C. The letter request should include, among other things, (1) the nature and duration of the business relationship between the applicant and the importer shown on the license application; (2) the reason or reasons for the foreign importer's inability to obtain the Austrian Import Identification number from his government; (3) a statement as to whether the exporter has previously submitted to the Bureau of Foreign Commerce any Austrian Import Identification numbers issued in the name of the importer and a listing of Bureau of Foreign Commerce Case Numbers to which such certificates applied; and (4) any other facts which would justify the granting of an exception. The applicant should also attach to his letter request, or have on file in the Bureau of Foreign Commerce, a statement from the consignee and purchaser in accordance with § 373.65. No request will be considered or granted unless such statement is submitted or is on file in the Bureau of Foreign Commerce.

(c) Where the letter request relates to more than one license application, whether submitted at the same time or at a later date, the original letter request shall be attached to one application and a copy of the letter request shall be attached to each additional application to which it is equally applicable. Any application to which a copy of the letter request is attached shall contain a reference (Bureau of Foreign Commerce Case Number, if known, or applicant's reference number) to the application to which the original letter request was attached.

4. Section 382.51 *Table of compliance orders currently in effect denying export privileges*, paragraph (b) *Table of compliance orders* is amended in the following particulars:

a. The following entries are added:

Name and address	Effective date of order	Expiration date of order	Export privileges affected	FEDERAL REGISTER citation
Angloparts, Piazza della Republica 25, Milan, Italy.	1-31-55	1-30-56	General and validated licenses, all commodities, any destination, also exports to Canada. (Company related to Alberto Leonelli, which see.)	20 F. R. 775, 2-4-55.
Corodex, N. V., Noorderduinweg 48, Zandvoort, Netherlands.	12-28-53	12-28-58	General and validated licenses, all commodities, any destination, also exports to Canada. (Company related to N. V. Amsterdamsche Maatschappij voor Industrie en Handel—"Hydrocarbon."	19 F. R. 37, 1-1-54.
Etablissment Henri Elaerts, 38 Rue du Beguinage, Brussells, Belgium.	7-28-55	Until further notice.	General and validated, all commodities, any destination.	20 F. R. 5510, 8-2-55.
Goetze-Werke, Via Fabio Filzi 15, Trieste, Italy.	1-31-55	1-30-57	General and validated licenses, all commodities, any destination, also exports to Canada. (Company related to Antonio Sabbadini, which see.)	20 F. R. 775, 2-4-55.
Krueger, Herbert, Krueger, Luise (Johannsen), Hanau-Wilhelmsbad, Hohe Tanne 101, Germany.	4-21-54	Duration	General and validated, all commodities, any destination. (Related to Hanke Chemie, et al., which see.)	19 F. R. 2432, 4-24-54.
Nova-Dur, Via Ferdinando di Savola 2, Milan, Italy.	1-31-55	1-30-57	General and validated licenses, all commodities, any destination, also exports to Canada. (Company related to Antonio Sabbadini, which see.)	20 F. R. 775, 2-4-55.
Prodaleo, S. a. r. l., 15 rue de la Cite, Geneva, Switzerland.	6- 9-55	Duration	General and validated licenses, all commodities, any destination, also exports to Canada. (Related to Les Fils de Basile Abegi et al., which see.)	20 F. R. 4190, 6-15-55.
Rohimport Trust, Vaduz, Leichtenstein.	4-21-54	do	General and validated, all commodities, any destination. (Related to Hanke Chemie, et al., which see.)	19 F. R. 2432, 4-24-54.
Societe d'Etudes et de Recherches Technique et Industrielles (SERTI, S. A.), 15 rue de la Cite, Geneva, Switzerland.	6- 9-55	do	General and validated licenses, all commodities, any destination, also exports to Canada. (Related to Les Fils de Basile Obegi et al., which see.)	20 F. R. 4190, 6-15-55.
Thiel, Reynold, 15 rue de la Cité, Geneva, Switzerland.	6- 9-55	do	do	20 F. R. 4190, 6-15-55.

b. The following entries are deleted:

Name and address	Effective date of order	Expiration date of order	Export privileges affected	FEDERAL REGISTER citation
American Ore & Metal Corp., 92 Liberty St., New York, N. Y., and/or 101 Cedar St., New York, N. Y.	6- 3-54	7-11-55	General and validated licenses, all commodities, any destination, also exports to Canada. (Company related to Sidney L. Jaffe, which see.)	19 F. R. 3403, 6-9-54. 19 F. R. 7356, 11-13-54.
Easy Enterprises, Inc., Pier 3, Miami, Fla.	2- 8-54	8-31-55	General and validated licenses, all commodities, any destination, also exports to Canada.	19 F. R. 806, 2-11-54.
Easy Machinery Export Corp., 6427 Southwest 16th St., Miami, Fla., and 824 92d St., Surfside, Fla.	2- 8-54	8-31-55	General and validated licenses, all commodities, any destination, also exports to Canada. (Related to Isadore Marks, which see.)	19 F. R. 806, 2-11-54.
Fisher, P., 22 Hanway St., London, W. 1, England.	9- 1-53	9-1-55	General and validated licenses, all commodities, any destination, also exports to Canada.	18 F. R. 5372, 9-4-53.

PART 399—POSITIVE LIST OF COMMODITIES AND RELATED MATTERS

MISCELLANEOUS AMENDMENTS

Section 399.1 *Appendix A—Positive List of Commodities* is amended in the following particulars:

The revised entries set forth below are substituted for entries presently on the Positive List. Where the Positive List contains more than one entry under a Schedule B number, the entry to be superseded is identified by a numerical reference in parentheses following the commodity description in the revised entry:

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar-value limits	Validated license required
	Synthetic rubbers (report synthetic liquid latex in terms of total dry latex solids (TDLS)) (report compounded or semi-processed in 209800):				
209098	Polytrifluorochloroethylene elastomer. (1) [18]	Lb.	RUBR 2	None	RO
	Other nonmetallic mineral products, except precious:				
596098	Lithium-containing minerals (e. g., Amblygonite, and spodumene). [4] [5]	----------	MINL	None	RO
	Nonferrous metallic ores and concentrates, n. e. c. (specify by name) (report radium ore concentrates in 829940):				
664598	Lithium ores (e. g. lepidolite), and lithium ore concentrates. [4] [5]	Lb.	MINL	None	RO
	Nonferrous metals and alloys in crude form, scrap, and semifabricated forms, n. e. c. (specify by name):				
664998	Lithium metals and alloys. (5) [4]	Lb.	MINL	None	RO
	Electrical apparatus, n. e. c., and parts, n. e. c. (specify by name):				
709998	Thermistors. (9) [13]	No.	RARA 52	100	RO
	Internal-combustion engines, n. e. c., and parts, n. e. c.:				
714500	Diesel and semi-Diesel (specify brake horsepower at normal speed, and revolutions per minute): Marine, 50 up to and including 200 brake horsepower, when the nonmagnetic content exceeds 50 percent of total weight. (1) [3]	No.	TRAN 7	None	RO
714500	Other marine, 50 up to and including 200 brake horsepower. (2) [3]	No.	TRAN 7	None	R
714620	Marine, over 200, up to and including 500 brake horsepower, when the nonmagnetic content exceeds 50 percent of total weight. (1) [3]	No.	TRAN 7	None	RO
714640	Marine, over 500, up to and including 1,000 brake horsepower when the nonmagnetic content exceeds 50 percent of total weight. (1) [3]	No.	TRAN 7	None	RO
715900	Parts and accessories, n. e. c., specially fabricated for Diesel engines included on the Positive List under Schedule B Nos. 714500 through 714760 for which validated license is required to R country destinations only. (Specify type of engine, brake horsepower, and revolution per minute). (1) [3]	----------	TRAN 7	500	R
715900	Parts and accessories, n. e. c., specially fabricated for Diesel engines included on the Positive List under Schedule B Nos. 714500 through 714760 for which validated license is required to both R and O country destinations. (Specify type of engine, brake horsepower, and revolution per minute.) (2) [3]	----------	TRAN 7	500	RO
	Other industrial chemicals:				
839900	Molybdenum salts and compounds, n. e. c. (including refined grades of calcium molybdate, molybdenum oxide, molybdenum trioxide and molybdic acid other than laboratory reagents; report molybdic oxide ore concentrate in 664550; and laboratory reagents in 829970). (12) [2]	Lb.	SALT 64	100	RO

[1] The GLV dollar-value limit is increased.
[2] The processing code is changed or related commodity group number is changed (see § 372.5 (f) of this subchapter).
[3] The letter "A" is added in the column headed "Commodity Lists," indicating that the commodity is subject to the IC/DV procedure (see § 373.2 of this subchapter), effective Nov. 21, 1955.
[4] The letter "B" is added in the column headed "Commodity Lists," indicating that the commodity is subject to DL restrictions (see § 374.2 of this subchapter), and is excepted from the Time Limit licensing procedure (see Part 377 of this subchapter), effective Nov. 7, 1955.
[5] The letter "C" is added in the column headed "Commodity Lists," indicating that the commodity may no longer be exported under the provisions of General License GIT (see § 371.9 (c) of this subchapter), effective Nov. 7, 1955.
[13] The commodity description is revised without substantive change.
[18] The entry is revised to reflect the appropriate Schedule B numbers applicable to all grades of molybdenum compounds.

This amendment shall become effective as of October 6, 1955, unless otherwise indicated in the footnotes.

(Sec. 3, 63 Stat. 7, as amended; 50 U. S. C. App. 2023. E. O. 9630, 10 F. R. 12245, 3 CFR, 1945 Supp., E. O. 9919, 13 F. R. 59, 3 CFR, 1948 Supp.)

LORING K. MACY,
Director,
Bureau of Foreign Commerce.

RECORD RETENTION REQUIREMENT

Correction

In F. R. Document 55–7952, appearing in the issue for Saturday, October 1, 1955, at page 7330, make the following change in line 12 of paragraph (b): Following the word "year" and preceding the close parenthesis mark, add the following words: "basis, until the end of the fifth fiscal year".

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 959]

IRISH POTATOES GROWN IN MODOC AND SISKIYOU COUNTIES IN CALIFORNIA AND IN ALL COUNTIES IN OREGON EXCEPT MALHEUR COUNTY

NOTICE OF PROPOSED EXPENSES AND RATE OF ASSESSMENT

Notice is hereby given that the Secretary of Agriculture is considering the approval of the expenses and rate of assessment hereinafter set forth, which were recommended by the Oregon-California Potato Committee, established pursuant to Marketing Agreement No. 114, as amended, and Order No. 59, as amended (7 CFR Part 959; 20 F. R. 7068), regulating the handling of Irish

potatoes grown in Modoc and Siskiyou Counties in California and in all counties in Oregon except Malheur County, issued under the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.).

Consideration will be given to any data, views, or arguments pertaining thereto, which are filed in triplicate with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D. C., not later than 15 days following publication of this notice in the FEDERAL REGISTER. The proposals are as follows:

§ 959.208 *Expenses and rate of assessment.* (a) The reasonable expenses that are likely to be incurred by the Oregon-California Potato Committee, established pursuant to Marketing Agreement No. 114, as amended, and Order No. 59, as amended, to enable such committee to perform its functions pursuant to the provisions of aforesaid amended marketing agreement and order, during the fiscal period ending June 30, 1956, will amount to $26,100.

(b) The rate of assessment to be paid by each handler, pursuant to Marketing Agreement No. 114, as amended, and Order No. 59, as amended, shall be one-half of one cent ($0.005) per hundredweight of potatoes handled by him as the first handler thereof during said fiscal period.

(c) The terms used in this section shall have the same meaning as when used in Marketing Agreement No. 114, as amended, and Order No. 59, as amended (§§ 959.1 to 959.88; 20 F. R. 7068).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c).

Dated: October 12, 1955.

[SEAL] S. R. SMITH,
Director,
Fruit and Vegetable Division.

NOTICES

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

BLUE HILL SALES CO. ET AL.

PROPOSED POSTING OF STOCKYARDS

The Secretary of Agriculture has information that the livestock markets named below are stockyards as defined in Section 302 of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 202), and should be made subject to the provisions of that act.

Blue Hill Sales Company, Blue Hill, Nebraska.
Oxford Livestock Commission Company, Oxford, Nebraska.
Republican Valley Livestock Auction, Franklin, Nebraska.

Therefore, notice is hereby given that the Secretary of Agriculture proposes to issue a rule designating the stockyards named above as posted stockyards subject to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 181 et seq.), as is provided in section 302 of that act. Any interested person who desires to do so may submit, within 15 days of the publication of this notice, any data, views or arguments, in writing, on the proposed rule to the Director, Livestock Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D. C.

Done at Washington, D. C., this 11th day of October 1955.

[SEAL] DAVID M. PETTUS,
Acting Director, Livestock Division, Agricultural Marketing Service.

[Docket No. G-2734]

S. D. JOHNSON

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 10, 1955.

Take notice that S. D. Johnson (Applicant), independent producer of natural gas, with a principal office in Denver, Colorado, filed on September 13, 1954, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant produces natural gas from the Sandusky Field, Grayson County, Texas, which is sold in interstate commerce to Texas Natural Gasoline Corporation and H. W. Bass & Sons, Inc., for resale to Lone Star Gas Company.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 23, 1955, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before November 9, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-8382; Filed, Oct. 14, 1955; 8:46 a. m.]

[Docket No. G-8875]

HOPE NATURAL GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

OCTOBER 10, 1955.

Take notice that Hope Natural Gas Company, a West Virginia corporation (Applicant), with a principal office in Clarksburg, West Virginia, filed on May 9, 1955, an application for permission to abandon service pursuant to section 7 of the Natural Gas Act, authorizing Applicant to terminate service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

The application recites that Applicant proposes to abandon an existing service being rendered to South Penn Natural Gas Company under Applicant's sale contract No. 124, and relating to natural gas being produced from Applicant's well No. 8987 on the Martha Pauley, et al, lease, the volumes from which are sold in the interstate commerce to South Penn Natural Gas Company for resale. Abandonment of service is allegedly due to well depletion although the small volumes of gas continuing to flow from the well will be taken and marketed by Pipe Line Construction and Drilling Company under agreement with Pipe Line Construction and Drilling Company. Applicant and South Penn have mutually agreed to the termination of service.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on November 22, 1955, at 9:40 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of section 1.30 (c) (1) or (2) of the Commission's Rules of Practice and Procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before November 9, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G-9445]

SUNRAY-MIDCONTINENT OIL CO.

ORDER SUSPENDING PROPOSED CHANGES IN RATES

Sunray-Midcontinent Oil Company (Applicant) on September 14, 1955, tendered for filing proposed changes in presently effective rate schedules for sales subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filing which is proposed to become effective on the date shown:

Description	Purchaser	Rate schedule designation	Effective date [1]
Notice of change, dated Sept. 9, 1955.	United Fuel Gas Co	Supplement No. 1 to Applicant's FPC Gas Rate Schedule No. 71.	Nov. 1, 1955

[1] The stated effective date is the first day after expiration of the required 30 days' notice, or the effective date proposed by Applicant if later.

The increased rates and charges proposed in the aforesaid filing have not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated supplement be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority contained in sections 4 and 15 of the Natural Gas Act and the Commission's General Rules and Regulations (18 CFR, Chapter I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of said proposed changes in rates and charges; and, pending such hearing and decision thereon, the above-designated supplement be and the same hereby is suspended and the use thereof deferred until April 1, 1956, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(B) Interested State commissions may participate as provided by sections 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's Rules of Practice and Procedure.

Adopted: October 5, 1955.

Issued: October 10, 1955.

By the Commission.[1]

[Docket No. G-9446]

SHELL OIL CO.

ORDER SUSPENDING PROPOSED CHANGES IN RATES

Shell Oil Company (Applicant) on September 15, 1955, tendered for filing proposed changes in presently effective rate schedules for sales subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filing which is proposed to become effective on the date shown:

Description	Purchaser	Rate schedule designation	Effective date [1]
Notice of change, dated Sept. 14, 1955.	United Fuel Gas Co	Supplement No. 1 to Applicant's FPC Gas Rate Schedule No. 26.	Nov. 1, 1955

[1] The stated effective date is the first day after expiration of the required 30 days' notice, or the effective date proposed by Applicant if later.

The increased rates and charges proposed in the aforesaid filing have not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated supplement be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority contained in sections 4 and 15 of the Natural Gas Act and the Commission's General Rules and Regulations (18 CFR, Chapter I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of said proposed changes in rates and charges; and, pending such hearing and decision thereon, the above-designated supplement be and the same hereby is suspended and the use thereof deferred

[1] Commissioner Digby dissenting.

until April 1, 1956, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(B) Interested State commissions may participate as provided by sections 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's Rules of Practice and Procedure.

Adopted: October 5, 1955.

Issued: October 10, 1955.

By the Commission.[1]

[SEAL] LEON M. FUQUAY, *Secretary.*

Docket Nos. G-2409, G-2399, G-2458, G-2465, G-4259, G-4260, G-4261

NORTHERN NATURAL GAS CO.

ORDER REOPENING AND CONSOLIDATING PROCEEDINGS FOR A HEARING

On August 15, 1955, the Presiding Examiner filed an initial decision in Docket No. G-2409 involving an application by Northern Natural Gas Company (Northern) for a certificate of public convenience and necessity pursuant to the Natural Gas Act to construct facilities for the purpose of making a sale of natural gas to Northern States Power Company for its own use in a power plant. Northern, on September 6, 1955, filed exceptions to this decision and a motion for oral argument before the Commission. Prior thereto, on August 29, 1955, the National Coal Association, et al. interveners filed a motion for oral argument in the event exceptions were filed to the initial decision.

Subsequently, Northern filed on September 12, 1955, a supplemental application in Docket Nos. G-2399, G-2458, G-2465, G-4259, G-4260 and G-4261, for a certificate of public convenience and necessity pursuant to the Natural Gas Act to construct facilities for the sale of gas to (1) existing customers, (2) the cities of Duluth, Minnesota, and Superior, Wisconsin, and certain towns along the route of the proposed pipeline, (3) the cities of Aberdeen, South Dakota, and certain towns along the route of the proposed pipeline, (4) Allied Chemical & Dye Corporation, at La Platte, Nebraska, and (5) certain other towns along its existing system.

This additional service represents an increase in contract demand of 93,789 Mcf of gas to be supplied from existing sources, and the question of availability of gas, when consideration is given to the subsequently filed supplemental application is further enlarged. Any determination at this time of Docket No. G-2409 might prejudice later determination of the service proposed in the supplemental application which hearing will be held in the near future.

The Commission finds: It is in the public interest that the Commission on its own motion reopen the proceeding in Docket No. G-2409, and consolidate said docket with Docket Nos. G-2399, G-2458, G-2459, G-4260 and G-4261, for the purpose of permitting the parties to introduce further evidence relating to the applications that may be pertinent, and enable consideration by the Commission of all of the above applications at one time. Further, the above motions for oral argument should be denied.

The Commission orders:

(A) The proceedings in Docket No. G-2409 be and the same hereby are reopened.

(B) The proceedings in Docket Nos. G-2409, G-2399, G-2458, G-2465, G-4259, G-4260 and G-4261, be and the same hereby are consolidated for the purpose of hearing, to be held at a time to be hereafter fixed by the Commission.

(C) The aforesaid motions for oral argument be and the same hereby are denied.

Adopted: October 5, 1955.

Issued: October 11, 1955.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[Docket No. G-9447]

SOUTHERN PRODUCTION CO., INC.

ORDER SUSPENDING PROPOSED CHANGES IN RATES

Southern Production Company, Inc. (Applicant) on September 12, 1955, tendered for filing proposed changes in presently effective rate schedules for sales subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filing which is proposed to become effective on the date shown:

Description	Purchaser	Rate schedule designation	Effective date[1]
Notice of change (undated)..	Southern Natural Gas Co...	Supplement No. 4 to Applicant's FPC Gas Rate Schedule No. 3.	Dec. 1, 1955

[1] The stated effective date is the first day after expiration of the required 30 days' notice, or the effective date proposed by Applicant if later.

The increased rates and charges proposed in the aforesaid filing have not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated supplement be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority contained in Sections 4 and 15 of the Natural Gas Act and the Commission's General Rules and Regulations (18 CFR, Chapter I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of said proposed changes in rates and charges; and, pending such hearing and decision thereon, the above-designated supplement be and the same hereby is suspended and the use thereof deferred until May 1, 1956, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(B) Interested State commissions may participate as provided by Sections 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's Rules of Practice and Procedure.

Adopted: October 5, 1955.

Issued: October 10, 1955.

By the Commission.[1]

SECURITIES AND EXCHANGE COMMISSION

[File No. 812-964]

NATIONAL AVIATION CORP.

NOTICE OF FILING OF APPLICATION FOR EXEMPTION OF TRANSACTIONS

OCTOBER 10, 1955.

Notice is hereby given that National Aviation Corporation ("National"), a registered closed-end, non-diversified investment company, has filed an application pursuant to sections 10 (f) and 17 (b) of the Investment Company Act of 1940 ("Act") for an order of the Commission (1) exempting from the provisions of section 10 (f) of the Act the proposed purchase by National of not to exceed 5,000 shares of the 243,469 shares of Preference Stock, -- percent Series of 1955, $100 par value ("preferred stock") to be issued by United Aircraft Corporation ("United"), and (2) exempting from the provisions of section 17 (a) of the Act the sale to National of shares of such preferred stock by Hornblower & Weeks.

United, a manufacturer of aircraft equipment, proposes to issue pro rata to its common stockholders rights in the form of transferable warrants to subscribe for 243,469 shares of preferred stock to be issued by United. It is expected that such warrants will be admitted to trading on the New York Stock Exchange. The shares of preferred stock which are not subscribed for are to be underwritten and offered publicly by a syndicate of underwriters, of which the firm of Hornblower & Weeks is expected to be a principal underwriter. National proposes to purchase not to exceed 5,000 shares of the preferred stock (in addition to 1,013 shares to which it will be entitled to subscribe as a holder of approximately 0.4 percent of the common stock of United) either (a) by the purchase of warrants on the New York Stock Exchange at the market price and their exercise at the subscription price; or (b) from Hornblower & Weeks or any of the other underwriters at the public offering price upon the public offering of the shares; or (c) by a combination of such means.

National states that Charles S. Sargent, a director of National, is a general partner in the firm of Hornblower & Weeks. Since Sargent is, by definition under the Act, an affiliated person of National and of Hornblower & Weeks, the latter is an affiliated person of an affiliated person of National. Section 10 (f) of the Act provides, among other things, that no registered investment company shall knowingly purchase or otherwise acquire, during the existence of any underwriting or selling syndicate, any security (except a security of which such company is the issuer) a principal underwriter of which is a person of which a director of such registered investment company is an affiliated person, unless the Commission by order grants an exemption therefrom. Section 17 (a) of the Act provides, among other things, that it shall be unlawful for an affiliated person of an affiliated person of a registered investment company, acting as principal, knowingly to sell any security to such registered investment company, with certain exceptions not pertinent here, unless the Commission by order pursuant to Section 17 (b) grants an exemption from such prohibition.

The Commission may by order upon application grant an exemption from the provision of section 10 (f) of the Act if and to the extent that such exemption is consistent with the protection of investors. The Commission shall upon application pursuant to section 17 (b) of the Act grant an exemption from the provisions of section 17 (a) if it finds that the terms of the proposed transaction, including the considerations to be paid, are reasonable and fair and do not involve overreaching on the part of any person concerned, that the proposed transaction is consistent with the policy of each registered investment company concerned, as recited in its registration statement and reports filed under the Act, and is consistent with the general purposes of the Act.

United has filed a registration statement under the Securities Act of 1933 covering the proposed offering of 243,469 shares of its preferred stock. National states that it understands that the subscription price, dividend rate, conversion rate, and other terms of the preferred stock will be fixed immediately prior to the distribution of the subscription rights to the common stockholders of United of record at the close of business on October 18, 1955, with the subscription rights to expire as of the close of business on November 1, 1955, at which time the underwriters will purchase and offer publicly the unsubscribed shares of preferred stock. The terms and conditions of the offering and the underwriting discount or commission will be arrived at through negotiations between United and the underwriters which, the applicant believes, will be at arm's length.

Notice is further given that any interested person may, not later than October 21, 1955, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the Rules and Regulations promulgated under the Act.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

SUBVERSIVE ACTIVITIES CONTROL BOARD

[Docket No. 115-55]

CALIFORNIA LABOR SCHOOL, INC.

HEARING ON REGISTRATION AS COMMUNIST-FRONT ORGANIZATION

Herbert Brownell, Jr., Attorney General of the United States, petitioner, v. California Labor School, Inc., respondent.

Notice is hereby given that, pursuant to the Subversive Activities Control Act of 1950 (Title I of the Internal Security Act of 1950, Pub. Law 831, 81st Cong. 50 U. S. C. 781 et seq.), particularly section 13 of said Act (50 U. S. C. 792), a hearing in the above-entitled proceeding on the petition of the Attorney General for an order of the Board requiring the Respondent to register as a Communist-front organization pursuant to section 7 of said Act (50 U. S. C. 786), will be held commencing on Monday, November 7, 1955, at 10:00 a. m., e. s. t., in Room 111, Lafayette Building, 811 Vermont Avenue NW., Washington, D. C.

Dated at Washington, D. C., October 12, 1955.

[SEAL] THOMAS J. HERBERT, *Chairman.*

INTERSTATE COMMERCE COMMISSION

[Rev. S. O. 562, Taylor's I. C. C. Order 61]

MACKINAC TRANSPORTATION CO.

DIVERSION AND REROUTING OF TRAFFIC

In the opinion of Charles W. Taylor, Agent, The Mackinac Transportation Company, account of an accident to car ferry, which caused the Mackinaw City and St. Ignace, Michigan car ferry to be removed from service for repairs, is unable to transport traffic offered to it for movement over the said car ferry:

It is ordered, That:

(a) Rerouting traffic: The Mackinac Transportation Company, and its connections, being unable to transport traffic offered to it for movement over the Mackinaw City and St. Ignace, Michigan car ferry, account car ferry out of service due to accident, is hereby authorized to divert and reroute such traffic over any available route to expedite the movement regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroad desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 8:00 a. m., October 10, 1955.

(g) Expiration date: This order shall expire at 11:59 p. m., October 20, 1955, unless otherwise modified, changed, suspended or annulled.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., October 10, 1955.

INTERSTATE COMMERCE COMMISSION,
CHARLES W. TAYLOR,
Agent.

FOURTH SECTION APPLICATIONS FOR RELIEF

OCTOBER 12, 1955.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 31181: *Carpets and related commodities, from, to and between points in W. T. L. Territory.* Filed by W. J. Prueter, Agent, for interested rail carriers. Rates on carpets, carpeting, mats, mattings or rugs, carloads between (1) specified stations in western trunk-line territory and between such points and points in Illinois territory (2) specified stations in western trunk-line territory, on one hand and points in central trunk line and New England territories, on the other and (3) specified stations in Missouri, and between such points, on one hand, and in central-eastern Illinois, and western trunk-line territories, on the other.

Grounds for relief: Short-line distance formula and circuity.

Tariffs: Supplement 4 to Agent Prueter's I. C. C. A-4106 and two other tariffs.

FSA No. 31182: *Sulphuric acid to St. Louis, Mo., area.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on sulphuric acid, tank-car loads, also spent sulphuric acid, tank-car loads from Baton Rouge, La., to St. Louis, Mo., E. St. Louis, Wood River and Roxana, Ill., and in the reverse direction on spent acid.

Grounds for relief: Barge-truck competition and circuity.

Tariffs: Supplement 96 to Agent Spaninger's I. C. C. 1357; Supplement 63 to Agent Raasch's I. C. C. 776.

FSA No. 31183: *Ammunition boxes—La Grange, Ga., to Joliet Arsenal, Ill.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on ammunition boxes, carloads from La Grange, Ga., to Joliet Arsenal (Area 2), Ill.

Grounds for relief: Circuitous routes.

Tariff: Supplement 162 to Agent Spaninger's I. C. C. 1351.

FSA No. 31184: *Asphalt filler—Chattsworth, Ga., to Follansbee, W. Va.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on asphalt filler, carloads from Chattsworth, Ga., to Follansbee, W. Va.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 162 to Agent Spaninger's I. C. C. 1351.

FSA No. 31185: *Agricultural implements and parts—Decatur, Ill., to Western Points.* Filed by W. J. Prueter, Agent, for interested rail carriers. Rates on agricultural implements and parts, and related articles, carloads from Decatur, Ill., to specified points in Colorado, Idaho, New Mexico, Oregon and Utah.

Grounds for relief: Rates made on defined formula basis and circuitous routes.

Tariff: Supplement 272 to Agent Prueter's I. C. C. A-3560.

FSA No. 31186: *Iron and steel borings—Twin Cities to Keokuk, Iowa.* Filed by W. J. Prueter, Agent, for interested rail carriers. Rates on iron or steel borings, filings, and scrap iron briquettes, carloads from Minneapolis, Minnesota Transfer, and St. Paul, Minn., to Keokuk, Iowa.

Grounds for relief: Barge competition and circuitous routes.

Tariff: Supplement 99 to Agent Prueter's I. C. C. A-3910.

FSA No. 31187: *Phosphate feed supplements from and to points in the South.* Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on phosphatic feed supplements, carloads from specified points in Alabama, Florida, Mississippi and Tennessee to specified points in southern territory, also to St. Louis, Mo., and Washington, D. C.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 17 to Agent Spaninger's I. C. C. 1434.

FSA No. 31188: *Sodium phosphates—New Jersey to Natchez, Miss.* Filed by St. Louis-San Francisco Railway Company for itself and interested rail carriers. Rates on phosphate of sodium, di-sodium phosphate and tri-sodium phosphate, straight or mixed carloads from Carteret and Grasselli, N. J., to Natchez, Miss.

Grounds for relief: Circuitous routes operating in part west of the Mississippi River.

FSA No. 31189: *Electrolytic manganese metal from Marietta, Ohio.* Filed by H. R. Hinsch, Agent, for interested rail carriers. Rates on electrolytic manganese metal, carloads from Marietta, Ohio to specified points in Illinois and central territories.

Grounds for relief: Competition and circuity.

By the Commission.

[SEAL] HAROLD D. McCOY,
Secretary.

VOLUME 20 NUMBER 203

Washington, Tuesday, October 18, 1955

TITLE 3—THE PRESIDENT

PROCLAMATION 3116

THANKSGIVING DAY, 1955

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

The custom of devoting one day each year to national thanksgiving is a wise and an ancient one, hallowed by observance in the days before we became a Nation, and sanctioned throughout the succeeding generations. It is therefore in keeping with our oldest traditions that at the fruitful season of the waning year we turn again to Almighty God in grateful acknowledgment of His manifold blessings.

At this time of thanksgiving, may we express our deep appreciation of those forebears who, more than three centuries ago, celebrated the first Thanksgiving Day. Through their industry and courage, our Nation was hewn from the virgin forest, and through their steadfastness and faith, the ideals of liberty and justice have become our cherished inheritance.

May we lift up our hearts in special prayers of gratitude for the abundance of our endowments, both material and spiritual, for the preservation of our way of life, in its richness and fullness, and for the religious faith which has wielded such a beneficent influence upon our destiny. May we show our thanks for our own bounty by remembrance of those less fortunate, and may the spirit of this Thanksgiving season move us to share with them to alleviate their need.

NOW, THEREFORE, I, DWIGHT D. EISENHOWER, President of the United States of America, having in mind the joint Congressional resolution of December 26, 1941, which designated the fourth Thursday of November in each year as Thanksgiving Day and made that day a legal holiday, do hereby proclaim Thursday, the twenty-fourth day of November, 1955, as a day of national thanksgiving; and I urge all our citizens to observe the day with reverence. Let us, on the appointed day, in our homes and our accustomed places of worship, each according to his own faith, bow before God and give him humble thanks.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this eleventh day of October in the year of our Lord nineteen hundred and [SEAL] fifty-five, and of the Independence of the United States of America the one hundred and eightieth.

DWIGHT D. EISENHOWER

By the President:

JOHN FOSTER DULLES,
Secretary of State.

LETTER OF OCTOBER 3, 1955

[PURSUANT TO PROCLAMATION CARRYING OUT PROTOCOL OF TERMS OF ACCESSION BY JAPAN TO THE GENERAL AGREEMENT ON TARIFFS AND TRADE AND FOR OTHER PURPOSES]

MEMORANDUM FOR THE SECRETARY OF THE TREASURY

Denver, Colorado, October 3, 1955.

Reference is made to my proclamation of July 22, 1955 [1] carrying out the Protocol of Terms of Accession by Japan to the General Agreement on Tariffs and Trade.

On September 5, 1955 Italy gave to the Executive Secretary to the Contracting Parties to the General Agreement the notification referred to in paragraph 3 of the Protocol for the accession of Japan, of intention to apply on October 5, 1955 concessions which it had negotiated initially with Japan. Accordingly, pursuant to the procedure described in Part I (b) (1) of the above-mentioned proclamation, I hereby notify you that both items 1531 in Part I of Schedule XX to the said Protocol shall not be withheld pursuant to paragraph 4 of the said Protocol on or after October 5, 1955.

DWIGHT D. EISENHOWER

AUTHORITY: §§ 51.620 to 51.658 issued under sec. 205, 60 Stat. 1090, as amended; 7 U. S. C. 1624.

GRADES

§ 51.620 *U. S. Fancy.* "U. S. Fancy" consists of grapefruit of similar varietal characteristics which are well colored, firm, well formed, mature, and of smooth texture, free from ammoniation, bird pecks, bruises, buckskin, cuts which are not healed, decay, growth cracks, scab, sprayburn, and free from injury caused by green spots or oil spots, pitting, scale, scars, thorn scratches, and free from damage caused by dirt or other foreign materials, dryness or mushy condition, sprouting, sunburn, disease, insects, or mechanical or other means.

(a) In this grade not more than one-tenth of the surface, in the aggregate, may be affected with discoloration. (See §§ 51.630 and 51.637.)

§ 51.621 *U. S. No. 1.* "U. S. No. 1" consists of grapefruit of similar varietal characteristics which are fairly well colored, firm, fairly well formed, mature, and of fairly smooth texture; free from bruises, cuts which are not healed, decay, growth cracks, sprayburn, and free from damage caused by ammoniation, bird pecks, buckskin, dirt or other foreign materials, dryness or mushy condition, green spots or oil spots, pitting, scab, scale, scars, sprouting, sunburn, thorn scratches, disease, insects, or mechanical or other means.

(a) In this grade not more than one-half of the surface, in the aggregate, may be affected with discoloration. (See §§ 51.631 and 51.637.)

§ 51.622 *U. S. No. 1 Bright.* The requirements for this grade are the same as for U. S. No. 1 except that no fruit may have more than one-tenth of its surface, in the aggregate, affected with discoloration. (See §§ 51.631 and 51.637.)

§ 51.623 *U. S. No. 1 Bronze.* The requirements for this grade are the same as for U. S. No. 1 except that more than 10 percent but not more than 75 percent, by count, of the fruits shall have in excess of one-half of their surface, in the aggregate, affected with discoloration: *Provided,* That when the predominating discoloration on each of 75 percent or more, by count, of the fruits is caused by rust mite, all fruits may have in excess of one-half of their surface affected with discoloration. (See §§ 51.632 and 51.637.)

§ 51.624 *U. S. Combination Grade.* Any lot of grapefruit may be designated "U. S. Combination" when not less than 40 percent, by count, of the fruits in each container meet the requirements of U. S. No. 1 grade and the remainder U. S. No. 2 grade. (See §§ 51.633 and 51.637.)

§ 51.625 *U. S. No. 2.* "U. S. No. 2" consists of grapefruit of similar varietal characteristics which are mature, fairly firm, not more than slightly misshapen or slightly rough, and which are free

from bruises, cuts which are not healed, decay, growth cracks, and are free from serious damage caused by ammoniation, bird pecks, buckskin, dirt or other foreign materials, dryness or mushy condition, green spots or oil spots, pitting, scab, scale, scars, sprayburn, sprouting, sunburn, thorn scratches, disease, insects, or mechanical or other means.

(a) Each grapefruit may be only slightly colored.

(b) In this grade not more than two-thirds of the surface, in the aggregate, may be affected with discoloration. (See §§ 51.634 and 51.637.)

§ 51.626 *U. S. No. 2 Russet.* The requirements for this grade are the same as for U. S. No. 2 except that more than 10 percent, by count, of the fruits shall have in excess of two-thirds of their surface, in the aggregate, affected with discoloration. (See §§ 51.635 and 51.637.)

§ 51.627 *U. S. No. 3.* "U. S. No. 3" consists of grapefruit of similar varietal characteristics which are mature, which may be misshapen, slightly spongy, rough but not seriously lumpy for the variety or seriously cracked, which are free from cuts which are not healed, and free from decay, and free from very serious damage caused by bruises, growth cracks, ammoniation, bird pecks, caked melanose, buckskin, dryness or mushy condition, pitting, scab, scale, sprayburn, sprouting, sunburn, thorn punctures, disease, insects, or mechanical or other means.

(a) The fruit may be poorly colored but not more than 25 percent of the surface of each fruit may be of a solid dark green color. (See §§ 51.636 and 51.637.)

UNCLASSIFIED

§ 51.628 *Unclassified.* "Unclassified" consists of grapefruit which has not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards, but is provided as a designation to show that no definite grade has been applied to the lot.

TOLERANCES

§ 51.629 *Tolerances.* In order to allow for variations incident to proper grading and handling in each of the foregoing grades, the tolerances set forth in §§ 51.630 to 51.636 are provided as specified.

§ 51.630 *U. S. Fancy Grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided,* That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.631 *U. S. No. 1 and U. S. No. 1 Bright Grades.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade other than for discoloration but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided,* That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may fail to meet the requirements relating to discoloration. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.632 *U. S. No. 1 Bronze Grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided,* That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce or to increase the percentage of fruits having in excess of one-half of their surface, in the aggregate, affected with discoloration which is required in the grade, but individual containers may vary not more than 10 percent from the percentage required: *Provided,* That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.633 *U. S. Combination Grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade other than for discoloration but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage other than that caused by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided,* That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may have more than the amount of discoloration specified. No part of any tolerance shall be allowed to reduce for the lot as a whole the percentage of U. S. No. 1 required in the combination, but individual containers may have not more than a total of 10 percent less than the percentage of U. S. No. 1 required or specified: *Provided,* That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.634 *U. S. No. 2 Grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade other than for discoloration but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage other than that caused by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided,* That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may fail to meet the requirements relating to discoloration. None of the foregoing tolerances shall apply to wormy fruit.
